PROCEEDINGS AND DEBATES OF THE 95th CONGRESS, SECOND SESSION

SENATE—*Wednesday, August 9, 1978*

(Legislative day of Wednesday, May 17, 1978)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by Hon. DENNIS DECONCINI, a Senator from the State of Arizona.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Let us heed the words of Ecclesiastes:

*To every thing there is a season, and a time to every purpose under the heaven * * * a time to keep silence, and a time to speak.*—Ecclesiastes 3: 1, 7.

Lord God, the strength of our lives, help us to live by the truth of Thy word, knowing when to speak and when not to speak. When we are moved to speak may it be with wisdom and courage. And give us the harder discipline of remaining silent when we have nothing to say and can profit more by creative silence. Show us that alike in speaking or in silence we may serve Thee. Thus, give us grace to move forward all useful legislation.

Take this Nation, its leaders, its legislators, its diplomats, its jurists, and all its public servants under the shelter of Thy fold that we go not astray.

In Thy holy name we pray. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., August 9, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable DENNIS DECONCINI, a Senator from the State of Arizona, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. DECONCINI thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR RECESS TODAY UNTIL 9 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 9 o'clock tomorrow morning.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR RECESS FRIDAY UNTIL 9 A.M. SATURDAY, AUGUST 12, 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business on Friday, it stand in recess until the hour of 9 o'clock on Saturday morning.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

BUDGET ACT WAIVER

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 997.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. The clerk will state it.

The assistant legislative clerk read as follows:

A resolution (S. Res. 531) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 11567.

There being no objection, the resolution (S. Res. 531) was considered and agreed to as follows:

S. RES. 531

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of H.R. 11567, a bill to amend the Securities Exchange Act of 1934 to authorize appropriations for the Securities and Exchange Commission for fiscal years 1979–1981, and for other purposes. Such waiver is necessary to permit consideration of H.R. 11567.

Compliance with section 402(a) was not possible by May 15, 1978, because of the press of business within the committee and within the Senate. Because of this schedule, the committee was unable to hold hearings until May 18, 1978. The hearing record was not closed until earlier this month at which time the committee resumed its consideration of the bill.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I have no further need for my time. I yield it back.

The ACTING PRESIDENT pro tempore. The Senator from Tennessee is recognized.

THE STORY OF WILLIAM GARRAWAY BROWNLOW

Mr. BAKER. Mr. President, I call the attention of my colleagues to the publication of a book about a colorful and controversial Tennessee newspaperman of the Civil War era. The title of the book is, "That D - - - - d Brownlow." It is the story of William Gannaway Brownlow and his newspaper, the Knoxville, Tennessee, Whig. He was also known as "The Fighting Parson."

Parson Brownlow served as Governor of Tennessee and served in the U.S. Senate, but the "D - - - - d" in the title does not stand for "distinguished." Instead, it reflects the reputation of the subject for being "mean, ruthless, vindictive and vitriolic"—and that was what his friends said about him.

Steve Humphrey, former associate editor of the Knoxville Journal, a descendent of the Whig, has thoroughly researched the life of Parson Brownlow and the history of the newspaper. He has put together a fascinating, readable and informative picture of Brownlow as Methodist preacher, newspaperman and human being.

I think the story of the fighting parson and his decidely one-sided newspaper is a delightful look back into history. Any readers who think our modern

press is too big, or too powerful or too influential will be amazed to read about the vigorous press of that day, differences of opinion were occasionally settled with duels or physical assaults upon the person.

My friend Steve Humphrey, who enjoyed a long and distinguished career before his retirement in 1969, without quite the fireworks of his predecessor, has made a major contribution with this book.

I congratulate him on his achievement and commend the book to a wider audience than my own State.

I also congratulate the publisher, Appalachian Consortium Press, of Boone, N.C., for bringing together these two Tennessee newspapermen.

Mr. President, I have no need for my time under the standing order. I yield it back.

DEPARTMENT OF THE INTERIOR APPROPRIATIONS, 1979

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of H.R. 12932, which the clerk will state by title.

The assistant legislative clerk read as follows:

A bill (H.R. 12932) making appropriations for the Department of the Interior and related agencies for fiscal year September 30, 1979, and for other purposes.

The Senate resumed consideration of the bill.

The ACTING PRESIDENT pro tempore. The pending question is on agreeing to the amendment of the Senator from Louisiana.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business, not to extend beyond 30 minutes, with statements therein limited to 5 minutes each.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETING

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Public Lands and Resources Subcommittee of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate today to hold a hearing on S. 2475 and H.R. 10587, legislation to improve the range conditions of the public grazing lands.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

NATIONAL INSTITUTES OF HEALTH CARE RESEARCH ACT OF 1978

Mr. ROBERT C. BYRD. Mr. President, what is the time agreement on S. 2466, the measure against which there is a motion entered to reconsider?

The ACTING PRESIDENT pro tempore. On the bill, S. 2466, debate on any amendment in the first degree is limited to 1 hour, debate on any amendment in the second degree is limited to 30 minutes, debate on any debatable motion, appeal, or point of order is limited to 20 minutes, in each case equally divided in accordance with the usual form.

Mr. ROBERT C. BYRD. How much time on the bill itself?

The ACTING PRESIDENT pro tempore. Time on the bill was limited to 2 hours.

Mr. ROBERT C. BYRD. Two hours.

Mr. President, if the motion to reconsider carries, the time agreement on that bill again obtains, does it not?

The ACTING PRESIDENT pro tempore. The Senator is correct.

Mr. ROBERT C. BYRD. How much time would remain on that bill in that event?

The ACTING PRESIDENT pro tempore. In order for the bill to have reached third reading and final passage, the time on the bill itself would have had to be yielded back.

Mr. ROBERT C. BYRD. That is not my question.

How much of the 2 hours originally on the bill was utilized?

The ACTING PRESIDENT pro tempore. The Chair is advised it will have to check the records and advise the Senator from West Virginia.

Mr. ROBERT C. BYRD. I think the Chair need not do that. I express my appreciation to the Chair.

UNANIMOUS-CONSENT AGREEMENT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that upon the disposition of the Interior appropriation bill today, in whatever form that disposition may take, including taking the bill down, the Senate then proceed to the reconsideration of S. 2466; that upon the disposition of that measure the Senate proceed to the consideration of the Agriculture appropriation bill; that upon the disposition of that bill the Senate proceed to the consideration of Calendar Order No. 991, resolution disapproving the proposed deferral of budget authority for the Garrison diversion unit, Bureau of Reclamation, Department of the Interior; that upon the disposition of that measure the Senate proceed to the consideration of the public works appropriation bill, without prejudice to the order that has already been entered authorizing the majority leader to proceed to the consideration of the agriculture bill at any time.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. BAKER. Mr. President, reserving the right to object, I wonder if the majority leader would consider describing with a little greater certainty when we might have the public works appropriation bill before us.

I had hoped he might include in that request some sort of specificity on time.

Mr. ROBERT C. BYRD. I can give the minority leader assurance that the bill would not be called up today.

Mr. BAKER. And today is Wednesday, so would the majority leader be willing to include in the order that it would not be before the Senate before Thursday?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. I thank the majority leader.

The ACTING PRESIDENT pro tempore. Is there objection?

Without objection, it is so ordered.

Mr. HANSEN. Would the majority leader yield for a question?

Mr. ROBERT C. BYRD. Yes.

Mr. HANSEN. The Senator from Wyoming is not certain that he understands clearly what the situation is now, when we go back to the Interior appropriations bill.

Am I correct in assuming that the Johnston amendment, as originally submitted, will be before the Senate?

Mr. ROBERT C. BYRD. The Senator is correct.

Mr. HANSEN. And the Senator from Louisiana would have the right, I assume, to modify that amendment as he chooses.

Mr. ROBERT C. BYRD. There is no time limit on the amendment, and no action has been taken on the amendment, so he would have the right to modify.

I ask the Chair if I am correct. No action having been taken on the Johnston amendment, he therefore would have the right to modify it.

The ACTING PRESIDENT pro tempore. The Senator is correct.

Mr. ROBERT C. BYRD. I want to be sure I am correct in saying that no action has been taken on the amendment.

The ACTING PRESIDENT pro tempore. The Senator is correct.

Mr. HANSEN. I thank the distinguished majority leader.

Mr. ROBERT C. BYRD. I thank the distinguished Senator from Wyoming.

I yield the floor, Mr. President.

UNIVERSAL CONSENSUS ON CERTAIN HUMAN RIGHTS ARGUES FOR RATIFICATION OF THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, last week, my distinguished colleague from Arizona, Mr. GOLDWATER, spoke with concern about the selective application of human rights and the contradictions that may arise as a result of such discrimination.

Of primary interest to the Senator were the basic ideals that underlie our support for human rights. Citing an article by Foreign Affairs Association director Cas de Villiers, he was distressed that this Nation has failed to apply human rights standards uniformly and neutrally, regardless of the nature of various regimes or the size of their armaments.

Much of the blame for this state of affairs, claims Mr. GOLDWATER, lies with President Carter, whose advocacy of human rights has sometimes seemed selective and arbitrary.

Part of the problem, however, may stem from the fundamental question of what exactly constitutes "human rights." As Mr. de Villiers notes in his article placed by Mr. GOLDWATER in the RECORD:

> Different cultures and political systems have produced different perceptions which have precluded any universally acceptable definition of human rights, in spite of Articles 55 and 56 of the United Nations Charter and the lengthy list of definitions included in the Universal Declaration on Human Rights which was adopted without dissent in 1948.

According to Mr. de Villiers, the upshot of this lack of consensus on the precise definition of human rights has been general confusion. He writes:

> Thus, from the earliest days of the United Nations, representatives found themselves using the same words—freedom, justice, rights, and dignity—but sharply disagreeing on their meaning.

Mr. President, Mr. de Villiers' essay challenges whether we are really invoking human rights, or whether we are merely dressing up arbitrary political standards in the guise of human rights.

But this consideration should not deter our efforts to support aggressively those individual human rights on which there is indeed universal consensus.

On such right, Mr. President, is the most sacred of all. It is the right to live.

Enunciated in the same Universal Declaration on Human Rights to which Mr. de Villiers refers in his article, the right to live is protected by the United Nations Genocide Convention, which defines and punishes genocide as a crime under international law.

Eighty-three nations have endorsed this treaty since 1948, but amazingly, the United States has not done so. Of course, that is entirely up to this body, the U.S. Senate. Every President since President Truman has urged us to do so. Needless to say, our failure to ratify this important document represents a glaring inconsistency in itself.

How can we constantly speak out for human rights when we have not yet pledged ourselves to safeguard the most precious of those rights?

It is true that we have suffered some setbacks in our human rights campaign. We have made some mistakes. In the future, we must work harder to insure that we apply our human rights standards in an equitable and consistent manner.

But let us not question the universality of certain human rights. Let us not, above all, be timid about defending the right to live. Let us ratify the Genocide Convention.

PRIVATE ENTERPRISE

Mr. STEVENS. Mr. President, we who work in government have long realized that government alone cannot address the enormously complex and seemingly endless problems faced by people in this Nation today. We have had to depend on a strong private and voluntary sector working in partnership with government to seek solutions to these problems. It is this unique feature of the American character that has helped to make our country strong and compassionate.

Recently, I had occasion to read a speech which my distinguished colleague from Pennsylvania, Senator HEINZ, delivered at the groundbreaking ceremony of the new Allegheny General Hospital in Pittsburgh. Senator HEINZ has captured the essence of the importance of business and the voluntary sectors to the success of our Nation, and I believe his message is so significant as to merit sharing with the other Members of this body. Mr. President, I ask unanimous consent that the full text of Senator HEINZ' remarks be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

REMARKS OF H. JOHN HEINZ III

This is an audience dedicated to health care and people's needs. And we, in this audience, are all aware of the need for attention to many major health care problems facing our Nation:

Catastrophically high medical bills.

The lack of universal and comprehensive health insurance coverage.

The minimal amount of consumer health awareness and education.

The need to provide quality training and education, for example, in the principles of nutrition—and I might add not just education of general public, but also nutrition education for doctors, nurse practitioners and others in the health care profession.

The lack of viable alternatives to institutionalization and the urgency for improvement in delivery of health care services for our elderly. One point you deserve special commendation for: I note that your new Center for the Aging is in the formative stages and well on the way to providing the research and investigation necessary for a better understanding of the health problems of older people.

I am aware that there are many Americans who say that these and other health services in the United States will only be improved and extended by the Federal Government alone—and with that point of view, I totally disagree. The PHASE II construction of this hospital will cost $104.3 million, and not one cent of it is Federal funding. Through bonds, contributions from the medical staff, the hospital employees, the women's auxiliary, and the generous outpouring of business and private donations, you have demonstrated that Americans, without Government handouts, are willing to invest freely and wisely, building for the future.

And so I would like to speak briefly today about the need to encourage a strong private enterprise and voluntary sector in America. For not only are these traditions of private giving for public purposes as old as America herself, they are the very foundations on which our country is built. And I am deeply concerned that we may be travelling in the direction of so weakening our private and voluntary sectors, that when we arrive at our destination there will be only Government resources and regulations on which to rely.

One issue the American people are forcing the country to confront is the issue raised most dramatically by Proposition 13 in California: at what point do taxes, that share of the Nation's wealth going to government-determined uses. become so burdensome as to undercut the very strengths of incentive, individual initiative, risk-taking, and involvement in the self-help and voluntarily undertaken community activities that have given our country its uniqueness and greatness. I believe it is high time that every level of government address this issue.

Speaking as a member of the Senate Buget Committee, I can assure you that on Capitol Hill—both in the old days of the Bureau of the Budget and most recently with the relatively new Congressional Budget Office—the traditional budget process has followed this pattern: first, set the level of outlays desirable or necessary to meet social and other needs; then, after that, finance them. The most obvious consequence of this dubious policy has been the enormous deficits that we have accumulated over the years. All this has raised our national debt from $500 billion four years ago to $750 billion or over $3,500 for every man, woman and child in America today.

I submit that a better approach to budget making would be to ask ourselves what is the affordable limit of the revenues which we give to government, and then to adjust our federal priorities accordingly.

Consider the following: next year FY 79, federal revenues will be approximately $440 billion. By FY 83, according to the Congressional Budget Organization, and including the enactment of a one shot tax cut next year, these revenues are expected to jump to $729 billion—a whopping 63% increase. Even adjusting these figures to account for the 5½% inflation factor built in to these projections, this means there will be an increase in taxes in real terms of well over one third, 36 percent in fact, within five short years.

This is why there is growing and legitimate interest in significant tax rate cuts, why so many of us in the Congress have cosponsored the Roth-Kemp tax proposal, or similar measures; and why, when asked to respond to the statement, "I have reached the breaking point on taxes", an amazing 72 percent of the American people agreed.

A related issue is the concern over the disappointingly low level of investment in research development in business formation, including venture capital, and in overall investment for plant modernization, expansion and elimination of bottlenecks. Among other things, the Steiger Capital Gains Amendment seeks to address these problems.

I agree with the principle that, generally speaking, when you tax something, you get less of it; if you subsidize something, you get more of it. In our country, we tax work and growth, investment and employment, savings and productivity. We subsidize nonwork and consumption, welfare and debt. Is it any great wonder, then, that our annual increases in productivity—less than 2%—are not only the lowest of, but far below, any industrialized nation in the world.

A rational tax policy must, therefore, also encourage and facilitate the growth of business capital, retained earnings and investment to achieve greater productivity and real growth. Which means more real jobs, and in the long run more real revenues to the government.

The strong sentiment for tax reduction, for Roth-Kemp, for Steiger, reflects the public's recognition of these fundamental problems and basic truths. In my judgment, the Congress will take these sentiments of the American people to heart this year and enact tax cut legislation that will effectively address these concerns.

In sum, if we are to make any progress in helping people who need help—if we are to build a better health care system—if we are to reform our welfare system—if we are to develop a more effective urban strategy—we will only be successful if our country is successful and if the people who pay the taxes, the wage earners and businesses, large

and small, have the incentive to work and produce.

I am equally concerned today about the quiet but constant erosion of another irreplaceable national resource, our tradition of volunteerism and its institutions.

One of the great distinguishing characteristics of the American people has been their willingness to come together voluntarily, in a spirit of caring and sharing, to do those things which they see must be done. It has given us libraries, art collections, historical societies and, yes, even $104 million hospitals. This voluntary spirit is as old as our nation. Today I fear it is in grave danger of being trampled and swept away.

Most Americans take our voluntary institutions and the good they do, for granted. But the fact is that the lifeblood of volunteerism, charitable contributions by individual Americans, is being drained away. If we look at the period of 1973–1975, we will see that 3½ million fewer taxpayers in our country chose to report making any charitable contributions. Nominally, charitable contributions appeared to rise during this same period by $1.6 billion, from $13.8 billion to $15.4 billion. In fact, however, inflation virtually turned this apparent gain into a nearly equal loss. In 1973 dollars, the $15.4 billion of 1975 was worth only $12.7 billion, or an actual loss in spending power of $1.1 billion compared to 1973. There is no evidence that this trend of shrinking support and involvement has in any way lessened.

This is why I introduced, in the fall of 1974, legislation to provide a 50-percent tax credit for religious and charitable contributions, and why Senators Packwood and Moynihan have introduced legislation to allow such contribution as an itemized dedution for all taxpayers—even if they take the standard deduction.

It may not be possible today to go as far toward relieving this hardship on the voluntary sector as I wanted to back in 1974. But at the very least, we must ensure that Middle Income Americans have an incentive to contribute to voluntary and charitable organizations if we expect to stimulate, not stifle, the interest of people in solving the problems of their neighborhoods, communities, or cities. I believe the American people can more often find better solutions than many of those we in government find in distant Harrisburg or Washington.

Where people have helped themselves, where innovation has been local in origin, as so much has been here in Pittsburgh with Station Square and the Mexican War Streets, with the Old Post Office Museum and Gateway Center, and now with this magnificent new wing of Allegheny General Hospital, all accomplished through private and voluntary efforts, we have seen the success of Americans as private citizens with a public interest. For people can reach where government cannot; people can do what government cannot; and people can bring to a task the heart and sensitivity that government cannot. This is not an argument against government and the responsibilities it must meet; it is, however, an argument for the realization that the problems of people are too important to be left to government alone.

Thank you for this opportunity to share these thoughts with you on this proud occasion.

THE CALENDAR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of calendar order Nos. 980 and 991.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

SECURITIES EXCHANGE ACT AMENDMENTS

The Senate proceeded to consider the bill (H.R. 11567) to amend the Securities Exchange Act of 1934 to authorize appropriations for the Securities and Exchange Commission for fiscal years 1979–1981, and for other purposes, which had been reported from the Committee on Banking, Housing, and Urban Affairs with an amendment to strike all after the enacting clause and insert the following:

That section 35 of the Securities Exchange Act of 1934 (15 U.S.C. 78kk) is amended—

(1) by striking out "and" after "September 30, 1977," in the first sentence;

(2) by inserting before the period at the end of the first sentence a comma and the following: "$69,000,000 for the fiscal year ending September 30, 1979, and $79,000,000 for the fiscal year ending September 30, 1980"; and

(3) by striking out "fiscal year 1978" in the last sentence and inserting in lieu thereof "fiscal year 1980".

SEC. 2. Section 3(b) of the Securities Act of 1933 (15 U.S.C. 77c(b)) is amended by striking out "$1,500,000" and inserting in lieu thereof "$2,500,000".

● Mr. WILLIAMS. Mr. President, H.R. 11567 would provide authorizations for the Securities and Exchange Commission for fiscal years 1979–80. In addition, the bill would amend section 3(b) of the Securities Act of 1933 to increase the maximum aggregate amount of securities which can be issued pursuant to the exemption provided by that section to $2.5 million. This provision is designed to assist small businesses in raising and attracting investment capital at reasonable costs and with a minimum of red tape.

Mr. President, the Securities and Exchange Commission originally requested a 3-year budget authorization for fiscal years 1979–81. The amounts requested were $70 million, $80 million, and $91 million, respectively. The bill before us provides for a 2-year authorization, slightly below the Commission's requested levels.

As the committee report makes clear, the SE deserves these increased authorization levels. In addition to its traditional mandate, in recent years the Congress has passed laws imposing new and significant responsibilities upon the agency. The Securities Act Amendments of 1975 augmented the responsibilities and the powers of the SEC to facilitate a a national market system and a nationwide system for the efficient and economical clearance and settlement of securities transactions.

More recently, the Foreign Corrupt Practices Act, passed late last year, recognizes the Commission's role in ferreting out and prosecuting improper conduct by American companies in bribing foreign officials and confers upon the Commission significant new enforcement and regulatory duties. In still other areas, the Commission must come to grips with the serious issues it has identified in the organized trading of put and call options. And these are only a few illustrations of the enormous and expanding workload of the SEC.

I should point out to my colleagues that the bill contains provisions which were already passed by the Senate and partially enacted into law as part of Public Law 95–283. In the Senate bill which eventually became law, the committee proposed to increase the regulation A offering under the Securities Act to $2.5 million from $500,000. Unfortunately, the dollar amount was raised only to $1.5 million because of some opposition in the House.

While this is still an improvement, I continue to feel very strongly that the Senate should once again insist on its original position. Small businesses are in full support of this amendment, as is the SEC. By approving this high ceiling, we can build flexibility into the law to allow the SEC to use its discretionary authority to adjust the level of the small business offering exemption periodically based upon experience with inflation and the actual costs of raising capital.

This is far better, it seems to me, than permitting small businessmen to be victimized by the increased cost of doing business and raising capital until the Congress can act again. The history of the small business exemption is that Congress always reacts long after the fact. This has happened four times since 1933. We can avoid this, and remove some of the difficulties small businesses have experienced, by building a cushion into the law and allowing the SEC—the agency charged by the Congress with protecting public investors—to raise or lower the threshold as circumstances warrant.

Mr. President, the committee is unanimously in favor of this bill. I urge my colleagues to approve H.R. 11567.●

● Mr. TOWER. Mr. President, I am pleased to support H.R. 11567 as reported by the Senate Banking Committee. The bill would authorize appropriations for the Securities and Exchange Commission for fiscal years 1979 and 1980 in amounts of $69 and $79 million, respectively. In addition, it would amend section 3(b) of the Securities Act of 1933 to increase the amount which may be sold in small offerings under that section from $1.5 to $2.5 million.

The authorization levels in the bill reflect the growing responsibilities of the SEC partially as a result of the Securities Acts Amendments of 1975. The Commission's role in implementing those amendments will require it to devote increasing time and effort to its responsibilities, particularly with respect to the development of the national market system.

The committee decided to approve a 2-year authorization for the SEC, in order to enable it to plan for and anticipate funding levels through fiscal year 1980. The committee's willingness to do so was based in large measure upon the effort which the Commission devoted in preparing and submitting a budget authorization request and a budget estimate which explained in detail the priorities of the Commission.

I am particularly pleased that the committee has approved the increase in the ceiling for small offerings. This increase is an important recommendation made in "The Study of Small Business" of the Small Business Administration, a study completed in June 1977. The study grew out of legislation that I introduced

in 1975 to authorize a major study of small business in America.

The principal "small offering" vehicle utilized is that provided by regulation A, the standard form established by the Securities and Exchange Commission. Regulation A is presently subject to a ceiling of $500,000; offerings of a larger amount must go through the process of full registration under the Securities Act. In recent years, partially because of this low ceiling, the use of regulation A has diminished almost to the point of extinction. In 1972, for example, 650 offerings were sold through the regulation A exemption, with total proceeds of approximately $256 million. By 1977, the number of offerings had declined to 124, and only $46 million was raised.

Demand for outside financing by businesses generally has increased greatly in the past few years, while at the same time the supply of capital for equity financing has diminished dramatically. In 1969, 1972 new equity issues were brought into the securities markets; in 1977, there were only 244 such issues. Companies with a net worth of less than $5 million sold $48 new equity issues in 1969, and derived almost $1.5 billion from the offerings. In 1975, however, only 4 new equity issues were offered, yielding about $16 million.

Companies using the regulation A exemption are generally small businesses, and the costs of having to go through the full registration process with the SEC are simply too high in many cases. In short, it is fair to say that many small businesses unable to raise funds through regulation A are effectively foreclosed from access to the public securities markets.

At the same time, these same companies may be unable to take advantage of the private placement and venture capital markets. I understand that small offerings in these markets are becoming more and more rare for a variety of reasons, including the tendency toward greater institutional dominance of securities investing, pressures leading to greater reliance upon debt financing rather than equity financing, and the decline in the number of strong small and regional brokerage firms which are often most attuned to the needs of small businesses.

These factors acting together have had a substantial adverse effect upon the abilities of small businesses to raise equity capital. That fact alone is disturbing; however, when considered in light of the contributions made to the economy by small businesses, including improved technology and growth in employment and competition, the implications of such a trend become even more alarming.

While increase in the statutory ceiling of the "small offering" exemption alone is not going to solve the capital formation problems of small businesses, it does represent a significant step in the direction of relief for some small businesses.

Coupled with other steps, such as enactment of a meaningful reduction in capital gains taxation rates and other needed steps to increase the potential rewards available to investors willing to take risks, this increase can address forcefully and directly some of the needs of small businesses.●

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1057), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

BACKGROUND AND NEED FOR THE LEGISLATION

Section 1 of the bill would amend section 35 of the Securities Exchange Act of 1934 (the Exchange Act) to provide the Commission with authorizations of $69 million in fiscal year 1979 and $79 million in fiscal year 1980.

Prior to 1975, appropriations for the Securities and Exchange Commission were based on open-ended budget authorizations contained in the Exchange Act. The specific sum was determined by the size of the Commission's annual appropriation. However, the Securities Acts Amendments of 1975 amended the Exchange Act to authorize a specific level of appropriations for the SEC in fiscal years 1976 and 1977 and required additional authorizations in subsequent years.

For fiscal year 1978, the Commission submitted legislation to the Congress providing for a multiyear budget authorization of $64 million in fiscal year 1978, $70 million in fiscal year 1979, and $75 million in fiscal year 1980. Because of its concern over the quality and quantity of information provided by the SEC in justification of its requested authorization levels, the committee approved only a single year authorization. The following passage from the committee report captures the committee's dissatisfaction with and recommendations for the Commission's future budget presentations (S. Rept. 95–182):

"Based upon this experience, the committee encourages and expects the Commission to upgrade the quality and informational content of its budget submissions in the future. If the committee is to exercise its substantive oversight functions and set authorization limits for this important agency of Government, it must receive better and more detailed information from the Commission. In the same vein, the Commission should prepare its budget submission and estimate its financial requirements in coordination with its planned priorities and projected needs. Such planning will result in maximum advantage to the Commission in terms of both charting its future course and using its resources most efficiently and effectively.

The committee is generally pleased that the Commission has responded for this and future fiscal years by vastly improving the informational and analytical content of the documents it submitted to the Congress concerning its budget requirements and future plans. According to the testimony of SEC Chairman Williams, the SEC engaged in comprehensive and detailed budget planning. The Commission produced for the appropriate committees of the Congress two informative and useful documents—a budget authorization request and a budget estimate. For the first time, the Commission prepared information which both provides and permits detailed analysis of every aspect of the Commission's activities and resource requirements. By setting out its program goals and long range objectives, the Commission has greatly assisted the committee. At the same time, the committee believes the Commission has benefited significantly from the exercise in terms of being better able to chart its own future course and apply its resources to maximum advantage and efficiency.

The SEC has once again requested a multiyear authorization. But unlike previous requests to which the committee was not receptive, this year the SEC has made a strong and well-documented case. In addition, the SEC pointed out that its single year authorization makes it somewhat unique among the independent regulatory agencies. There are 10: six are presently funded on the basis of standing budget authorization—the Civil Aeronautics Board, Federal Communications Commission, Federal Maritime Commission, Federal Power Commission, Federal Trade Commission, and Interstate Commerce Commission. Of the four remaining agencies with definite or fixed budget authorizations, only the Securities and Exchange Commission and the Nuclear Regulatory Commission are authorized appropriations on a single-year basis. The other two agencies, the Commodity Futures Trading Commission and the Consumer Product Safety Commission, have been granted budget authority for a 3-year period. The committee is aware of no reason to single out the SEC for annual authorizations which can be time-consuming for both the committee and the Commission.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read:

A bill to amend the Securities Exchange Act of 1934 to authorize appropriations for the Securities and Exchange Commission for fiscal years 1979 and 1980, and for other purposes.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. HANSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DISAPPROVAL OF DEFERRAL OF BUDGET AUTHORITY FOR THE GARRISON DIVERSION UNIT, BUREAU OF RECLAMATION

The resolution (S. Res. 525) disapproving the proposed deferral of budget authority for the Garrison diversion unit, Bureau of Reclamation, Department of the Interior, was considered and agreed to, as follows:

Resolved, That the Senate disapproves the proposed deferral of budget authority (deferral numbered D78–63) for the Garrison diversion unit, Pick-Sloan Missouri Basin program, Bureau of Reclamation, Department of the Interior, as set forth in the message of May 12, 1978, which was transmitted to the Congress by the President under section 1013 of the Impoundment Control Act of 1974.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. YOUNG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. YOUNG. Mr. President, on behalf of my colleague, Senator BURDICK, and myself, I ask unanimous consent to have printed in the RECORD a copy of the committee report on the resolution of disapproval. This report gives the reason why the administration was opposed to it and the committee response for approval. I ask unanimous consent on behalf of both of us that the report be printed.

Approval of this resolution will require the administration to continue construction on a project North Dakota has been seeking since statehood, one on which the Federal Government has al-

ready spent $170 million. The Interior Department estimates that if the project were discontinued, it would cost an additional $93 million to restore the environment of North Dakota to what it was before the features of Garrison diversion built thus far had been built.

Mr. President, with the addition of the language to the report relating to consultations with Canada, our State Department has advised me that it no longer objects to the resolution.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-1068), explaining the purposes of the measure.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

PRESIDENTIAL RATIONALE FOR PROPOSED DEFERRAL

The amount deferred was provided in an appropriation of $18,660,000 in the Public Works for Water and Power Development and Energy Research Appropriation Act, 1978 (Public Law 95-96). These funds are for continued construction of facilities of the Garrison Diversion Unit project in North Dakota. Funds are being deferred pending the completion and evaluation of project studies which have been necessitated for the following reasons:

(1) Department of State assurances to the Canadian Government that construction of project features which may be in violation of the Boundary Waters Treaty of 1909 would not begin until after a report on the project by the International Joint Commission (IJC) was received by the two Governments and subsequent consultations were held. The IJC report was completed in September 1977 and consultations are being arranged, but have not taken place.

(2) In May of 1977, the Secretary of the Interior and the Audubon Society entered into an agreement, in connection with Civil Action No. 76-0943 brought by the Audubon Society against the Secretary of the Interior, to cease activity on the project pending the completion of a supplementary environmental impact statement and reconsideration of the project by the Congress. The court approved the agreement (stipulation and order) and the deferral will remain in effect until these and environmental problems are resolved.

COMMITTEE RECOMMENDATION

The Committee recommends that the proposed deferral be overturned.

In approving Senate Resolution 525, its sponsors and the Committee agree that construction of the Garrison Diversion Unit should only be on that part of the project where the return flows are to the Missouri River and Tributaries Basin. This would be in accord with the findings of the International Joint Commission as contained in its Report entitled "Transboundary Implications of the Garrison Diversion Unit," which has been filed with both the Canadian and United States Governments. One of its recommendations was:

". . . the Commission further believe all the outlet works from the reservoirs should be relocated so they discharge only into the Missouri River Basin. Moreover, to prevent inadvertent transfers of biota, fishing in Lonetree Reservoir should be forbidden. These actions would reduce the likelihood of the introduction of foreign biota into the waters of the Hudson Bay Drainage Basin.

"The Commission concludes that Lonetree Reservoir and its dams could be constructed without an unacceptable risk to Canada if all outlet works from the reservoir are located so as to discharge only into the Missouri River Basin and if fishing in the reservoir is forbidden."

Thus, proceeding with construction of this project would be in compliance with the recommendations of the International Joint Commission.

The Committee intends that none of the funds mandated for expenditure by this resolution should be expended in ways inconsistent with the obligations and undertakings of the United States Government to Canada. The Committee understands that the United States has undertaken to consult with the Government of Canada on the potential transboundary impacts of the project before certain aspects of the project potentially affecting Canada are initiated. It is the sense of this Committee that those consultations should be completed not later than the end of calendar year 1979 in order that this important project may not be unduly delayed.

The proposal of irrigating land in eastern North Dakota with water from the Missouri River was first brought to the attention of Congress in 1889, and since 1938 there have been continuous appropriations to pursue this purpose. Beginning with the construction of Garrison Dam, which was authorized in 1944, the people of North Dakota finally believed that their dream would come true.

Approximately 466,000 acres of rich, agricultural bottom lands were taken by the United States to construct and operate the Garrison Dam and Reservoir. An additional 100,000 acres were given up by the people of North Dakota to the Oahe Dam and Reservoir. This total and final sacrifice of these land resources was made to provide the flood control, navigation, hydroelectric power, and dependable water supplies for downstream and other needs as they are served by these reservoirs. The downstream benefits have been enjoyed for more than 20 years. In return, the people of North Dakota were promised diversion of Missouri River water into eastern North Dakota.

The project was first authorized with one million acres proposed for irrigation by the Pick-Sloan Missouri Basin Plan in the Flood Control Act of 1944, and reauthorized in 1965 (the present authorization) with 250,000 acres authorized for irrigation. And while the primary project purpose has been irrigated, the committee notes the compelling need now for municipal an industrial water also. Over 32 cities, towns, and communities have requested water from the project. The project has been under construction for 10 years and Federal expenditures now exceed $170 million.

If the project were to be discontinued or abandoned, the Department of Interior estimates it would require approximately $93 million in additional funds to restore the environment of the State of North Dakota to the condition which existed prior to the construction of the features of Garrison Diversion which have been built to date. In recommending the appropriation of $18,660,000 for the Garrison Project for fiscal year 1978, the Committee carefully reviewed the President's revised budget request of $15,260,000 and determined that the proposed revisions were not warranted. The Committee was at that time fully aware of the extensive litigation which had taken place on the Garrison Diversion Project, including the decision by the U.S. Court of Appeals for the Eighth Circuit Court affirming the decision of the Federal District Court in Bismarck, N. Dak., that the Environmental Impact Statement on the Garrison Diversion Unit had been prepared in good faith and had complied with the National Environmental Policy Act. The Committee was also fully aware of pending litigation in the Federal District Court in the District of Columbia, which litigation is still pending.

In the course of hearings on the fiscal 1979 Public Works for Water and Power Development and Energy Research Appropriations bill, the Committee has developed a voluminous file and record on this project. The Committee believes that construction of the project should go forward. As has previously been stated, the sponsors of this resolution and the Committee agree that these funds could only be spent on that part of the Garrison Diversion Unit where the return flows were only to the Missouri River and Tributaries Basin and in ways which are consistent with the obligations and undertakings of the United States Government to Canada. Thus, any construction would be in compliance with the recommendations of the International Joint Commission.

VIEWS OF THE COMMITTEE ON THE BUDGET

On Senate Resolution 525, a deferral resolution disapproving a proposed deferral of $17.7 million in budget authority for the Garrison diversion unit project in North Dakota.

The Senate Committee on the Budget, to which was referred Senate Resolution 525, disapproving the proposed deferral of budget authority numbered D78-63, as set forth in the President's special message transmitted to the Congress under section 1013 of the Impoundment Control Act of 1974, having considered the same, reports as follows:

The matter contained in Senate Resolution 525 does not appear to have significant macroeconomic effects, nor does it significantly affect budget priorities or aggregate spending levels. The Committee therefore has no recommendation on this resolution.

Mr. ROBERT C. BYRD. Mr. President, on July 25, Senate Resolution 525 was introduced by the distinguished Senators from North Dakota, Mr. YOUNG and Mr. BURDICK, and referred to the Appropriations Committee. On August 7, the Appropriations Committee, having obtained the views of the Budget Committee, reported favorably on the resolution. The views of the Budget Committee were in concurrence with this recommendation.

The resolution offered by Senators YOUNG and BURDICK disapproved the proposed deferral of $17.7 million in budget authority for the Garrison Diversion Project in North Dakota. Pursuant to title X of the Impoundment Control Act of 1974, the President, on May 12, transmitted to the Congress a proposal that the expenditure of these funds, previously appropriated for the Bureau of Reclamation within the Department of Interior, be deferred.

Mr. President, on November 2, 1889, North Dakota joined the Union. During the past 89 years, that State has sent great representatives to Washington—among them, Senator YOUNG, who has served North Dakota in the Senate since 1945, and Senator BURDICK, who has worked for North Dakota in the Senate since 1960.

Since 1889, the leaders and the people of North Dakota have come before the Congress to express the need to divert the waters of the Missouri River to the eastern portions of their State. Over the years, much attention and study has been devoted to the project. Since 1938, Federal funds have been appropriated to pursue this purpose. In 1944, the Pick-Sloan Missouri Basin plan of the Flood Control Act authorized the Garrison Diversion Irrigation Project. The project was reauthorized in 1965. It has been under construction for 10 years and Federal expenditures now exceed $170 million.

All but two of the project's major features have been completed. One of these

is the 76-mile-long major supply canal, which is near completion. The other is the Snake Creek Pumping Station which would pump water from Garrison Reservoir to a higher elevation in order to permit gravity flow of water to the Lonetree Reservoir. Land for the Lonetree Reservoir has already been acquired, and some construction has begun.

In his message to the Congress concerning the proposed deferral of certain budget authority for the Garrison unit project, the President pointed out that construction of certain features—such as the Lonetree Reservoir—could possibly be in violation of the Boundary Waters Treaty of 1909 between the United States and Canada. The sponsors of Senate Resolution 525, Senators BURDICK and YOUNG, worked with the members of the Appropriations Committee and fashioned an agreement to provide that construction of the Garrison diversion unit should only be on that part of the project where the return flows are to the Missouri River and tributaries basin. This agreement, as explained in the Appropriations Committee report on the resolution, is in accord with the findings of the International Joint Commission. The Appropriations Committee stated its clear intention that work should proceed in a manner consistent with the treaty obligations of the U.S. Government and Canada. In order to assure that the project not be unduly delayed, the committee has urged that consultations between Canada and the United States on the matter be completed no later than the end of calendar year 1979.

Mr. President, I strongly support Senators BURDICK and YOUNG in their intentions to see the completion of this important project. It is important for irrigation purposes, and for the provision of municipal and industrial water. More than 32 cities, towns and communities have already requested water from the project.

The people of North Dakota are fortunate in having, in Senators BURDICK and YOUNG, two great Senators who have brought their case before the Senate. The Garrison diversion project is a good project which the Congress has agreed repeatedly should go forward. I hope that now, with adoption of Senate Resolution 525, that work will be speedily completed.

PRIVILEGE OF THE FLOOR

Mr. STEVENS. Mr. President, I ask unanimous consent that Myrene Glasmann, of my whip office, have the privilege of the floor today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HANSEN. Mr. President, I ask unanimous consent that the following staff members have the privilege of the floor during the debate and votes on the bill before the Senate: Danny Boggs, Dave Swanson, Fred Coatt, Peggy Kimbrough, Carol Sacchi, and Nolan McKean.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Is there further morning business? If not, morning business is closed.

DEPARTMENT OF THE INTERIOR APPROPRIATIONS, 1979

The Senate continued with the consideration of the bill.

AMENDMENT NO. 3443

The ACTING PRESIDENT pro tempore. The pending question is on the amendment of the Senator from Louisiana.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that the following staff members have the privilege of the floor during the consideration of my amendment to H.R. 12932: Rick Richard, Ben Cooper, Jim Bruce, Laure Hudson, and Richard Grundy.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. JOHNSTON. Mr. President, the bill before the Senate provides appropriations to support the operation of the crude oil entitlements program by the Department of Energy. I am offering an amendment which will, in a specific way, limit the use of these funds in the administration of this program.

The ultimate power of Congress to control the President's interpretation of the policies embodied in existing laws lies in control of the funds required to execute these policies. In my opinion, the administration is using the entitlements program to shift vast amounts of the consumer's money around in the domestic economy to the benefit of those it seeks to please. In my opinion, this is a glaring example of abuse of congressional authority. It is entirely appropriate for Congress to check such abuses through the denial of funds for actions contrary to the spirit and intent of the law.

Mr. President. My amendment would forbid the use of funds appropriated under this act to implement an increase in the existing entitlement subsidy for imports of residual fuel oil and refined petroleum products. The amendment is a specific limitation on the use of funds and will not require any interpretation or determination by anyone in the Department of Energy. The program for issuance of entitlements is an established one, described in the Code of Federal Regulations (10 CFR 211.67). Enactment of this amendment will place a sorely needed limit on the administration of this program.

The amendment complements a more general policy on refined products imports adopted by the Senate Committee on Energy and Natural Resources earlier this year by a vote of 17 to 1. The action by the Energy and Natural Resources Committee is incorporated in S. 2692, the fiscal 1979 authorizing legislation for the Department. However, as most of you know, Senate floor action on the authorization bill has been delayed by the continuing controversy over the President's energy plan. This fact makes it all the more necessary that the Senate have an opportunity to state its position on refined product import subsidies in the context of the appropriations process.

Let me briefly describe the issue. The existence of the crude oil entitlements program is a direct consequence of the existence of price controls on domestic crude oil production. This program equalizes crude oil costs among domestic refiners, so that refiners dependent on high-cost imported oil are able to maintain operations in competition with refiners (mostly major oil companies) with access to price-controlled domestic crude oil. Without this program, a substantial portion of our domestic refining capacity would be totally unable to compete, for no other reason than the high crude oil costs they would face, while other refiners would reap unwarranted windfall gains.

Domestic production of gasoline, heating oil, residual fuel and other refined petroleum products would be severely curtailed, and our imports of these products would be far higher than they are today.

The program involves transfers of funds, at the rate of $200 million per month—that is the existing law—among domestic refiners, all of whom are subject to Federal regulation. It is a complex program when restricted to domestic refiners, but one that could be quickly phased out in concert with any phaseout of domestic crude oil price controls.

The Department of Energy, and earlier, the Federal Energy Administration, under heavy pressure from the east coast congressional delegations, has proposed to dip into the pool of funds generated by the crude oil entitlements program to subsidize imports into the east coast of residual fuel oil and home heating oil processed in foreign refineries outside the reach of Federal regulation. Since April 1976, importers of residual fuel oil have received a 30-percent entitlement subsidy. At present, no entitlements are issued to importers of home heating oil, although full subsidy was granted on a temporary basis in 1977.

On June 15, the Department of Energy issued a proposed rule which would increase the entitlement subsidy for residual fuel imports from the present 30-percent value to 100 percent. This increased access to the entitlements pool would be available to importers on the U.S. east coast and in the State of Michigan.

The east coast is seeking lower prices, and for that they cannot be blamed. However, this would be achieved by transferring funds from consumers of petroleum in States outside the east coast—and from gasoline and heating oil consumers on the east coast—to residual fuel importers. That is, refiners costs of operation will be increased by the amount of the subsidy to residual fuel importers. These costs will be passed directly on to consumers. Or, to state it another way, when you lower the price of resid on the east coast, you raise the price of all petroleum products elsewhere across the country.

Mr. President, I ask unanimous consent that tables sharing the State-by-State impact of these transfers submitted to the Committee on Energy and Natural Resources by the Department of Energy be printed at the conclusion of my remarks.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. (See exhibit 1.)

Mr. JOHNSTON. These tables show the impact of the proposed rule on gasoline, distillate, and residual fuel production only. They indicate that additional amounts of approximately $400 million annually will be transferred to importers of residual fuel oil. Of this, over $250 million will come from consumers of petroleum products in States outside the east coast and about $150 million will be charged to east coast and Michigan users of gasoline and heating oil. Ironically, the States of Michigan, Georgia, and Vermont, who are supposed to be recipients of benefits under the proposal, would actually lose funds if it were adopted, because gasoline and distillate fuel costs would rise by an amount which is greater than the subsidy to residual fuel in these States.

The DOE proposal is a prime example of administrative abuse of the very general authority granted under the Emergency Petroleum Allocation Act.

The action of the administration will clearly encourage additional imports of residual fuel oil. What it would do is subsidize imports of resid. The bulk of these imports will come from Caribbean refiners owned by major international oil companies. Increased imports mean increased dependence on unreliable foreign sources of supply. It means an increased deficit in our balance of payments and attendent pressure on the dollar abroad.

The proposal invites the kind of divisive, interregional conflict over energy policy which has been so destructive of efforts to achieve a reasonable, national energy policy.

The proposal further complicates the entitlements program—by creating a vested interest by these new proposed beneficiaries in its continuation. This only pushes the day further into the future when this overly burdensome, insensitive, and ineffective regulatory machinery can be dismantled.

There is no guarantee that the subsidy will in fact work to actually lower consumer prices.

It is entirely likely that foreign refiners being free of any regulation from the United States, will simply raise their prices and capture all or part of the subsidy. That is precisely what happened when the 30-percent entitlement was implemented in 1976. Indeed, that change in the regulation was scarcely in effect before resid fuel prices began a sharp increase.

Let me repeat that.

When the very same thing was done in 1976 and the first 30-percent entitlement was given, resid prices immediately went up to take advantage of the 30 percent. So, in effect, what we did in 1976 and what DOE proposes to do today is subsidize the foreign refiners in the Caribbean at the expense of domestic refiners.

It is no wonder that we are 3 million barrels a day short in refining capacity.

What is even more discouraging about the DOE plan is the fact that the Department apparently expects the extreme dependence of the east coast on residual fuel imports to continue forever. Surely explicit, encouragement of residual fuel imports must send the worst possible signals to domestic refiners seeking to expand our own capacity to meet our refined petroleum product needs. There is no justification for encouragement of construction of foreign refining capacity to serve U.S. markets.

Mr. President, the Senate simply ought not to tolerate the uses that DOE is making of the entitlements program. It was never intended that a $200 million a month slush fund be created to reward the President's friends and punish his enemies. My amendment will check what is perhaps the most overt use of the program for purposes which are counterproductive of national policy. I hope it will discourage any future abuse.

The east coast's problems with import dependence must find their solution in increased domestic production of residual fuel oil. Such a policy is in the interest of the east coast and it is in the interest of the country as a whole. It is in this direction that the DOE should be directing its efforts, rather than attempting to solve short-term political problems with continual adjustments to an already overly complex regulatory scheme.

Mr. President, having made that rather strong indictment of what the President proposes to do with 100 percent entitlements, I think it is appropriate that I explain the reason why I was willing to compromise this matter on yesterday and indeed if the Senate would consent why I would still be willing to do that.

A compromise in this case, Mr. President, is not made or offered or considered because it is partly right or because there is justice or equity or good policy in what the administration proposes to do. Rather it is in recognition of the fact that we are in the midst of August and by the end of September will undoubtedly adjourn the Senate. This 100 percent entitlement is strongly supported by the administration, by the Speaker of the House of Representatives, and by a large number of Representatives in the House, and I think it is fair to say that there are always difficulties in getting an amendment passed all the way through the process, through the House of Representatives, through the Rules Committee, through the floor of the House, and through a conference committee, this late in the year.

For that reason I thought that giving two-sevenths of what the rulemaking would do, in other words, get a five-sevenths victory and a two-sevenths loss made pretty good sense as a compromise.

I still say this amendment was the proper thing. I brought it up in the Energy Committee and it passed by 17 to 1. I believe we can pass it here on the floor of the Senate. I still maintain that a compromise is the best thing.

Let me say, Mr. President, we recognize that costs of residual on the east coast when paid in the midst of a cold winter, as we have had in the last two winters, constitute an expense. But there has been no study to show that the expense of fuel from all sources on the east coast is any greater than the expense of fuel elsewhere. No attempt has been made, for example, to compare the cost of heating in Maine with the cost of heating and air-conditioning in Alabama.

Until that kind of relative study is done, there is no justification for this massive transfer of funds, $400 million a year, from the consumers of one type of petroleum product to the consumers of others.

I am pleased to say for Boston that its costs of gasoline are some 5 cents a gallon less than they are in New Orleans. Why that should be I have not the slightest idea, with the refining capacity being located close to New Orleans. But that is the fact.

Residual fuel oil costs less on the east coast than it does, for example, in California. So the point is there has been no study, no justification made, as to why this amendment should not pass.

Mr. President, I hope that the Senate will pass this amendment.

EXHIBIT 1

TABLE VIII.—IMPACT OF PROPOSED EAST COAST RESIDUAL FUEL OIL PROGRAM ON IMPORT-DEPENDENT STATES

[Dollar amounts in thousands]

State	Gasoline (1,000 gal)	Gasoline cost	Distillate (MBY)	Distillate cost	Residual (MBY)	Residual benefit (MBY)	Total Net effect
Connecticut	1,419,530	$3,264	23,706	$2,276	33,365	21,867	$16,147
Delaware	315,483	726	4,615	443	11,132	7,236	6,067
Florida	4,507,541	10,367	26,068	2,407	91,241	59,307	46,533
Georgia	2,913,600	6,701	21,480	2,062	13,409	8,716	(47)
Maine	567,427	1,305	13,407	1,287	11,616	7,550	4,958
Maryland-District of Columbia	2,149,542	4,944	24,352	2,338	33,332	21,666	14,384
Massachusetts	2,398,788	5,517	61,666	5,920	80,888	52,577	41,140

Mr. JOHNSTON. At this point, Mr. President, I ask unanimous consent that the testimony of Senator LLOYD BENTSEN and James A. O'Neill, Jr., both of whom testified before the Committee on Energy and Natural Resources, and a table showing gasoline prices in selected cities be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR LLOYD BENTSEN

Mr. Chairman, I appreciate this opportunity to testify on the Department of Energy's proposal to increase the entitlement subsidy for imported residual fuel oil. When the entitlements program was adopted in 1974, its purpose was to eliminate the competitive disadvantage of refineries which rely on imported oil at world market prices. The program was intended for a single purpose: To evenly distribute the higher costs of imported crude so that no refiners would derive unfair economic benefits simply because they had the good fortune to be supplied with domestic crude at artificially low prices.

Since then, we have further complicated an already complicated program by repeatedly using the entitlements mechanism to achieve purposes for which it was never intended. It has become a Rube Goldberg contraption; one that is troublesome to both the public and private groups that have become entangled in its bureaucratic tentacles.

Now the Department of Energy wants to use the Entitlements Program to increase subsidies for imported residual fuel oil on the East Coast. I appreciate their desire to lower energy costs but must strongly object to this effort to cut East Coast energy bills at the expense of every other region.

Eastern states are not alone in experiencing rapidly rising residential energy costs. For example, since 1967, electric utility rates have increased by 72 percent in Boston, Mass., and 88 percent in Houston, Texas. According to the Bureau of Labor Statistics, the retail price index for all energy has gone up by 205 percent in Boston compared to 207 percent in Houston. A comparison of residual fuel oil costs reveals that prices on the East Coast are often no greater than those for the same quality fuel in many other regions of the country.

I am concerned because increased entitlements for residual fuel oil will eventually be paid for by consumers of other refined petroleum products—especially gasoline. Because Texans travel greater than average distances to reach their places of employment and commerce, they stand to be the big losers in this program. I am told that in one year alone, Texas gasoline costs could increase by as much as $18 million. The total cost of the increased subsidy will come to as much as $624 million nationwide. I simply cannot understand why consumers in one part of the country should be asked to chip in to help pay their neighbors' energy bills when their neighbors' bills are no more costly than their own.

Futhermore, I am not convinced the increased subsidy will ever be seen by East Coast consumers. In 1976, DOE approved a 30 percent entitlement which they expected to show up in reduced residential fuel bills. A Library of Congress study reveals that prices initially dropped, but by less than the entitlement subsidy, and soon began to rise again with the approach of winter. In fact, residual prices increased by $3.00 per barrel during a period when world crude prices rose by less than $1.00 per barrel. These prices never returned to the lower levels experienced immediately following the granting of the new subsidy. The Library of Congress concluded, "The ultimate result was a diminution of competition from refiners which allowed prices to *rise*."

The numbers clearly show that the entitlements program failed misarably as a device for lowering residential energy costs. But where did this subsidy go if consumers didn't get it? There are two possibilities: the foreign refiner or the importer. By increasing the subsidy from a 30 percent to a 100 percent entitlement, we can expect the same thing to happen, only on a grander scale.

What I fail to understand is why DOE wants to further subsidize foreign refiners at a time when the United States desperately needs to increase its own refining capacity. It is an unfortunate fact of life that for the immediate future we must continue to be dependent on foreign sources of energy. But there is no justification for our continued dependence on foreign refiners. We are currently short nearly 3 million barrels per day of refining capacity, and are the only major industrialized nation which cannot supply its own refining needs. In fact, I understand the Department of Energy is concerned that in case of national emergency, it will be necessary to rely on foreign refiners to help process oil from the Strategic Petroleum Reserves. By increasing the subsidy for foreign refiners, we will act against our own self interest by erecting one more barrier to the development of our domestic refining capabilities.

Furthermore, we will be acting at cross purposes to our stated goal of energy independence. Instead of making it more difficult to use imported fuel, the DOE proposal would provide an incentive for the consumption of foreign petroleum products, and would do so at a time when our balance of payments deficit is dangerously high.

Mr. Chairman, on numerous occasions, this Committee has demonstrated its concern with the problems I have discussed, and I want to commend you in particular for your overwhelming opposition to the proposed increase in the residual fuel oil subsidy. Instead of the DOE program, what we need is a plan to reduce our unhealthy reliance on foreign refiners. Ideally, fuel oil used on the East Coast should be produced by domestic refiners, not those located on foreign shores. To accomplish this, we must encourage the construction of more refineries, and the conversion of existing plants to handle heavy and sour crudes from Alaska and California.

I want to help lower energy costs as much as anyone, but I believe the Senate should address such problems with the best interest of the nation foremost in mind. As individual Members of Congress, we are expected to—and should—fight for programs that benefit our constituents. But as a body, it is the responsibility of Congress to see beyond sectional differences and forge policies that will work for the good of the whole country, not just one region.

TESTIMONY OF JAMES A. O'NEILL, JR.

Mr. Chairman and Members of the Subcommittee:

International Processors is grateful for the opportunity to present its views to the Subcommittee on Energy Conservation and Reg-

ulation of the Senate Committee on Energy and Natural Resources. We commend the Committee for its continued efforts to review and constructively criticize the entitlements program and to examine the broader perspective concerning this country's lack of sufficient refinery capacity and urgent need for a clear national refining policy. These are issues of grave concern to our company and to the nation as a whole.

International Processors is a 50–50 partnership between Ingram Corporation and International Matex Tank Terminals, both of New Orleans, Louisiana. International Processors has recently begun construction of a 30,000 barrel per day grass roots refinery at St. Rose, Louisiana. When the plant commences operations in the first quarter of 1979, a substantial portion of its output will be residual fuel.

In 1976, the Department of Energy promulgated regulations which granted partial entitlement benefits to qualified East Coast importers of foreign refined residual fuel. In addition, the program, which remains in effect today, penalized all shipments of domestically refined residual fuel to the East Coast above 5,000 barrels per day. DOE has long since recognized that this program has had a disastrous effect upon the competitive balance between onshore and offshore refiners, as well as upon the East Coast and Gulf Coast markets. Appropriately, DOE is seeking to change the program currently in effect.

The program which DOE has proposed, however, is equally disastrous. The proposal to remove the "reverse entitlement" penalty and extend product entitlements to 100 percent would effectively subsidize foreign refineries at the expense of domestic refiners, workers and consumers. The promulgation of the current proposal would result in a number of undesirable effects, as outlined below.

1. Increased Imports of Refined Products:

DOE's proposal, if implemented, would encourage the importation of increased volumes of residual fuel. Since the implementation of the current DOE program, more and more residual fuel has remained in the Gulf Coast rather than moving to the East Coast where it is needed most. To the extent that residual has continued to move to the East Coast, it has been through the 5,000 BPD "window" that does not incur the reverse entitlement penalty. Whereas under the current program, such residual fuel movements are essentially competitive with foreign supplies, under the new proposal, no such window would exist. Therefore, all Gulf Coast residual fuel would be severely disadvantaged vis-a-vis Caribbean residual fuel, and less and less Gulf Coast residual fuel would move to the East Coast, in turn requiring greater and greater amounts of imports.

Presumably, it is the goal of the United States to foster energy independence. If this be the case, then actions should be considered which would decrease product imports rather than increase them. Moreover, importing greater volumes of refined products forces the U.S. to bear the costs of foreign refining and consequently would exacerbate what is already the worst balance-of-payments deficit in this country's history. Further, by increasing our dependence on foreign refiners, we undermine our ability to meet our own needs and hence our own national security.

2. Discouragement of New Refinery Capacity:

The United States is currently short some 3 million barrels of daily refinery capacity in meeting domestic demand. It is noteworthy that the U.S. is the only major industrial country in the world that cannot refine its own needs. Further, the United States is currently in the extremely embarrassing position of being incapable of refining the crude oil which will be stored in the Strategic Petroleum Reserve. These reserves will be of little use to the nation's security if we have to depend upon foreign refineries to refine the crude oil into required products, since there is serious doubt as to the reliability of Caribbean supplies during any embargo situation.

We believe that new fuels refinery capacity is necessary to provide U.S. industry with the residual fuel required to burn in its factories—residual fuel that is in short supply and presently must be imported. Residual fuel is one product for which there is no short-term alternative, nor can it be conserved without threatening the rate of growth of the U.S. economy. In the view of authoritative studies which predict significant growth of residual fuel demand in the U.S., our reliance upon imported residual fuel will only increase in the absence of new, expanded or retrofitted refinery capacity.

The original purpose of the entitlements program was to equalize the cost of crude oil among domestic refiners. This enabled the independent domestic refiners, who in general have no access to price-controlled lower tier domestic crude oil, to compete with the major integrated companies who control this inexpensive oil. In addition, the crude oil entitlements program—together with price controls on domestic crude oil—allows the U.S. independent refiner to compete with foreign refiners who, despite higher average crude oil costs, have a net advantage over the U.S. independent because of fewer environmental restrictions, the ability to employ less expensive foreign flag shipping for the transportation of product, lower capital costs, and various exemptions from income taxes.

By granting full entitlements to imported residual fuel, DOE would be eliminating the one significant piece of protection that the U.S. refiner currently enjoys. The simple fact is that under the DOE proposal, no U.S. refiner could compete with the offshore refiners in the East Coast residual fuel market. Exhibit I contains our analysis of the competitive positions of both a new and old Gulf Coast refinery with that of an old Caribbean refinery delivery residual fuel to the East Coast.

You will note that even if there were no entitlements whatsoever on imported residual fuel, and the "reverse entitlement" penalty were eliminated, the Caribbean refiner would still have a cost advantage of approximately 90 cents per barrel in delivering residual fuel to the East Coast.* In the case of the new Gulf Coast refinery, the Caribbean advantage could approach $2.00 per barrel.

By increasing the entitlement benefit to 100% of a crude entitlement, DOE would give the Caribbean refiner a cost advantage of more than $2.00 per barrel over the existing Gulf Coast refiner in the East Coast residual fuel market. The comparable number for a new Gulf Coast refinery would be about $3.00.

Clearly, then, the DOE proposal would result in no refineries being built to supply the East Coast with residual fuel. Indeed, it is unlikely that, in this regulatory environment, any new refineries will be built at all.

New refineries provide jobs. Our refinery, athough smaller than many, will nonetheless employ nearly 200 skilled American workers at the peak of construction at the refinery site. Many more will be employed in manufacturing and transporting the material needed to construct the refinery. Indeed, Mr. A. F. Grospiron, President of the Oil, Chemical and Atomic Workers International Union, has estimated that:

". . . the practice of building refineries overseas deprives American workers of oil industry jobs. On the average it requires 12 refinery workers for each thousand barrels of crude processed daily . . . Additionally, according to a study done by Gulf Canada, each refinery job creates 3.5 jobs in closely allied service and manufacturing sectors, and it is that company's opinion that the same holds true in the U.S."

Hence, eliminating imports of refined products through the expansion of domestic refining capacity could result in as many as 150,000 to 200,000 permanent jobs for Americans in expanding and modernizing our existing refineries to supply this shortage. In effect, by relying on product imports we have exported these jobs, which is totally inconsistent with the national goals of reducing unemployment. In addition to providing jobs, new refineries would provide an expanded tax base for the nation and the states in which they are located. New refineries cost millions, in some cases hundreds of millions, of dollars. These dollars would remain in the United States rather than be exported to build additional, unneeded refinery capacity in the Caribbean.

3. Costs and Benefits of DOE's Proposal to Consumers:

Measuring the costs and benefits to consumers of DOE's proposal is a complicated procedure. There are a number of assumptions than can be made, any one of which can have a significant effect upon the magnitude of consumer costs or benefits.

One thing is clear. The issuance of additional entitlements on imports of residual fuel will reduce the per barrel entitlement benefits to U.S. refiners. Any such reduction in entitlement benefits equates to an increase in crude oil costs for refiners. This increase in crude oil costs would result in increases in prices for all products other than residual fuel We have estimated these increases to be approximately 10 cents per barrel (other companies have reportedly estimated them to be as high as 13 cents per barrel) and we would point out that this price increase would apply to products such as gasoline and home heating oil which are purchased directly by individual consumers. We would further emphasize that these increases in fuel costs would apply to East Coast consumers as well as the rest of the nation.

In addition to these costs on products other than residual fuel, there is the likelihood that residual fuel prices in areas outside the East Coast would increase by 10 cents per barrel as well. To the extent that competition precluded refiners from implementing such increases, they could, of course, simply increase gasoline and home heating oil prices by more than 10 cents per barrel.

The DOE proposal will increase the subsidy on imported residual fuel by 65-70 cents per barrel. DOE and the East Coast Congressional delegations state publicly that this subsidy will be passed on to the consumer in its entirety, and that the net result will be a 70 cents per barrel reduction in residual fuel costs on the East Coast. However, there is a significant degree of uncertainty as to how much, if any, of this subsidy would ever reach the consumer in the form of lower prices.

* This assumes that the adequate fee free licenses continue to be available so that no product import fee is paid on imported residual fuel. In the case where the importer must pay the 63 cent per barrel import fee the Caribbean refiner still enjoys a 27 cent advantage.

There have been two instances in which DOE has authorized entitlement subsidies on imported petroleum products. The first occasion was in 1976 when the current residual fuel entitlements became effective. The second occasion was in February of 1977, when DOE temporarily granted a subsidy of 5 cents per gallon ($2.10 per barrel) on imports of home heating oil. In both cases, there was substantial evidence that less than 100 percent of the subsidies was passed on to the consumer. The "Oil Buyer's Guide", a leading oil pricing publication, reported the following price behavior in the weeks immediately following the implementation of residual fuel entitlements in 1976:

APRIL 5, 1976—U.S. EAST COAST MARKET REPORT

"Upon hearing of the new regulations, U.S. Independents immediately began making inquiries regarding foreign oil availabilities to take advantage of the price break. European sellers, however, were quick to capitalize on their position and raised their asking prices instantly.

For example, early last week prior to Washington's action, a foreign cargo of 0.3 percent sulphur, low pour, No. 6 fuel was on offer at $12.45 bbl, delivered New York, and because of the soft market, did not sell. When word of the 30 percent product entitlement value hit the street, however, this seller raised his asking price to $12.90 bbl—a 45 cent bbl jump. . . .

One heavy fuel marketer said Washington's actions will, among other things (1) increase the balance of payments defict by discouraging imports; (2) make the price of imported oil more expensive; and (3) discourage domestic oil production by putting it in a less competitive position with foreign market."

APRIL 12, 1976—EUROPEAN PRICE WRAP-UP

U. S. buyers are looking for prompt low sulphur resid . . . This renewed call from the previously dormant U.S. East Coast has had the predictable effect of raising seller's price expectations."

APRIL 21, 1976—EAST COAST MARKET REPORT

"Washington's 30 percent 'product entitlement' on imported residual fuel has had the effect of boosting the value of imported oil. . . . Since imports carry about a 90 cent per barrel rebate, domestic buyers are naturally favoring foreign purchases. As a result, the past week has seen an upward adjustment in prices for foreign offerings. . . ."

Caribbean sellers also reacted to the advantage they now enjoy because of the 30 percent product entitlement regulation. Sellers there quickly raised their selling prices. . . ."

These price increases gain even more importance when one considers the period in question. These increases took place in April, normally the weakest time of the year for residual fuel prices. That is, instead of prices decreasing as is normally the case in the spring months, prices actually went up, so that an increase of 45 cents per barrel might really mean prices 80–90 cents higher than they otherwise would have been.

These are but a few indications that foreign refiners siphoned off the benefits of the subsidy intended for U.S. consumers. There were further indications later that summer of a shortage of residual fuel in the Caribbean, reinforcing the undesirability of increasing our dependence on imported product. "Oil Buyer's Guide" reported in its August 16, 1976 issue:

"That escalation in prices and the dearth of availabilities again is attributable to the reverse entitlements program which penalizes Gulf Coast refiners who ship resid to the East Coast; the product entitlement given on imports; and, finally, the generally lower world-wide refinery output."

We have seen substantial evidence that, in the case of heating oil entitlements, there were also price increases which prevented the consumer from realizing any benefit from higher subsidies (See Exhibit 2).

Therefore, given the above indications that product entitlement subsidies intended for consumers tend, in actuality to be absorbed by foreign refiners, there is no guarantee whatsoever of lower fuel prices on the East Coast. As a result of DOE's proposal, all the East Coast consumer can be sure of is higher prices on gasoline, home heating oil and other domestically produced products while he hopes that foreign refiners will allow him to enjoy some small part of the import subsidy. In many cases, East Coast consumers would end up spending more on gasoline and home heating oil than they would save on residual fuel.

4. Poor Timing of DOE's Proposal—Relation to National Energy Act:

International Processors would also contend that DOE's proposal is particularly ill-timed in view of the pending energy legislation. Should Congress adopt a crude oil equalization tax as part of its energy package, the entitlements program would thereby be completely phased out and DOE would be forced to come up with still another program.

The Administration is also currently contemplating the imposition of a substantial fee on imported crude oil in the absence of a crude oil equalization tax. Such a tariff would substantially increase the entitlements benefits to East Coast importers of residual fuel while at the same time significantly increasing the average cost of crude oil to U.S. refiners. For example, a $2 per barrel fee on imported crude oil with no accompanying fee on imported refined products would result, under the DOE proposal, in an increase in the average post-entitlement cost of crude oil to domestic refiners by 0.85 to $1.15 per barrel, depending on the proportion of imported and/or uncontrolled domestic crude oil included in DOE's calculations. At the same time, such a fee would result in an increase in the entitlement subsidy for imported residual fuel by the same amount. As a result, the competitive position of a U.S. refiner producing residual fuel for sale on the East Coast or in Michigan would be undermined by $1.90 to $2.30 per barrel! Clearly, under this scenario, economic realities would force DOE to modify its proposed program for residual fuel oil.

We would, therefore, strongly recommend that DOE postpone any such proposal until after the Congress has had time to finalize the pending energy legislation. Only then will it be possible for DOE to predict the effects of its proposal with any degree of accuracy whatsoever.

5. Poor timing of DOE's Proposal—Imperative Need for Comprehensive Refining/Consumer Legislation:

We have discussed earlier in our testimony the need for additional refinery capacity in the United States. If this much needed capacity is to be built, two questions must be addressed—immediately and thoroughly.

A. Why are no major refineries being built?

There are several factors underlying the lack of new refinery construction. First, companies and, as importantly, financial institutions, are extremely wary of the uncertainty which pervades those federal regulations which directly affect the refining industry. Few people are willing to spend the many millions of dollars to build a refinery which can be made totally inviable overnight as a result of changes in government regulations. The only major grass roots refinery project in the recent past, the 2000,000 barrel per day ECOL refinery in Louisiana, was built to fulfill the country's need for additional refinery capacity to convert high-sulphur, low gravity crude oil into low-sulphur residual fuel. The SCOL project represented an investment of several hundred million dollars and more than three years of effort by thousands of people. With the stroke of a pen the Federal Energy Administration rendered the project uncompetitive through the East Coast residual fuel entitlements program. The plant was subsequently bought by Marathon Oil Co., which is currently spending several hundred million dollars more to convert the plant to emphasize gasoline production. As a result, a new entrant to the refining industry has been eliminated and further, there will be no significant addition to U.S. residual fuel production from the refinery. ECOL remains a constant reminder of the threat of arbitrary and capricious regulatory actions to any refinery investment in the United States. Only by adopting comprehensive refinery legislation can this threat be mitigated.

A second reason for the current lack of refinery construction is, of course, the environmental regulations which in some cases prohibit the refineries from being built at all, and in other cases, result in a costly and time-consuming procedure to obtain the necessary permits for construction. There are currently two major refinery projects, the Pittston refinery in Maine and the Hampton Roads refinery in Virginia, which are stalled because of environmental problems. As they are stalled, costs of construction continue to escalate, and permits previously approved expire and must be approved all over again. While we understand and support the need for a responsible national environmental policy, it would be helpful to assign a lead agency which could operate to expedite the siting process for new, expanded, or retrofitted refinery projects.

Finally, there are economic considerations which preclude much of the needed refinery capacity from being built. One need only look at what refineries are being built today. They are, for the most part, small refineries of under 30,000 barrels per day which receive up to $2.00 per barrel in "small refiner bias" entitlements. It is only with this aid that many of these plants are economically viable.

Attached as Exhibit III is a copy of the Nelson Cost Index for refinery construction as it appeared in the July 3, 1978 issue of the Oil and Gas Journal. This chart, widely accepted as an accurate industry economic indicator, shows the extent to which all the compenents of refinery construction cost have increased over the past several years. According to Nelson, in the past five years, construction costs have increased more than 45 percent. Since 1962, these costs have risen by over 185 percent. Any new refinery, built at current costs, has to compete with older U.S. refineries which were built at significantly lower costs. Thus, competition prohibits a new refinery from realizing sufficient revenues to pay off its investment.

The costs of a new refinery in the United States are even greater when compared to foreign refiners—foreign refiners who are not required to comply with EPA and OSHA regulations and hence do not incur the higher construction costs associated with such compliance.

B. What is needed to encourage refinery construction?

Currently, the only significant economic incentive given to new or expanded refinery capacity is a five-year, 75 percent fee-free allocation on imports of crude oil. This amounts to 10–15 cents per barrel. Although this help is not insignificant, it is in no way sufficient to offset the regulatory uncertainty, environmental restrictions, and the extremely high construction costs of new, expanded and retrofitted capacity.

What is needed is a comprehensive policy based on the long range welfare of the U.S.

We believe this can be done without disadvantaging any geographical region of the U.S., without cutting off or bankrupting any of our traditional foreign suppliers, without creating competitive marketing disparities, and with creation of a strong, viable, modern refining industry including new capacity, especially for fuels, and retrofitting of existing capacity to process high sulphur crude oils.

Such a program should include the following principles:

1. Imports at very low or negative tariff levels should be restricted to historical levels.

2. The quantity of imports at low or negative tariff levels should be automatically expanded if and when domestic inventories fall significantly below their historical seasonal levels. Similarly, they should be contracted if and when domestic inventories rise significantly above their historical seasonal levels. Imports above these levels should be subject to a very high tariff but it should never be necessary to exceed these levels and the high tariff should never be incurred.

3. The targeted level of imports should decrease by small percentages annually as additional domestic refinery capacity becomes available.

4. Financial incentives to install capacity capable of producing required products and to retrofit low sulphur refineries to process high sulphur crudes should be provided in the form of government loan guarantees, accelerated depreciation, and expanded investment tax credits.

5. Most importantly, the legislation must be worded carefully to ensure that some future bureaucrat will not find a way to corrupt the intent and use it to accomplish some unintended or unforeseen purpose. Otherwise both investors and financial institutions will continue to be extremely wary. April Fool's Day, 1976 will be long remembered.

We would strongly recommend this type of comprehensive approach—and we believe that its enactment would serve the long term interests of all Americans, and of all the companies and interests represented here. But I must emphasize very strongly that implementation of the East Coast proposal by itself would be disastrous for many independent domestic refiners and would be harmful to most U.S. consumers.

Accordingly, I would urge this committee to bar the implementation of the East Coast residual proposal—as Senator Johnston's amendment of the EPPA would do—for at least a period long enough to enact the comprehensive refinery/consumer legislation the U.S. urgently needs. We believe Senator Johnston's amendment of the EPPA is a modest first step—it does not take away anything from anyone, but rather merely holds the current policies constant while the comprehensive refinery/consumer legislation is enacted.

We again praise this Subcommittee for its continued leadership in the area of refinery incentives legislation and thank you for this opportunity to present our views. We look forward to working with you to implement a program which will promote a healthy, competitive refining industry in this country.

EXHIBIT II

PRICE ANALYSIS—HOME HEATING OIL

For the months of February and March, 1977, FEA promulgated a rule granting a $2.10 per barrel entitlement for each barrel of home heating oil (No. 2 F.O.) imported into PAD I. That equates to 5c per gallon for each imported gallon.

To determine whether there was an ultimate passthrough of that cost benefit, three different sources of price information were reviewed. Recognizing the fact that seasonal reductions normally begin in February or March and the fact that although the 1976–1977 winter was severe (but not after February 7, 1977), there does not appear to be any evidence that the entitlement benefit was passed through to consumers.

The attached documents (A, B, & C) are as follows:

(A) Residential Heating Oil Prices by Region. This is an FEA–DOE compilation of prices paid by consumers by region. The underscored months of February and March, 1977, are the months when the $2.10 entitlement was issued. As can be seen, from February to the end of the reporting period, New England and Mid-Atlantic prices actually increased.

(B) Refined Product Prices in Gallons. This is a compilation of spot cargo prices for selected regions as reported by American Petroleum Institute in the Oil & Gas Journal. Again, from pre-entitlement periods in Januard through the entitlement months, there is a price increase for landed cargos.

(C) NY Harbor Spot Prices—No. 2 Fuel Oil (Foreign). This is a compilation of foreign prices for New York Harbor cargo prices laid out in comparable year columns. Looking at the differences in cargo prices from year earlier totals, price movements appear to reflect normal seasonal variations. However, even with favorable entitlement treatment, and of period year to year differences do not reflect a passthrough of entitlement benefits on foreign cargos.

SUMMARY

COMPARISON OF COST DIFFERENTIALS OF A U.S. GULF COAST REFINERY TO EXISTING OFFSHORE REFINERS

[U.S. dollars per barrel]

	U.S. gulf coast refinery commencing operations—		Offshore refinery (Bahamas) commencing operations prior to 1972
	Jan. 1, 1978	Prior to 1972	
1. Cost of capital expense	0.843	0.335	0.335
2. Transportation expense	2.804	2.804	1.338
3. Working capital expense	.125	.125	.057
4. Return on investment element	1.648	1.070	.435
5. Clean product realization advantage			(.450)
Subtotal (excluding fees/tariffs/entitlements)	5.420	4.334	1.715
Cost advantage/(disadvantage) versus offshore refinery	(3.705)	(2.619)	

	U.S. gulf coast refinery commencing operations—		Offshore refinery (Bahamas) commencing operations prior to 1972
	Jan. 1, 1978	Prior to 1972	
Case A: Reflects regulatory program currently in effect:			
1. Above subtotal	5.420	4.334	1.715
2. Fees/tariffs/entitlements	(.908)	(.803)	(.293)
Total	4.512	3.531	1.422
Cost advantage/(disadvantage) versus offshore refinery	(3.090)	(2.109)	
Case B: Reflects proposed amendments to current program:			
1. Above subtotal	5.420	4.334	1.715
2. Fees/tariffs/entitlements	(2.446)	(2.026)	(1.613)
Total	2.974	2.308	102
Cost advantage/(disadvantage) versus offshore refinery	(2.872)	(2.206)

Mr. JOHNSTON. Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. RIEGLE). The Senator from Wyoming.

Mr. HANSEN. Mr. President, I yield to the distinguished Senator from Alaska for a unanimous-consent request.

Mr. STEVENS. Mr. President, I ask unanimous consent that Janet Rogozinski of my staff be permitted access to the floor during the consideration of this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HANSEN. Mr. President, I want to compliment the junior Senator from Louisiana for his informative and succinct remarks this morning. I think he has spelled out clearly and forthrightly what the situation is.

I think what we need to understand is that the entitlements program is counterproductive. This point has been made very clearly and forcibly by the Senator from Louisiana. I see no purpose, useful purpose, being served for any part of the country in pursuing any longer a program that does not guide this Nation in a way that will best serve its long-term goals.

The Senator from Louisiana has pointed out that it increases our dependency upon foreign refineries, it increases our dependency upon foreign crude as it passes through those refineries; it tends to discourage the construction and bringing into being of sufficient domestic refinery capacity in this country to do the kind of job we need to have done.

I can be even more specific. In my State of Wyoming we have in the city of Casper several refineries. Because of the workings, the machinations, of the entitlements program, one of those refineries operated by a major oil company was almost on the verge of being shut down about 2 or 3 years ago, because that company was faced with the prospect of having to pay out, despite the fact that it

had its own crude, so much under the entitlements program as to bring into question, serious question, the economic feasibility of continuing to operate that refinery.

Fortunately, they concluded overall that they would weather the storm. While they had a very tough row to hoe insofar as the balance sheet of the Casper refinery is concerned, they are still in business.

The trouble with the program that is being endorsed by the administration, it seems to me, is that it is one directed more toward garnering sufficient and enough votes to get other legislation passed that I do not think is in the national interest either.

The trouble with this program is that it holds out hope to the northeast and to the State of Michigan that prices there for residual fuel oil will be less than would otherwise be the case by virtue of the transfer of some $200 million per month, to quote the Senator from Louisiana, from those sections of the country where the drawdown would occur into those areas that would benefit from the entitlements program, plus the fact that it greatly complicates and extends the redtape and the bureaucratic work that go into the administration of the entitlements program.

So I think what the Senate should do is, first, look at the direction this program will take us; decide if we want to encourage and bring about the expansion of our domestic refining capacity; if we want to do everything we can to encourage and expand the drilling for and the production of oil and gas within the United States; and whether or not we do not think it is time to call a halt to this increasingly complicated bureaucratic maze that prices, production and definition of oil and gas products have to be subjected to, and to let the law of supply and demand work in this industry as I am certain most of us know it continues to work in all other industries.

Despite our efforts here on the floor of Congress to legislate the law of supply and demand out of existence for the petroleum industry, we have not succeeded very well, and I am glad we have not, because we have by virtue of the, as yet, freedom of the intrastate market given real impetus to the search for, discovery of, and production of natural gas when it can go to satisfy the needs of the intrastate market.

That is one of the reasons why, Mr. President, I am opposed to the natural gas compromise that now has been before the conference of the House and Senate to try to resolve.

I think there is little question but what we can and will produce more, we will move the balance of payments problem in a positive direction as we encourage the production of domestic oil and gas, we will create additional jobs for Americans, we will reduce the dependency of our Nation upon uncertain foreign supplies, and it will remove us, to whatever extent we move affirmatively, from the whims and caprices of foreign governments in trying to take advantage of situations which may arise such as we have experienced in the last decade.

I hope we will stop and take a look at where we are headed, and decide if it is not time to take advantage of the yet unexplored and undiscovered natural resources we have in the United States.

If it is not time to give encouragement to the domestic refining needs of this country, and if it is not time to decide, once and for all, we are going to start doing away with regulations, bureaucratic red tape, and dictatorial decisions that oftentimes have been postponed not for months but for years, when requests for relief have been applied for.

My good friend Dr. Schlesinger, the Secretary of the Department of Energy, and I have talked on numerous occasions. I am disturbed and frustrated, as I know many people in the oil and gas business are, when we consider the number of times that price relief has been requested which, if granted, would bring about the necessary encouragement to permit the further extraction from the ground of oil and gas. All too often, the failure to respond in a timely fashion by the Department of Energy has simply resulted in the closing down of wells, and of our leaving in the ground unproduced oil and gas that could do much for America.

It could help our balance of payments. It could increase our self-sufficiency. It would tend to mitigate the dependency upon foreign sources of supply. It would add affirmatively to our national security.

These are all things that could result if we let the laws of supply and demand replace the very complex and complicated set of laws and regulations under which we are now working.

I am disturbed with the ramifications of the natural gas bill still under consideration by the Senate and House conferees, because it certainly does not move us in the direction that we ought to be going at all. It will add to the regulations. It will make very much more complicated the determining of the price that gas will sell for, if and when it is found.

There are perhaps not fewer than 17 kinds of gas that the bill now before the conferees identifies. No one, I repeat, no one drilling today, could with certainty say what price he would get for the gas that he would hope to discover.

Some of the provisions in the bill that seem particularly distressing are ones such as this example illustrates: And old well, let us say penetrated down to 10,000 or 12,000 feet, could be drilled even more deeply. If gas were discovered in that well, it would not necessarily qualify as new gas, unless earlier encountered in that same well was gas that had not been produced. It would deny the extension of a deep well that is extremely expensive to drill in order to test lower horizons, but would permit a driller to go offsite 50 yards, go through the very unnecessary and duplicative expense of drilling a new hole and then, if that hole resulted in a discovery of gas at a deeper elevation, it would qualify for new gas.

I think most reasonable people would have to conclude and admit that such a provision makes no sense at all. And yet that is a part of the provisions of this bill that we have before us. I think that if Members of the Senate could take the time to look over what is contained in the bill, if they could examine the good reasons to do away with the entitlements program, no matter where they are, whether they represent one of our New England States, the Southwest, the State of Michigan, or wherever, they would have to conclude that this must be the direction we should be moving.

I would hope very much that the Senate would examine closely the proposal of my good friend from Louisiana, and agree with him and me that it is time to do away with this entitlement program.

Mr. President, I realize that this is an extremely complicated subject. It is one that has been fraught with a lot of prejudice and sentiment, because of stories that have appeared in the media over the last half dozen or more years. Most people look upon anyone in the oil business as not the best kind of citizen; and I know it is difficult to separate prejudice from fact, but I think that the extremely critical situation that the country is in does demand that we take action, and that we take the right action.

In this morning's Wall Street Journal there is published a story by James Tanner, in which he calls attention to the fact that—

> On the surface, last month's news seemed favorable: Oil imports, a key villain in the huge U.S. trade deficit and the sinking fortunes of the dollar, were about 13% below last year's record levels. . . . But beneath the surface, the facts are a good deal gloomier.

Mr. President, I ask unanimous consent that the entire article, entitled "Barreling In; Oil Imports Are Rising After First-Half Drop; Record '79 Total Likely," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BARRELING IN: OIL IMPORTS ARE RISING AFTER FIRST HALF DROP; RECORD '79 TOTAL LIKELY

(By James Tanner)

On the surface, last month's news seemed favorable: Oil imports, a key villain in the huge U.S. trade deficit and the sinking fortunes of the dollar, were about 13% below last year's record levels. President Carter went to Europe to promise a 2.5 million-barrel-a-day cut in oil imports by the mid-1980s, and a high U.S. Treasury official predicted that imports would be slashed by a million barrels a day by the end of the year.

But beneath the surface, the facts are a good deal gloomier: That 13% drop for the first half of the year was only temporary, and imports are starting to climb again. "We haven't solved the import problem," is the blunt opinion of John H. Lichtblau, executive director of the Petroleum Industry Research Foundation. "This import decline we have seen will start leveling off in the second half and will disappear altogether in 1979."

Even the administration is realizing that its hopes for cutting back on oil imports are fading. Indeed, Energy Department figures suggest the possibility that imports will actually rise this year. The major fear is that this will give the Organization of Petroleum Exporting Countries the evidence of a turnaround in the world oil market that it needs

to justify an intended price increase by the end of this year.

HEADING TOWARD 10 MILLION

There is general agreement that 1979 imports will reach record levels, exceeding last year's record of 8.7 million barrels a day. Forecasts vary for beyond 1979, but most oil-industry people believe that imports will continue a slow but gradual rise, eventually passing 10 million barrels a day, no matter what happens in Washington to President Carter's long-debated energy program. Imports will rise, they say, because petroleum demand will continue to outpace domestic oil output.

Why were oil imports down in the first half compared with the first six months of 1977? Oil-industry officials note that in the 1977 first half, imports were unusually high because the oil companies were building up inventories. This was largely because of pricing disagreements among the OPEC producers, which led to a company scramble for cheaper Saudi Arabian oil even while the companies were under pressure from the higher-priced producers to continue taking their oil. OPEC resolved its pricing split in mid-1977.

In this year's first half, imports were unusually low because the oil companies began using up their inventories. But for the rest of this year, the companies are expected to rebuild their U.S. inventories of crude oil and petroleum products, now at the relatively low level of 857 million barrels, down from about 921 million barrels a year ago. The inventories already are being built up with imports.

Another factor is cited for the decrease in the first half's imports: oil from the North Slope of Alaska. The oil began flowing in mid-1977, averaging in the second half of last year about 700,000 barrels a day from the Prudhoe Bay field. In this year's second half, production is close to the pipeline's capacity of 1.2 billion barrels.

Despite that increase, the significance of North Slope oil will diminish in the overall U.S. picture. This is because output from the fields in the Lower 48 States will continue to decline and U.S. demand for oil will continue to rise. Right now Americans are using about 3 percent more petroleum than they were last year. No one knows what the increase in demand will be for the year, although forecasts range from jumps of 1 percent to 5 percent.

A significant reason for the difficulty in trying to predict the course of oil imports is that a great amount of oil is being imported that isn't included in any official figures.

This is the oil that is being imported to be stockpiled in the strategic petroleum reserve, which was authorized by Congress in 1975 but which didn't get underway until the beginning of the second half of last year. The program calls for as many as one billion barrels of oil to be stored, mainly in underground salt domes, by 1985 to prevent disruptions in the event of any future embargo.

The target for the end of 1980 is 500 million barrels, and the oil now is going into the reserve at the rate of 150,000 barrels a day, most of it from Mexico, Saudi Arabia and elsewhere abroad. This is likely to have a considerable effect on the current half's import figures.

AN INCREASE THIS YEAR

It isn't known what the average daily imports for the strategic reserve will be for the whole year. But the petroleum research group's Mr. Lichtblau believes they could add as many as 500,000 barrels a day to the import figures for the second half. This could average out to more than 300,000 barrels a day for the entire year.

The Energy Department bases its estimates for the year's imports (not including the stockpile) on high, medium and low ranges of demand. Its medium-range estimate is that imports will average 8.6 million barrels a day for the year. If a possible 300,000 to 400,000 barrels a day of imports for the strategic reserve were added, this would bring 1978 imports to nearly 9 million barrels a day, compared with the 8.7 million for last year.

Even if imports for the reserve remain at the present 150,000-barrel-a-day rate, the Energy Department figures still suggest a total increase in imports for the year.

With so many predictions flying around, it's hardly surprising that Washington appears confused about what is happening to oil imports. On July 27, for example, Anthony M. Solomon, the U.S. Treasury under secretary, told reporters that the decline in oil imports would continue for the remainder of this year, contributing, he said, to a lower trade deficit and a stronger dollar. Oil imports, he predicted, should be down by one million barrels a day for the year.

But Mr. Solomon's optimism was deflated by figures from the Commerce Department projecting increases in the second half from the year-ago half. Indeed, the Energy Department had been projecting such an increase since June. Even Mr. Solomon's colleague at the Treasury, assistant secretary Fred Bergsten, told a House subcommittee last week that an increase in imports is expected in the second half.

(Asked for comment, a Treasury official explained that Mr. Solomon really meant to say that oil imports were running one million barrels a day lower during the first half.)

The administration does have support, however, in its view that oil imports will show a decline for all of 1978, although not nearly as great as the sharp decline of the first half would suggest.

Mr. Lichtblau's guess is that, not counting the strategic reserve, "this year we will bring in at least 8.1 million barrels a day." The Independent Petroleum Association of America estimates that the 1978 average, including imports for the reserve, will be slightly more than 8.5 million barrels a day.

Both of these estimates are conservative when compared with projections by Exxon Corp., whose figures are typical for the oil industry. Exxon believes that without provision for the reserve, the U.S. will import about 8.5 million barrels a day this year.

Certainly there is wide agreement that oil imports next year will rise to a record, whether or not the strategic reserve is included. Estimates that exclude the reserve: Mr. Lichtblau, 8.8 million barrels a day; Exxon, 9.3 million, and the Energy Department, about 9.1 million (medium range).

The renewal of the climb in imports obscures an important development concerning oil consumption in the U.S., however. Most energy experts agree that Americans are beginning to be less wasteful of petroleum, largely because of the increased cost but also because of improved automobile mileage. Frank G. Zarb, the former head of the Federal Energy Administration, now a general partner at the investment banking concern of Lazard Freres, observes. "The American (free-market) system is working despite the government's silly controls (on petroleum prices). Industry is using less energy per unit of output."

Evidence of this conservation trend is beginning to show up in the oil-demand forecasts. Generally, these forecasts suggest that oil demand will rise proportionately less, on a percentage basis, than the gross national product.

Generally, the estimates of 1978 demand range between 18.7 million and 19.4 million barrels a day, or increases of between 1% and 5% from the 18.4 million barrels a day of 1977.

Domestic petroleum production, including output from the North Slope, is estimated at between 8.7 million and 8.9 million barrels a day for 1978, up from about 8.2 million barrels a day in 1977. Natural-gas liquids and certain other domestic supplies account for the rest of the difference between demand and imports.

● Mr. MOYNIHAN. Mr. President, it is important that all Senators be aware of the inequitable effects on the east coast that would result from the enactment of the amendment of the Senator from Louisiana. If the Senate were to pass this amendment, prohibiting the Department of Energy's proposed modifications in the entitlements system for residual oil, it would be an action, startling in its insensitivity.

The current entitlements system for residual oil is a program of open discrimination against the east coast. The system has a built-in bias of over $1 per barrel of residual oil sold on the east coast. The current system also discourages domestic refiners from selling residual oil to east coast consumers.

The Secretary of Energy has proposed a fair program, a system that would remove some of the inequity and eliminate the disincentive on east coast sales. The program does not increase the subsidy to imports; the current differential of 42¢ per barrel between imported and domestic oil would be maintained.

The statistics that show the effects of DOE's proposed modifications in the entitlements system demonstrate the importance of this amendment to the east coast. Other Senators have spoken for their own States; New York uses more imported residual oil than does any other State. In 1975, New York imported 132 million barrels of residual oil, 30 percent of American residual oil imports in that year. New Yorkers derive 64 percent of their energy from petroleum products, as compared to 46 percent nationally.

New York, with its dependence on imported oil, will be one of the major beneficiaries of DOE's proposed action. The Northeast-Midwest Institute estimates that New Yorkers' residual oil costs would be reduced by approximately $90 million per year. The New York Energy Policy Office estimates a similar savings. These benefits are not savings just for industry; a large portion of the savings will be passed through directly to the customers of the Consolidated Edison Co. and the Long Island Lighting Co. which together provide electricity to all of southeastern New York—New York City, Westchester, Suffolk, and Nassau Counties. Con Ed and LILCO generate almost all of their electricity with imported residual oil. It is not surprising, therefore, that these two utilities have among the highest costs of electricity generation in the country.

The benefits for New York and the east coast are great, and there are those that would argue against giving us these benefits. But we must recognize that the proposed changes in the entitlements system would not be an act of largesse by DOE, but an attempt to correct the

inequities in the present system. As Secretary Schlesinger pointed out in his testimony before the Committee on Environment and Public Works, it is the east coast that is now subsidizing the rest of the country through the unintended effects of the current entitlements system. The proposed action will reduce the subsidy that we now pay; it will not increase the subsidy that we receive.

In a memorandum prepared for me, the Department of Energy stated:

All U.S. consumers benefit from lower priced domestic crude oil (through the entitlements program) as they consume domestically refined products, but East Coast consumers only partially benefit because most of their residual fuel oil needs cannot be met by domestic refineries. This inequity results in higher residual fuel oil prices for the East Coast than in other areas of the country.

That is the current situation, and the law is quite clear that such a situation should not exist. The Emergency Petroleum Act of 1973 (15 U.S.C. 751) provided the statutory authority for the entitlements program. The key passages indicate that there should be an—

(F) equitable distribution of crude oil, residual fuel oil, and refined petroleum products at equitable prices among all regions and areas of the United States and sectors of the petroleum industry, including independent refiners, small refiners, nonbranded independent marketers, branded independent marketers, and among all users; and . . .

(I) minimization of economic distortion, unflexibility, and unnecessary interference with market mechanisms.

The entitlements system is not for the benefit of oil refiners, as some would claim. It is a plan to equalize the prices of oil for consumers in different regions of the country. Our oil prices are not now equal, and the amendment now before the Senate would keep them that way.

Whenever we deal with energy issues in this body, regionalism and a parochial view of issues seem to dominate. But, here is a proposal on which the representatives of the oil producing regions should join east coast Senators. We certainly must have a mutual interest in removing obstacles to domestic refining sales, and that is precisely what this plan would do. The current system extends only a 50-percent entitlement to domestic refiners who sell residual oil on the east coast, an obvious disincentive for domestic refiners. It is proposed that this barrier to domestic sales in the East be removed by extending a full entitlement. This makes sense, and it is clearly in the interest of the producing States as well as the consuming States of the East to support such a plan.

DOE's proposal will obviously benefit the east coast; I am not hesitant to admit that. But it will do so by correcting a situation that is inequitable and inefficient. I hope that my colleagues will carefully consider this issue, an admittedly complex and perhaps baffling one, before they make their decisions.●

Mr. HANSEN. Mr. President, I ask for the yeas and nays on the amendment by the Senator from Louisiana.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HANSEN. Mr. President, I yield the floor.

Mr. JOHNSTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. HANSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HANSEN. Mr. President, I ask unanimous consent that Fred Craft and Carol Sacchi be granted the privileges of the floor during the consideration of and any votes on the legislation before the Senate today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HANSEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask that the cloakrooms put out on the wire an inquiry whether or not there should be a vote up or down on the pending Johnston amendment at 11:30 a.m. today.

Mr. JOHNSTON. Mr. President, I am advised that an amendment has been prepared which will be a substitute to my amendment. I suppose it would not do any harm to put out that hotline to get them over here, but I did want to advise the leader of that fact.

Mr. ROBERT C. BYRD. Mr. President, I also ask that the cloakrooms urge the Senators who have amendments to the Johnston amendment to come to the floor at the present time. There is nobody on the floor who wishes to offer an amendment to the Johnston amendment. Consequently, if it were not for the honor and integrity and charitableness and fairness of the Senators who are on the floor, we would have a vote now—right now—up or down on the Johnston amendment. There is no one here to protect those who are not here, except those of us who are here, and we are reasonable men.

Mr. HANSEN. And fair.

Mr. ROBERT C. BYRD. And fair. We want to protect the rights of Senators, but I do think they ought to be asked to come to the floor and offer their amendments if they have such.

With that, I suggest a quorum call for the protection of Senators who may have an amendment to the Johnston amendment. Otherwise, the Chair would be constrained to put the question to a vote. Am I not correct, I ask the Chair?

The PRESIDING OFFICER. The Senator is absolutely correct.

Mr. ROBERT C. BYRD. The Chair would be constrained to ask for a vote on this amendment.

Mr. JOHNSTON. Will the Senator yield?

Mr. ROBERT C. BYRD. Yes.

The Chair would be required, as a matter of fact, to put the issue to a vote. Am I not correct?

The PRESIDING OFFICER. The Senator is not only correct, but he is really tempting the Chair to do exactly that.

Mr. ROBERT C. BYRD. I yield the floor to the distinguished Senator.

Mr. JOHNSTON. I have the amendment here and I could offer it and we could get a time agreement. We could make that much progress.

Mr. ROBERT C. BYRD. Certainly, the Senator may offer any amendment he wishes to. If he wants to offer an amendment, he has that right at any time. I yield the floor if he wishes to do that.

Mr. HANSEN. Will the Senator yield?

Mr. JOHNSTON. Yes.

Mr. HANSEN. I am not sure I understand what the Senator from Louisiana is saying. He is speaking about an amendment to his amendment?

Mr. JOHNSTON. That is correct. Yesterday, the Senator will recall, we discussed an agreement in concept which we had reached. We asked for unanimous consent to be able to put that on either this bill or the public works bill. That unanimous consent was not forthcoming. In the meantime, this amendment had been drawn.

I have it. It would be offered. I would vote for this amendment based on assurances I would expect to receive on the floor and put in the RECORD to the effect that this would be the final agreement and would not be subject to further erosion of any kind in the conference committee.

Mr. HANSEN. If the Senator will yield, how would the Senator assure the Senator from Wyoming that such an agreement could be ascertained and would be lived up to?

Mr. JOHNSTON. We would get those assurances from those concerned on the east coast.

Mr. HANSEN. And who are those concerned on the east coast?

Mr. JOHNSTON. All Senators from the east coast.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. JOHNSTON. Yes.

Mr. ROBERT C. BYRD. Well, now, is the Senator stating explicitly that the majority leader, who happens to be chairman of the Appropriations Subcommittee on the Department of the Interior, and who would be chairman of the Senate conferees, would be bound hand and foot and gagged? Is that the kind of assurance the Senator is expecting from the Senator from West Virginia, who is not accustomed to that treatment?

Mr. JOHNSTON. If the majority leader would excuse me, please, do not make jokes. I have a hurt back and it hurts me to laugh.

I would not expect the Senator from West Virginia to be gagged, hogtied, and to lose his customary independence.

I would think, however, that there are two sides, in effect, to this issue. One such is the east coast which wants the entitlements, and if we have all of the east coast Senators signed over, the administration signed on, and they control the rulemaking, I would think the Senator from West Virginia, the distinguished majority leader, would not have difficulty in going along with not only the will of the Senate but the will of both sides to a controversy, and I would be confident that would be so.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. JOHNSTON. Yes.

Mr. ROBERT C. BYRD. The Senator from West Virginia certainly wants to uphold the desire of the Senate, regardless of what the Senator from West Virginia's position may be on this amendment, if it is agreed to.

I have not made up my mind yet. I may be for it, I may not be for it.

But there comes a time in conference when, in order to get movement and get action, one House has to yield to the other body.

So I am afraid that the Senator should not be under any delusions as to the need for some flexibility when the issue reaches a point in time when there must be some give or take.

I would hope he would understand this Senator would not be bound by the administration, or anybody else. I can be bound by the Senate. But even instructions to Senators, as the Senator knows, even instructions can be disobeyed, and the instructions of the Senate can be disobeyed in conference. That has happened.

So I just do not want to leave anybody under any misunderstanding as to what my position would be in conference. I certainly want to uphold the Senate's position as far as I can. But I would like to see an Interior appropriations bill put on the President's desk at some point in time, which means somebody has to give on some of these issues that arise in conference.

Mr. JOHNSTON. If the Senator is seeking to persuade me not to go with the compromise, he has almost succeeded.

So, Mr. President, I would——

Mr. ROBERT C. BYRD. Mr. President, if the Senator has a substitute and he wishes to offer it, it is his right to do so.

Mr. JOHNSTON. I was going to be for a substitute only with the view this would be a compromise lived up to by all parties. But I think the Senator properly points out that would need to be flexible in conference and that it would be subject to further bargaining in conference.

Based on that, I do not believe at this point I could offer the amendment.

Mr. HANSEN. Will the Senator from Louisiana yield?

Mr. JOHNSTON. Yes.

Mr. HANSEN. Mr. President, it occurs to me that, first, I should observe that I ascribe all good faith and sincerity to the remarks and observations by my friend from Louisiana. I would not want to be misunderstood in any fashion in that respect.

But I do want to make the point that despite his best intentioned efforts to make certain that all of the principals, or all of those as he may have implied, I am not quoting, who would be affected would be approached and talked to and their consent would have been secured in advance, I think it is presumptuous to assume that only the Northeastern Senators are interested in this. As I understand, the way the entitlements program is working now, and it has not been explained any better, in my opinion, than was explained earlier this morning by the Senator from Louisiana, it takes money from refiners and users in other parts of the country to minimize the cost of residual fuel oil in other parts of the country, in the Northeast as an example, and in the State of Michigan as a second example, because by the access to barge transportation the State of Michigan uses a lot of residual fuel oil.

But the point is that many sections of this country, in fact, I think there is not a single State that is not interested in this issue, it seems to me that to presume we could talk to a select number of Senators and know that whatever thought of compromise we might arrive here would be approved begs the point, because I submit that cannot be done.

I spoke yesterday about the impact this program has on my State of Wyoming. If I could presume to suggest what my colleague from Wyoming would say, I think I did so yesterday in saying that it does not make our voters very happy to think we live in a State that has felt the impact of industrial activity—when I say the impact of it, it has not all been adverse, by any means. We have a good, strong, booming economy out there, not only from oil and gas and uranium, but from coal, as well.

Nevertheless, if this program is changed, if the entitlements programs are expanded or increased, it will take additional dollars out of the pockets of Wyoming people to subsidize people in New England, and at least in the State of Michigan and maybe other States as well, but in that State at least, to make their fuel bill less.

So I do not think it follows at all that anyone can say we are going to get this all worked out and we are going to conference and there will not be any changes made.

I have not been in this Chamber as long as many Members have. But I have been here longer, I guess, than a majority of the Members. Those conferences on which I have participated almost—almost—Mr. President, without exception, have resulted in both sides making concessions. That is the whole idea of a conference. The House passes one bill and the Senate another and in order to reconcile those differences a conference is scheduled. It is not often that the actions of that conference result in one side making all of the concessions and agreeing in toto to what the other side has asked for.

I yield to the distinguished Senator from Oklahoma.

Mr. BARTLETT. Mr. President, I thank the distinguished Senator from Wyoming.

I agree with him, with my limited experience, that the conferees from the House and the Senate generally reach a compromise somewhere in the middle—but not always. Often, many times are considered, and sometimes one set of conferees will support completely a position different from that of the other side, but that is generally counterbalanced by a reversal of that action on another item.

Mr. President, I support very strongly the amendment offered by the Senator from Louisiana (Mr. JOHNSTON). However, I think it is important to take a look at the background to the entitlements program and not be of the opinion that it is something that started from conditions that did not build up over the years.

It really had its beginning back in the 1950's. At that time, we started importing oil in significant quantities. We had excess productive capacity, but we decided to conserve our oil and gas by reducing the production of oil. We were very well served by this excess domestic capacity of some 2 million to 3 million barrels during two Mideast crises. During those crises, we were able to supply oil to our friends in Europe and in the Middle East.

However, during the late 1950's, President Eisenhower instituted a voluntary import program—this was in 1958—and a year later, a mandatory program. The whole purpose of the mandatory import program was to protect the domestic oil and gas industry from the importation of cheap foreign oil.

It is rather ironic to look upon that now, since the problem faced with the entitlements is the expensive imported foreign oil. However, at that time the problem that affected us was imported oil coming in at about $1 a barrel and competing with the domestic oil at $3 a barrel. The mandatory program worked to a degree and certainly did provide some protection to the domestic oil and gas industry. It also served our national security.

It was then agreed that our imports should be limited to approximately 10 percent of our domestic consumption, so that we would not be overreliant on imports to the extent that our national security would be threatened.

The mandatory import program also was used by administrations as a club over the head of the oil and gas industry. This was done by threatening to increase the amount permitted to be imported—the cheap, foreign oil—as a threat to domestic production, to prevent the domestic producers from raising the price of domestic oil and gas as the cost of production went up.

Thereafter, these efforts—this using of the import quota as a club—was responsible for squeezing the profits of the oil and gas industry. This profit squeeze took place over a considerable length of time and also resulted in less domestic oil production being found, developed, and made producible.

Then in 1973 we had the embargo by the OAPEC nations, in which we were cut off from a large part of our imports—but not all, thanks to the actions of the major oil companies. This, of course, put a lot of pressure on our Nation, both in-

dustrially, from a national security point of view, and individually on American citizens, who found it quite inconvenient to wait for long periods of time to fill their gas tanks, if they could fill them at all.

Later, we had the institution of entitlements. This came about as a necessary evil due to our price control system

It seems to me, in following this matter rather closely since 1973, that it is somewhat like a series of leaks in a dike. You arbitrarily provide a certain program to deal with a problem and put your thumb in one hole in the dike, and that leads to more pressure somewhere else and creates probably five more problems, and hence other mandatory controls become necessary.

So the real culprit in all this is our mandatory control system on the price of oil and gas. If this were eliminated, we would then eliminate any need at all for entitlements.

I remind my colleagues that an amendment identical to that offered by the distinguished Senator from Louisiana was adopted by the Senate Committee on Energy and Natural Resources by a vote of 17 to 1. Such an endorsement by the jurisdictional committee cannot be taken lightly.

Mr. President, the Johnston amendment is necessitated by the administration's proposal to increase dramatically the crude oil entitlement benefit for imported residual oil on the east coast. The proposal would increase the subsidy by 233 percent.

The effect of increasing this entitlement benefit would be threefold: First, gasoline and other refined product prices would rise for all consumers; second fuel oil imports would be encouraged; and third, the domestic refining industry would be adversely impacted, to the benefit of foreign refiners.

The intent of the proposed subsidy increase is to lower artificially the price of imported residual oil on the east coast. The effect of this lower price will be to encourage greater imports of foreign oil in preference to higher priced domestically refined fuel oil. If the subsidy were allowed to be absorbed by the importers, and not passed on to east coast consumers as intended, the greater profit incentive for imports would increase the imports further.

Implementation of this subsidy would not only discourage construction of new U.S. domestic refining capacity, it would put many existing refineries in a noncompetitive posture. This would result in a loss of American jobs, American security, and American economic strength; and it would weaken our domestic energy self-sufficiency at a time when we should do all we can to strengthen it.

Who pays for this subsidy? The answer is simple: everyone who is not benefited directly by the subsidy itself. That includes consumers in two-thirds of the States. It is unfair and illogical to require consumers in my State of Oklahoma to directly subsidize the importation of foreign-refined fuel oil on the east coast.

Mr. President, I have recounted the background that has led to the present situation of continued price controls on oil and gas and the entitlements program. Political muscle has been used from the very beginning, combined with shortsightedness by the people on the east coast not looking at the overall picture of our great need to keep a strong energy industry viable, alive, and looking to the future. This is the problem we have today.

This will be exacerbated further if this entitlements subsidy increase of 233 percent comes about.

The entitlements system is an evil. It has become a tool to achieve political goals. It is not in the best interest of a strong domestic energy industry. It is not in the best interests of this Nation.

I think everyone familiar at all with our energy plight recognizes that our Nation needs to invest in a stronger capability of producing energy, and the first place to look for an improvement and an increase is in the oil and gas sector.

I think it is obvious that we are now aware of the threat to our national security of our lack of domestic production of oil and gas. We have instituted an extremely expensive program of storing oil so that if we are cut off with another embargo as we were in 1973, we will have some time to prepare ourselves for the consequences of a shortfall on our national security and our economic and industrial well-being.

This is an extremely expensive thing to do. It seems to me so shortsighted to be willing to pay this large amount of money, estimated to be ultimately $20 billion, and which I am willing to pay, and not be willing to face the crisis in another way—and work to solve the problem—by lifting the controls on oil and gas.

This is the answer to this kind of unfairness. This is the answer to this kind of selfishness and provincialism that will take place if we have such a sizable increase in the entitlements subsidy program.

Mr. President, I yield to the Senator from Wyoming.

Mr. STONE and Mr. HANSEN addressed the Chair.

The PRESIDING OFFICER. Does the Senator yield for a question?

Mr. BARTLETT. I was yielding at the request of the Senator from Wyoming. If the Senator from Wyoming is not ready, I am happy to yield the floor.

Mr. HANSEN. I am ready, but I am happy to defer in order that the Senator from Florida might ask a question.

Mr. STONE. No, I have no question. I have a few remarks but they will not take long, only about 5 minutes.

The PRESIDING OFFICER. The Senator from Oklahoma has the floor.

Mr. HANSEN. Mr. President, I ask unanimous consent that the Senator from Florida be recognized next and that I follow him.

Mr. BARTLETT. Mr. President, I yield the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Florida is recognized.

Mr. STONE. I thank the Senator from Wyoming.

Mr. President, I rise in opposition to the amendment offered by the distinguished Senator from Louisiana. I believe that the administration must have the authority to increase the current entitlement subsidy for imported residual oil products. Whatever may be the long-term goals for a national energy policy, there are pressing short-term energy problems the country must address. Historical market patterns and regional differences have complicated our efforts to solve these problems. The dependence of the East Coast, including Florida, on imported residual fuel oil is an example.

Florida has strongly supported the extension of the entitlements program to imported residual fuel oil since its inception. The reason is clear and simple—high utility rates. The consumers of my State—many on limited fixed incomes—pay utility bills which are among the highest in America.

Florida is the second largest consumer of residual fuel oil in PAD 1, with consumption of 89 million barrels in 1976, the latest year for whch DOE has final figures. About 83 percent of this total was used to generate electricity. Florida is overwhelmingly dependent on foreign suppliers because of history and geography, not chance. The supply system developed in response to confused energy policies of the past which discouraged domestic refining of residual fuel oil. As a result, by 1976, two-thirds of Florida's residual fuel oil was imported.

Unfortunately, dependence on foreign oil means that the price is set by OPEC. It also means that it does not reflect the benefits generally realized from the domestic crude oil price control and entitlements program.

Since 1973, the price of imported residual fuel oil has escalated much more than the prices of other petroleum products. Electric consumers in Florida, dependent on residual fuel oil for electricity generation, have realized a drastic increase in monthly electric bills.

It is estimated that a 100 percent entitlement for east coast importers of residual oil will save Florida electric consumers about $47,500,000 per year. Florida's utilities operate under the State public service commission's fuel adjustment clause which will have the effect of passing along directly to consumers any decreases in the cost of residual fuel.

In my opinion, Mr. President, raising the residual oil entitlement represents simple equity for those consumers whose electricity bills are vulnerable to the whims of the OPEC cartel. What is at stake is the economic well-being, in some cases the basic comfort, of millions of our citizens.

Mr. President, I ask unanimous consent that the testimony on this subject of Mr. William T. Mayo, chairman of the Florida Public Service Commission, before the Committee on Interstate and Foreign Commerce Subcommittee on Energy and Power be printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

TESTIMONY OF WILLIAM T. MAYO

My name is William T. Mayo. I have been a member of the Public Service Commission of Florida for fourteen consecutive years, six of them as Chairman. I appreciate very much the opportunity to appear before you today on behalf of the Florida Public Service Commission and consumers of electricity throughout the State of Florida to present the official position of the State of Florida.

Florida's problem is a fundamental one. We are the second largest consumer of residual fuel oil in PAD I, with consumption of about 89 million barrels in 1976, the latest year for which DOE has final figures. Of this, about 74 million barrels, or 83%, was used to generate electricity. Florida is overwhelmingly dependent on foreign suppliers because of history and geography, not choice. The supply system was developed by the oil companies in response to the confused energy policies of the past which discouraged domestic refining of resid. As a result, by 1976 two-thirds of Florida's resid came from foreign refiners. This great dependence on foreign oil effectively means that the price is set in the world marketplace and very inadequately reflects domestic crude oil price control and entitlements program. In fact, the reverse entitlements program raises the price of resid in Florida. Since the domestic programs went into effect in 1973, the price of resid has escalated much more than prices of other petroleum products. As a result, electric customers in those areas substantially dependent on resid have seen drastic increases in monthly electric bills. Impacts in Florida have been even worse, because of its geography and climate, and because of the very large concentrations of retired persons and others on small and/or fixed incomes.

Florida has done everything we can to help ourselves, and I will go into specifics in a moment. The fact remains that no matter what we do, Florida will have a continuing heavy dependence on resid for many years. We will thus continue to be at the mercy of world market conditions, and we can only look to Congress and DOE to help, by correcting the inequities in the entitlements program.

Specifically, Florida supports the proposal recently publicized by DOE under which imported resid would receive the full $2.00 per barrel fractional entitlement less about $0.63 for domestic refinery protection. This proposal would help both direct and indirect Eastern consumers of resid by bringing the prices they pay into equality with prices consumers pay for oil products elsewhere in the United States.

According to preliminary figures published by DOE, this proposed change would reduce the price of imported resid by about $0.74 a barrel. Since the price of resid in this country is set by the world marketplace, the reduction would apply both to imported and domestic resid in much of the Eastern United States. The entitlements provided for imported resid under this program would be paid for out of the entitlements pool and would be spread evenly among all consumers of petroleum products throughout the country at a cost, according to DOE's estimates, of no more than 2/10 cents per gallon. The net savings to Florida consumers under such a program would be about $47,500,000 per year.

Some have questioned whether the substantial benefits of an increased entitlement for imported resid would be flowed through to the ultimate consumer. In Florida, as I have mentioned, over 80% of the residual fuel oil burned is used to generate electricity. Investor owned utilities in Florida all operate under the Commission's fuel adjustment clause which passes directly along to the consumer any increases or decreases in the cost of fuel and the municipal systems have similar clauses. Savings in the purchase of residual fuel oil from entitlements are passed directly to consumers through this clause which is policed by the Commission in monthly hearings.

DOE is also considering elimination of reverse entitlements. Under this aspect of the entitlements program, all refiners outside of PAD I producing oil for sale within PAD I must sacrifice a 50% entitlement for each barrel over and above 5,000 barrels a day. The bottom line is that resid produced by U.S. refiners outside of PAD I costs more if shipped into PAD I than if shipped anywhere else in the country. In effect, oil shipped to the East Coast carries a surcharge. Elimination of the reverse entitlement would eliminate this differential and free additional supplies for the East Coast market.

As I mentioned earlier, we in Florida have not been sitting on our hands and crying. In contrast, under the leadership of the Florida Public Service Commission, we have conducted an active program to reduce our consumption of resid as much as possible. We have had to use a number of methods, because our potential for converting generating units to coal is very limited; only two large units can be converted. Of these, one has been converted to coal and the other is in the process of being converted. The Commission staff studied the matter intensively and concluded that the cost of converting all plants above 20 megawatts, whether or not they are presently capable of burning coal, was between 9 and 13 billion dollars, which rather clearly says that to do so is a waste of resources, to say nothing of environmental and transportation problems. Of course, all new construction is coal, and when these baseload plants come on line it will make possible the retirement of older, less efficient oil units.

With the possibility of large scale coal conversion denied to us, Florida have actively pursued other alternatives. We tried seasonal pricing and concluded after a year's trial that it did not work and was not understood by consumers. We have conducted, and are conducting now, various experiments in time-of-day pricing and similar techniques with which this Committee is familiar, including an inverted rate for our largest utility. We have conducted very detailed studies in such areas as joint generation planning, power pooling and central dispatch, each of which cost a half-million dollars, which DOE is using as a model for what state commissions ought to be doing. The results of these studies are being implemented. These include energy audit programs for the customers of utilities under our jurisdiction, including life cycle analyses and home conservation and construction standards and active conservation programs. Our most exciting and immediate innovation is our "power broker" concept, which redispatches the state on an hourly basis to ensure that the most efficient generation mix is on the line at all times. The result is a fuel saving of over $1.5 million per month, which is entirely a saving in oil and therefore in the balance of payments as well. We expect this saving to continue to climb, because our concept will allow seasonal shutdown of older, less efficient units. Of course, these savings are passed directly to the rate-payers.

In conclusion, let me reiterate that Florida, in common with other Eastern states, has a problem. We have done and are doing everything we can to help ourselves. Now we need your help.

I appreciate very much the opportunity to present the official state position of Florida on this complex topic. I urge you to consider seriously the present inequities which have led to disproportionately high electric utility rates throughout much of the Eastern United States. We need fairer, more rational national policy and much needed relief for beleaguered electricity consumers in States such as Florida.

Mr. STONE. I yield.

Mr. TOWER addressed the Chair.

Mr. STONE. We had a unanimous-consent order that Senator HANSEN, of Wyoming, would be recognized, but I am sure he will yield to the Senator from Texas.

Mr. HANSEN. I am happy to yield to the Senator.

Mr. TOWER. May I have 3 minutes?

Mr. HANSEN. Yes.

The PRESIDING OFFICER. The Senator from Wyoming is recognized and yields to the Senator from Texas.

Mr. HANSEN. Without losing his right to the floor?

The PRESIDING OFFICER. The Senator is correct.

Mr. TOWER. I am greatly honored to have the very distinguished Senator from Wyoming yield to me.

Mr. President, I am pleased to join my able colleague from Louisiana in support of this amendment to block implementation of the administration's east coast residual oil entitlements change. The plan cannot be justified in terms of need, or policy, or equity. It is, plain and simple, a major energy price subsidy which benefits one region of this country at the expense of everyone else.

I believe it is time for us to call a halt to the kind of regional favoritism by the administration's plan. More to the point, it is time that we put a stop to this oft-repeated myth that New Englanders and other Northeasterners are the only citizens of this country who pay high energy prices.

The fact is, of course, that Texans—along with others—pay among the highest energy prices in the Nation. Yet they ask for no subsidy and no special consideration. What is more, Texas—unlike some others—have contributed mightily toward the solution of this Nation's energy supply problems.

The administration's residual entitlements plan, however, not only subsidizes east coast oil consumers; it also has the effect of rewarding most a region of the country which has, on the whole, done little to share the national burden of energy production and supply. The States which would benefit most from this rules change have, in general, done all within their power over the years to prevent necessary development of new energy supplies, both within their respective State boundaries and in the Nation as a whole.

The entitlements change for residual fuel oil is only the most recent example in a pattern of Carter administration regional bias in energy policy. The original Carter national energy plan would have made the State of Texas little more than an energy colony for the benefit of the nonproducing areas of the country. In many important respects, the President's plan was little less than an attempt at Federal takeover and consfication of the precious energy resources of Texas. It would have artificially de-

pressed oil and gas prices below replacement levels while authorizing their allocation by Presidential action.

The Carter legislation would have required Texas industries and electric utilities—unreasonably and at great cost—to convert from the use of Texas oil and gas to coal—coal which, in many cases, would have to be purchased outside the State and transported at great cost.

The President's plan also imposed a heating oil tax credit that would have required all Americans to chip in to help pay the fuel bills of east coast consumers of home heating oil. This is entitlements proposal to subsidize residual fuel oil is a variation on that same theme.

The administration's plan will cost American oil consumers many millions of dollars. One study has estimated that Texans alone would pay about $28 million more per year in increased costs for gasoline and other refined petroleum products. Together, the four States of Texas, Louisiana, Oklahoma, and New Mexico would pay almost $47 million in increased fuel costs. All this to subsidize one region of the United States—a region which can claim little justification for special treatment.

I urge the Senate to adopt this amendment and thus express its disapproval of this kind of special interest, regionally-biased foreign oil subsidy scheme.

I thank my friend from Wyoming.

Mr. RIEGLE. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. HANSEN. I am pleased to yield to the distinguished Senator from Michigan.

Mr. RIEGLE. I thank the Senator. I ask unanimous consent that Dave Hansell of my staff have the privilege of the floor during the debates and votes on this measure.

The PRESIDING OFFICER (Mr. HODGES). Without objection, it is so ordered.

Mr. DURKIN. Mr. President, will the Senator yield for another unanimous-consent request?

Mr. HANSEN. I yield.

Mr. DURKIN. I ask unanimous consent that Ed Tanzman and Chris Burke of my staff have the privileges of the floor during the consideration of this measure and the votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HANSEN. Mr. President, Senator JOHNSTON has proposed an amendment to limit the use of funds by the Department of Energy to further subsidize imports of refined petroleum imports. The Johnston amendment should be adopted by the Senate for the following reasons:

First. Consumers may receive little, if any, of the new subsidy. The subsidy may be completely absorbed by foreign refiners who can raise their prices for residual oil in an amount equal to the new subsidy without changing the current cost of resid to U.S. importers. A Library of Congress study shows that when the 30 percent subsidy was adopted in 1976, very little of it was passed through to the consumer.

Second. The entitlements program is a complex bureaucratic scheme that should not be made more complicated. The entitlements funds, which transfer approximately $200 million each month among domestic firms, provide the DOE with a vast funding pool to distribute as it wishes among competing interests. The potential for abuse of this discretion is substantial.

Third. Because the entitlements program subsidizes imports of foreign crude oil and petroleum products, it effectively encourages continued reliance on foreign sources of energy. The new proposal relating to imported residual fuel oil could make the United States even more dependent on foreign refiners.

Fourth. Under the Emergency Petroleum Allocation Act, it is the responsibility of DOE to insure that there is distribution of residual fuel oil at equitable prices among all regions in the country. Although fuel oil prices are currently pegged at equitable levels, DOE states that it wants to use its power under the EPAA to give the east coast consumers residual fuel oil prices that are, in effect, equal to the lowest fuel oil prices in the Nation. In other words, at this time the east coast residual fuel oil prices are as low as prices in any region of the country except the gulf coast. And gulf coast prices are artificially low because they include no transportation costs. Therefore, this alteration in the entitlements program may exceed the grounds of the Agency's legislative directive.

Fifth. The DOE proposal will cause the costs of domestically refined products to rise in all regions of the country. Even in the area which will receive the new entitlement, the cost of domestically refined gasoline and distillate will rise.

Sixth. Inflation is the harshest of all the bills that the consumer must pay. Energy imports contribute greatly to the forces that push inflation upward. By maintaining or increasing energy imports, the DOE proposal may be trading one kind of a bill for a less obvious, but more devastating one.

Seventh. By subsidizing foreign refiners with this proposal, we undermine our own domestic refining industry. This proposal represents an extension of a U.S. fuels policy that has reversed the downward trend in residual fuel imports since the Arab embargo and stifled attempts to expand domestic refining capacity. Carribean refineries are required to adhere to fewer environmental constraints than U.S. plants, but enjoy significant tax advantages over their U.S. competitors. This proposal will just give foreign refineries an additional advantage.

Eighth. The current east coast residual fuel oil problem is not caused by an erroneous entitlements policy but rather, by an unsound domestic refinery policy. And it is not really a problem of subscribing to the "wrong" policy—the United States has no domestic refinery policy. We continue to stumble along, short almost 3 million barrels of refining capacity daily.

Ninth. The adoption of the DOE proposal will foster a regional approach to energy problems. This proposal may aid one region; however, it will surely disadvantage all others. This approach may be politically expedient, but it reflects bad policy and is inherently unfair.

Tenth. Consumers who do not reside on the east coast or in Michigan will not benefit from the increased subsidy, as some sources have suggested. Proponents of the regulation contend that residual fuel oil prices are set by east coast prices. As a result, as prices on the east coast decrease, prices elsewhere allegedly should follow. An examination of the average weighted prices of residual fuel oil used for residential purposes reflects that except for February through April 1977, the price for resid has been lower on the east coast than in areas outside of the east coast. The trend of shipment of resid refined elsewhere in the counrty to the east coast further disproves the assumption that east coast resid prices set prices for other regions. As less resid refined in other parts of the country is shipped to the east coast, the connection between the markets should diminish. For example, in 1975, 33.5 percent of gulf coast resid production was sent to the east coast. It has considerably declined since then. In 1976, gulf coast resid accounted for 26.8 precent of the east coast's total; by 1977, that percentage dropped to 13.6 percent. The percentage should continue to decline as utilities in the gulf coast area and other parts of the country increasingly turn to residual fuel oil.

The PRESIDING OFFICER. The Senator from Texas.

Mr. BENTSEN. Mr. President, first let me congratulate the Senator from Wyoming on a very factual and logical presentation of this particular issue.

The entitlements program has become a mess of contradictions and conflicts, and is really understood only by a handful of economists, lawyers and DOE bureaucrats.

I am delighted to support Senator JOHNSTON's amendment, which would put some limits on the use of the entitlements program. When the entitlements program was first proposed in 1974, its sole purpose was to eliminate the competitive advantage that some refineries had over other refineries, because they had a greater quantity of artificially low priced domestic oil. It was to spread equally the burden of the cost of the imported oil, the very expensive oil that was coming into this country.

That was the original objective of the entitlements program. However, now it is used for a whole variety of purposes. It has become an extraordinarily complicated and very far-reaching program. Recently we have learned that the Department of Energy wants to use that entitlements program to further subsidize the cost of the imports of residual oil to the east coast.

I do not object to the Department's desire to lower residential heating bills. I think that is a very worthy objective, until they acknowledge that the effect of this proposal is to raise the heating bills for the residents of my State and the rest of the country; then it is a very unfair proposal.

Unless this amendment is adopted, that is precisely what is going to happen. They are going to lower the cost for heating residences on the east coast and they are going to raise it for Louisiana, Texas, and most of the rest of the Nation.

If those regulations become effective, we will find that the cost of refined products in every State will be increased by a corresponding amount, to pay for the additional fuel oil entitlements. In Texas, I am told, the entitlements change will cost consumers an estimated $18 million in higher gasoline costs alone. Most other States will be similarly affected.

Mr. President, we are all concerned about our rapidly growing balance-of-trade deficit which for the first 5 months of this year reached $8.2 billion, an increase of 79 percent over the previous 5 months. Imported crude and residual fuel oil contributed $15.9 billion to our total import expenditures during that same period of time.

Given these facts, and the obvious danger that they pose to our economic well-being, I just cannot understand why the Department of Energy would propose a program that would further subsidize the importation of foreign oil.

It is clear to me that the proposed entitlements changes will provide an incentive for increasing residual fuel oil imports, and further add to the drain on the dollar.

I do not believe there is any justification for providing relief to east coast consumers beyond that provided to citizens in all the other parts of this Nation. I have not been persuaded that the cost to east coast consumers is any higher than that experienced in other regions of this country. In fact, I would argue that the utility rates in my home State of Texas are as high, and frequently much higher, than they are on the east coast. Let me compare what is happening to utility rates in Texas and what is happening on the east coast.

Since 1967, electric utility rates have increased by 72 percent in Boston, Mass. During that same period of time, they increased by 88 percent in Houston, Tex. According to the Bureau of Labor Statistics, the retail price for all energy has increased by almost identical amounts in Houston and Boston.

The comparison of residual fuel oil prices reveals that the costs on the east coast are often no greater than those for the same quality of fuel in other parts of the country. If that is the case, everybody in this Nation is suffering from increased utility costs. Consumers all over the country are finding that their monthly utility costs are sometimes as high, or even higher, than the mortgage payments on their homes.

The east coast is in trouble; but so are the Southwest, the West, and the central part of the United States. We are in this problem together and it is no solution to help one section of the country at the expense of the rest of the Nation.

Mr. President, I want to help lower energy costs just as much as anyone. But I believe the Senate should consider these problems with the best interests of the entire Nation in mind. As individual Members of Congress, we have a responsibility to fight for programs that benefit our constituents, but we also have the responsibility to look beyond sectional differences and to create policies that will benefit the entire Nation as a whole.

Mr. President, I think that this particular approach is politically inspired. I think it is inequitable. I think the amendment of the Senator from Louisiana will do much to correct this situation, and I support it.

Mr. STENNIS. Mr. President, will the Senator yield to me for less than 1 minute?

Mr. BENTSEN. Yes, I yield.

Mr. STENNIS. I want to commend the Senator for the very fine factual statement he has made here. There may be disputed points in his factual statement; to some extent I suppose there are. But all told, I think it is a splendid statement that you can hie to and put your teeth in, and the Senator's logic is very convincing.

None of us want to cast a vote in a so-called sectional manner or provincial manner. We are one Nation; we are not divided, and this problem is common to all.

I believe the Senator's speech has thrown a clear factual light on this problem, showing it is not a sectional matter after all, and that one policy will have to cover the Nation as a whole.

I thank the Senator for his fine work on this subject.

Mr. BENTSEN. I thank the distinguished Senator from Mississippi, who has risen time and time again above sectional interests to support policies and programs which benefit the entire Nation as a whole.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Louisiana.

Mr. DURKIN and Mr. BROOKE addressed the Chair.

The PRESIDING OFFICER. The Senator from New Hampshire sought recognition first.

Mr. DURKIN. Mr. President, I will be happy to yield to the Senator from Massachusetts without losing my right to the floor.

The PRESIDING OFFICER. Does the Senator ask unanimous consent to do that?

Mr. DURKIN. Yes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The Senator from Massachusetts.

Mr. BROOKE. Mr. President, I thank my distinguished colleague from New Hampshire.

Mr. President, if I may have the attention of the distinguished proponent of this amendment, the distinguished Senator from Louisiana (Mr. JOHNSTON), I would like to propound some questions.

Mr. President, as I understand it, we have pending the so-called Johnston amendment, which amendment would, in effect, take down the rule which provides for the entitlements program. Is that not true?

Mr. JOHNSTON. Will the Senator repeat the question?

Mr. BROOKE. We have before the Senate——

The PRESIDING OFFICER. Will the Senator withhold for a moment? The Senate will be in order. Senators are engaging in colloquy and posing questions. There is difficulty in hearing. The Senate will please be in order.

The Senator from Massachusetts.

Mr. BROOKE. Mr. President, I first ask unanimous consent that the Senator from Vermont be recognized without my losing the floor.

The PRESIDING OFFICER. Is there objection?

Mr. DURKIN. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. DURKIN. I yielded the floor to Senator BROOKE without losing my right to the floor.

The PRESIDING OFFICER. That is correct. The Senator from New Hampshire has the right to the floor after Senator BROOKE concludes his speech.

Mr. DURKIN. So would the proper form be for me to yield to Senator LEAHY for the purpose of a unanimous-consent request without losing my right to the floor?

The PRESIDING OFFICER. The Senator is correct. Does the Senator make that request?

Mr. DURKIN. I do.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I ask unanimous consent that in all actions today and into this evening, and throughout whatever time we are still on the Interior appropriations bill, Robert Paquin and Susan Brannigan, of my office, have all privileges of the floor during votes and deliberations.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Massachusetts.

Mr. STEVENS. Will the Senator yield for a unanimous-consent request?

Mr. BROOKE. Without losing the right to the floor, which I understand I have by virtue of the right of the Senator from New Hampshire.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, I will have to begin interposing objections to this business of fielding out to Senators who in turn field out to Senators who in turn field out to Senators. If this is going to be a filibuster, let us get through with it as soon as we can. I have no way of objecting to those requests which have already been entered, but I hope if I am not on the floor some other Senator will object to fielding out time to Senators who in turn field out time to Senators who in turn field out time. If a Senator wants to speak on his own, let him speak.

If he wants to yield the floor, let him yield the floor. If there is going to be a filibuster, I want to know about it.

The PRESIDING OFFICER. Is there objection to the last request? Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that my administra-

tive assistant, Tim McKeever be granted the privileges of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Massachusetts.

Mr. BROOKE. If I may explain to the distinguished majority leader, I am merely yielding for the purpose of obtaining unanimous consent for a staff member to be granted the privileges of the floor. The Senator is correct, that Senators should not yield and yield and yield and yield.

My question to the distinguished Senator from Louisiana is this: As of the present time, we are now debating the amendment of the Senator from Louisiana which, in effect, would pull down the rule that would permit the entitlement program. Is that correct?

Mr. JOHNSTON. The Senator is correct. But for my amendment, the pending DOE rulemaking would go into effect on August 26, I believe, which would provide 100 percent on the east coast.

Mr. BROOKE. Is it not also true that throughout all of yesterday the dinstinguished Senator from Louisiana and I, together with other Senators, attempted to work out some agreement which would provide, rather than 100 percent, to take it from 30 percent to 50 percent? Is that true?

Mr. JOHNSTON. The Senator is correct.

Mr. BROOKE. Is it not further true that in the course of those negotiations we were unable to come forth with such an amendment with our colleagues because of some procedural difficulties?

Mr. JOHNSTON. The Senator is correct.

Mr. BROOKE. And is it not further true that in an attempt to resolve those difficulties we attempted to write legislative language that would be contained in the amendment which the Senator ultimately would present for consideration by the Senate?

Mr. JOHNSTON. The Senator is correct.

Mr. BROOKE. Now if I may ask the Senator from Louisiana, as of this time has that legislative language been perfected to the degree that we are now ready to present it to the Senate for its consideration?

Mr. JOHNSTON. The amendment was prepared. However, an error was found in it and that is being corrected now. That amendment should be ready momentarily.

Mr. BROOKE. Mr. President, my distinguished colleague from Louisiana has worked so diligently and sincerely in an effort to arrive at a compromise between the two sides.

My next question to him is this: Is it still the intention of the Senator from Louisiana, once this legislative language is perfected, to propose that language to the Senate for its consideration?

Mr. JOHNSTON. Let me say to my good friend from Massachusetts that it would be my intention to join in such an amendment, provided we have an agreement of minds between the parties as to the fact that this is the amendment, that this is the agreement, and it will be adhered to.

The distinguished Senator from Wyoming (Mr. HANSEN) brought up a very cogent question this morning. He asked how can we be assured that this amendment agreed to on the floor of the Senate will not be further eroded and compromised in the conference committee? That question, in turn, was put to the distinguished chairman of the Senate conferees, who said, yes, indeed, he would need flexibility. He would not be able to go into that conference with his hands tied.

Unless we can get some kind of assurance that this would be the amendment that would not be subject to further compromise, then I would have to reconsider cosponsorship of this amendment. I think its terms are fair. I think it represents a proper balancing of the fear of losing against the chance of winning. I think it treats the east coast fairly. Most importantly, it is only a temporary measure between now and July 1.

I think it is a fair amendment, a fair compromise. But we must work out mutual arrangements to assure that, as best we can, this amendment will be the final word, and that all parties will sign on to it.

Does the Senator have some ideas as to how we might incorporate such assurances into some kind of an agreement that would reassure all parties in this matter?

Mr. BROOKE. Let me say that I hope the distinguished Senator from Louisiana will continue to support the concept and the intent of what he has described as a fair and equitable compromise by both sides on this issue.

The distinguished Senator from Wyoming, in his customary manner, always makes cogent observations. I can understand the cogency of his most recent observation concerning this particular issue.

As I understand it, there is nothing in the House bill relative to the entitlement program at all.

If we did arrive at a compromise that could be accepted by the Senate, I do not see how there would be any flexibility so far as that portion of this bill is concerned when we go into conference with the House.

Maybe I have missed something and I certainly stand to be corrected. If there is anything in the House bill—let me ask that first. It is my understanding that there is nothing in the House bill that refers to the entitlements program.

Mr. JOHNSTON. Let me ask specifically, has the Senator from Massachusetts been in touch with the distinguished majority leader and/or the distinguished Speaker of the House, Mr. O'NEILL, who has a great interest in this bill?

Mr. BROOKE. To respond first to the question of my friend from Louisiana, I have not been directly in contact with the distinguished Speaker of the House, Mr. O'NEILL. There were members of that group who did contact the Speaker's office as of yesterday—I think in the course of our discussions—to ascertain if there were some possibility of getting a ruling from DOE as expeditiously as possible; because, as the Senator from Louisiana will recall, we were working on a very limited time limitation yesterday, hoping that we would be able to resolve this matter in time to have completed action on the Interior appropriations bill prior to the close of last night's session.

To my knowledge that is the only contact that was made with the Speaker of the House.

Mr. JOHNSTON. I should think the Speaker ought to be signed on to this compromise, and explicitly so, if we are to assure the Members of the Senate that this is a compromise and not simply a first shot at a bargaining arrangement.

Mr. BROOKE. I have been informed by my staff that the Speaker's staff called at some time and said that the Speaker did support the concept of the compromise. That may be some assurance to the distinguished Senator from Louisiana that the House would, perhaps, go along with it. If it did not go along with it, I would understand the concern of the Senator from Wyoming about this matter, which is that we might get into conflict, I assume, and he feels that if we got into conflict with this compromise language and the conference did not accept it, that would mean that the rule would stand and go into effect in August.

That is the Senator's fear, I take it.

Mr. HANSEN. If I may respond to the inqury made by the Senator from Massachusetts, let me say, Mr. President, that that is one of my concerns. The second one is that I think we are really naive—and I do not mean to use that adjective in any manner at all to criticize or to demean anyone in the Chamber at all.

But it seems that we are naive to take as tenuous an assurance as I gather the remarks for the Senator from Massachusetts imply, that it is information, I believe he said, conveyed to him by staff that the speaker goes along with the concept. It reminds me of a situation I was in last fall. We were debating one of the mining bills. I had some pretty positive assurances from sources at the White House that I thought could be counted upon and depended upon, that were telling us that the Secretary of the Interior would do certain things. His right-hand person in that area was right up here telling us what we could count on. But I found out, to my regret, that they did not deliver.

Now, even though the Speaker were persuaded that this compromise would clearly be in the interests of the State of Massachusetts and of the country as well, I pointed out earlier today, I say to my friend from Massachusetts, that there are other Senators, if we were to get it passed here, and there are other States represented that are concerned. It is not simply a matter of getting the Representatives and, indeed, with the Speaker's support in the House, to sign off on it. I think we could very well expect that if the bill goes to conference, as I know it would and everyone here knows it would, we may find a lot of interest, a lot of people around the country that reflect what the Senator from Louisiana said: that we are taking money from a larger group of people to give it to a smaller group of people to lower their fuel oil costs.

I agree with the Senator from Texas

(Mr. BENTSEN) that that is a laudable objecitve insofar as the administration's proposal to lower costs goes. He says it becomes less laudable, less supportable, when we are going to lower costs by having somebody else pick up part of the tab.

I just have to say that the Senator is right: I am concerned first by the assurance that I do not think is accurate, that we can count on passing a bill here and assuming that it is not going to be changed in conference. From what little experience I have had in conferences, I know if you start out with one body taking no position on something and another body taking a position, say, of 100, then I understand that it is within the conference's prerogative to consider anything between nothing and 100. That would be my fear and concern here, that we are giving away, as I said to the Senator from Louisiana earlier today in an aside, part of our trading horses before we ever get to the county fair.

I just cannot think that we can unilaterally decide here that this is the way it is going to be and it might be changed there.

Mr. BROOKE. Let me respond to my colleague from Wyoming. No. 1, I do not think there is anything to be gained by having a debate as to whether we are taking the cost from one section and putting it on another. We obviously differ on that. We feel that we have been paying the tab all these years for the other section of the country and this is some way, through the entitlements program, of bringing equity into this whole picture. Obviously, the Senator from Wyoming sees that differently. I want to address my remarks to the Senator more along the line of a practical procedural basis.

I was trying to understand the Senator's concern about this compromise proposal and what would happen to it in a conference between the House and the Senate.

Let us assume for a moment that we do not pass this compromise proposal which the Senator from Louisiana, after lengthy debate and discussion and research, himself believes is fair and equitable, and we pass the amendment of the Senator from Louisiana, which I think the Senator from Wyoming would support.

Mr. HANSEN. His original amendment, yes.

Mr. BROOKE. Which would pull down the rule. If we did that and went to conference with the House and there was nothing in the House conference on it at all, as there is not, then, of course, the House could stand firm and if the Senate did not stand firm, eventually, conceivably, the Senate could recede. The Senator from Wyoming, so far as his position is concerned, would be in a worse position then, because that would mean that the entitlements program as it is in the Register, the 100 percent where we get 70 percent, would go into effect in August.

What I am suggesting to the Senator from Wyoming is that, at least in his own interest, he is better off if the Senate went into that conference with a compromise position rather than the extreme position, which could very well be rejected by the House.

Mr. HANSEN. Would the Senator from Massachusetts yield for a question?

Mr. BROOKE. Certainly. I do not know what is going to happen in a conference. I do not want to mislead the Senator. I cannot give him assurance from the Speaker of the House of Representatives, he is quite right. I have been to conferences many times, as the Senator from Wyoming has, believing that things have already been cleared with conferees on the House side and find it is just the opposite. You just cannot rely on it, you have to wait and see, because there are many different interests and the Members of the House vote on their own individual thoughts and concerns about a particular issue.

Yes, I yield.

Mr. HANSEN. The question I was going to ask my friend from Massachusetts, Mr. President, is simply this: Under the Administrative Procedures Act, which is part of the route that a proposed regulation has to go, would not the Senator from Massachusetts think that the Secretary of Energy would be derelict if he were to ignore the sentiments of the Senate and unilaterally reject the proposal and go for the full 100 percent that he proposes to go? My understanding was that in this rulemaking business, the intention of the Department first has to be published in the Federal Register, and there is an appropriate time given for comment.

I should think, if the Secretary of Energy were to do what my friend from Massachusetts suggests might be done, it would be a display of arrogance that would not suit the American public very well.

Mr. BROOKE. I think I disagree with my colleague from Wyoming, and on what he said so far as the procedure is concerned is absolutely correct, it has been published in the registry and would go into effect, is open for comment and I am sure comments are being received.

But I am saying that if we pass an amendment to a bill which becomes law, then the Secretary will have to abide by that legislation that is passed by the Congress. That is what we were trying to do, to draft language that could be accepted by the Senate and, hopefully, then by the House in conference with the Senate, which would become law and that would clear up the procedural problems the Secretary of Energy would have.

I do not think the Secretary of Energy has in the past, or will in the future arrogantly disregard the intent of the Congress—even when he was in the Defense Department and since he has been in the Department of Energy.

I have personally found him most cooperative and most sensitive to the will of the legislative branch of this Government.

So I do not anticipate that at all.

The only thing I am trying to ascertain is if we do come up with legislative language that can be acceptable, I feel that the Senator from Wyoming and those who feel as he does, and there is a very respectable number of Senators on this floor——

Mr. HANSEN. Probably a majority, does the Senator think?

Mr. BROOKE. I would say possibly. I hope not probably. But I certainly have to say possibly a majority would agree with the Senator from Wyoming, and they may be in a better position in conference with the compromise language than they would be if the pure Johnston language were accepted by the Senate.

I do not know that. I certainly do not throw that out as any veiled threat. I talked to no Members of the House conferees.

I can say this, however, that there are many members of the Appropriations Committee, both in the House and the Senate, on which I serve, who feel very strongly and are getting very tired of legislation on appropriation bills, even if it can be so written to qualify by the Parliamentarian. We still know, whether it is ruled that it is not legislation on an appropriation bill, that it is, in effect, for all intents and purposes—and no disrespect intended to the Parliamentarian—that it is still legislation on an appropriation bill.

We get most of it, as I said yesterday, under the Labor-HEW. Now we are getting it under Interior. I understand the House just did things on a Defense bill, by a recent vote on the matter, not pertaining at all to defense.

So I think we are in for a rough road, both in the House and the Senate, if we continue to go down this road.

But the Congress, at least for the time being, is doing exactly that.

I say to my colleagues that there is a good likelihood the House conferees may feel very strongly about any legislation or attempt to put legislation on an appropriation bill and make it wait until the DOE bill comes up, which does not suit the Senator from Louisiana's strongest point, because I think a vote in that committee was 17 to 1.

Mr. JOHNSTON. Will the Senator yield for a question?

Mr. BROOKE. Yes, I am pleased to.

Mr. JOHNSTON. The Senator is anxious, I know, to get the fee-free license continued, to make the President make his declaration.

Mr. BROOKE. Yes.

Mr. JOHNSTON. What happens if the President does not amend that declaration and refuses to continue the fee-free license?

What would the Senator see as his obligation under this amendment? Is the deal off, or is the deal on, or just what happens?

Mr. BROOKE. Well, of course, the Senator from Louisiana well remembers yesterday we could not get an opinion from the White House because the President was in New York signing the loan guarantee bill. It is my understanding that the President is back in the White House today.

So I would hope that before the end of this day we would have some decision from the White House regarding the tickets, the guideline 1 issue we discussed at some length.

As the Senator from Louisiana will also remember in the discussion yesterday, as a part of this compromise, the compromise that the Senator from Louisiana

agreed to, it was silent on the question of the fees. But it certainly was made, I think, clear to the Senator from Louisiana that if we were not able to get a favorable decision from the White House relative to the fees that the effective rate would not be 50 percent, but considerably less. Therefore, it would be a wash so far as we—we being on the side of this issue—are concerned.

So there would be no real benefit to us unless we did get a favorable decision from the White House.

I am just waiting now to find out, as I am sure the Senator from Louisiana is himself, as to what the decision from the White House will be. What we will do after that, I am not prepared to say, because there are many of us who will have to make that decision.

But I can tell the Senator from Louisiana that I, for one, would feel it certainly would not be an agreement then that would have any particular benefit to us in New England and on the east coast.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum, without the Senator from Massachusetts, or whoever has the floor, losing his right to the floor.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. MATHIAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. STEVENS. Mr. President, reserving the right to object, I shall not object if the right of the preceding Senator to retain the floor will remain in effect.

The PRESIDING OFFICER. The Senator cannot reserve the right to object to calling off a quorum call.

Mr. MATHIAS. Mr. President, I will not affect the right to the floor——

The PRESIDING OFFICER. Debate is not in order.

Mr. MATHIAS. Mr. President, I ask unanimous consent that the floor return to the posture in which it was.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATHIAS. Mr. President, I ask unanimous consent that Mr. DeGenoa, of my staff, have the privilege of the floor during debate on this matter and votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that the preceding order granting the floor to the Senator who held the floor at the time the quorum call was entered be restored, so that that Senator will have the floor when the quorum call I am going to request goes into effect.

The PRESIDING OFFICER. The previous order included not only that the Senator from Massachusetts would have the floor when the quorum call ended but also that the Senator from New Hampshire would have the floor after the Senator from Massachusetts. Does the Senator request that, also?

Mr. STEVENS. I seek to protect those two Members of the Senate, yes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 1:05 P.M.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate stand in recess for 10 minutes.

There being no objection, the Senate, at 12:55 p.m., recessed until 1:05 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. SARBANES).

The PRESIDING OFFICER. The Senate will come to order.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DURKIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURKIN. Mr. President, I ask unanimous consent that Henry Banta, Tom Susman, and Jerry Brady of Senator KENNEDY's staff may be granted the privilege of the floor for the balance of the day.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, the Senate has before it H.R. 12932, the Interior and related agencies appropriation bill for fiscal year 1979.

As reported, the bill provides $11.5 billion in new budget authority. Outlays associated with the bill total $10.6 billion, including $5.1 billion in outlays from budget authority provided in prior years.

Under section 302(b) of the Budget Act, the Appropriations Committee divides among its subcommittees the total budget authority and outlays allocated to the committee under the first budget resolution. The Appropriations Committee has allocated $13.3 billion in budget authority and $11.6 billion in outlays to the Interior Subcommittee.

The funds provided by the bill are under the subcommittee's section 302(b) allocation, for both budget authority and outlays. Funding of possible later requirements known at this time would add to the amounts appropriated in this bill but the total also would be under the allocation.

Mr. President, I ask unanimous consent that a table comparing the subcommittee's 302(b) allocation to the funding in this bill be printed in the RECORD at the conclusion of my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MUSKIE. As reported, the bill is within the targets of the first budget resolution.

This is due in large part to the efforts of the chairman of the Interior Appropriations Subcommittee, our distinguished majority leader. Indeed, a generous portion of the credit for the new congressional budget process taking hold in the Senate belongs to the distinguished Senator from West Virginia (Mr. ROBERT C. BYRD).

As a member of the Senate Rules Committee, Senator BYRD played an instrumental role in the formulation of the bill that became the Congressional Budget and Impoundment Act of 1974. Better than most people, he understands the provisions of this complex and important measure. Both as majority whip and majority leader, the distinguished Senator has lent his considerate support to the budget process and, under his leadership, the Democratic Policy Committee has been most cooperative in securing compliance with the demanding provisions of the Budget Act.

This act provides us with a tool to affect the national economy. It gives us a way to deal with inflation: by holding down the expenditure of Federal dollars. But it takes discipline to do that, and our majority leader has shown once again with this bill that he has the sense of purpose, courage, and toughness to achieve this discipline. The distinguished junior Senator from West Virginia knows what inflation is doing to the people of this country. He knows that men and women, in West Virginia and every other State of the Union, are demanding a new sense of fiscal responsibility from the Congress and he is acting in accord with their wishes and in the best interests of this country.

I commend him for this bill, for his support of the budget process, and for the leadership he is providing to us all.

EXHIBIT 1

H.R. 12932, Interior and related agencies appropriation bill, 1979; relationship to subcommittee's section 302(b) allocation

[Dollars in billions]

	Budget authority	Outlays
Subcommittee's section 302(b)		
Allocation	13.3	11.6
H.R. 12932, as reported	11.5	10.6
Amount over (+) or under (−) Subcommittee allocation	−1.8	−1.0
Possible later requirements:		
Forest firefighting	0.2	0.2
National parks	0.1	0.1
Strategic petroleum reserves	0.4	---
Energy programs	0.4	0.2
Possible amount over (+) or under (−) Subcommittee allocation	−0.7	−0.5

Mr. DURKIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SCHWEIKER. Mr. President, I

ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it s so ordered.

Mr. SCHWEIKER. Mr. President, I ask unanimous consent that David Winston, Mary Frances Lowe, and Robert J. Rubin of my staff; John Rother and Barbara Green of Senator JAVITS' staff; and Mary Block, Ginny Eby, Fran Pairs, and Bob Hunter of the Human Resources staff, be granted privilege of the floor during debate and consideration of S. 2466.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCHWEIKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL INSTITUTES OF HEALTH CARE RESEARCH ACT OF 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the vote by which S. 2466 failed passage be reconsidered, that the vote on the motion to advance the bill, S. 2466, to third reading be reconsidered, and that the vote on the motion agreeing to the committee substitute as amended be reconsidered, thus putting S. 2466 back before the Senate and on second reading.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. Mr. President, reserving the right to object, and I will not object. As I understand it, the bill would be open to further amendment.

Mr. ROBERT C. BYRD. Yes, it would.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered, and the motions, the various motions to reconsider, are agreed to en bloc.

Mr. SCHWEIKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SCHWEIKER. Mr. President, I yield myself such time as I may consume.

Mr. ROBERT C. BYRD. Mr. President, there is no time limit on the bill, that is correct, is it not?

The PRESIDING OFFICER. The Chair would inform the Senator that the observation of the majority leader is correct, there is no time on the bill. Therefore, an amendment must be offered before there is time for debate.

Mr. ROBERT C. BYRD. All the time is yielded back or was consumed before the final vote on the bill.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. There would be 1 hour on amendments in the first degree and 30 minutes on any amendment in the second degree of debate time, but there is no debate time on the bill itself.

UP AMENDMENT NO. 1626

(Purpose: To give the Office of Health Technology certain administrative responsibilities)

Mr. DOLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes unprinted amendment numbered 1626.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the proper place, insert the following:

"SEC. 111. (a) The Assistant Secretary for Health, acting through the Office of Health Technology, shall have the responsibility (1) for developing the policies of the Department of Health, Education, and Welfare with respect to the rights to inventions of its employees, grantees and contractors, subject to applicable laws and regulations; (2) for issuing invention and patent administration policies and procedures; (3) for administering the receipt of land processing invention reports by employees, grantees and contractors, of the Department and maintaining records and documents incident to patent and invention administration; (4) for making determinations of rights in inventions and patents involving inventions of employees, grantees and contractors of the Department; and (5) for making determinations with respect to applications for licenses under patent applications and patents owned by the United States, as represented, and for accepting licenses issued to the United States as represented by the Department.

(b) All functions of the Office of General Counsel relating to patent administration and administration of invention reports by employees, contractors and grantees of the Department are transferred to the Office of Health Technology, provided, however, that all legal services and functions, relating to patents inventions by employees, grantees and contractors of the Department shall remain in the Office of General Counsel.

The PRESIDING OFFICER. This would be a first-degree amendment. Therefore, on this amendment there is 1 hour, 30 minutes to a side.

The Senator from Kansas.

Mr. DOLE. Mr. President, I am prepared to yield additionally to the distinguished Senator from Pennsylvania. one of the floor managers of the bill, if he would like 5 or 10 minutes at this time.

Mr. SCHWEIKER. I appreciate that.

I might say that the Senator from Kansas has played an instrumental role in developing these amendments, and that will unfold as he offers his amendment and we discuss the committee amendment.

I congratulate him for his help and support in working out this amended bill.

Mr. President, I support S. 2466 as amended. I believe the changes incorporated in the amendments reflect some of the concerns voiced by members of the Senate when the bill was previously before us. The bill as amended would:

First. Extend for 3 years the authorization of the National Center for Health Statisics.

Second. Extend for 3 years the authorization for the National Center for Health Services Research.

Third. Provide a legislative base for an existing administrative unit, the Office of Health Technology, which is located in the Office of the Assistant Secretary for Health.

Fourth. The authorizations have been significantly reduced.

The Subcommittee on Health and Scientific Research, of which I am the ranking Republican member, has conducted a series of hearings on federally supported research activities over the past year. In the course of these hearings, it has become clear that not enough research in the area of health services delivery is now being done. I have concluded that the current governmental research entities in many cases could not, and in other instances, would not, give this area the priority it deserves.

I want to stress that this bill does not envision the centralization of the functions of all existing public health service and health care financing administration efforts into one superagency. I recognize that the center for disease control has developed expertise in the field of epidemiology related to the control of infectious disease and the investigation of disease incidence and outbreaks, for example, and should retain its capabilities in such areas, and that the National Institutes of Health should continue its important epidemiological work in the disease-oriented institutes. The mandate in this bill is for clearer coordination, not the elimination of functions performed well and with great expertise by responsible existing agencies.

I do not in any way wish to suggest that the research currently being conducted is undesirable or unnecessary, but I am convinced that greater attention to health services research, epidemiological studies, and the assessment of medical technologies is warranted. In addition, current statistical activities supported by various agencies, within HEW have at times proved to be less useful than they could have been, due to problems of coordination and comparability of data. Perhaps as much as $200 million could be saved if statistical and data gathering activities could be effectively coordinated and duplication eliminated, according to one estimate.

I hope the bill before us today will go a long way toward improving our research and data-gathering capability by extending the National Center for Health Statistics and the National Center for Health Services Research.

In supporting the creation of a legislatively authorized Office of Health Technology I am aware of the concerns raised during the last debate regarding the creation of new bureaucracies and the concern about Government control of technology research. I think it is important to note that this bill does not create a new office—the office already exists within DHEW. The bill would specify that the office should be concerned about priorities for Federal research regarding

medical technologies, should promote and encourage studies of medical technologies; should develop better methodologies for conducting evaluations of medical technology; and act as a clearinghouse for information concerning medical technologies.

It is not my intention in supporting the Office of Health Technology to create a Federal agency which will regulate medical technology or medical practice. On the contrary, I think it is important to note that the Office would have no regulatory authority. Rather, I seek to creat a focal point for medical technology assessment activities, to evaluate appropriate technologies for safety and effectiveness and to share the result of these evaluations with the appropriate public and private entities.

One other aspect of the bill which I would like to highlight is the provision I introduced to require the Center for Health Services Research to conduct a study of the impact of the new United Mine Workers' collective-bargaining agreement, which requires copayment for health services, upon the utilization of health services and the health status of the mine workers and their families. It has been suggested by a number of very distinguished health experts that copayment would reduce utilization without adversely affecting health status. The new agreement ratified by the mine workers provides a unique opportunity for study which should not be lost. I am glad that my colleagues in the committee have agreed to this provision and concur with the need for the study. I think the results will be very useful as we continue to search for ways to control costs while assuring quality health care.

The bill currently before the Senate is designed to foster much needed research into health services and medical technologies without creating new Federal bureaucracies. I urge its adoption.

I compliment the distinguished chairman of my subcommittee, who is a prime author of this bill, Senator KENNEDY, on his work and leadership in this area; and I thank Senator DOLE and his colleagues for their willingness to work out this compromise bill.

Mr. DOLE. Mr. President, I ask unanimous consent that Sheila Burke and Barry Leskowitz, of my staff, have the privilege of the floor during the debate on this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, the Senator from Kansas offered an amendment, an effort to move along and start the debate. I now withdraw that amendment, and I will reoffer it after Senator KENNEDY offers his amendment.

The PRESIDING OFFICER. The Senator has the right to withdraw his amendment.

The amendment is withdrawn.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the following staff members have the privilege of the floor during the consideration of and votes on S. 2466: David Blumenthal, Larry Horowitz, Stuart Shapiro, Bob Wenger, Rebecca Beauregard.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1627

(Purpose: Reduce authorization levels; eliminate seventh Public Health Service agency)

Mr. KENNEDY. Mr. President, I call up my amendment, on behalf of myself and the Senator from Pennsylvania (Mr. SCHWEIKER), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from New York (Mr. JAVITS).

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY), for himself and others, proposes an unprinted amendment numbered 1627.

Mr. KENNEDY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert the following:

SHORT TITLE; REFERENCE TO ACT

SECTION 1. (a) This Act may be cited as the "Health Services Research, Health Statistics and Medical Technology Act of 1978".

(b) Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Public Health Service Act.

SECTION 101. (a) The heading to section 304 is amended to read as follows:

"GENERAL AUTHORITY RESPECTING HEALTH STATISTICS, HEALTH SERVICES, MEDICAL TECHNOLOGY RESEARCH EVALUATIONS, AND DEMONSTRATIONS

(b) (1) Section 304 (a) is amended to read as follows:

"(1) The Secretary, acting through the National Center for Health Services Research, the National Center for Health Statistics, and the Office of Health Technology, shall conduct and support research, demonstrations, evaluations, and statistical and epidemiological activities for the purpose of improving the effectiveness, efficiency, and quality of health services in the United States.

"(2) In carrying out paragraph (1), the Secretary shall give appropriate emphasis to research, demonstrations, evaluations, and statistical and epidemiological activities respecting—

"(A) the accessibility, acceptability, planning, organization, distribution, utilization, and financing of systems for the delivery of health care,

"(B) alternative methods for measuring and evaluating the quality of systems for the delivery of health care,

"(C) the collection, analysis, and dissemination of health related statistics,

"(D) alternative methods to improve and promote health statistical and epidemiological activities,

"(E) the safety, efficacy, effectiveness, cost effectiveness, and social, economic, and ethical impacts of medical technologies,

"(F) alternative methods for disseminating knowledge concerning health and health related activities,

"(G) the special health problems of low income and minority groups and the elderly to insure that these problems are assessed on a periodic regular basis, and

"(H) the prevention of illness, disability, and premature deaths in the United States.

"(3) The Secretary shall (through National Research Service Awards) undertake and support manpower training programs to provide for an expanded and continuing supply of individuals qualified to perform the research, evaluation, and demonstration projects set forth in sections 305, 306, and 306A.".

(2) Section 304(b)(1) is amended by (1) inserting ", when appropriate," before "enter into contracts" and (2) inserting a period after "entities and individuals" and striking all that follows.

(3) Section 304(b)(3) is amended by adding at the end thereof the following new sentence:

"In addition, the Director of the National Center for Health Services Research and the Director of the National Center for Health Statistics, in order to assist each of them in carrying out the functions set forth in sections 305 and 306 respectively, and without regard to any other provision of this Act, are each authorized to obtain the services of not more than fifteen experts or consultants who have appropriate scientific or professional qualifications.".

(4) Section 304(c) is amended to read as follows:

"(c) The Secretary shall coordinate all research, evaluation, demonstration, and statistical and epidemiological activities referred to in subsection (a) undertaken and supported through units of the Department of Health, Education, and Welfare. To the maximum extent feasible, such coordination shall be carried out through the National Center for Health Services Research, the National Center for Health Statistics, and the Office of Health Technology.".

SEC. 102. (a) Section 305(b) is amended by—

(1) striking "technology," in paragraph (1);

(2) striking "and" after "manpower;" in paragraph (2);

(3) striking the period in paragraph (3) and inserting in lieu thereof ", and"; and

(4) adding at the end thereof the following new paragraph:

"(4) the uses of computer science in health services delivery and medical information systems.".

SEC. 103. (a) Section 306(b) is amended by—

(1) striking "; and" after "dissolution" in paragraph (1)(H) and inserting in lieu thereof a period;

(2) adding at the end thereof the following new paragraph:

"(3) undertake and support (by grant or contract or both) epidemiological research, demonstrations, and evaluations on the matters referred to in paragraph (1).".

(b) Section 306(c) is amended by—

(1) inserting "and epidemiological" after "statistical" each place it occurs; and

(2) striking "Labor and Public Welfare" and inserting in lieu thereof "Human Resources".

(c) Section 306(e) is amended by—

(1) inserting "to be known as the Cooperative Health Statistics System" after "levels" in paragraph (1), and

(2) striking "such cooperative system" each place it occurs and inserting in lieu thereof "such System".

(d) Section 306(1)(1) is amended by striking "United States".

(e) Section 306 is amended by adding at

the end thereof the following new subsection:

"(j) In carrying out the requirements of section 304(c) and paragraph (2) of subsection (e), the Secretary shall coordinate health statistical and epidemiological activities of the Department of Health, Education, and Welfare by—

"(1) developing in consultation with the National Committee on Vital and Health Statistics, promulgating by regulation, and maintaining the minimum sets of data needed on a continuing basis to fulfill the collection requirements of subsection (b)(1),

"(2) after consultation with the National Committee on Vital and Health Statistics, establishing, by regulation, standards to assure the quality of health statistical and epidemiological data collection, processing, and analysis,

"(3) reviewing periodically all existing health statistical data collections of the Department that were previously approved pursuant to the Federal Reports Act of 1942 to determine whether such collections conform with the minimum sets of data and the standards promulgated pursuant to paragraphs (1) and (2). If any such collections are found not to be in conformance, the Secretary shall take the necessary action to assure that any future collections (effective ninety days after the review) are in conformance,

"(4) reviewing all proposed health statistical data collections of the Department that require approval pursuant to the Federal Reports Act of 1942 to determine whether such proposed collections conform with the minimum sets of data and the standards promulgated pursuant to paragraphs (1) and (2). If any such proposed collections are found not to be in conformance, the Secretary shall take the necessary action to bring them into conformance before such proposed collections are initiated.".

SEC. 104. Title III is amended by adding after section 306 the following new heading and section:

"OFFICE OF HEALTH TECHNOLOGY

"SEC. 306A. (a) There is established in the Department of Health, Education, and Welfare the Office of Health Technology (hereinafter in this section referred to as the 'Office') which shall be under the direction of a Director who shall be appointed by the Secretary and supervised by the Assistant Secretary for Health (or such other officer of the Department as may be designated by the Secretary as the principal adviser to him for health programs).

"(b) The Secretary, acting through the Office, shall—

"(1) establish, in consultation with the Council for the Evaluation of Medical Technology, priorities for research, demonstrations, and evaluations of medical technologies as prescribed by paragraph (2)(A). In establishing such priorities, particular emphasis should be placed on—

"(A) the actual or potential risks and the actual or potential benefits to patients associated with the use of the medical technology,

"(B) per use and/or aggregate cost of the medical technology,

"(C) the rate of utilization of the medical technology, and

"(D) the stage of development of the medical technology; and

"(2) undertake and support (by grant or contract or both) research, demonstrations, and evaluations concerning—

"(A) the safety, efficacy, effectiveness, cost effectiveness, and social, ethical, and economic impacts of particular medical technologies;

"(B) the factors that affect the utilization of medical technologies throughout the United States;

"(C) alternative methods for disseminating information on medical technologies to health professionals;

"(D) alternative methods for measuring the quality of health services; and

"(E) the effectiveness, administration, and enforcement of quality assurance programs.

"(c) To assist in carrying out this section, the Secretary, acting through the Office, shall cooperate and consult with the National Institutes of Health, the Veterans' Administration and any other interested Federal departments or agencies and with State and local health departments and agencies.

"(d)(1) The Secretary, acting through the Office, shall, by grants or contracts, or both, assist public and/or private nonprofit entities in meeting the costs of planning and establishing new centers, and operating existing and new centers for multidisciplinary research, evaluations, and demonstrations respecting the matters referred to in paragraph (2) of subsection (b). To the extent practicable, the Secretary shall take such actions, in accordance with the requirements of this subsection and section 308, to assure that three such centers shall be operational by September 1, 1981.

"(2)(A) No grant or contract may be made under this subsection for planning and establishing a center unless the Secretary, acting through the Office, determines that when it is operational it will meet the requirements listed in subparagraph (B), and no payment shall be made under a grant or contract for operation of a center unless the center meets such requirements.

"(B) Each center shall meet the following requirements:

"(i) there shall be a full-time director of the center who possesses a demonstrated capacity for sustained productivity and leadership in research, demonstrations, and evaluations respecting the matters referred to in paragraph (2) of subsection (b), and there shall be such additional professional staff as may be appropriate;

"(ii) the staff of the center shall have expertise in the various disciplines needed to conduct multidisciplinary research, evaluations and demonstrations respecting the matters referred to in paragraph (2) of subsection (b);

"(iii) the center shall be located within an established academic or research institution with departments and resources appropriate to the programs of the center; and

"(iv) each center shall meet such additional requirements as the Secretary may by regulation prescribe.

"(e)(1) There is established in the Office a National Council for the Evaluation of Medical Technology (hereinafter in this subsection referred to as the 'Council') to be composed as follows:

"(A) The Surgeon General, the Director of the National Institutes of Health, the Chief Medical Director of the Veterans' Administration, the Assistant Secretary of Defense for Health Affairs, the Chairman of the National Professional Standards Review Council (or their designees), and three other employees of the Department of Health, Education, and Welfare (or their designees) appointed by the Secretary, shall be ex officio members of the Council.

"(B) Eighteen members appointed by the Secretary. Six of the appointed members shall be selected from among leading medical or scientific authorities; two of the appointed members shall be practicing physicians; two of the appointed members shall be practicing hospital administrators; two of the appointed members shall be selected from members of the general public who are leaders in the field of economics; two of the appointed members shall be selected from members of the general public who are leaders in the field of law; and four of the appointed members shall be selected from outstanding members of the general public who, based on their interests, disciplines, and/or expertise, would be appropriate members of the Council.

"(2)(A) Each appointed member of the Council shall be appointed for a term of four years, except that—

"(i) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term; and

"(ii) of the members first appointed after the effective date of this section, five shall be appointed for a term of four years, five shall be appointed for a term of three years, five shall be appointed for a term of two years, and three shall be appointed for a term of one year, as designated by the Secretary at the time of appointment.

Appointed members may serve after the expiration of their terms until their successors have taken office.

"(B) A vacancy in the Council shall not affect its activities, and twelve members of the Council shall constitute a quorum.

"(C) Members of the Council who are not officers or employees of the United States shall receive for each day they are engaged in the performance of the functions of the Council compensation at rates not to exceed the daily equivalent of the annual rate in effect for grade GS-18 of the General Schedule, including travel-time; and all members, while so serving away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as such expenses are authorized by section 5703 of title 5, United States Code, for persons in the government service employed intermittently.

"(3) The Council shall annually elect one of its appointed members to serve as Chairman until the next election.

"(4) The Director of the Office shall (1) designate a member of the staff of the Office to act as Executive Secretary of the Council, and (2) make available to the Council such staff, information, and other assistance as it may require to carry out its functions.

"(5) The Council shall meet at the call of the Chairman, but not less often than four times a year.

"(6) The Council is authorized to—

"(A) advise, consult with, and make recommendations to the Secretary and the Director of the Office with respect to carrying out the provisions of this section;

"(B) after consultation with appropriate public and private entities, advise the Secretary concerning the safety, efficacy, effectiveness, cost effectiveness, and the social and economic impacts of particular medical technologies;

"(C) after consultation with appropriate public and private entities, develop, when appropriate and to the extent practicable, exemplary standards, norms, and criteria concerning the utilization of particular medical technologies;

"(D) publish, make available and disseminate, through the National Library of Medicine, promptly in understandable form and as widely as possible, but, at a minimum, to each of the National Institutes of Health, to the Food and Drug Administration, to the Indian Health Service, and the Bureau of Medical Services of the United States Public Health Service, to all health systems agencies, to all Professional Standards Review Organizations, to all medical schools professional associations, State and local departments of public health, and to the Department of Medicine and Surgery of the Veterans' Administration and the Assistant Secretary of Defense for Health Affairs, the standards, norms, and criteria developed pursuant to paragraph (C); and

"(E) review and approve any grant that the Office proposes to make and any contract the Office proposes to enter pursuant to this sec-

tion if such grant or contract is in an amount exceeding $35,000 of direct costs.

"(f) For purposes of this section, medical technology means any discrete and identifiable medical or surgical regimen or modality used to diagnose or treat illness, prevent disease, or maintain patient well-being.".

SEC. 105. (a) The heading to section 308 is amended by inserting "306A," after "306,".

(b) Section 308(a)(1)(B) is amended by (1) striking "and" after "research" and inserting in lieu thereof "," and (2) inserting "and the evaluation of medical technology" after "statistics".

(c) Section 308(b)(1) is amended by inserting "306A," after "306".

(d) Section 308(d) is amended by (1) inserting "306A," before "or 307" and (2) by inserting "or epidemiological" after "statistical" in paragraph (1).

(e) Section 308(e) is amended by inserting "306A," after "306" each place it occurs.

(f) Section 308(f) is amended by striking "or 306" and inserting in lieu thereof "306, or 306A".

(g) Section 308(g)(2) is amended by striking "and 306" and inserting in lieu thereof "306, and 306A".

(h) Section 308(h)(1) is amended by striking "or 306" each place it occurs and inserting in lieu thereof "306 or 306A".

(i) Section 308(i)(1) is amended by—

(1) striking "and" after "1976," and inserting ", $32,600,000 for the fiscal year ending September 30, 1979, $35,000,000 for the fiscal year ending September 30, 1980, and $40,000,000 for the fiscal year ending September 30, 1981" after "1978" in the first sentence thereof.

(2) amending the second sentence thereof to read as follows:

"Of the funds appropriated under this paragraph for any fiscal year, at least 15 per centum of such funds or $6,000,000, whichever is less, shall be available only for health services research, evaluation, and demonstration activities directly undertaken by the National Center for Health Services Reseach and at least 5 per centum of such funds or $1,000,000, whichever is less, shall be available only for dissemination activities directly undertaken by the Center.".

(j) Section 308(i)(2) is amended by—

(1) inserting "and epidemiological" after "statistical",

(2) striking "and" after "1976," and inserting ", $43,400,000 for the fiscal year ending September 30, 1979, $47,000,000 for the fiscal year ending September 30, 1980, and $50,000,000 for the fiscal year ending September 30, 1981" after "1978", and

(3) inserting at the end thereof the following new sentence:

"Of the funds appropriated under this paragraph for any fiscal year commencing after September 30, 1978, at least 15 per centum of such funds shall be available only for health statistical and epidemiological activities directly undertaken by the National Center for Health Statistics.".

(k) Section 308(i) is amended by adding at the end thereof the following new paragraph:

"(3) For medical technology research, evaluation, and demonstration activities undertaken or supported under secton 304 or 306A, there are authorized to be appropriated $15,000,000 for the fiscal year ending September 30, 1979, $25,000,000 for the fiscal year ending September 30, 1980, and $30,000,000 for the fiscal year ending September 30, 1981. Of the funds appropriated under this paragraph for any fiscal year commencing after September 30, 1980, at least 15 per centum of such funds shall be available only for medical technology research, evaluation, and demonstration activities directly undertaken by the Office of Health Technology.".

SEC. 106. Section 472(a)(1)(A) is amended by—

(1) striking "and" after "private institutions," in clause (iii);

(2) redesignating clause (iv) as clause (vii); and

(3) inserting after clause (iii) the following:

"(iv) research at the National Center for Health Services Research, the National Center for Health Statistics, and/or the Office of Health Technology,

"(v) training at such Centers and Office to undertake such research,

"(iv) research on the matters set forth in section 304(a)(2) at public institutions and at nonprofit private institutions, and".

SEC. 107. Part K of title III is repealed in its entirety.

SEC. 108. Title IV is amended by adding at the end thereof the following new section:

"SEC. 477. The Director of the National Institutes of Health shall make available annually to the Office of Health Technology and the Council for the Evaluation of Medical Technology a list of all technologies (as defined in section 306A(g)) of which he is aware that are under development and that appear likely to be used in medical practice in the near future.".

SEC. 109. The Secretary, acting through the National Center for Health Services Research, shall arrange for the conduct of a study to evaluate the impact upon the utilization of health services by and the health status of members of the United Mine Workers and their dependents as a result of changes in the United Mine Workers' collective-bargaining agreements of March 1978, that require copayments for health services. Such study and a report thereon shall be completed and submitted to the Secretary, the Committee on Human Resources, the Committee on Appropriations, and the Committee on Finance of the Senate, and the Committee on Ways and Means, the Committee on Appropriations, and the Committee on Interstate and Foreign Commerce of the House of Representatives no later than thirty months after the date of enactment of this section. Not more than $1,000,000 of the sums authorized to be appropriated for health services research, evaluation and demonstration activities by section 308(i)(1) of the Public Health Service Act shall be made available for such study.

SEC. 110. (a) The Secretary, in cooperation with the Secretary of Labor and the Administrator of the Environmental Protection Agency, shall develop a plan for the collection and coordination of statistical and epidemiological data on the effects of the environment on health. Such plan shall include, but not be limited to, a review of the data now available on health effects, deficiencies in such data, and methods by which existing data deficiencies can be corrected. The plan shall be submitted to Congress not later than October 1, 1979.

(b) In carrying out the provisions of subsection (a), the Secretary, the Secretary of Labor, and the Administrator of the Environmental Protection Agency shall consult with the Committee on Human Resources and other appropriate committees of the Senate and the Committee on Interstate and Foreign Commerce and other appropriate committees of the House of Representatives.

I. GENERAL THEMES

Mr. KENNEDY. Mr. President, the amendments that we are today introducing will substantially alter S. 2466 as reported by the Committee on Human Resources. The amendments which we are making today incorporate and respond to many of the concerns raised by my colleagues during the earlier consideration of this legislation.

In particular, S. 2466 as amended, would create no new bureaucratic structures. Also, S. 2466 provides for modest and absolutely necessary increases in authorizations for the programs that we are renewing with this legislation.

Whereas the initial legislation created a new public health service agency, to be known as the National Institutes of Health Care Research, this amended version of S. 2466 merely extends existing programs. No new institutes and no new agencies are created.

I understand that many of my colleagues feel that this is not the time to be creating new institutions and new agencies. In particular, some felt that current plans for the research and statistical agencies with which we are dealing—current administration plans—should be allowed to run their course. It was argued that the administration has its own proposals from an organizational point of view and that these proposals deserved a chance to prove themselves.

We have in large measure accepted that point of view in this legislation. However, I want to make clear that the administration's plan for the National Center for Health Services Research and the National Center for Health Statistics remain very much on trial, and that we will continue to follow with extreme vigilance the progress of these two institutions, as well as the Office of Health Technology whose duties are defined in S. 2466 as amended.

II. THE MAJOR FEATURES OF S. 2466 AS AMENDED

The legislation extends for 3 years the authorization for the National Center for Health Services Research. Authorization for 1979 would be $1 million above the President's budget request, at a total of $32.6 million. The additional $1 million is specifically earmarked for study of the impact of recently introduced coinsurance and deductibles on the health care utilization of mineworkers under the revised plan resulting from their recent settlement. Authorizations for 1980 would be $35 million, in 1981 $40 million. These are bare bones authorizations, and I think every penny is justified.

The legislation would extend for 3 years the National Center for Health Statistics; 1979 authorization would be $43.4 million, which is the President's budget request. In 1980 authorization would be $47 million and in 1981 $50 million. The National Center for Health Statistics would acquire a somewhat expanded mandate for doing epidemiological research, and again, this is an absolutely minimal, cut to the bone, budget.

Finally, S. 2466 as amended would provide legislative authorization and definition to the Office of Health Technology. This is an existing administrative entity within the Office of Assistant Secretary for Health. The Secretary of HEW officially created this office within the last several months, and it is currently staffing up and about to begin functioning. This is not a new structure. It will, in keeping with the pending House legislation, be designated under this legislation as a Office of Health Technology. Its authorizations would be $15 million in 1979, of which only $5 million is new money; $10 million was previously authorized for studies in quality assurance. The mandate for the use of these moneys is incorporated into the new National Center; 1980 authorization is $25 million, and 1981 authorization is $30 million.

III. JUSTIFICATIONS FOR THE TWO EXISTING NATIONAL CENTERS:

The two existing national centers—the National Center for Health Statistics and the National Center for Health Services Research—perform critical functions for the operation of our health care system.

The National Center for Health Services Research is the only source of nontargeted research money for the perfection of our health delivery system. At our proposed authorization level of $32.6 million we are spending as a country less than 5 hundredths of 1 percent of our health care dollar on research and development aimed at improving the delivery of medical care. This compares with 3 to 4 percent in the area of biomedical research generally. We are pouring money into the provision of health care, but we are not doing the basic work needed to lay the groundwork for an improved system of health care delivery. No industry with a $55 billion dollar budget, like that of the Federal medicare and medicaid programs, would be content with that kind of paltry expenditure on research. This is a barebone budget. I intend to come back in the future with proposals for increases; at the appropriate time.

However, I would like to note that this year we have reversed a long period of decline in the budget of the National Center for Health Services Research.

In 1973 the authorization for this center was $80 million, and it declined to $28.6 million last year. This year we are advancing it, judiciously, to $32.6 million. I expect that this investment will be justified over time. The National Center has gotten little credit in the past for clear accomplishments: the development of the Professional Standard Review Organization prototypes, the early development of the cooperative health statistics system, pioneering work in the area of disease prevention and in the area of the design of rural health clinics.

The National Center for Health Statistics provides virtually all our information about the health of the American people, their health habits, their health needs, the costs of our health care system. Without its contributions, we would never know where we can save money and where we need to spend more. Our health planners would be at a complete loss to develop a rational health care system.

As we have noted, the budgets of these two centers are at the President's budget request, with the exception of the National Center for Health Services Research, which is $1 million above that budget. The reasoning for this added million dollars is that it will permit us to do a study of the changes in the health care utilization of the United Mine Workers whose policy has just recently come to include co-insurance and deductibles.

Our distinguished colleague from Pennsylvania was the principal sponsor of this provision, and I think it is a valuable and useful amendment to consider the coinsurance and deductible impact on utilization of services.

This study would have an important impact on our planning of future health care financing mechanisms. It would help us measure the effect of payments by consumers on their utilization of health services. One million dollars is allocated for this study.

We are not proposing, as we did previously, to move the two national centers out of the Office of the Assistant Secretary. However, I want to make clear that I continue to have grave reservations about the placement of these two centers. I think over the long term that their location in the Office of the Assistant Secretary will tend to undermine their legitimacy and their image as nonpolitical, completely objective sources of information about the health of Americans and about the way in which our health care delivery system should be structured. For that reason, I want to make clear that we will continue to follow with the utmost closeness the development of these centers, their health and their reputations. We share with the administration, I feel, a genuine concern to make these two centers function in the best possible way. However, we have a difference of opinion about whether their current situation is optimal.

In addition, I continue to have an ongoing concern about the general health of health services research, and whether it does not deserve the kind of institutional recognition, prestige, and integrity that has served the National Institutes of Health so well. We have an ongoing and successful model of how the Government can fund research to the overwhelming benefit of the American people. Yet in an area that is critically important, we reject as overly bureaucratic attempts to apply successful models to a problem area. The subcommittee will continue to study the best organizational approaches toward promoting health services research and health statistics. The administration has promised to study possible alternatives to the current locations of the two centers. We intend to see that they keep their word in scrutinizing those alternatives.

WHAT IS THE PLANNED OFFICE OF HEALTH INSURANCE?

We have changed the name of the agency originally mandated in S. 2466, so that it is now entitled an Office of Health Technology. This is to make clear the overall similarities between what we are proposing and what the administration is supporting and recently created.

The Office of Health Technology would have the function of improving coordination among agencies doing evaluations of medical technologies and health practices. It would also have the function of making certain that health care technologies which badly need study—or are of high priority—receive that scrutiny.

Its specific functions would include:

First. Setting priorities for the study of medical technologies in government agencies.

Second. Improving our methodology for studying the cost-effectiveness, efficacy and safety of medical technology.

Third. Acting as a clearinghouse for information on the effectiveness and cost-effectiveness of medical technologies.

The purpose of the center is to save on cost and to protect the quality of care. It can accomplish this goal with a minimal new Federal investment and without any new Federal regulation. Its goal is to disseminate information about which techniques work and which do not, about which are cost-effective and which are not. It will not be a policeman of medicine, but a servant of the physician and the consumer. It will make available to physicians, hospital administrators, and health care planners the very latest information, in a digested and easily understood form, the very most up-to-date information available from federally funded research.

It will increase the amount and the availability of knowledge about the effectiveness of clinical techniques and devices.

It has been argued that we do not really need a new Office of Health Technology. There is plenty of work, it is said, being done on the effectiveness of new medical practices and procedures.

But at least four separate studies, including the administration's own analysis, recommended setting up a center or office like the one mandated in S. 2466. These studies include reports from the National Academy of Sciences, the Boston University Health Policy Institute, the AMA National Commission on the cost of medical care, a forthcoming report by the Office of Technology Assessment, and a study by the Institute of Medicine. All these studies agree.

They agree on the following:

First. There is some research being done, but it is uncoordinated.

Second. Even then, not enough research is being done.

Third. Perhaps the most serious criticism made by the administration and by these studies is that the information generated by America's scientists and clinical researchers is not getting out to the public. It is not being presented in a uniform and systematic fashion, and for that reason, it is not having the effect it could have on the health and welfare of the American people.

We do not give our physicians the information they need to distinguish between the best new clinical procedures and those that do not work. New technologies and the increased use of existing technologies account for 40 percent of the annual increase in the cost of a day of hospital care. Since 1967, that comes to an increase of $10 to $12 billion in the cost of health care. We see numerous examples of clinical techniques that become widely and commonly used before their efficacy is studied. For instance, gastric freezing was used in the treatment of ulcer disease on the thousands of patients before it was discovered that it did not work and caused fatal side effects. We have heard testimony that coronary artery surgery, while it prolongs life and relieves pain in some patients, is vastly overutilized. It cost $1 billion a year. We know that we have 500 CAT scanners in this country while the British have a small fraction of that many.

Is anyone watching the shop? Who is looking to see that the expensive, or the

most beneficial, or the most highly utilized, or the most dangerous technology get close and careful scrutiny early on in their development. I am not talking about regulating them. I am talking just about studying them.

We have health care planners whose job it is to rationalize the distribution of health care. Where are they to turn for advice on which techniques should be more broadly available, and which less so? Who is the definer of health care needs? The answer is no one. That is why we need this office.

We will hear arguments that the $15 million provided, of which only $5 million is new money, is excessively costly. How shortsighted. Here we have medicare costs and medicaid costs going up by $6 or more billion a year, and we are fighting about $5 million set aside for the purpose of winnowing out (through noncoercive means) those medical practices and procedures which do not work, or which are of extremely limited effectiveness. These are cost-saving goals. We all scream about excessive costs, but no one wants to spend the minimal amount of money needed to control those expenditures.

Quotes from various studies supporting the need for an office of the kind we are proposing:

There should be a substantial expansion of efforts to assess health care technologies. . . . A national center should be established to serve as a central depository and clearinghouse for information on health care technologies. . . ." (The AMA Commission)

A mechanism for evaluating and reporting on the performance, costs, and benefits of. . . . technologies should be developed. A national coordinating body should be established. . . . (The NAS Committee)

"A new unit should be established in the office of the Assistant Secretary for Health . . . responsible for overall . . . coordination of Federal health technology policies. . . ." (The BU Health Policy Institute)

Mr. President, these remarks are typical of the comments made during review of these proposals in committee. I think there is ample justification for all the provisions of this legislation, as amended, and I urge swift passage of S. 2466.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. Presdent, I echo what the distinguished Senators from Pennsylvania and Massachusetts have said with reference to S. 2466. Amended S. 2466 is a marked improvement over the original bill. It goes far in alleviating many of the concerns I raised in my original floor statement on the bill. At that time, you may recall, I objected to the establishment of a new and very substantial bureaucratic entity, under the umbrella of a national institute. Establishment of this public health service agency consisting of two new institutes and a center has now been deleted. The bill's sponsors are now offering a much more modest proposal that authorizes the extension of the National Center for Health Services and the National Center for Health Statistics and Epidemiology, and provides legislative authorization for the Office of Health Technology.

Levels of authorization in the original bill have also been pared down considerably. No longer are we being asked to approve a 100-percent increment over the existing appropriation. Instead a more reasonable increase of about 30 percent is being requested. In light of the importance of the health care issues before the country, these new funds are not very much out of line, at least when measured in terms of the absolute dollars requested.

What caused me the greatest concern in the original bill was the creation of an entirely new center for the evaluation of medical technology. Although the present proposal only authorizes funding for an already established Office of Health Technology in HEW, I am not entirely comfortable with what I understand to be the responsibilities of the new office. There still exist potential problems of overlapping authorities with the existing research and development programs at the NIH, FDA, and CDC. I would like to point out that these agencies are devoting considerable resources, in excess of $120 million for the evlauation of the safety and efficacy of more than 30 important medical technologies. Considering the limited resources of the new office, I would anticipate that every effort would be made to avoid duplication of the ongoing projects of these established agencies.

A second concern raised in my previous statement on S. 2466 was the trepidation that, through its power to set standards, the office would be transformed into another regulatory agency in HEW. I am assured by the committee that no such regulatory authority is being assigned to the office. The stated purpose of the office is to coordinate and evaluate medical technology in collaboration with NIH, FDA, and CDC and other agencies and to transfer this information to the various State and Federal health agencies.

As clearly stated in the committee report on S. 2466, two major issues have been raised in connection with the management of medical technology. The first relates to the too-rapid application of insufficently evaluated technology. The second issue, commonly referred to as the "bench to bedside" problem refers to the inordinate lag in the transfer of knowledge from the laboratory to the patient. Additional attention might well be paid to this problem of transfer of technology.

With this in mind, and in order to strengthen the transfer of technology capability of DHEW, I will reoffer in a moment an amendment that previously had been offered. The amendment would create a focus for technology transfer activities within the Office of Health Technology. This will be accomplished by transferring the administrative responsibilities of the DHEW Patent Counsel, who presently serves as the principal technology transfer agent in DHEW, from the Office of the General Counsel to the Office of Health Technology.

To understand why this amendment is necessary, let me review briefly how biomedical technology developed with HEW funds reaches the public. All biomedical inventions and pharmaceuticals emanating from HEW extramural (that is, at universities) and intramural research programs are reported to the HEW Patent Counsel. These inventions are almost always in an early stage of development, requiring substantial additional development and evaluation before they can be introduced to the public.

The development process is very expensive, many times more expensive than the original research grant, and therefore requires the participation of the private sector. Establishing the necessary collaboration between the HEW-supported scientist at the University and the private sector firm is the responsibility of the HEW Patent Counsel. Through the allocation of patent rights to the university the Patent Counsel seeks to create a working relationship between the two sectors for the purpose of bringing the medical invention to the public.

Over the past 10 years the development of substantially all of the HEW inventions has been due to the transfer of technology activities of the Patent Counsel. This has been accomplished through the establishment by the Patent Counsel of a network of over 70 technology coordinators at many of the country's major university and medical research centers. Although the Office of the HEW Patent Counsel has not received very much publicity, it has been able to transfer to the public more than 75 lifesaving inventions and pharmaceuticals.

Notwithstanding the above accomplishments, HEW's efforts to transfer medical technology have not achieved all that might be expected on the basis of the $2 billion annual investment in biomedical research. In the main, this lack of performance is due to the underemphasis of transfer of technology within the DHEW. It is in an effort to correct this situation that the Senator from Kansas is introducing an amendment to the bill under consideration.

In addition, I point out that we are working on legislation that I will be introducing at a later time that will modify the present Federal patent policy. But the present amendment does not address policy.

This neglect of an absolutely crucial aspect of HEW's biomedical research programs is manifest in the low visibility and lack of resources assigned to the Office of the Patent Counsel. For example, in spite of the accomplishments of the Patent Counsel, HEW has permitted the staffing of the Office to be reduced from 16 to 7.

HEW's decision to deny to scientists at universities ownership rights to many of the inventions made with HEW support precludes the possibility of these potentially life-saving breakthroughs ever reaching the public.

I have been advised that there are now 29 cases where a university has been joined by the sponsoring institute of NIH in its petition to HEW's General Counsel for permission to develop the invention for introduction to the public. HEW's response has been to ig-

nore the petition—in an effort to "stonewall" the university—to "stonewall" its own department.

Who is served by a policy that holds back from development 29 life-sustaining inventions? Potential cures for cancer, hepatitis, muscular dystrophy. Methods for early diagnosis of cancer are being denied to the American public, because of the actions taken by the HEW General Counsel. The Senator from Kansas just does not understand these attitudes that now prevail in HEW.

Perhaps the major reason for the low visibility of the HEW Patent Counsel is it placement in HEW. The HEW Patent Counsel resides in the Office of the HEW General Counsel. Because the General Counsel has not viewed technology transfer as a primary mission he has consistently downgraded this function. In the last year, the situation has eroded still further through the introduction of an additional review by the General Counsel of all petitions submitted by universities for allocation of patent rights. In the last year, the failure of the General Counsel to even respond to any of these petitions, despite the positive recommendation by NIH, has done much to destroy the existing technology transfer programs at HEW.

The General Counsel's decision to intervene in the transfer of technology program is in clear violation of DHEW's regulations. According to chapter 1–901 of the DHEW organizational manual, "the Assistant Secretary for Health is responsible for evaluation and development of current patent policy, and shall make the determination of rights in inventions and patents involving important policy considerations."

It is abundantly clear that the Assistant Secretary for Health, who also serves as the chairman of HEW's patent board, is delegated the administrative authority for patent matters. The General Counsel's assumption of this delegated authority, which effectively undercuts the Assistant Secretary for Health, is totally contrary to DHEW regulations.

The natural home for the focus for transferring medical technology is clearly the Public Health Service where both the knowledge and development agencies, NIH, CDC, FDA, and the health action agencies are located. Coordination of the delivery of medical technology is generally acknowledged to be the responsibility of the Assistant Secretary for Health. I therefore recommend that the administrative responsibilities of the DHEW patent counsel be transferred to the proposed Office of Health Technology. Since this office will be placed under the auspices of the Assistant Secretary for Health and will have the mandated responsibility for encouraging the use of efficacious and cost-effective technologies, it is the obvious place to put the unit responsible for transferring medical technology. Consideration of S. 2466 presents an appropriate opportunity to make an organizational change that will, I feel, go far in improving the expeditious delivery of medical technology to the public.

Mr. President, I appreciate the distinguished Senator's yielding, and I will reoffer the amendment at the appropriate time.

Mr. HATCH addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. HATCH. Mr. President, will the distinguished Senator yield some time to me?

Mr. KENNEDY. I yield 5 minutes.

Mr. HATCH. I think I can use 7 or 8.

The PRESIDING OFFICER. The Senator from Utah is recognized for 8 minutes.

Mr. HATCH. Mr. President, I ask unanimous consent that Ron Docksai of my staff be accorded the privileges of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Mr. President, I thank the distinguished Senator from Massachusetts, who is my friend, and with whom I serve on three committees and the Technology Assessment Board.

I have been considering this legislation for quite a while. As a member of the Human Resources Committee, on which both of us sit, I recognize the need to improve the coordination of those Federal research programs dealing with health technology. My able colleague, the Senator from Massachusetts (Mr. KENNEDY) has described many of these programs in the past, programs found in the National Institute of Health, the Food and Drug Administration, and others. On a Government organizational chart, these various Federal programs resemble a plate of spaghetti. They resemble something that ought to be hanging in the new gallery of art's east wing. And they are a fact of life, and I am sure there is not a Senator here who does not want to see these programs made more sensible and responsive.

However, the bill we are again asked to consider today is not the answer. This bill, S. 2466, will only serve to increase the caloric intake of our overweight Federal bureaucracy. We are asked to approve what amounts to a minimum of $75 million for the next 3 years to set up another one of the innumerable national institutes which promises to have overlapping authorities with existing agencies of the Federal Government. And it will do more than spend a lot more money.

This new National Center for the Evaluation of Medical Technology presents us with a new unwarranted expansion of the bureaucracy. Its purpose is not clearly stated; and in fact becomes all the more vague in light of the most recent creation of an Office of Health Technology within the Department of HEW. That is, using his authority to establish such an intra-agency review mechanism, Secretary Califano has already set up an office reputed to do what this new institute claims to want to do. And the preexisting office within HEW will do it for less. It will do it for $3 million, money to be taken from HEW's existing resources. (And I might add that these HEW resources are considerable considering the $168 billion they have to work with.) If one accepts Senator KENNEDY's premise on the need for such a new health mechanism, then let us support the reauthorization—at the appropriate time—of the office already established within HEW, an office which apparently can do the job for many millions less.

It is absolutely not true that the Department of HEW has declared a sudden need for the new institute to be set up in S. 2466. In fact, Assistant Secretary for Health. Richmond, testifying before the House Commerce Committee spoke against it. He stated that, "* * * The conceptual, methodological and managerial underpinning of a coherent technology management strategy" is still a frontier of public administration; that it has not been so well developed that there is a call for a significant new legislative mechanism to run the Federal Government's program in this area. To do so, to set up an office to do something which has not yet even been formulated in theory is to waste money and to create further bureaucratic problems—problems of an even more profound character than those we currently confront.

Mr. President, I admire my friend and colleague from Massachusetts, and it is a pleasure to serve with him on many committees.

In fact, I believe he and I are the only two in the whole Congress who serve on all four entities: The Judiciary Committee, the Human Resources Committee, the Joint Economic Committee, and now the Assessment Board.

However, I am compelled to vote against this bill, S. 2466, and I hope a majority of my fellow Senators will do the same. If Lincoln's old adage that Government rests on public opinion means anything, it means that proposition 13 was in part a message to the people here in Washington—a message to us. I have heard the message, and I know that all of us who have will vote against this unfortunate bill.

I think the problem is that all we do around here, instead of really going through the maze of legislation which confronts all of us and is eating all of us alive allowing the bureaucracy to engulf all of us, and dominating every aspect of our lives, and revitalizing that legislation and making it better, what we do is keep coming up with more and more legislation, more and more budgetary requests, more and more expenditures of money, more and more overlapping, more and more costs to the taxpayers, and, in the end, less and less services that really amount to anything for the American people.

I think it is not right for us to fund this entity to the tune of $75 million for the next 3 years, when the whole thing can be done for somewhere near $3 million within the current budget of HEW, and within the $183 billion that HEW has to spend.

What we are doing, instead of coming up with more constructive legislation, is clouding the whole medical-technical field to the point where it suffers because of governmental interference, not just inflation, which itself is caused by gov-

ernmental interference and the printing of too many dollar bills at a time and under circumstances in which nationally the dollar is debilitating. This bill, in my opinion, is just one of these overlarge pieces of legislation which really will not do that much good for anybody, which could be handled within the framework of bureaucracy which already exists, and which is essentially going to cost the taxpayers unnecessary billions of dollars because we are so bill conscious around here that it looks as though we just want another bill.

I suggest to my colleagues in this matter that I do not believe HEW is really behind this matter, and I do not see how any of us can be, in the light of the fact that HEW, as it is, is against it, in the light of the fact that the present budget of HEW is adequate, and in the light of the fact that we just set up, a short while ago, another bureaucracy entitled, "The Office of Health Technology," just in the past few weeks, which negates the need for setting up another new endowed health institute.

This newly established office is being funded with existing HEW funds of $5 million, and therefore I would submit today that my colleagues in the Senate should vote against this new institute, and in doing so save the taxpayers $75 million, which is the authorized level over the next 3 years for this particular bill.

I like to support good legislation, but this, in my opinion, is not good legislation, and, in the end, really is another one of those devastations to the taxpayers of America of which we already have enough.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. HATCH. I thank the Senator from Massachusetts, and I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. I yield myself such time as I may need.

Mr. President, the comments of the Senator from Utah fail to persuade me. I am sure he is not surprised by that. And hopefully he will not persuade the rest of our colleagues.

The fact of the matter is, Mr. President, that the American taxpayer in this body has paid an additional $10 billion to $12 billion over the period of the last 10 years because of new technology in the health area, and there is no mechanism, absolutely none today, to do an evaluation of the effectiveness of this technology in improving the health of the American people or endangering the health of the American people. Absolutely none.

The capacity for the United States to develop more and more and more technology is virtually unlimited. Some of it is going to be enormously valuable and helpful. Some much needed technology is not getting into the areas of the country where it could save lives. Other parts of the country and other population groups get excessive medical care and are subjected to excessive use of technology.

But if we were to accept the argument of the Senator from Utah, we would just say, "Go ahead, boys, put all the technology that you want on line, and the Federal Government, either through the medicare and medicaid programs or reimbursement mechanisms, will pick up the tariff for it."

Mr. President, some studies have estimated that 40 percent of the increase in the cost of a hospital day is due to the use of new technology. The Senator talks about getting a handle on cost control. Moderating the explosion of technology is one of the principal areas where we can get a handle on costs.

We are asking for $5 million; $5 million, when we are talking about $10 to $12 billion over the period of the last several years.

This is recognized as an important function by the National Academy of Sciences, by the prestigious Institute of Medicine, by the Boston University Health Policy Institute, and other organizations.

These organizations point to two goals for technology evaluation. One is improving the health of the American people, and the other saving money.

So, Mr. President, I fail to be persuaded by the distinguished Senator from Utah. He mentions what is being done in HEW. Let us review the record of what has happened in HEW. After we began studying this problem, we held hearings on the technology issue. We asked HEW to study the problem. They proposed, after 6 months, yet another study. After we actually proposed the legislation, HEW answered with their own proposal. When we set figures in terms of authorization, HEW then announced what they are going to do in terms of the amount of resources. The Congress has led, and they have followed, at every point. Now the Senator from Utah argues—after we have forced HEW into a critical and valuable new initiative—that we should sit back and let the administration work its will, that to do more would be "duplicative." I disagree. The Congress has precipitated this development, and has a role in defining its responsibilities.

Mr. President, we have a right here in Congress to recognize areas of important health policy issues and questions. I am satisfied that this proposal makes sense, both as a cost-saving device and as a quality of care device.

Finally, let me just say that the United States has no ability, even though we have virtually an automatic reimbursement for the use of technology, to do any kind of effective evaluation of what the cost of new technology is going to be, or what its impact is going to be on the health of the American people. Nowhere does that capacity exist. One result is that we are finding that the health care cost spiral has continued to go up, until the rate of inflation is now virtually 220 percent higher than the consumer price index.

We have no coordinated and effective mechanism that says when a technology is effective and worthwhile and valuable, that we are going to be able to get it out to doctors all over this country so they can treat their patients and bring them the best in terms of health technology. This function does not exist. When we get new technology that can help, we have absolutely no way to get it out.

Mr. HATCH. Will the Senator yield for a question?

Mr. KENNEDY. This is an important function, Mr. President. Brought together with all the other elements on statistics and health care research we believe that we can reduce the explosion of health care costs. We do not suggest we are going to be able to reverse the trend, but we are going to make it grow at a slower rate, and we believe it will have an important impact in improving health. I yield to the Senator.

Mr. HATCH. I thank the Senator.

What are the changes in this bill over the previous bill? The Senator has indicated that he has changes. Maybe I misunderstood, but I do not think so.

Mr. KENNEDY. Well, first of all, there is a reduction in terms of the authorization.

Mr. HATCH. That goes $46 million in the first year to $75 million in 3 years, is that correct?

Mr. KENNEDY. I am not certain to which figures the Senator refers. The Center for Health Statistics has existed for 10 years and health care research had an authorization in 1973 three times the amount proposed here. There has been a significant reduction, as stated by the Senator, since the Senate first considered this legislation.

There is also a fundamental difference in the fact that we are not creating any new institute. That is a major change. A major concern to members of this committee was the establishment of new institutes. We are not moving any agencies around or creating any new agencies. All these three centers and offices will remain in the Office of the Assistant Secretary for Health.

Let me just say very clearly why initially we put it outside that office, in a new Institute of Health Care Research. It seems to me that health care research ought to be separated from politics. Health statistics ought to be separated from politics. The Congress on health statistics to be unbiased and objective, I do not think it ought to be under the arm of a political office, as much as I support and respect many of HEW's officials. I think all the functions of this legislation belong in a nonpolitical setting, where their independence and objectivity are beyond dispute.

Because the membership felt the creation of a new institute was not appropriate, we have said all right, we will not do that, we will preserve the function on a significantly reduced basis within the Department of HEW and under the Assistant Secretary of Health.

I believe, as I mentioned earlier, we will observe these offices. We have every intention of doing that. If it becomes necessary at some future time, we can develop them in another way.

Mr. HATCH. Is the Senator representing that the $46 million in the first year and $75 million over the next 3 years are not funds? There is one other aspect of that question: Is this the only change between the old bill and the new bill, that it brings it from $100 million down to

$46 million in the first year? It is my understanding these are new funds. This will cost the taxpayer $75 million over the next 3 years. I think that is what the bill says. Is that the only change made from the prior bill?

Mr. KENNEDY. I do not know what figures the Senator is talking about. The National Center for Health Care Research under the current law is receiving $31 million. Under our proposal the authorization goes to $32.6 million. That is not even the inflation rate. The National Center for Health Statistics appropriation is $38.6 million and the authorization goes up to $43 million. In medical technology there is currently the authorization of $10 million which is increased by $5 million. Then the NCHCR authorization goes from $32 million to $35 million to $40 million, health statistics goes from $43 million to $47 million to $50 million, and medical technology goes $15 million, $25 million, $30 million. Those represent the increases in authorizations.

Mr. HATCH. Then they are new funds or increases?

Mr. KENNEDY. If the Senator wants to say——

Mr. HATCH. I am just asking.

Mr. KENNEDY. Will the Senator permit me to respond? There are modest new moneys in the legislation, just enough to perform vital and fully justified Federal functions. The funds allow us to know how many people die of heart disease and cancer each year. They allow us to determine infant mortality rates. They show the rate of hospitalization in different sections of the country, the rate of tonsillectomies, the medical procedures, and so on. Does the Senator have a better way of getting our infant mortality figures?

Sure, it is true these activities would continue under this legislation, and there would be a modest increase, though not as much as of an increase as we had in the previous bill.

Mr. HATCH. Am I correct in my assertion that HEW said that they could take care of this function within their present circumstances and that it would cost considerably less, we estimate $3 to $5 billion as contrasted to the many, many millions the distinguished Senator from Massachusetts is now going to saddle the taxpayers of America with?

Mr. KENNEDY. I reviewed earlier what has been the record of HEW in response to each step of the Health Subcommittee in this area.

I think our committee, quite frankly, has felt that the importance of this function needed the legislative authority which this provides because of the general lack of interest. I think there are people within HEW who understand the importance of it and believe in it deeply, and I am sure they can develop the capacity to carry it through effectively.

Mr. HATCH. Is it not true that we just established an Office of Health Technology within the last week or so that literally could take care of this whole problem without establishing this new bureaucracy?

Mr. KENNEDY. What is the new bureaucracy the Senator sees? It will be done within HEW. What is the new bureaucracy? Under the Assistant Secretary, what is the new one? The critical difference is that we are not establishing a new institute. We are giving legislative authorization to an existing office, an existing entity.

Mr. HATCH. It is going to be a national center for the evaluation of health technology, is it not? Is that what the Senator is establishing here?

Mr. KENNEDY. There is none in our legislation.

Mr. HATCH. I know, but we established just a week ago the Office of Health Technology within HEW. We seem to be duplicating the effort at a very high expense and cost to the taxpayers. That is the gripe I have.

I recognize the distinguished Senator from Massachusetts has great concern about health processes and systems in this country, but why do we have to keep duplicating in these areas which are already taken care of by recent legislation, within the past week or so?

Mr. KENNEDY. I am unfamiliar with the legislation the Senator refers to. We did not pass that in the last week.

Mr. HATCH. I am in error there. Secretary Califano did set up an interagency office about a week ago. I said it was legislation. I did not mean that. He said he could take care of this for considerably less than what this bill will cost and now we are going to saddle him with another bureaucracy with a tremendous cost to the taxpayers for the benefit, really, of hardly anybody.

Mr. KENNEDY. The Senator has not read the legislation.

Mr. HATCH. I am afraid I have.

(Mr. CANNON assumed the chair.)

Mr. KENNEDY. If the Senator would read the legislation, can he tell me where it establishes another one?

Mr. HATCH. Yes.

Mr. KENNEDY. Then find it, because it does not exist. What it does is it defines the authority and responsibility.

Mr. HATCH. On page 32 of the bill.

Mr. KENNEDY. That does not set it up. It establishes——

Mr. HATCH. It establishes a National Center for the Evaluation of Medical Technology.

Mr. KENNEDY. Mr. President, I am glad to continue to engage in further dialog, but the fact is we are defining the authority of an existing office. We are not creating a new office. This function which has been recommended as being a critical and important function from both the cost point of view and from a health benefit point of view by the Institute of Medicine and the National Academy of Science, and the others who have studied it.

Such distinguished individuals as Dr. David Hamburg of the Institute of Medicine have supported this legislation. This is the first piece of health legislation that he has ever testified on, in any Congress of the United States. He felt that it was that essential, from both a health point of view and a cost point of view. He feels that this particular approach warrants the support of the Members of Congress and the Senate.

The Senator from Utah thinks this function can be done in some different way. We have made a judgment that it was the best way to perform it and do it and I am hopeful that we will have the acceptance of the Senate.

Mr. HATCH. Will the Senator yield for just one more comment? Then I shall cease.

It is my understanding that the Assistant Secretary of HEW—the Assistant Secretary of Health for HEW—Mr. Richman, testified before the House Commerce Committee in February against developing this institute. So if you have conflict within HEW——

Mr. KENNEDY. Since the Senator is asking questions, we are not having a new institute. That was the previous bill, opposed by Senator DOLE.

Mr. HATCH. Well, he certainly spoke out against this concept.

Mr. KENNEDY. The Senator is incorrect. He spoke out in support of this concept and this office. He opposed a new institute of Health Care Research, not an Office of Health Technology.

Mr. HATCH. Not this man.

Mr. KENNEDY. The Senator is incorrect. I listened to Julie Richmond. I talked to him. I spent a lot of time as chairman of the subcommittee on this. The Senator is incorrect.

Mr. HATCH. If I happen to be correct, will the Senator withdraw his bill——

Mr. KENNEDY. The Senator is not correct. It is not a question of that.

Mr. HATCH (continuing). In the interest of bureaucratic creativity? I think this is just another expense proposed by the bureaucrats over in HEW, who, I think, have been arguing against what their own people have said. If the Senator will read Mr. Richman's testimony, he will find that he spoke out against the concept. I do not see why we allow the bureaucrats of Washington to tell us to keep funding them in a way that does not do anything for the taxpayers of the country. It is just costing more money.

I thank the Senator from Massachusetts for his courtesy in answering my questions and engaging in this discussion.

The PRESIDING OFFICER. The time of the Senator from Massachusetts has expired. Who yields time? The minority leader has 14 minutes remaining.

Mr. KENNEDY. We are prepared to yield time to the Senator from Kansas.

Mr. DOLE. I am prepared to yield back the time in order to have my amendment considered.

Mr. KENNEDY. We have to yield the time in order to consider that amendment.

UP AMENDMENT NO. 1626

(Purpose: To give the Office of Health Technology certain administrative responsibilities)

Mr. DOLE. I am prepared to yield back the time, the 14 minutes, and reoffer the amendment which is at the desk.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes unprinted amendment number 1626 to unprinted amendment numbered 1627 proposed by Mr. KENNEDY:

At the proper place, insert the following:

"SEC. 111. (a) The Assistant Secretary for Health, acting through the Office of Health Technology, shall have the responsibility (1) for developing the policies of the Department of Health, Education and Welfare with respect to the rights to inventions of its employees, grantees and contractors, subject to applicable laws and regulations; (2) for issuing invention and patent administration policies and procedures, (3) for administering the receipt of and processing invention reports by employees, grantees and contractors, of the Department and maintaining records and documents incident to patent and invention administration; (4) for making determinations of rights in inventions and patents involving inventions of employees, grantees and contractors of the Department; and (5) for making determinations with respect to applications for licenses under patent applications and patents owned by the United States, as represented, and for accepting licenses issued to the United States as represented by the Department.

(b) All functions of the Office of General Counsel relating to patent administration and administration of invention reports by employees, contractors and grantees of the Department are transferred to the Office of Health Technology, provided, however, that all legal services and functions, relating to patents inventions by employees, grantees and contractors of the Department shall remain in the Office of General Counsel.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. Mr. President, I think the Senator from Kansas has 10 minutes remaining on the amendment and 15 minutes remaining on the other side.

The PRESIDING OFFICER. The Senator is correct.

Mr. DOLE. I shall take just a minute, since we have already discussed the amendment. I think the amendment is acceptable.

Mr. KENNEDY. The Senator is correct. I thank the Senator.

Mr. SCHWEIKER. Mr. President, I commend the Senator for his amendment.

Mr. DOLE. Mr. President, I have listened with interest to the discussion between the distinguished Senator from Utah and the Senator from Massachusetts. The Senator from Kansas is now supporting the bill, based on what I thought were some rather significant changes having been made. It is my hope that we come back from the conference not with the bill we had earlier this year, but something pretty much like the one which may pass today.

Second, it is the hope of the Senator from Kansas that we create an Office of Medical Technology that will serve technology, not suppress it. I do not share the view indicated by the Senator from Massachusetts on the cost of technology. It seems to me our concern should be whether or not we are making progress and what the technology is.

On that basis and on the basis of the amendment I am am offering, I am prepared to yield back the remainder of my time.

The PRESIDING OFFICER. Is all time yielded back?

Mr. SCHWEIKER. Mr. President, I just want to say to the Senator that we appreciate his constructive role in this matter and his amendment, which we are supporting. I assure him that we will not come back from conference with the original bill, because the House bill is very similar to the amended bill that we have before us today. The Senator from Kansas can be reassured that we will not bring back anything that resembles the original bill. It should be something very close to the bill that we are considering here today.

Mr. DOLE. Mr. President, I ask unanimous consent that a table be printed in the RECORD at this point showing the difference in the funding under the original bill and the bill now before us, along with other changes that have been made in the original version and this version.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

[Dollars in millions]

	Orig. Bill	As Amend.
Health Research		
1978 28.6M		
1979	$40	$32.6
1980	45	35
1981	50	40
Health statistics		
1978 33.6M		
1979	60	43.4
1980	65	47
1981	70	50
Technology		
1979	25	15
1980	35	25
1981	50	35
Total	440	323

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Kansas to the amendment of the Senator from Massachusetts to the committee substitute.

The amendment was agreed to.

The PRESIDING OFFICER. The question now is on agreeing to the Kennedy amendment as amended.

Mr. KENNEDY. I ask for the yeas and nays.

Mr. SCHWEIKER. I yield back all the time on the committee amendment.

The PRESIDING OFFICER. The time has expired on the committee amendment.

Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question now is on agreeing to the amendment of the Senator from Massachusetts, as amended, to the committee substitute. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, there has not been a response, has there?

The PRESIDING OFFICER. There has not been a response. The yeas and nays were requested and there was a sufficient second.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the yeas and nays that were ordered on the amendment be vitiated.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The question now is on agreeing to the amendment of the Senator from Massachusetts, as amended, to the substitute.

The amendment (UP No. 1627), as amended, was agreed to.

● Mr. GLENN. I commend the distinguished Senator from Massachusetts and his subcommittee for their continuing efforts to improve health research, statistics and technology.

I have been especially concerned about the problem of obtaining and coordinating data regarding occupational hazards in the workplace. I have encouraged the National Cancer Institute and the Social Security Administration to coordinate their statistics, subject of course to restraints of the Privacy Act.

For example, through the social security system workers who have been unknowingly exposed to carcinogens might be made aware of hazards so that prompt medical checks can be made.

I note that under your amendment to S. 2466 the Secretary of HEW will coordinate statistical activities within the Department. Do I corectly understand that this provision could help increase the cooperation between the Social Security Administration and the health agencies, to the end that social security data could be judiciously used to help workers protect their health, and help Federal agencies identify dangerous work environments?

Mr. KENNEDY. The Senator from Ohio is correct. Our legislation would require the Secretary to coordinate health statistical and epidemiological activities of all agencies of the Department of Health, Education, and Welfare. Any of the agencies which can contribute information that will help workers know of dangers to which they have been exposed should be utilized.

Mr. GLENN. I thank the Senator from Massachusetts. The Department and the National Cancer Institute plan to use the social security system to alert asbestos workers who may have been exposed to carcinogens. I have encouraged HEW to expand this kind of effort, and to undertake a pilot project to use the social security system to generate epidemiological data. Do I understand that your legislation seeks to reinforce our concern that notification of exposed workers be expanded and accelerated, and that innovative methods, including use of the social security system to generate epidemiological data, will be utilized?

Mr. KENNEDY. That is correct. The act provides additional authority and authorization of funds for such purposes.

Mr. GLENN. I thank the Senator, and I compliment him for his leadership in this area.

Mr. President, I ask unanimous consent to insert at this point in the RECORD my July 19, 1978, letters on these matters to Dr. Arthur C. Upton, Director of the National Cancer Institute, and Acting Commissioner Don I. Wortman, of the Social Security Administration.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

COMMITTEE ON GOVERNMENTAL AFFAIRS,
Washington, D.C., July 19, 1978.

Mr. DON I. WORTMAN,
Acting Commissioner, Social Security Administration, Baltimore, Md.

DEAR MR. WORTMAN: I am sure you are aware of the increasing concern over workplace exposures that induce disabling and fatal disease conditions many years after employment began. In addition to the known occupational hazards, there are other situations in which an unusual disease prevalence has been noted in certain plants, industries and occupations or in particular geographic locales. The reasons for these observations are not always evident and additional research is needed to elucidate causative factors. In this regard, epidemiologic studies in which the disease experience of industrial populations is monitored over time, or studies of the occupational background of groups of persons with the same disease, are fruitful means of identifying high-risk occupations which, in turn, point toward possible etiologic agents.

A major determining factor in initiating epidemiologic studies is availability and accessibility of appropriate data to define exposed populations according to employment history and identify health outcomes such as fact and cause of death. For example, the National Cancer Institute conducts follow-up studies of various worker groups to determine their mortality status. Identifying information and employment data on individual workers are usually obtained from cooperating companies or labor unions. The ultimate fate of these workers is determined by reference to Social Security Administration earnings, benefits, and claims files, since these records are currently the only national follow-up resource available to the National Cancer Institute.

In one such study, the Social Security Administration identified 1,507 deaths among 5,742 men employed at a large U.S. copper smelter. Although the death information proved of great value, further use of SSA data could have been made if study subjects still alive (as verified from reported current earnings or receipt of claim payments) were identified in the returns. In this particular study, 82 percent of the workers not known to be dead were in reality alive but current SSA operating procedures do not permit them to be individually identified.

In some instances, employment data are not obtainable from the usual sources, either because permission to access has been denied, or because it has been lost, destroyed or is incomplete. In these cases, the Social Security Administration is in the unique position of being the only source of information as to who was employed where, when and for how long. In selected instances, these data may be vitally important to a research effort to identify high-risk industries. In the past, limited use has been made of SSA employment data by individual researchers and their studies have been recognized as important achievements in industrial epidemiology.

One other use of SSA employment files is in the compilation of lifetime employment histories for individuals afflicted with certain diseases—looking for unusual patterns compared to a random sample of nondiseased persons. The National Cancer Institute is currently conducting studies of persons with lung cancer in which prior employment data is obtained from death certificates and personal interviews with the patient or his next-of-kin. In one such study, it was found from interviews that a large proportion of lung-cancer victims had worked in certain shipyards during World War II but this was not reflected on their death certificates since it was not their "usual" or last employment. For this kind of study, SSA data would be very helpful in supplying a historical record of employment that by itself could provide clues to industrially-related disease and also supplement and verify information gained from personal interviews, particularly when reliance is placed on the memories of next-of-kin for persons already dead of the disease being studied.

I have attempted to outline briefly three general research uses of SSA data that would greatly assist other federal agencies in their environmental programs. I realize that these approaches must be used judiciously in the most important or critical situations so that SSA resources are not taxed beyond their limits. In addition, it is important in any use of SSA resources that the protection of individual privacy be maintained. Beyond this caveat however, I wish you would give these ideas careful thought and consider getting together with appropriate parties to work out collaborative arrangements for discrete well-defined projects of high priority to the federal environmental health research effort. I believe, in particular, that a pilot project involving the use of the Social Security system in identifying connections between work place environment and cancer would be particularly useful at the present time. I am sending an information copy of this letter to Dr. Arthur C. Upton, Director of the National Cancer Institute. I am also urging him (copy attached) to use the Social Security system not only for the purpose of carrying out a pilot project of the type I have outlined, but also for the purpose of notifying persons at risk to development of cancer due to exposures to environmental carcinogens. If you have any problems in this matter, I would appreciate information on their nature and alternatives for their solution in which I may be of assistance to you.

Best regards.
Sincerely,

JOHN GLENN.

JULY 19, 1978.

Dr. ARTHUR C. UPTON,
Director, National Cancer Institute, National Cancer Program, National Institutes of Health, Bethesda, Md.

DEAR DR. UPTON: It has been apparent to me for some time that the Social Security Administration could be of great potential value to the National Cancer Institute for the purpose of generating epidemiological data involving connections between work place environment and cancer. Once such connections have been made, the Social Security Administration can also be used to notify persons at risk to the development of cancer due to exposures to environmental carcinogens.

I understand that the HEW/NCI will utilize a Social Security mailing in early October to alert social security recipients of the possible health effects of asbestos exposure. I commend HEW/NCI and the Social Security Administration on this approach.

I realize that this first utilization of the system must be evaluated for any possible problems. I would also encourage NCI and other groups to consider this system as a means for notification of persons at risk to other environmental carcinogens. An example of such carcinogenic exposure might be benzidine, betanapthalamine and related dyes.

Beyond this, I would like to see a program begun, initially involving a pilot project, whereby the Social Security system would be used to generate new epidemiological data. I believe such a project would not only show the value of using the Social Security system for this purpose, but could be used to illustrate and alleviate some of the problems that may conceivably arise through utilization of the SSA. In particular, in any project involving the Social Security Administration, the protection of individual privacy must be maintained; and ways and means of providing such protection should be studied and incorporated into the project.

I am sending an information copy of this letter to Don I. Wortman, Acting Commissioner of the Social Security Administration. I am also urging him (copy attached) to work out collaborative arrangements with other federal agencies which need SSA data for their environmental programs consistent with the caveat on protection of individual privacy.

If you have any problems in this matter I would appreciate information on their nature and alternatives for their solution in which I may be of assistance to you.

Best regards.
Sincerely,

JOHN GLENN.●

The PRESIDING OFFICER. If there be no further amendments to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. Is all time yielded back? There is no time remaining. The yeas and nays are automatic on reconsideration, the first vote on the bill having been a rollcall.

The bill having been read the third time, the question now is, Shall the bill pass?

The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Arizona (Mr. DECONCINI), the Senator from Colorado (Mr. HART), the Senator from Maine (Mr. HATHAWAY), the Senator from Kentucky (Mr. HUDDLESTON), and the Senator from Minnesota (Mrs. HUMPHREY) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "yea."

Mr. STEVENS. I announce that the Senator from New York (Mr. JAVITS) is necessarily absent.

The result was announced—yeas 74, nays 19, as follows:

[Rollcall Vote No. 301 Leg.]

YEAS—74

Anderson	Griffin	Nelson
Baker	Haskell	Nunn
Bayh	Hatfield, Mark O.	Packwood
Bellmon	Hatfield, Paul G.	Pearson
Bentsen	Hayakawa	Pell
Biden	Heinz	Percy
Brooke	Hodges	Randolph
Bumpers	Hollings	Ribicoff
Burdick	Inouye	Riegle
Byrd, Robert C.	Jackson	Sarbanes

So the bill (S. 2466), as amended, was passed, as follows:

S. 2466

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE; REFERENCE TO ACT

SECTION 1. (a) This Act may be cited as the "Health Services Research, Health Statistics and Medical Technology Act of 1978".

(b) Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Public Health Service Act.

SECTION 101. (a) The heading to section 304 is amended to read as follows:

"GENERAL AUTHORITY RESPECTING HEALTH STATISTICS, HEALTH SERVICES, MEDICAL TECHNOLOGY RESEARCH EVALUATIONS, AND DEMONSTRATIONS".

(b)(1) Section 304(a) is amended to read as follows:

"(1) The Secretary, acting through the National Center for Health Services Research, the National Center for Health Statistics, and the Office of Health Technology, shall conduct and support research, demonstrations, evaluations, and statistical and epidemiological activities for the purpose of improving the effectiveness, efficiency, and quality of health services in the United States.

"(2) In carrying out paragraph (1), the Secretary shall give appropriate emphasis to research, demonstrations, evaluations, and statistical and epidemiological activities respecting—

"(A) the accessibility, acceptability, planning, organization, distribution, utilization, and financing of systems for the delivery of health care,

"(B) alternative methods for measuring and evaluating the quality of systems for the delivery of health care,

"(C) the collection, analysis, and dissemination of health related statistics,

"(D) alternative methods to improve and promote health statistical and epidemiological activities,

"(E) the safety, efficacy, effectiveness, cost effectiveness, and social, economic, and ethical impacts of medical technologies,

"(F) alternative methods for disseminating knowledge concerning health and health related activities,

"(G) the special health problems of low income and minority groups and the elderly to insure that these problems are assessed on a periodic regular basis, and

"(H) the prevention of illness, disability, and premature deaths in the United States.

"(3) The Secretary shall (through National Research Service Awards) undertake and support manpower training programs to provide for an expanded and continuing supply of individuals qualified to perform the research, evaluation, and demonstration projects set forth in sections 305, 306, and 306A.".

(2) Section 304(b)(1) is amended by (1) inserting ", when appropriate," before "enter into contracts" and (2) inserting a period after "entities and individuals" and striking all that follows.

(3) Section 304(b)(3) is amended by adding at the end thereof the following new sentence: "In addition, the Director of the National Center for Health Services Research and the Director of the National Center for Health Statistics, in order to assist each of them in carrying out the functions set forth in sections 305 and 306 respectively, and without regard to any other provision of this Act, are each authorized to obtain the services of not more than fifteen experts or consultants who have appropriate scientific or professional qualifications.".

(4) Section 304(c) is amended to read as follows:

"(c) The Secretary shall coordinate all research, evaluation, demonstration, and statistical and epidemiological activities referred to in subsection (a) undertaken and supported through units of the Department of Health, Education, and Welfare. To the maximum extent feasible, such coordination shall be carried out through the National Center for Health Services Research, the National Center for Health Statistics and the Office of Health Technology.".

SEC. 102. (a) Section 305(b) is amended by—

(1) striking "technology," in paragraph (1);

(2) striking "and" after "manpower;" in paragraph (2);

(3) striking the period in paragraph (3) and inserting in lieu thereof ", and"; and

(4) adding at the end thereof the following new paragraph:

"(4) the uses of computer science in health services delivery and medical information systems.".

SEC. 103. (a) Section 306(b) is amended by—

(1) striking "; and" after "dissolution" in paragraph (1)(H) and inserting in lieu thereof a period;

(2) adding at the end thereof the following new paragraph:

"(3) undertake and support (by grant or contract or both) epidemiological research, demonstrations, and evaluations on the matters referred to in paragraph (1).".

(b) Section 306(c) is amended by—

(1) inserting "and epidemiological" after "statistical" each place it occurs; and

(2) striking "Labor and Public Welfare" and inserting in lieu thereof "Human Resources".

(c) Section 306(e) is amended by—

(1) inserting "to be known as the Cooperative Health Statistics System" after "levels" in paragraph (1), and

(2) striking "such cooperative system" each place it occurs and inserting in lieu thereof "such System".

(d) Section 306(1)(1) is amended by striking "United States".

(e) Section 306 is amended by adding at the end thereof the following new subsection:

"(j) In carrying out the requirements of section 304(c) and paragraph (2) of subsection (e), the Secretary shall coordinate health statistical and epidemiological activities of the Department of Health, Education, and Wefare by—

"(1) developing in consultation with the National Committee on Vital and Health Statistics, promulgating by regulation, and maintaining the minimum sets of data needed on a continuing basis to fulfill the collection requirements of subsection (b)(1),

"(2) after consultation with the National Committee on Vital and Health Statistics, establishing, by regulation, standards to assure the quality of health statistical and epidemiological data collection, processing, and analysis,

"(3) reviewing periodically all existing health statistical data collections of the Department that were previously approved pursuant to the Federal Reports Act of 1942 to determine whether such collections conform with the minimum sets of data and the standards promulgated pursuant to paragraphs (1) and (2). If any such collections are found not to be in conformance, the Secretary shall take the necessary action to assure that any future collections (effective ninety days after the review) are in conformance,

"(4) reviewing all proposed health statistical data collections of the Department that require approval pursuant to the Federal Reports Act of 1942 to determine whether such proposed collections conform with the minimum sets of data and the standards promulgated pursuant to paragraphs (1) and (2). If any such proposed collections are found not to be in conformance, the Secretary shall take the necessary action to bring them into conformance before such proposed collections are initiated.".

SEC. 104. Title III is amended by adding after section 306 the following new heading and section:

"OFFICE OF HEALTH TECHNOLOGY

"SEC. 306A. (a) There is established in the Department of Health, Education, and Welfare the Office of Health Technology (hereinafter in this section referred to as the 'Office') which shall be under the direction of a Director who shall be appointed by the Secretary and supervised by the Assistant Secretary for Health (or such other officer of the Department as may be designated by the Secretary as the principal advisor to him for health programs).

"(b) The Secretary, acting through the Office, shall—

"(1) establish, in consultation with the Council for the Evaluation of Medical Technology, priorities for research, demonstrations, and evaluations of medical technologies as prescribed by paragraph (2)(A). In establishing such priorities, particular emphasis should be placed on—

"(A) the actual or potential risks and the actual or potential benefits to patients associated with the use of the medical technology,

"(B) per use and/or aggregate cost of the medical technology,

"(C) the rate of utilization of the medical technology, and

"(D) the stage of development of the medical technology; and

"(2) undertake and support (by grant or contract or both) research, demonstrations, and evaluations concerning—

"(A) the safety, efficacy, effectiveness, cost effectiveness, and social, ethical, and economic impacts of particular medical technologies;

"(B) the factors that affect the utilization of medical technologies throughout the United States;

"(C) alternative methods for disseminating information on medical technologies to health professionals;

"(D) alternative methods for measuring the quality of health services; and

"(E) the effectiveness, administration, and enforcement of quality assurance programs.

"(c) To assist in carrying out this section, the Secretary, acting through the Office, shall cooperate and consult with the National Institutes of Health, the Veterans' Administration and any other interested Federal departments or agencies and with State and local health departments and agencies.

"(d)(1) The Secretary, acting through the Office, shall, by grants or contracts, or both, assist public and/or private nonprofit entities in meeting the costs of planning and establishing new centers, and operating existing and new centers for multidisciplinary research, evaluations, and demonstrations respecting the matters referred to in paragraph (2) of subsection (b). To the extent practicable, the Secretary shall take such actions, in accordance with the requirements of this subsection and section 308, to

assure that three such centers shall be operational by September 1, 1981.

"(2)(A) No grant or contract may be made under this subsection for planning and establishing a center unless the Secretary, acting through the Office, determines that when it is operational it will meet the requirements listed in subparagraph (B), and no payment shall be made under a grant or contract for operation of a center unless the center meets such requirements.

"(B) Each center shall meet the following requirements:

"(i) there shall be a full-time director of the center who possesses a demonstrated capacity for sustained productivity and leadership in research, demonstrations, and evaluations respecting the matters referred to in paragraph (2) of subsection (b), and there shall be such additional professional staff as may be appropriate;

"(ii) the staff of the center shall have expertise in the various disciplines needed to conduct multidisciplinary research, evaluations and demonstrations respecting the matters referred to in paragraph (2) of subsection (b);

"(iii) the center shall be located within an established academic or research institution with departments and resources appropriate to the programs of the center; and

"(iv) each center shall meet such additional requirements as the Secretary may by regulation prescribe.

"(e)(1) There is established in the Office a National Council for the Evaluation of Medical Technology (hereinafter in this subsection referred to as the 'Council') to be composed as follows:

"(A) The Surgeon General, the Director of the National Institutes of Health, the Chief Medical Director of the Veterans' Administration, the Assistant Secretary of Defense for Health Affairs, the Chairman of the National Professional Standards Review Council (or their designees), and three other employees of the Department of Health, Education, and Welfare (or their designees) appointed by the Secretary, shall be ex officio members of the Council.

"(B) Eighteen members appointed by the Secretary. Six of the appointed members shall be selected from among leading medical or scientific authorities; two of the appointed members shall be practicing physicians; two of the appointed members shall be practicing hospital administrators; two of the appointed members shall be selected from members of the general public who are leaders in the field of economics; two of the appointed members shall be selected from members of the general public who are leaders in the field of law; and four of the appointed members shall be selected from outstanding members of the general public who, based on their interests, disciplines, and/or expertise, would be appropriate members of the Council.

"(2)(A) Each appointed member of the Council shall be appointed for a term of four years, except that—

"(i) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term; and

"(ii) of the members first appointed after the effective date of this section, five shall be appointed for a term of four years, five shall be appointed for a term of three years, five shall be appointed for a term of two years, and three shall be appointed for a term of one year, as designated by the Secretary at the time of appointment.

Appointed members may serve after the expiration of their terms until their successors have taken office.

"(B) A vacancy in the Council shall not affect its activities, and twelve members of the Council shall constitute a quorum.

"(C) Members of the Council who are not officers or employees of the United States shall receive for each day they are engaged in the performance of the functions of the Council compensation at rates not to exceed the daily equivalent of the annual rate in effect for grade GS-18 of the General Schedule, including traveltime; and all members, while so serving away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as such expenses are authorized by section 5703 of title 5, United States Code, for persons in the Government service employed intermittently.

"(3) The Council shall annually elect one of its appointed members to serve as Chairman until the next election.

"(4) The Director of the Office shall (1) designate a member of the staff of the Office to act as Executive Secretary of the Council, and (2) make available to the Council such staff, information, and other assistance as it may require to carry out its functions.

"(5) The Council shall meet at the call of the Chairman, but not less often than four times a year.

"(6) The Council is authorized to—

"(A) advise, consult with, and make recommendations to the Secretary and the Director of the Office with respect to carrying out the provisions of this section;

"(B) after consultation with appropriate public and private entities, advise the Secretary concerning the safety, efficacy, effectiveness, cost effectiveness, and the social and economic impacts of particular medical technologies;

"(C) after consultation with appropriate public and private entities, develop, when appropriate and to the extent practicable, exemplary standards, norms, and criteria concerning the utilization of particular medical technologies;

"(D) publish, make available and disseminate, through the National Library of Medicine, promptly in understandable form and as widely as possible, but, at a minimum, to each of the National Institutes of Health, to the Food and Drug Administration, to the Indian Health Service, and the Bureau of Medical Services of the United States Public Health Service, to all health systems agencies, to all Professional Standards Review Organizations, to all medical schools, professional associations, State and local departments of public health, and to the Department of Medicine and Surgery of the Veterans' Administration and the Assistant Secretary of Defense for Health Affairs, the standards, norms, and criteria developed pursuant to paragraph (C); and

"(E) review and approve any grant that the Office proposes to make and any contract the Office proposes to enter pursuant to this section if such grant or contract is in an amount exceeding $35,000 of direct costs.

"(f) For purposes of this section, medical technology means any discrete and identifiable medical or surgical regimen or modality used to diagnose or treat illness, prevent disease, or maintain patient well-being.".

SEC. 105. (a) The heading to section 308 is amended by inserting "306A," after "306,".

(b) Section 308(a)(1)(B) is amended by (1) striking "and" after "research" and inserting in lieu thereof "," and (2) inserting "and the evaluation of medical technology" after "statistics".

(c) Section 308(b)(1) is amended by inserting "306A," after "306".

(d) Section 308(d) is amended by (1) inserting "306A," before "or 307" and (2) by inserting "or epidemiological" after "statistical" in paragraph (1).

(e) Section 308(e) is amended by inserting "306A," after "306" each place it occurs.

(f) Section 308(f) is amended by striking "or 306" and inserting in lieu thereof "306, or 306A".

(g) Section 308(g)(2) is amended by striking "and 306" and inserting in lieu thereof "306, and 360A".

(h) Section 308(h)(1) is amended by striking "or 306" each place it occurs and inserting in lieu thereof "306 or 306A".

(i) Section 308(1)(1) is amended by—

(1) striking "and" after "1976," and inserting ", $32,600,000 for the fiscal year ending September 30, 1979, $35,000,000 for the fiscal year ending September 30, 1980, and $40,000,000 for the fiscal year ending September 30, 1981" after "1978" in the first sentence thereof.

(2) amending the second sentence thereof to read as follows: "Of the funds appropriated under this paragraph for any fiscal year, at least 15 per centum of such funds or $6,000,000, whichever is less, shall be available only for health services research, evaluation, and demonstration activities directly undertaken by the National Center for Health Services Research and at least 5 per centum of such funds or $1,000,000, whichever is less, shall be available only for dissemination activities directly undertaken by the Center.".

(j) Section 308(1)(2) is amended by—

(1) inserting "and epidemiological" after "statistical",

(2) striking "and" after "1976," and inserting ", $43,400,000 for the fiscal year ending September 30, 1979, $47,000,000 for the fiscal year ending September 30, 1980, and $50,000,000 for the fiscal year ending September 30, 1981" after "1978", and

(3) inserting at the end thereof the following new sentence: "Of the funds appropriated under this paragraph for any fiscal year commencing after September 30, 1978, at least 15 per centum of such funds shall be available only for health statistical and epidemiological activities directly undertaken by the National Center for Health Statistics.". (K) Section 308(1) is amended by adding at the end thereof the following new paragraph:

"(3) For medical technology research, evaluation, and demonstration activities undertaken or supported under section 304 or 306A, there are authorized to be appropriated $15,000,000 for the fiscal year ending September 30, 1979, $25,000,000 for the fiscal year ending September 30, 1980, and $30,000,000 for the fiscal year ending September 30 1981. Of the funds appropriated under this paragraph for any fiscal year commencing after September 30, 1980, at least 15 per centum of such funds shall be available only for medical technology research, evaluation, and demonstration activities directly undertaken by the Office of Health Technology.".

SEC. 106. Section 472(a)(1)(A) is amended by—

(1) striking "and" after "private institutions," in clause (iii);

(2) redesignating clause (iv) as clause (vii); and

(3) inserting after clause (iii) the following:

"(iv) research at the National Center for Health Services Research, the National Center for Health Statistics, and/or the Office of Health Technology,

"(v) training at such Centers and Office to undertake such research,

"(vi) research on the matters set forth in section 304(a)(2) at public institutions and at nonprofit private institutions, and".

SEC. 107. Part K of title III is repealed in its entirety

SEC. 108. Title IV is amended by adding at the end thereof the following new section:

"SEC. 477. The Director of the National Institutes of Health shall make available annually to the Office of Health Technology

and the Council for the Evaluation of Medical Technology a list of all technologies (as defined in section 306A(g)) of which he is aware that are under development and that appear likely to be used in medical practice in the near future.".

SEC. 109. The Secretary, acting through the National Center for Health Services Research, shall arrange for the conduct of a study to evaluate the impact upon the utilization of health services by and the health status of members of the United Mine Workers and their dependents as a result of changes in the United Mine Workers' collective-bargaining agreements of March 1978, that require copayments for health services. Such study and a report thereon shall be completed and submitted to the secretary, the Committee on Human Resources, the Committee on Appropriations, and the Committee on Finance of the Senate, and the Committee on Interstate and Foreign Commerce of the House of Representatives no later than thirty months after the date of enactment of this section. Not more than $1,000,000 of the sums authorized to be appropriated for health services research, evaluation and demonstration activities by section 308(1)(1) of the Public Health Service Act shall be made available for such study.

SEC. 110. (a) The Secretary, in cooperation with the Secretary of Labor and the Administrator of the Environmental Protection Agency, shall develop a plan for the collection and coordination of statistical and epidemiological data on the effects of the environment on health. Such plan shall include, but not be limited to, a review of the data now available on health effects, deficiencies in such data, and methods by which existing data deficiencies can be corrected. The plan shall be submitted to Congress not later than October 1, 1979.

(b) In carrying out the provisions of subsection (a), the Secretary, the Secretary of Labor, and the Administrator of the Environmental Protection Agency shall consult with the Committee on Human Resources and other appropriate committees of the Senate and the Committee on Interstate and Foreign Commerce and other appropriate committees of the House of Representatives.

SEC. 111. (a) The Assistant Secretary for Health, acting through the Office of Health Technology, shall have the responsibility (1) for developing the policies of the Department of Health, Education, and Welfare with respect to the rights to inventions of its employees, grantees and contractors, subject to applicable laws and regulations; (2) for issuing invention and patent administration policies and procedures; (3) for administering the receipt of and processing invention reports by employees, grantees and contractors, of the Department and maintaining records and documents incident to patent and invention administration; (4) for making determinations of rights in inventions and patents involving inventions of employees, grantees and contractors of the Department; and (5) for making determinations with respect to applications for licenses under patent applications and patents owned by the United States, as represented, and for accepting licenses issued to the United States as represented by the Department.

(b) All functions of the Office of General Counsel relating to patent administration and administration of invention reports by employees, contractors and grantees of the Department are transferred to the Office of Health Technology, provided, however, that all legal services and functions, relating to patents inventions by employees, grantees and contractors of the Department shall remain in the Office of General Counsel.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of S. 2466.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I send an amendment to the desk, on behalf of myself, Mr. SCHWEIKER, Mr. WILLIAMS, and Mr. JAVITS.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

Amend the title so as to read as follows:

To amend the Public Health Service Act to extend and revise the assistance programs for health services research and health statistics; to establish the Office of Health Technology, and for other purposes.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

DEPARTMENT OF THE INTERIOR APPROPRIATIONS, 1979

The PRESIDING OFFICER. The Senate will continue with the consideration of H.R. 12932, which will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 12932) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1979, and for other purposes.

AMENDMENT NO. 3443

The PRESIDING OFFICER. The pending question is on the amendment of the Senator from Louisiana.

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that Roger Singlaub and John MacIlroy, of my staff, have the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I would like to ascertain what the situation is with respect to the Interior appropriation bill and the pending amendment thereto. Can any Senator inform me and the Senate as to just what is about to happen with respect to the Johnston amendment?

Mr. NELSON. Mr. President, may we have order? We cannot hear.

The PRESIDING OFFICER. The Senate will be in order.

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. BROOKE. If I may respond to the distinguished majority leader, an agreement has been reached, language has been prepared, and it is my understanding that the Senator from Louisiana (Mr. JOHNSTON) will call up immediately the substitute amendment.

There may be a question of germaneness which may require a vote of the full Senate. Depending upon the outcome of that vote, there will be a vote on the substitute amendment. If the substitute amendment should be rejected, then there would be consideration of the Johnston amendment.

I see the Senator from Louisiana in the Chamber, and he probably can explain it better, but that is my understanding.

Mr. ROBERT C. BYRD. I thank the Senator.

I yield to the distinguished Senator from Louisiana.

Mr. JOHNSTON. Mr. President, I propose to do this: I will offer at this point a compromise amendment. The dimensions of that compromise amendment are as follows: Under present law——

Mr. ROBERT C. BYRD. Would the distinguished Senator withhold the details of the amendment and inform the majority leader as to what is contemplated procedurally?

Mr. JOHNSTON. I will offer this amendment; then the question of legislation on an appropriation bill will be raised. We will then raise the question of germaneness, which, under the rules, will be submitted to the Senate for a vote. If germaneness is sustained, then we will proceed to consider this amendment on its merits and vote on the amendment on its merits.

If the germaneness is not upheld, then the substitute amendment would be out of order, and we would go back to consideration of the original Johnston amendment.

So the next vote would be on the question of germaneness of the compromise amendment.

Mr. ROBERT C. BYRD. I thank the distinguished Senator.

Mr. President, I hope the distinguished Senator will proceed to explain his amendment. Then, in a reasonably short time, if someone wishes to raise the point of order, I wish that would be done, and the question of germaneness could be raised. Of course, the vote would occur immediately, without debate on that question. So that the Senate could proceed to work its will on the procedural question.

Then, if it gets to the substantive question, that should be done as soon as reasonably possible, so that this bill may be completed and sent to conference at a reasonably early hour today.

Mr. HANSEN. Mr. President, will the distinguished majority leader yield the floor for a question or observation?

Mr. ROBERT C. BYRD. I yield.

Mr. HANSEN. It is my intention to raise a point of order on the amendment. While I have not seen the final drafting of it, if it still contains what earlier was identified as subparagraph (e) on page 2 of the handout, I shall raise the point of order that it does constitute legislation on an appropriations bill. I just wanted to inform my friend.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. President, I yield the floor. I hope the Senator will proceed to explain his amendment.

Mr. JOHNSTON. Mr. President, I shall be very brief in explanation of this amendment and expect the vote to come momentarily.

Under the present law, Mr. President, the northeast coast, which is Petroleum Allocation District No. 1, receives a 30-percent entitlement for the importation of foreign refined residual fuel oil and other products. What that means is under the present law consumers of other

petroleum products across the country subsidize the northeast coast to the extent of about 60 cents per barrel on imported residual. The reason for that, according to DOE at that time, or FEA, which promulgated the rule at that time, was their recognition that fuel costs generally are higher in the Northeast and they are the principal users of residual fuel oil.

Now, the Department of Energy has proposed in lieu of the 30-percent entitlement to grant to the Northeast a 100-percent entitlement which would be a subsidy of about $2 per barrel. Along with granting that 100-percent entitlement DOE had proposed to eliminate the fee-free license.

There is an importation fee on foreign residual oil of 63 cents per barrel. But presently they have a fee-free license. So under the DOE proposal the Northeast would receive $2 as a subsidy but lose 63 cents under the fee-free license which would expire.

I felt that that was an unwise thing to do, to subsidize the Northeast at the expense of the rest of the country. I felt that it would stand in the way of coming up with an overall refinery policy, which we badly need.

After some negotiation on this matter, however, we have arrived at this compromise which does this:

First, in lieu of the 30-percent entitlement it would grant a 50-percent entitlement. In other words, our side, those of us who feel it is unfair to subsidize the northeast coast, would win five-sevenths of the victory, the northeast coast would win two-sevenths of the victory or, to state it differently, in lieu of the 70-percent entitlement, which will go into effect automatically under the DOE rulemaking without action of Congress, we would grant an additional 20 percent. That 20-percent entitlement would expire July 1 of next year. So it is a very temporary thing.

And the question of the continuation of the fee-free license would be left to the President to decide, and I understand that the President would probably extend the fee-free license.

Mr. HANSEN. Mr. President, will the Senator yield for one short observation?

Mr. JOHNSTON. I yield for a short observation, yes.

Mr. HANSEN. It is my understanding and I think the Senator from Louisiana said that this regulation proposed by DOE would go into effect immediately. Am I not correct in understanding that under the APA, the regulation as proposed, has to be published, hearings are to be held, or a time is given during which comments will be received, and only when that process has been gone through would DOE then be enabled to go through with the regulation? Am I not right about that?

Mr. JOHNSTON. The Senator is correct. However, there has been notice of rulemaking. They are in the process of those hearings now. As I understand it, the regulations would probably go into effect on or about August 26.

Mr. HANSEN. The point I want to make, Mr. President, is simply: I do not think it is accurate to say that after this legislation action here it is going to go into effect immediately or with great assurance that will be because I think that that presupposes that the whole Administrative Procedure Act will be ignored despite what the report may disclose. I think the Senator made an excellent record this morning in saying why the thing should not go in, and I hope that DOE is not so immune to the feelings of the people in the country that it will ignore the overwhelming evidence that I think condemns this concept.

Mr. BROOKE. Mr. President, will the Senator from Wyoming and the Senator from Louisiana yield?

Mr. HANSEN. I do not have the floor.

Mr. BROOKE. Only for a response to that, will the Senator yield?

Mr. JOHNSTON. If the Senator will permit, why does he not let me respond briefly to that and then get on with the question of germaneness?

Mr. BROOKE. I have only one point to make to the Senator because he brought this matter up on the floor earlier this morning and we discussed it. The present rule will go into effect within 2 weeks. As to the second rule he is talking about, he is quite correct. That will require comment and hearings, et cetera, before going into effect. But the present rule will go into effect within 2 weeks. That will make it about August 22.

Mr. HANSEN. What is the present rule?

Mr. BROOKE. The present rule gives us, as he said, seven-sevenths, rather than the compromise the Senator is talking about.

Mr. JOHNSTON. The Senator's observation with respect to that rule going into effect is correct. They have complied with the Administrative Procedure Act, and they have completed that hearing process. It is my understanding that it would go into effect automatically on August 26. I think it is wrong. That is the whole purpose of my amendment to prevent it from going into effect. But I think the process has been completed and that it would go into effect.

Mr. HANSEN. If the Senator from Louisiana will yield for a further inquiry, has DOE said, absent the expiration of the time which it is presumed to afford the public for comment, it has already determined what it is going to do?

Mr. JOHNSTON. That is my understanding.

Mr. HANSEN. And who made that statement?

Mr. JOHNSTON. I cannot tell the Senator who made the statement.

Mr. HANSEN. Did Secretary Schlesinger make this?

Mr. JOHNSTON. But this rulemaking has been pending for a matter of weeks. It has been published. There has been evidence taken.

Mr. HANSEN. I fully agree with all of those statements the Senator is making. But my question is: Has the executive branch of Government, DOE specifically, said that this is what it is going to do now prior to the expiration of the time?

Mr. JOHNSTON. It must have been an informal communication. That is simply my understanding.

Mr. HANSEN. It is very interesting that they would have decided short of the time that is provided by law to say that despite what anyone may say this is what they are going to do. I am just amazed, and if the Senator from Louisiana could identify the individual who is responsible for having made such a declaration I wish to know who it is.

Mr. JOHNSTON. I cannot identify any person specifically. I can tell the Senator when this was proposed I loudly protested and my protests fell on deaf ears, and they proceeded with the rulemaking. If it does not comport with the Administrative Procedure Act, it is news to me. In any event, I feel that it is necessary to put in my amendment to prevent the rulemaking from going into effect. If I thought we had the rulemaking otherwise defeated, I would not have to put in the amendment.

Mr. CURTIS. Mr. President, will the distinguished Senator yield for a question?

Mr. JOHNSTON. I will yield for one more question and then I will offer the amendment.

I yield.

Mr. CURTIS. In times past there has been an entitlement program that had great interest in areas where a refinery did not have its own source of crude oil. The discussion today seems to center on New England and, I take it, primarily on heating oil. Does this proposal relate only to the Northeast States?

Mr. JOHNSTON. Well, the Petroleum Allocation District 1, which is the whole eastern seaboard plus the State of Michigan.

Mr. CURTIS. So it does nothing with reference to the problem I mentioned earlier, an entitlement program in which there was interest on the part of independent refiners who have no source, in other States who have no source, of crude oil?

Mr. JOHNSTON. Independent refiners in other States, it is my information, would oppose this rulemaking because it penalizes the domestic refiners, the rulemaking would penalize the domestic refiners, in favor of foreign refiners.

Mr. CURTIS. I hold here a sheet which appears to come from the Senator's office of States eligible for subsidy. Is this still a correct list in light of the compromise?

Mr. JOHNSTON. No. These figures on what the increase in cost would be related to the pending rulemaking and not to the compromise about to be offered.

Mr. CURTIS. If the figures are not the same in light of the compromise are the States the same?

Mr. JOHNSTON. The States would be the same; that is correct.

Mr. CURTIS. I thank the distinguished Senator.

UP AMENDMENT NO. 1628

(Purpose: To limit the use of funds under the act unless certain changes are made in the regulation under the Emergency Petroleum Allocation Act of 1973)

Mr. JOHNSTON. Mr. President, I have an amendment which I sent to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment. The second

assistant legislative clerk read as follows:

The Senator from Louisiana Mr. JOHNSTON (for himself, Mr. BROOKE, Mr. KENNEDY, Mr. MUSKIE, Mr. LEAHY, Mr. DURKIN, and Mr. PELL) proposes an unprinted amendment numbered 1628 as a substitute to amendment numbered 3443.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the language proposed, insert the following:

SEC. —. (a) No funds appropriated under this Act may be used to implement the provisions with respect to the allocation of domestic crude oil specified in 10 CFR 211.67 on the date of enactment of this section, unless the President within thirty days after such enactment has amended the regulation under section 4(a) of the Emergency Petroleum Allocation Act of 1973 as provided in this section.

(b)(1) The amendment to the regulation required under subsection (a) shall provide that for the period between the effective date of such amendment and July 1, 1979 the provisions of the regulation specified in 10 CFR 211.67(a)(3) on the date of enactment of this section (relating to the issuance of entitlements to eligible firms importing residual fuel oil) shall be amended by replacing the words "thirty (30%) percent" wherever they appear by the words "fifty (50%) percent", except that for the purposes of this section the State of Michigan will be treated as if it were part of the East Coast market as defined in 10 CFR 211.62.

(2) Such amendment shall provide that on and after July 1, 1979 the provisions of the regulation referred to in paragraph (1) shall revert to those provisions in effect on the date of enactment of this section.

(c) The amendment required under subsection (a) shall amend the provisions of the regulation specified in 10 CFR 211.67(d)(4) on the date of enactment of this section (relating to the reduction in entitlement value for sales into the East Coast market) to delete the provisions exempting the first 5,000 barrels per day of a refiner's crude oil runs to stills from the operation of that subsection and to provide that 10 CFR 211.67(d)(4) is applicable only to domestic refiners that transport residual fuel oil for sale in the East Coast market in foreign flag tankers.

(d) The effective date of the amendment required under subsection (a) shall be July 1, 1978 unless the Secretary finds it impracticable to implement such amendment on such date.

(e) In promulgating the amendment required under subsection (a) and any related implementing or conforming amendment, the President shall not be subject to the provisions of section 553 of title 5 or of sections 7174 and 7191 of title 42 of the United States Code.

(f) Except as specifically provided in this section, nothing in this section affects the authority of the President to amend the regulation under section 4(a) of the Emergency Petroleum Allocation Act of 1973.

Mr. JOHNSTON. Mr. President, this is the amendment just referred to that eliminates the 100-percent entitlement and goes two-sevenths of the way that the northeast coast wants to go. We save five-sevenths, we lose two-sevenths, that is the rest of the country. The Northeast wins two-sevenths and they lose five-sevenths.

I think, considering the chances of winning as opposed to the chances of losing, this is a reasonable compromise, and I hope the question of germaneness, which I would raise, would be sustained and that we could pass the amendment.

Mr. HANSEN. Mr. President, before making a point of order, which I will do very shortly, let me observe that it is my understanding that when we talk about who will be affected and who will not be affected, it is going to affect every person in the United States, some favorably, and some not so favorably, and I am certainly inclined to believe that others will be affected more favorably than they are inclined to believe at the present time.

On the floor this morning it was brought out that this will result in moving $200 million per month around the country, and to penalize those areas that will not be recipients of the benefit of the entitlements program to help out New England and Michigan; am I not right about that?

Mr. JOHNSTON. No; the $200 million a month was the entire entitlements program.

Mr. HANSEN. That is what we are talking about, the entitlements program.

Mr. JOHNSTON. What the rulemaking would do would be to have the consumers of all petroleum products send $400 million a year to the importers of residual fuel oil. Two hundred and eighty million dollars of that would come from non-PAD 1 States. The $120 million would come from consumers of other petroleum products within Petroleum Allocation District No. 1.

Mr. HANSEN. If the Senator will just let me raise a question there. If the whole program takes $200 million per month now, and this compromise we are passing, which adds to the 30 percent another 20 percent, and if that only costs $400 million a year, I fail to understand how, on the one hand, it is costing $200 million per month when you add two-thirds of that amount and get only $400 million per year.

Mr. JOHNSTON. The $200 million per month referred to in the statement this morning was the entire entitlements program.

Mr. HANSEN. That is right.

Mr. JOHNSTON. The entire entitlements program is more than just the entitlement for 30 percent of the fuel oil. That is a program to equalize the cost of imported oil with the cost of the domestic oil.

Mr. HANSEN. But this is part of the entitlements program; is it not?

Mr. JOHNSTON. What is part?

Mr. HANSEN. This is part of the entitlements program; is it not?

Mr. JOHNSTON. What? This amendment?

Mr. HANSEN. No; the $200 million per month the Senator just spoke of. That is part of the entitlements program.

Mr. JOHNSTON. Yes; but that is not affected; not all of that program is affected by the rulemaking, this compromise, or the Johnston amendment. The only thing affected by the rulemaking is $400 million per year. That is the cost of paying to importers of residual fuel oil in Petroleum Allocation District No. 1, which is the eastern seaboard and mainly the northeast coast, because that is where they burn most of it.

Mr. HANSEN. But also the State of Michigan.

Mr. JOHNSTON. And also the State of Michigan. We would send from the consumers of all petroleum products all over the country to the importers of residual oil in PAD 1, plus Michigan, $400 million a year. Of that, $280 million would be paid by the consumers of all petroleum products outside of PAD 1. One hundred and twenty million dollars would be paid by consumers of other petroleum products within PAD 1. In other words, there is somewhat of a wash in some States such as Vermont, for example, which receives some benefit under the entitlements program but must also pay for the entitlements through other petroleum products, so they come out about even; in fact, it costs them a little bit of money in Vermont. But the effect of the proposed rulemaking is in 36 States they would pay $280 million to PAD 1.

Under the compromise instead of there being $280 million involved—excuse me, instead of being approximately $250 million involved, there would be only $70 million. So under the compromise we save $180 million, and we pay $70 million.

The spirit of the compromise is that you pay out two-sevenths and you are sure we stop the five-sevenths, which is a good deal for the rest of the country. If the Senator sees it differently and if he says he is sure this amendment, the Johnston amendment, will pass, perhaps he would oppose it.

Mr. HANSEN. Would it not be fair to observe that this eventuality that the Senator from Louisiana speaks about presupposes that the House, when we go to conference, will go along and may go for the changes in this. Earlier this morning the distinguished majority leader observed that as chairman of the Appropriations Subcommittee he could not guarantee—I am paraphrasing now what he said, but he could not guarantee—that he would be able to sell this proposition to the House.

So I think if we buy this compromise, which will call upon 36 States to subsidize 14 States, we are giving away part of the trading stock that we otherwise would have in going before the full conference with the House. We are making concessions already, and the Senator from West Virginia, the distinguished majority leader, said he could not guarantee at all—and he is here, and if I misquote him or misspeak the thrust of his remarks, I know he will help set me straight—but he said he could not guarantee at all that the House was going to buy with no changes the sort of compromise that could be worked out here.

I ask my friend from Louisiana if that is not essentially what the distinguished majority leader was saying this morning.

Mr. JOHNSTON. The Senator is correct.

I would simply point out that if we pass the unadulterated Johnston amendment

with no compromise we face the same eventuality.

Mr. HANSEN. But we start out from a better bargaining position.

Mr. JOHNSTON. Well, if there is to be bargaining we would start out with a better bargaining position. Under the compromise, however, we would have the support of both sides of the controversy, that is, the Northeast as well as the rest of country, and we would also have the support of the administration and the support of the Speaker of the House.

Mr. HANSEN. They may not necessarily be on the same side from the way I read the papers lately.

Mr. JOHNSTON. That is another problem.

Mr. HANSEN. That is not my problem, but I have an academic interest in it, nevertheless.

Mr. JOHNSTON. That is right. But the Senator points out problems with any bill when it leaves here. It is not absolutely certain that we would be able to pass the Johnston amendment. We may not have the votes.

The distinguished chairman of the subcommittee, the Senator who is handling this bill, might pull down the bill or it might go to the House and it might fail in the House. So in that spirit I think a five-sevenths victory makes a reasonable compromise. If the Senator sees it differently then he would vote against it.

● Mr. RIBICOFF. Mr. President, there are no energy resources of any significance in my region of the Nation. A substantial portion of Connecticut's energy supply, for example, is composed of direct foreign imports. These imports are largely residual fuels used predominantly for electricity generation. In 1964 residual fuels represented 56.9 percent of Connecticut's directly imported petroleum products. In 1969 residual oils increased to 76.9 percent of direct imports and by 1974 it had risen to approximately 80 percent. This is just an example of the extent to which we in the Northeast are dependent on imported oil.

Furthermore, we use oil more than other areas. Seventy-one percent of all New England's buildings are heated by oil and 74 percent of the population heat with oil. In my State 72 percent of the population—2.2 million people—depend on oil for space heating. Over 1 million buildings in Connecticut are heated with oil.

Finally, energy prices in our area are 31 percent higher than in the United States as a whole. Since the oil embargo the price of fuel has almost tripled. During the four preceding heating seasons the cost of heating oil has increased more than 150 percent.

Mr. President, I do not want to dwell on the mechanics of the entitlements program. Suffice it to say that a serious inequity presently exists. Residual oil is imported to the east coast as a finished product. Most of the east coast residual oil is produced by Caribbean refineries which are not eligible for full entitlements benefits under the current program. While a barrel of crude oil receives a full entitlement worth about $2, a barrel of residual oil receives only a 30-percent or 60-cent entitlement, even though both forms of oil are foreign in origin.

Thus, inasmuch as entitlements are not fully shared, east coast residual consumers are subisidizing the consumption of other products, such as gasoline, that are domestically refined from foreign crude. It is this imbalance which the Department of Energy hopes to correct with the proposed change in the residual oil entitlements programs—a change which will be especially critical should some administrative step be taken to raise domestic oil prices, such as an oil import fee or quotas.

We must also not ignore the fact that the current regulations violate the spirit if not the letter of the Emergency Petroleum Allocation Act of 1973. This law specifically requires the "equitable distribution of crude oil, residual fuel oil, and refined petroleum products at equitable prices among all regions and areas of the United States."

The proposed residual entitlements program will also eliminate the so-called reverse entitlement. This device penalizes domestic refiners selling residual oil into the east market by forcing them to forgo part of their normal entitlement. Removing the reverse entitlement would facilitate the redistribution of the domestically produced oil. This action will help to relieve the overabundance of oil on the west coast and aid in reducing the east coast's dependence on foreign oil.

Mr. President, some may claim that the new DOE residual oil entitlements regulations will benefit only the Northeast or the east coast. The fact is that other regions will gain under this proposal. I am informed, for example, that Michigan will benefit by $11 million, Indiana by $4.8 million, Louisiana by $20.2 million, and Illinois by almost $1 million. Thus, the new entitlements rules would not be a subsidy for one region at the expense of the rest of the Nation.

Mr. President, if the new entitlements rules are not implemented, consumers in many regions will be the losers because of higher electric bills and inflated industrial product costs. Residual oil prices will continue to rise—amounting to over $300 million.

Mr. President, equity in energy pricing must be achieved. One area or State cannot bear a disproportionate share of rising energy costs and the new entitlements rules will help to more justly distribute the burden.●

RESIDUAL OIL ENTITLEMENTS

● Mr. KENNEDY. Mr. President, I am pleased to support the compromise which was agreed upon today regarding residual oil entitlements and I wish to express my appreciation to Senator JOHNSTON and to my colleagues from the Northeastern States.

The elements of the compromise seem to me to be clearly fair to all participants and represent the best in the art of compromise.

Under the agreement, an entitlement for residual oil of 50 percent will be in effect from July 1, 1978 to July 1, 1979. The reverse entitlement would be eliminated. This will open the east coast to additional competition and make possible some movement of residual oil from the gulf States into the east coast.

This is the essence of the agreement we have reached. However, an important ingredient in this compromise is the willingness of the President to reissue a Presidential order which has been in effect for 2 years regarding a fee-free license for the import of residual oil. Without this Presidential agreement, the fees would gradually rise to 63 cents by 1980. Unless this Presidential declaration is made, the increase residual entitlements would be of no value.

I have spoken to Secretary Schlesinger. He has agreed to give our proposal consideration, and I believe he will be able to persuade the President of the rightness of this course.

The virtue of this agreement, among others, is that it will give certainty to the market and allow all participants to know what the market will be as far as entitlements treatment is concerned for more than a year. It will result in immediate benefits to consumers in Massachusetts of something over 30 cents and if all of the benefits are passed through to consumers additional benefits may be enjoyed from the increased competitiveness made possible by the change in the reverse entitlements provisions.

With regard to the pass-through of entitlements benefits, I note that the attorneys general in some States had been investigating oil prices and insuring that lower prices are passed on to consumers. I recommend this course of action to States in the Northeast and I want both the consumers in Massachusetts and those in the oil industry to know that I fully expect these lower costs will be passed on to consumers on a cent-for-cent basis.

Mr. President, I have heard the argument that New England is enjoying lower gasoline prices and lower residual oil prices, They do not need any relief; I say that argument is wrong and inaccurate.

Let us look at the facts:

First. Delivered coal costs in New England are 85 percent higher than the national average: $33.96 per ton versus $18.40.

Second. Our electricity costs are 45 percent higher—4.19 cents per kilowatt hour versus 2.89 national average. What is more, these costs have been steadily rising and will rise still further because oil is our primary fuel.

Third. Overall New England's energy costs 26 percent more per million btu's that national average—$4.06 versus $3.22.

Fourth. Moreover, 80 percent of New England's energy source is oil, compared to 47 percent nationally, and this is the fuel most threatened by international price rises.

Where we do have lower costs it is because of a more competitive market. New England is regarded as having a highly competitive gasoline market. As for resid, surplus capacity in European refineries have kept the price lower than in some other U.S. markets.

I have also heard the argument that

it is unfair for New England to seek this subsidy from the rest of the country.

My answer is that, what is unfair is the subsidy already going to the rest of the country.

U.S. oil prices are lower than elsewhere in the world because we produce our own oil under controls and because we do not capture energy values through taxes as do other countries. These national policies should benefit all citizens. The entitlements program was intended to distribute these benefits through all refineries and all consumers. Yet it does not work equitably.

The Rocky Mountains: Senator HANSEN and Senator MCCLURE's States, get 97 percent of the benefits of lower domestic oil.

The Gulf States: Senator JOHNSTON's area, get over 98 percent.

The Far Western States get 96 percent.

But Northeast gets only 81 percent.

If the administration's plan were enacted, New England would be brought up to rough parity—about 94 percent. With the compromise today, we will still be short of equity. The percentages cannot be calculated but New England would still be somewhere in the mid 80-percent range. ●

● Mr. BROOKE. Mr. President, I believe the oil refining interests have done a superb job of presenting an entirely biased picture of the New England energy situation to the American people and I have every intention of setting the record straight.

For example, the press has recently entertained its readers with the specter of a so-called battle between oil producing regions and oil-consuming regions. The people of the gulf coast are said to be at odds, for example, with those in the Northeast. Mr. President, the controversy here is between certain narrow oil-producing concerns, specifically the nonintegrated refiners, and users of residual oil everywhere in the Nation. Once again, powerful economic interests have managed to sell a false explanation to the media so as to mislead consumers. The truth is that we know from our recent experience that residual prices on the domestic markets drop when the price of imported resid drops. Gulf coast electric utility customers are going to save money when New Englanders or Michiganites save money. Some refiners, however, are most certainly going to see profits lowered.

Second, we are continually told this entitlement is a so-called subsidy to the east coast importers. Again, this is a distortion. For the moment, let me only reiterate that this entitlement is simply the mechanism chosen to spread the benefits of the U.S. price controls to users of industrial oil—the only product which comes to us chiefly from foreign refineries. These rules represent not a raid on the system, but an equalization of the system's benefits.

There are certainly subsidies in the entitlements program. And they were put there for what was considered to be national purposes. The $1.1 billion which is skimmed off for small refineries each year is hardly an aid to small businesses. But it is a subsidy to marginally efficient operations that are thought to have special merit because they are not part of major oil companies.

The proposed reforms do not undermine these intentional subsidies but they will put a stop to consumers underwriting a number of real financial windfalls to a few firms as the fraud-ridden "reverse entitlement" program ends and the Hess refinery advantage is reduced. The reforms will not only further equalize easterners' share of price control benefits, they will also increase the efficiency of the entire market. Larger, more efficient U.S. refineries and the Caribbean refineries which supply the east coast will be more competitive.

We have every reason to anticipate this healthier, less biased market is going to generate more supplies and thus the price competition necessary to get the new entitlements benefits passed through the consumer. Should anyone doubt the effectiveness of this measure, you have but to consider the fact that upon DOE's announcement of the rules which language would abolish gulf coast, that is, domestic, resid prices started dropping and are now lower than ever since the Mideast war.

Indeed, this entire controversy has been used not only to represent some imaginary war between the States but also to raise the old mythology about the alleged greed of the Northeast. We are said to want no part of energy production but to covet all the benefits that go to energy producers. This absurd misrepresentation must end. Northeasterners have always paid more for oil than other Americans. We have always been victimized by price and production control schemes designed solely to protect domestic producers. When domestic prices were low, we had tariffs. When resid was unprofitable, we had to go to foreign refiners. When OPEC struck, we were forced to depend on their products. We have conserved more energy than Americans in any other region. And we have offered to take our share of energy facilities—which we intend to locate in sites other than our prime tourist or fishing areas. For instance, the world seems to have forgotten that the Machiasport refinery was killed—despite New England support—by the Governors and Senators from the Gulf Coast States.

These are not simple matters. Like many issues involving complicated private market relationships, they are convoluted. Describing them so as to inflame audiences is virtually impossible. Yet billions of dollars which are redistributed from one set of consumers to another are at stake. The Congress owes it to users of oil everywhere in the Nation to deal with these tough, tedious choices. It is past time to reject the simple explanations, the glib phrase and facile fingerpointing.

Most important, it is past time to stop basing national energy policies on fratricidal conflicts between regions. The War Between the States should be over. Armistice was declared over a century ago. The interests of consumers in Texas or even Louisiana are far closer to the concerns of Massachusetts consumers than to the concern of Texas or Louisiana refiners. It is time to stop symbolic posturing which plays well to the press gallery and to start developing positions that put us on the undramatic but safe road to sound energy policies.

Mr. President, I have referred to my annoyance with the spurious contention that the East in general and New England in particular is in the habit of demanding special consideration in energy policy or that this set of regulations is a manifestation of some special benefit at other regions' expense.

First, it is important to recognize that, as a consuming area at the end of every pipeline and rail network—we have special energy problems.

I would like to cite some of the harsh facts prepared lately by DOE Region 1 and the New England Regional Commission:

D. NEW ENGLAND'S ENERGY PRICES

New England relies primarily on petroleum products to meet its energy requirements.

Comparing the energy prices to end-users between 1970 and 1976, residual fuel oil has had the greatest percentage increase in both New England (312 percent) and the U.S. (263 percent). Electricity prices have had the largest increase in terms of actual dollars per million BTU's—almost $6 in New England and $4 in the U.S.

In 1976, the price paid for energy by end-users was 26 percent higher in New England than in the U.S. as a whole—a price differential of $.84 per million BTU.

At $.84 more per million BTU, this represents a net outflow of $1.4 billion in real income than if New England energy prices were equivalent to the United States.

We pay substantially higher prices for natural gas and electricity compared with nationwide prices. In 1976, the price differential per million BTU was $1.71 for natural gas and $3.78 for electricity.

Factors contributing to New England's high natural gas prices are—transmission costs from gas fields to our region and the high price of supplemental fuels.

Approximately 15 percent of our natural gas consumption (as high as 45 percent on peak demand days) is made up of the supplemental fuels, LNG, SNG and propane. These fuels are approximately three times more expensive than domestic pipeline natural gas.

Principal factor for higher electricity prices is our electrical generation fuel mix, 59 percent of which is oil based vs. 16 percent for the U.S.

The weighted average cost of electricity in New England has been significantly above the National average.

In 1960 the cost differential was .9¢ per KWH or 53 percent more than the U.S. average cost.

In 1976, New England costs were 45 percent higher than the U.S. with a price differential of 1.3¢ per KWH.

Within New England, the states that depend most on petroleum for electricity generation have the highest electricity rates—conversely, those states with the highest rates of nuclear, coal, and hydro generated electricity have the lowest rates.

But, Mr. President, New England has responded to this price pressure by implementing the national energy policy which has even yet to become law. We have conserved more and used less.

B. NEW ENGLAND'S CONSUMPTION OF ENERGY

From 1965–1973, our consumption of energy increased 3.6 percent per year compared to a U.S. increase of 4.3 percent per year.

From 1973–1976, New England's energy consumption decreased 1 percent per year whereas energy consumption in the United States increased by .01 percent per year.

New England's oil consumption has increased from 29 barrels of oil equivalent per capita in 1960 to 40 barrels in 1976—an increase of 38 percent. The respective per capita figures for the U.S. were 42 barrels in 1960 and 59 barrels in 1976—an increase of 40 percent.

New England's energy consumption mix differs significantly from the nation as a whole.

Six percent of the Nation's population resides in New England, however, we consume 12 percent of the residual and 10 percent of the distillate fuel in the country. Our nuclear power consumption is 13 percent of the U.S. total, whereas our use of coal and natural gas is less than 2 percent of the U.S. total.

Furthermore, contrary to the mythology constructed by the oil interests, our region is willing to take its share of energy development.

Of course, we are not about to destroy our No. 1 industry, tourism. We will pay whatever it costs in added energy prices to keep our beaches and estuaries clean and our mountain air from deteriorating further. But we will explore Georges Bank; we will keep up the search for coal in the Narragansett Basin; we will take the risks of a threefold larger share of nuclear reactor and their wastes than any other part of the country. Indeed, if the Louisiana delegation will let us, we can build strategic storage and refineries.

Mr. President, we are often told that the people of the east coast in general, and of New England in particular, are themselves responsible for their dependence on foreign refineries. A number of my colleagues have suggested that we have failed in our obligation to help ourselves by failing to build our own refineries. Why, they ask, should the rest of the Nation subsidize the Northeast's lack of foresight and enlightened self-interest?

I would like to remind my colleagues of certain events that transpired 10 years ago, when objections to another New England proposal were allowed to carry the day.

At that time, a serious plan was advanced for a refinery and deep-water port complex at Machiasport, Maine. That refinery would have produced 300,000 barrels a day of refined product and 21 percent of New England's residual oil demand. The Governors of the six New England States supported it. The New England Regional Commission supported it. I worked for it. The two present Senators from Maine worked for it. But fierce opposition to the proposal prevented the Federal Government from granting the necessary approval.

It was not environmental opposition that killed Machiasport. It was not any zero growth movement either. Rather, we witnessed the spectacle of Congressmen and other Government officials from Louisiana, Texas, Wyoming, Oklahoma, and Kansas trooping to Portland, Maine, to protest the project.

A New England refinery they said, would threaten the domestic petroleum industry by bringing in cheap foreign oil to compete with the domestic market.

A new England refinery, they protested, would open the door to dependence on the crude supplies of unreliable Arab producers. National security, they maintained, would be jeopardized by allowing the foreign oil menance to get a toehold on American shores. And so Machiasport was not constructed.

Ten years later we see the folly of their arguments. We as a nation now import 50 percent of our petroleum needs, and Machiasport could have been a useful addition to the Nation's national security through assured domestic refinery capacity. But the oil producing areas didn't want it.

And now we hear precisely the same arguments that were once used against that New England refinery being resurrected to oppose residual oil entitlements. Again we hear that domestic refiners should not be forced to compete with those offshore. Again we hear that the supplies are unreliable. Again we hear that national security demands that the domestic oil industry be protected. I believe, Mr. President, that the ones who need protection now and who should have been protected 10 years ago, are the consumers of this entire Nation. They are the ones now being forced and who have always been forced to pay the freight for the oil producers and refiners.

But the resid entitlements reforms present the clearest possible case of distortion of the truth about the east coast energy situation and policy.

As far back as the comprehensive FEA reexamination we precipitated in 1976, the clear consensus of witnesses was that the amendments, particularly the reverse entitlements provision, produced significant operational and marketing difficulties for affected firms and in certain cases resulted in serious inequities among consumers of residual fuel oil, depending on where they were located. In general, FEA found that the reverse entitlements provisions created strong disincentives to sales of domestic residual fuel oil in the east coast.* It specifically found that—

The reverse entitlements provisions seem to be having the apparently anomalous effect of encouraging shipments into a marketing area where residual fuel oil is generally in surplus and which would not constitute a normal marketing outlet for the product. An analysis of residual fuel oil prices also shows that East Coast prices are higher than those prevailing in the rest of the United States, which is primarily due to the entitlement loss experienced for domestic product sold on the East Coast.

Following the hearing, on December 23, 1976, FEA issued a proposal which contained three alternative programs for residual fuel oil. Each was designed to provide a level of protection for domestic refiners and also to eliminate the reverse entitlements provision. Another hearing was then held on January 23, 1977, on the issue of east coast residual fuel oil entitlements. DOE found no clear consensus on these proposals and in light of the President's proposed crude oil equalization tax, which would significantly affect the entitlements program, the agency delayed taking any action.

In brief, despite a clear recognition that the March 1976 regulations have serious defects and anticompetitive effects, they have remained in place, without change, for more than 2 years.

In its recent proposal to amend the entitlements program DOE states that its primary objective is:

To correct the fundamental inequity resulting from the fact that some regions of the country are heavily dependent on certain imported refined products, particularly residual fuel oil, and therefore do not receive the full benefits of domestic crude oil price controls through the entitlements program that other regions not dependent on product imports receive.

The Department of Energy's new proposed changes for residual oil entitlements have been portrayed as a giveaway to the east coast at the expense of the rest of the country. The fact is, by creating domestic crude oil price controls Congress established a price differential between foreign and domestic oil.

Since almost 50 percent of our national oil consumption is from foreign sources, a mechanism was needed to spread the benefits of the domestic price control differential to all consumers. That mechanism is the entitlements program.

As Secretary James Schlesinger stated in announcing the proposed regulations on June 15, 1978, all the regional inequities will not even be corrected by the reforms:

In 1977 the percentage of East Coast Petroleum demands that received entitlements benefits was only 81%, compared to virtually complete benefits in other parts of the country. After the proposed action, the amount of East Coast petroleum demand being subsidized through the entitlements program would increase to 94%.

This compares to 97.1 percent for the Rocky Mountain area and 96 percent for the west coast and 99 percent for the gulf coast. I have a chart here I would like to read.

Percentage of total petroleum demand that receives subsidy (1977 DOE data)

	Today	After reforms
U.S. average	91.2	96.7
Gulf coast	98.9	98.9
Midwest	95.7	97.4
Rocky Mountain	97.1	97.1
West coast	96.0	96.0
East coast	80.7	94.2

The new regulations will allow full entitlements benefits to the gulf coast and Midwest as well as the east coast. At the present time the price of gulf coast residual oil serving that region and the Midwest is being set by the high price available on the east coast. Since imported east coast residual oil gets only a 30-percent entitlement, gulf and Midwest residual also receives only 30 percent. The new regulations will allow all three regions to receive 100 percent entitlements, less 63 cents domestic refinery protection.

The only difference between a barrel of imported residual oil and a barrel of oil imported as crude and refined domestically, as is 40 percent of all our crude oil, is that in the former case the refinery is located in the Caribbean while in the

* "Alternative Entitlement Program Adjustments for Imported Residual Fuel Oil", 41 F.R. 56821 (December 30, 1976).

latter case it is located on the gulf coast. Each barrel is equally foreign in origin yet the barrel of crude oil receives full entitlements whereas the barrel of residual oil does not. Who is subsidizing whom?

The proposed rules change can help keep the price of electric generation and institutional heating down, not only on the east coast, but everywhere east of California where resid is used. At the present time, resid sold by a gulf coast refiner to the non-PAD I market should be about a dollar cheaper than gulf coast resid sold into PAD I. This is not the case. The resid user in the Midwest is paying the same high price as those on the east coast and someone is making higher profits rather than passing along the entitlements. Two years ago, when a partial entitlement was given to imported east coast resid, prices not only dropped on the east coast but on the gulf coast domestic refinery market as well. The same thing is likely to occur this time resulting in lower residual oil costs east of the Rockies. I intend to pursue this later in much greater detail.

Who pays? The new entitlements regulations would result in an increased cost on all other petroleum products of between one-tenth and two-tenths of a cent. This small sum would be paid by all gasoline consumers, for example, be they in California, Texas, New York, or Massachusetts. The east coast also pays a part of the price. This is not an interregional ripoff.

Who is complaining? Refinery interests who would see their benefits from the entitlements program decrease. It is not clear that refiners are passing along the entitlements benefits on domestic resid to the final customer. This change in the regulations may force them to do so.

There has been much confusion generated regarding the overall effect of increasing import entitlements. The two main claims have been that it benefits the Northeast at the expense of the rest of the country and that foreign refiners will reap the benefits of the increased import entitlement. These concerns are based more on emotions than on a logical and objective assessment.

It is generally accepted that manipulations within the entitlements program just shift costs from one product to another. Therefore, the proposal to increase the import entitlements and lower the price of residual fuel would raise the price of gasoline and heating oil concurrently. District 1 consumes 53 percent of total U.S. residual fuel demand and therefore, would receive 53 percent of the benefits of this lowering of the fuel price. However, district 1 consumes almost 40 percent of the Nation's total demand for gasoline and heating oil, and accordingly would pay for 40 percent of the cost increase. Therefore, the net benefit to district 1 is closer to the 13-percent level—the difference between 53 and 40—than the 53-percent level. Our observation is that the emotional outcry has been as if it were a 100-percent level.

The second emotional claim is that the foreign refiners will benefit from the increased import entitlements. Fortunately we have solid data which allow us to refute this claim with a high degree of confidence, since this exact feature has already been implemented once before. When the 30-percent entitlement was granted about April 1, 1976, foreign prices for residual fuel remained constant, whereas domestic price dropped almost instantaneously to a level approximately $0.85 billion below foreign prices. This $0.85 billion represented the effective benefit of a 30-percent entitlement. We see no reason why the same effect would not occur in exactly the same manner should the current level of import entitlements be changed.

	Prior to import entitlements	Subsequent to import entitlement regulation	
	March 15, 1976	April 15, 1976	May 15, 1976
1% S No. 6 Oil, New York basis:			
Foreign price	11.40	11.35	11.35
Domestic price	11.40	10.55	10.50
Difference	0	0.80	0.85

The difference between these two price levels has continued to reflect the 30 percent entitlement value up to the present time.

Now, turning to the question of regional price parity, the current proposal places prime importance on historical import dependence as a criterion for import entitlement treatment. Historical performance should have no bearing on application of import entitlement treatment except in that it might give guidance as to future import dependent areas. Import entitlements should be granted on what is to happen; not what has already happened.

Historically—for the last 4 years—gulf coast has been a major supplier of residual fuel to the east coast. These supplies were not developed for the primary purpose of supplying the east coast. Instead they were the quantities of fuel produced in the gulf coast in excess of local demand and were disposed of on the east coast as the next most attractive market. This oversupply situation, as far as the gulf coast tributary area was involved, required that residual fuel be sold at competitive price, not in the tributary gulf coast area, but in the distant disposition area—namely, the east coast. Since the freight to move product to this nontributary area has been relatively expensive, residual fuel prices in the gulf coast area have been relatively low, as would be expected from an oversupply situation. It should be noted, though, that for portions of both the 1976–77 and 1977–78 winters, the oversupply situation was interrupted. Gulf coast consumption exceeded residual fuel manufacturing capability and gulf coast prices rose to levels much closer to east coast prices than the freight difference would have allowed. We believe that the growing demand in district III may soon consume the entire supply capability of this region and make the exception the rule. When this occurs, the gulf coast price will no longer have the relationship with the east coast price that has occurred historically. Further, when demand reaches levels that require supplementary supplies from outside district III, the price will have to rise to a level sufficient to attract oil from other domestic locations, or more likely, imports from foreign sources. When the situation reaches this point, district III will need the same protection as is now being considered for district I in order to achieve the stated purpose of price parity within geographical regions.

Mr. President, I would have liked to see our region get the support of the entire Nation for the DOE's proposed 100 percent entitlement. We deserve it in all equity.

But in the face of insuperable opposition. I think we have achieved a good compromise, one which puts us on the road to regional understanding across the Nation. And that is worth a great deal in and of itself.●

● Mr. CHILES. Mr. President, several years ago when the price of foreign petroleum products skyrocketed, certain areas of the country, most notably New England, the eastern seaboard, and Florida, suffered a dramatic and severe increase in consumer energy costs. These areas, which are largely dependent upon imported petroleum products for electrical generation and home heating, were placed under an economic burden which continues to this day. Because of traditional market patterns that involve a reliance on imported oil, persons living in these States have been forced to make greater sacrifices in meeting energy costs than their fellow citizens in other parts of the country.

Ever since this first drastic increase in prices, I and other Senators from similarly affected States have been attempting to seek relief for our consumers. We have not argued that somehow our constitutents should be spared the economic burden of increased energy costs. We fully realize the new energy reality means higher prices. What we have argued for is equity of treatment. We have argued that all regions should share equally in these higher costs. We have maintained that equal treatment must be the rule in our energy policy.

Regrettably there has not been a great deal of progress in this regard. Perhaps the only beacon of hope, and it has been a dim light indeed, has been the entitlements program. This program was established in the wake of the Arab oil embargo to equalize the cost of crude oil nationwide. Congress enacted this approach to allow those importing expensive foreign oil to gain access to the lower cost, price-controlled domestic oil. This, in effect, somewhat lowered the cost of imported oil in Florida and gave some small measure of relief to hard-pressed consumers.

The entitlements program, however, has been limited in its applicability to residual fuel oil. Residual oil is the heavy oil used in Florida primarily for electrical power generation. The present entitlements program provides that each barrel of residual oil receive only 30 percent of the amount of an old oil entitlement. Further, the program has included a "reverse entitlement" feature, which allows firms marketing residual oil in PAD I States to receive only a 50-percent entitlement benefit. Thus while the entitlements program has been of benefit to Florida and other States importing residual oil, we have received only a limited measure of its equalizing effect.

The Department of Energy proposed new regulations revising the entitlements program to grant a full entitlement for imports of residual fuel oil and to do away with the reverse entitlement. This proposal is long overdue and represents only the most modest of actions to provide some equity of treatment to Florida and other States heavily dependent on foreign imports. It would not only lower the cost of residual oil but would increase competition by suppliers to the Florida market by doing away with the disincentives restricting Florida's access to domestic refiners.

The Department of Energy proposal makes sense because, unique among all oil products used in this country, the majority of the supply of residual fuel oil is imported. Without participation in the entitlements program, the market price for the product is fully at the world level. All other oil products, such as gasoline, home heating oil, diesel, and jet fuel are held well below the world market by the domestic oil price control program. The proposal to grant a full entitlement to imports of residual oil is simply a move toward equity among all consumers of all oil products in all regions. It is fulfillment of the clear statutory mandate that all regions should share equally the burden of increased energy costs.

This proposal is not a "subsidy of imports" as some opponents of the proposed regulation have argued. It is no more such a subsidy than is the entire domestic oil price control program. While price controls remain in effect, Florida and other consumers of residual oil should be granted the same benefit presently accorded consumers of all other oil products.

As I have pointed out, this approach is of definite advantage to my State of Florida. It would mean a saving to Florida consumers in the neighborhood of about $47 million per year. Hardly a windfall when put on per capita basis but in the case of our many retired citizens for whom every dollar counts, these few extra dollars saved in energy costs will indeed be welcome.

I would hope that in deciding on this amendment, Senators will look not only to the parochial interest and support the amendment if their state is free of a dependence on imported residual oil. I would hope rather that a spirit of fair play would prevail in recognition that an inequity has existed and should be corrected. The cost to the Nation's consumers as a whole will not be great but the benefit to those consumers who have borne an extra burden these past years will be significant.●

Mr. HANSEN. Mr. President, I make the point of order that the compromise does contain legislative language on an appropriations bill.

Mr. JOHNSTON. I raised the question of germaneness, Mr. President.

The PRESIDING OFFICER. The Chair, under Senate rule XVI, now submits to the Senate the question raised by the Senator from Louisiana (Mr. JOHNSTON); namely, is the amendment germane or relevant to the subject matter of the House-passed bill?

Several Senators addressed the Chair.

The PRESIDING OFFICER. The question is not debatable. The yeas and nays have been requested. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. ROBERT C. BYRD. Is a motion in order to lay the question of germaneness on the table?

The PRESIDING OFFICER. A motion is in order to lay the question of germaneness on the table.

Mr. JOHNSTON. Mr. President, in that case, I ask unanimous consent to vitiate the order for the yeas and nays on the question of germaneness, and ask for the yeas and nays on the motion to lay on the table.

Mr. ROBERT C. BYRD. Mr. President, I have not made that motion. I am simply interested in learning for my own edification whether it could be made, it never having happened, to the best of my knowledge, in my 20 years in the Senate; but I thought the need might arise some day.

The PRESIDING OFFICER. The Senator is correct.

The question is, Is the amendment germane or relevant to the subject matter of the House-passed bill? The yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Maine (Mr. HATHAWAY) and the Senator from Minnesota (Mrs. HUMPHREY) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "nay."

Mr. STEVENS. I announce that the Senator from New York (Mr. JAVITS) and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

The yeas and nays resulted—yeas 65, nays 31, as follows:

[Rollcall Vote No. 302 Leg.]

YEAS—65

Abourezk	Case	Dole
Allen	Chafee	Durkin
Bentsen	Chiles	Eagleton
Biden	Church	Eastland
Brooke	Cranston	Ford
Bumpers	Culver	Glenn
Burdick	Danforth	Gravel

		Weicker

NOT VOTING—4

Hathaway	Javits	Wallop
Humphrey		

The PRESIDING OFFICER. (Mr. HODGES). On this question, the yeas are 65, the nays are 31. Therefore, the amendment is held germane.

Mr. BROOKE. Mr. President, I move to reconsider the vote by which the amendment was held germane.

Mr. JOHNSTON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. JOHNSTON. Mr. President, I think the amendment has been thoroughly debated. I think it is a good compromise. I think it does not give everybody all they want, but I think it is a good compromise and I am ready to vote.

Mr. WEICKER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HANSEN. Mr. President, I shall not take long, but I do want to take a couple of moments, because there are a number of Senators here who are not here this morning and, as a consequence, missed the excellent presentation made against the entitlements program by my good friend, the distinguished Senator from Louisiana.

What we have done in this entitlements program is tax 34 or 36 of the States to subsidize the other 14 or 16, whichever it may be—I am not certain about what those figures are, but I know the Senator from Louisiana would agree with me on this. We are trying to make it better for them.

Just to go back a little bit on the entitlements program, we had a mandatory oil import program a long time ago, when there was concern in this country about the adequacy of fuel to take care of America. In order not to become unduly dependent upon foreign sources of supply, we said, let us not let be imported into this country more than 12½ percent of our needs. When they found oil in the Middle East and when it became available, New England wanted to do away with that program. They attempted to have it done away with.

The program was opened up to foreign residual oil and everybody was happy because New England could buy that cheap oil from the OPEC countries. That was just great for everybody until the Arab OPEC countries imposed an embargo on this country.

Then New England started saying, "We do not want to buy as much of that oil as we have been buying because we can buy the domestic oil more cheaply." So in order to keep everybody happy and placate them, we came up with this entitlements program, which has had the effect of encouraging the buying of more residual oil from the Caribbean.

I had in my office, just a few days ago, representatives of one of the smaller countries down there that said if we do not pass this entitlements program, we are going to have a lot of people out of work.

What we are doing is exporting American jobs to the Caribbean and to the Middle East in order that we can import more of that oil here and in order to subsidize those sections of the country that have grown to become dependent, as New England has, on this oil. We are asking about two-thirds of the States in the United States to tax our citizens more in order that they can buy the product cheaper than they would otherwise be able to buy it.

The thing that is wrong with the whole operation is simply this: We are exporting American jobs. We are keeping American oil in the ground through the whole ramification of these various laws we passed on energy, simply to try to win votes one way or another.

The Secretary of Energy is for this program. I think—I make this charge and I may be wrong and if I am, I will stand corrected. I think that, in order to try to help sell the Natural Gas Act and some other things such as the crude oil equalization tax, he has said to New England, "If you will go along with the gas bill and COET, we will increase your entitlements program."

It is wrong because it is exporting jobs, it is increasing our dependence upon foreign sources of supply. It ought to be done away with. We are not doing away with it.

My good friend from Louisiana is saying, "Let us not go to the House with a 30-percent entitlement, which we now have on the books; let us change it to 50," hoping they will buy it and will not make it worse. I think if the people in this country understand what is at issue, they are going to say, "Let us not make it any worse and, for heaven's sakes, let us not go into conference having given away two-sevenths of our trading stock before we get there."

This morning, when it was debated, the Senator from Louisiana held out the hope—he went even further than that in saying it was pretty well agreed upon—that this thing would go zinging through the conference. My good, good friend, the distinguished majority leader, said, "I cannot guarantee you, as chairman of this Appropriations Committee, that we are going to be able to sell the House conferees on what we agree to here." It is just that simple.

Mr. DURKIN. Will the Senator from Wyoming yield for just an observation?

Mr. HANSEN. For a short observation.

Mr. DURKIN. I should like to lay something to rest once and for all, unequivocally: There is absolutely no deal with the eastern Senators or the eastern conferees on natural gas. In fact, most of the eastern members of the gas conference are flatly opposed to the product of the conference committee. Most of the Congressmen on the conference committee from the East voted against the compromise that has been emanating from various rooms in this zip code. I should like to lay it to rest completely, once and for all: There is absolutely no deal with respect to natural gas pricing, or COET, the two parts of the President's energy plan which we all know are either dead or in an iron lung. I should like to make that clear to the entire Chamber.

I thank my colleague for giving me the opportunity.

Mr. McCLURE. Will the Senator from Wyoming yield?

Mr. HANSEN. I am happy to.

Mr. McCLURE. I appreciate what the Senator from New Hampshire said, because I think it draws rather starkly the contrast in the treatment which is being asked here by the New England States, because they are asking for a subsidy on the price of home heating oil, primarily, and residual oil, which runs utilities, while many of us in other areas of the country pay a very high price for imported natural gas. Sixty-nine percent of the supply in my State comes from Canada and we pay an unsubsidized price.

Are you fellows willing to give us entitlements on the natural gas so that we spread the cost of the natural gas over all of the States equally? You are asking my State to pay over a million dollars in subsidy so you can get cheaper oil while my people get no subsidy, no assistance on the price they pay for natural gas.

Mr. BROOKE. Will the Senator yield?

Mr. HANSEN. I am happy to yield to my friend from Massachusetts.

Mr. BROOKE. I think this is about the third time today we have had this discussion.

Mr. HANSEN. The only difference, if I may interrupt momentarily my good friend from Massachusetts, is to say that we have more listeners than he and I had this morning.

Mr. BROOKE. I think we have picked up two or three more listeners as I look around the room. We had a few before. At any rate, the Senator from Wyoming continues to say "the New England States." This is not just the New England States.

Mr. HANSEN. It includes the State of Massachusetts.

Mr. BROOKE. It includes the entire eastern seaboard, it includes the State of Michigan, it includes midwestern States as well, who will benefit indirectly.

Mr. HANSEN. What are the midwestern States?

Mr. BROOKE. Indiana, Illinois, and there are others that benefit indirectly from this entitlements program.

What the Senator fails to say is that, by accepting this compromise agreement, the Senator from Louisiana is doing all that can possibly be done in an effort to work out some agreement between all sections of the country. After all, this is a United States of America. It is not East against West; it is not oil-producing States against consumer States. We have been working for 2 days to try to come up with some kind of equitable agreement that could be passed through the Senate and through the conference.

I know the Senator is concerned about what might happen in the conference. We have reason to believe that this compromise certainly decreases what the eastern States and the midwestern States that I have named would benefit from, would really have a decrease from what they possibly could have if this rule goes into effect on August 22.

So, really, the Senator from Louisiana has performed a great service to the other 36 States that the Senator from Wyoming continues to talk about. I hope that he understands that.

In other words, I am saying to him that he is getting a good deal under the compromise agreement that we have worked out reluctantly with the Senator from Louisiana.

The Senator from Louisiana has certainly not sold him out. I think the Senator from Louisiana has been very strong, very stalwart, and has come up with the best agreement that he can possibly get under the circumstances.

As he very well knows, we have had this out before, that this rule would go into effect within 2 weeks. To avoid that and take the risk, and we have some risks because this is an appropriation bill, this is legislation, there is nothing in the House bill that has anything about that this is all. It could be knocked out in the House.

If it was knocked out in conference with the House, then by the time that would happen the rule would go into effect and we would get the 100-percent entitlements, which I am sure the Senator from Wyoming does not want to see happen.

All I am saying is that it is a good, sound compromise worked out after laborious negotiations, which tries to bring some kind of equity to it.

Mr. HANSEN. Before I yield to my friend from Idaho and to my friend from Connecticut, I wish to make this observation.

Mr. President, there is little question that a point of order can be made against the original Johnston amendment because it is not legislation on an appropriation bill. It is simply a limitation on an appropriation bill. There is that distinct difference.

So if we are concerned about what may happen when we go to conference, I hope Senators, including my good friend from Massachusetts, will keep in mind that a point of order can be made on this amendment here because it does say that the Administrative Procedures Act shall not apply, and to that extent the Parliamentarian has told me that it is legislation on an appropriation bill.

Now, the second point he made is that

it really is a good deal for everybody. It reminds me of an old judge I knew in Wyoming who came around a sharp bend and ran into a herd of cattle, hit a steer, knocked him over the barricade. One of our cowboys rushed up and the judge hopped out of his car and said, "Didn't hurt him a bit, he's perfectly all right." And before the cowboy had very much time, the judge repeated again how well the steer looked. Finally, the cowboy said, "Judge, if you think it did the steer any good, tell me right now."

If anyone thinks it does us good to have to pay more to the other parts of the country, I hope we are told right now, but I do not happen to say that.

Mr. BROOKE. I am telling the Senator now, they will have to pay less, not pay more, but they will have to pay less. if this rule goes into effect, they would have to pay more.

Mr. HANSEN. A point the Senator from Massachusetts makes is that he says despite the Administrative Procedures Act, Mr. President, which says a rule shall not go into effect until a certain period of time has elapsed, it has already been prejudged.

I made this point a little earlier, that, really, what we are talking about is that despite the fact that the Administrative Procedures Act says this decision, this determination, shall not be made until 2 weeks from now, apparently, those in the know, and I know my good friend from Massachusetts is because he is a good friend, I assume, of the powers that be downtown—I happen not to be—but they have already decided how they will find on this issue.

I think that is an interesting thing to know, and I asked my friend from Louisiana who said that. Well, he did not identify who said this is what we are going to do, but it certainly is extremely interesting. It is extremely interesting to me that Members of the Senate now know what a decision will be that legally cannot be made until 2 weeks from now.

I ask my good friend from Massachusetts on whose authority does he make a statement to me that that is going to happen 2 weeks from now? Can he help me on that?

Mr. BROOKE. Mr. President, my friend from Wyoming is one of the most effective and resourceful debaters on the floor.

Mr. HANSEN. I want a simple answer to the question.

Mr. BROOKE. The Senator is going to get that. He already raised his point of order. He spoke about a point of order. He raised the point of order and the germaneness question was voted upon by the Senate. So this has cured the problem the Senator was concerned about.

Mr. HANSEN. As far as Massachusetts is concerned, but not Wyoming.

Mr. BROOKE. They let the Senate work its will. The Senate did work its will and it found it was germane by a vote of 68 to something or other.

So, at any rate, that question has already been resolved, maybe not to the Senator from Wyoming's satisfaction, but it was resolved.

But insofar as who has given that, I do not think that is true.

Mr. HANSEN. How does the Senator know——

Mr. BROOKE. I think the Department of Energy has already gone through all of the steps it needed to go through as far as the present rule is concerned, and that is the rule that we say will become effective on August 22.

What the Senator really is referring to is the language under the substitute amendment, and that is the rule he raises, the point of order, or on the procedural grounds, and that is the rule that caused the vote on germaneness which the Senate has upheld.

Mr. STEVENS. Will the Senator yield for one observation without losing his right to the floor?

Mr. HANSEN. I wanted to yield to my friend from Idaho, but I will be happy to yield to the Senator for an observation.

Mr. STEVENS. Representing a State, as I do, that now produces one-eighth of the domestic production of the United States, I want to say that I do not understand this amendment yet. I intend to be in the conference and do everything I can to take it out, if it is on there, if it does not do what I have been told that it does.

This, I think, does disturb the entitlements program and it is going to cost New England more to get our oil in New England, if I understand it.

I admit I have not been able to study it yet and to ask questions. I am told the Secretary of Energy just had it read to him on the phone and I would question whether Mr. Schlesinger himself really knows what this means to the entitlements program.

As it applies to Alaska, crude oil entitlements are given to the Alaska North Slope crude as it enters the domestic market in order to equalize the price in New England.

I am going to oppose it. I voted it was germane, as I told my friend from Wyoming, because I wanted to demonstrate my honesty since I put a little of legislative language on this bill myself.

But from the point of view of understanding this, I challenge anybody to understand what is going on here in a bill on which we have not held hearings, have not heard arguments of the people that represent those who have appeared at the administrative public hearings, in terms of what the rule should be that will be issued in 2 weeks. Yet, we are asked to legislate on something today that I say, frankly, I have read but I still do not understand as it applies to Alaska North Slope crude.

I say that with due respect to my friend, if the Senate wants to pass it, fine, but I do not think it belongs on this bill until we do understand it.

I have not had time to send it home for study yet. It just came to us. How can I get hold of the people who manage this program for the State of Alaska and get a reply back when it just came out of an impromptu conference held off the floor an hour ago?

Mr. JOHNSTON addressed the Chair.

Mr. STEVENS. We are producing much more oil than the Senator is and I hope we will be partners in oil production in the future here. But again, my friends in New England in my opinion this will cost you more money than you think in the long run.

Mr. BROOKE. The Senator keeps saying "New England."

Mr. WEICKER. Regular order, Mr. President.

As I understand it, the Senator from Wyoming has the floor and questions are in order, but for those of us seeking the floor in our own right, it is impossible to get into the round table.

The PRESIDING OFFICER. The Senator is correct. The Chair was attempting to be lenient to save time.

The Senator from Wyoming has the right to the floor. He does not have a right to yield the floor except for a question, so that from now on, regular order having been asked, the Senator from Wyoming has the right to yield for a question, but no other right to yield the floor.

Mr. HANSEN. Mr. President, I yield the floor.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Connecticut was seeking recognition first.

Mr. WEICKER. Mr. President, I oppose the amendment. I suppose that ostensibly my position would seem to be in opposition to the regional interests of New England. I think, however, that the question which was posed is the overriding quesiton—whether or not we are going to pay less or are we going to pay more for our energy.

Make no mistake about it: Under this aberation that will call energy policy, we are going to be paying more, as we have been paying more, as we will continue to be paying more.

I think it is a good time to point out several things. Whether or not we pay less and whether or not our supplies are stable is a matter of national interest. It cannot be determined by regional interests. It cannot be determined by partisan interests, or philosophical interests, or special interests.

It is a simple matter as to whether or not we are going to produce more and use less. When that day comes we are going to have lower prices and we are going to have stable supplies.

Up to this point—and the Senator from Alaska alluded to it in his statement—we have managed to bend ourselves into a pretzel when it comes to energy policy, to the point that nobody, including the energy conferees, including the members of the Energy Committee—I cannot speak for the Finance Committee—knows what is going on in this Nation.

We have left the very basis that would make economic sense, the law of supply and demand: a free market to encourage production and mandatory rather than voluntary conservation we have to change our lifestyle and use less.

The reason why we in New England are battling with respect to the entitlements problem is simple. You would not have entitlement programs unless you have controls. Because we have controls, because that is against all laws of economic commonsense, we therefore have

to go ahead and take care of the unusual circumstances that this creates; so we develop a program of entitlements.

Now we are on the floor of the Senate, trying to doctor up the program of entitlements. No matter which way you cut it, you cannot make reality out of a mirage; you cannot bring substance out of mirrors. It will not happen.

We have to come to grips in this country as to what needs to be done. Anything that has value to it in the future is going to cost something in the way of lifestyle and dollars today. No politician, not the President, not Congress, not the House, will come to this realization. Every day that goes by that we do not have an energy policy, the economic situation worsens and the energy situation worsens. We cannot bring this country back to any sort of economic strength until we tackle this problem head on.

There is only one reason why any member of the energy conference should vote for the energy bill, and that is specifically to say that the United States has one. It has nothing to do with the content or substance of that legislation. Not one member of the conference could tell you today what is in that bill. Yet, it is going to be brought to the floor and voted upon.

Mr. President, I intend to vote against this entitlement compromise, because I honestly feel that it is not helping New England interests to keep on sticking a lollipop in their mouths.

Yes, provisions of this compromise—and the people should know this—have been specifically agreed to in order to satisfy oil and gas interests so they will not be hurt too much. Other aspects of the agreement have been agreed to so the Democratic Party can stick to its promises and the Republican Party can stick to its promises.

What we have in this country is still a lack of energy as well as an overconsumption of it. I will have no more part of the charade.

We have to get something before us that clearly delineates what needs to be done in the sense of encouraging American production in all its forms of energy—nuclear, oil, gas, coal, solar—everyone has to make his contribution, and it has to be done within the concept of a free market.

I am going to say the same thing I said when I was running for office. The heck with voluntarism. It will not work. There has to be some sort of mandatory conservation coupled with increased production. When we come to grips with those two tasks that are demanded of us, then you can talk about paying less, then you can go ahead and talk about stable supplies, then you can talk about an economy that has substance to it, then you can put an end to the deficit in balance of payments, then you can have a national security picture that is there in reality, rather than the dependence on foreign oil. Until those matters are taken care of, the so-called energy policy that this country will have will be a political sham that is perpetrated on the Nation.

Mr. BROOKE. Mr. President, will the Senator say it is a sham for those consumers who are paying high prices for their home heating oil along the east coast? Does the Senator really think that is a sham?

Mr. WEICKER. The amendment that has been agreed to will guarantee a greater dependence by New Englanders on OPEC oil. I ask the Senator from Massachusetts how that helps New Englanders, when those men are sitting in a cartel environment and jacking up prices whenever they wish. That is not helping New England. All that does is postpone the inevitable.

How do we in New England explain that for years we have been so environmentally concerned that we would not build our own refineries in New England? And we encouraged that. The political leadership in New England encouraged that. If we had those refineries available in New England, we would not be in this bind today, but that was politically dangerous at the time.

What I am saying to my fellow colleagues from New England is not that the fault is all ours. The energy bills here are helpful to interests in the Southwest and the West. We have the burden of failing to act, and we kid our constituents that we are going to make them feel they are going to get out of this bind by relying on an entitlements program. We kidded them about a controls program. Tell me how, in my own section of the country, controls brought about lower prices to New England, in any sense—natural gas, home heating oil, and so forth. Tell me about the lower prices that were guaranteed by a system of controls. It has not worked, and it will not work, and entitlements will not work.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. WEICKER. I yield for a question.

Mr. MUSKIE. I want to make a point for the record, and I will do it in the form of a question.

Is the Senator aware that the first refinery proposed in New England, at Machiasport, Maine, was killed not by the environmentalists but by the oil industry, which influenced the Johnson administration to deny the issuance of an import quota to fuel that inventory, and was denied a free port license, which, by the explicit language of the statute, assured a trade-free zone to any port in the United States that applied for one?

Those two decisions, which were made down here, killed the Machiasport refinery, not environmentalists. It was supported by me. It was supported by the then Governor of Maine. It was supported by every Senator from Maine in that generation, as I recall it. It was our attempt to contribute to the refinery capacity of this country and to do it by fueling it with the only oil available to us, which was from the Middle East, because the domestic oil industry was not interested in building a refinery in New England.

I come from the most energy poor State in an energy poor region. The State of Maine imports more than 90 percent of the energy it consumes. And the great bulk of the energy we import comes from sources outside the United States.

As the difficult work toward a national energy policy has proceeded in the Congress, I have been guided by two responsibilities. The first and most important has been the adoption of policies which balance out the cost of energy among areas which import oil and oil products and areas which produce it. The second has been the development of a national energy policy which treats all regions equally, because a policy which promotes regional competition is a policy doomed to fail.

Congress, reacting to the Arab oil embargo and the threat it posed to our economic future, agreed with those of us from New England and other energy importing regions that a policy which promotes economic benefit to some areas at the expense of others will in the end damage the American economy. We adopted a system of entitlements designed to roughly equalize the cost of all crude oil by spreading the cost of imported oil among all areas. We recognized that in our complex and interlocked economy a recession for some areas would in the end result in suffering for all. But the policy we adopted was incomplete on at least one major point. We did not spread the majority of costs of refined residual oil out across the country. I will not review the circumstances which led to that decision, but the decision was made.

Now, as we review a long-range energy policy which promotes the use of coal and alternatives to oil for fuel, the Energy Department has undertaken a review of our policy toward residual oil, and agreed that our region needs relief.

Yesterday and today, a group of Senators including myself and my distinguished colleague from Louisiana, Senator JOHNSTON, met to discuss that proposal.

I want to commend my colleague for his diligent efforts at helping shape a compromise which I believe will ease the cost of residual oil in the Northeast.

Federal energy policy after the Arab oil embargo helped my region avoid economic catastrophe. But I am convinced that it did not insulate my region from serious economic difficulty. The policy we agree to today recognizes this fact. And it recognizes that the Northeast must play an active part in our national drive toward energy independence.

Briefly, the agreement is this: That the value of entitlements for residual oil be increased to 50 percent of the difference in cost between foreign oil and domestically refined oil. Further, we have asked President Carter to waive the 63-cent per barrel import fee on residual oil. The net result will be a substantial easing of prices in the Northeast.

We have also agreed that energy independence means the abandonment of policies which discourage American producers from competing in portions of the American marketplace. Therefore, the so-called reverse entitlements program would also be eliminated. The effect of this would be to remove the barriers blocking east coast producers from competing in oil markets in the northeast.

Finally, we recommend a national refinery development policy which has several broad goals. First, we believe that Government policy should encourage new refinery and fuel desulfurization

capacity. Second, where possible, our demand for oil should be met by domestic refineries. Third, when new refineries are built to serve the U.S. market, they should be built in the United States. Fourth, the policy should recognize the difficulties independent refiners now face. Finally, and importantly, State and local policies for refinery siting should be developed consistent with environmental standards.

Mr. President, the development of siting, construction and operation guidelines consistent with environmental responsibility is not an easy task. But I am convinced it can be done, and that careful site selection and development can lead to domestic refineries whose benefits exceed their costs.

I think my region is willing to commit a portion of its resources to the national energy policy from which it also receives substantial benefit.

So when the Senator says that we are not supposed to defend ourselves in this region which has no indigenous energy sources, that we are not supposed to defend ourselves in the face of that kind of zig-zagging influence by this oil industry, I do not agree with it.

I have been fighting this fight when the oil industry was against refineries in New England, again when the oil industries were for refineries in New England, when the oil industry in this country was for imported oil, when it was against imported oil. I have been told over and over that what they really want is a free market, and I know that is not so.

What the Senator from Connecticut is arguing for is an application of free market principles. I have not seen it, not in 20 years, in this field.

Mr. WEICKER. Mr. President, I appreciate and accept the summation of the facts relative to Machiasport as stated by the distinguished Senator from Maine. On the other hand, that issue was resolved in the sixties, I believe. Here it is in the late 1970's.

Mr. MUSKIE. It was still an issue——

Mr. WEICKER. I do not yield.

Mr. MUSKIE. The Senator asked a question.

Mr. WEICKER. I accepted the statement of facts.

However, the bottom line is that there is no refining industry in New England today. Just now, just of late, have we decided that this is something we should get moving on. But the fact remains that today we have a program of controls—why should I have to defend a free market? It seems to me that those who have advocated controls have to defend a system of controls, in light of what the price of energy is in this country today.

I am talking about fossil fuels. Those who have advocated controls have to defend that program in light of the unstable supplies available to this country. But that has not occurred. All of a sudden those who want a change in the game plan, one which would take us to a free market, are the ones expected to stand up. If any track record had been established in any other way as has been established by the system of controls and entitlements, it would have been wiped off the boards a long time ago. But there is just a basic political dishonesty going on around here that makes people believe that in whatever section of the country, we can have cheap energy in the environment we live in today. We are Senators living in the year 1978. The world has changed entirely and we are unwilling to change with it.

I want to know how many men are going to go out on the campaign trail this year and advocate rationing and mandatory conservation, so no longer only elderly Americans, black Americans, poor Americans have to go ahead and ration or be rationed by price? How many are going to go out there and advocate some mandatory change in lifestyle?

Certainly, up to this point we have had a program of volunteerism, and again, as in the system of controls, how do you go ahead and justify the success of a program that has raised by 1,000 percent the consumption of oil? How do you justify that with a program of volunteerism? You cannot.

How do you justify the price of oil or an imbalance of payments in light of the control program?

No. I feel clearly the shoe should be on the other foot. But what I am warning all of you is this, and this is the point I am trying to make here today: Every step along the line requires one more bend of the pretzel and what you saw here today was a compromise negotiated between the Senator from Louisiana and some of my New England colleagues, and the reason why they put another bend in the pretzel was because it emanated from another pretzel-bending exercise, simply that of controls, and it goes on, and goes on.

Mr. LONG. Mr. President, will the Senator yield?

Mr. WEICKER. The difficulty is that once we pass whatever it is we are going to pass in Congress, Americans are going to believe we have an energy program. I think they have a right to believe that considering 100 responsible Senators, and the President are all affixing their name to it.

But the truth of the matter is it will not be an energy program. It will be a political program. It will be a philosophical program. It will be a special interest program. It will be every program in the world except an energy program. And that is what is killing this Nation, just as indeed the Nation is now suffering from the same disease, excessive politics, that we have suffered from in New England on the subject of energy.

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. WEICKER. I yield first to the distinguished Senator from Louisiana for a question.

Mr. LONG. Mr. President, as a matter of trying to keep the history straight on the subject, let me say to the Senator that he is making a magnificent argument and basically the problem about the Machiasport refinery from the point of view of the Senator from Louisiana, and I spoke against the refinery at this point, is just the kind of thing that the Senator is talking about. We objected to treating the Machiasport refinery any different than you treat a refinery in Louisiana or any other State in the Nation. We do not want favoritism of a State industry over another State industry with which we had to compete.

I ask the Senator if he cannot recall at the time that controversy was going on some of us here were opposed to it for our own reasons, which we explained for the record, from my point of view? The Senator will recall the people of Machiasport had a chance to vote on it and they voted they did not want the refinery in Machiasport. That is my recollection.

Mr. BROOKE. Mr. President, will the Senator yield for a question?

Mr. WEICKER. I yield for a question from the distinguished Senator from Massachusetts and then I will yield to the distinguished Senator from Idaho, and then I intend to yield the floor.

Mr. BROOKE. Mr. President, I say to my colleagues who are advocating this that no one would disagree with what the Senator from Connecticut said about the need of this Nation to have a sound and forceful energy policy. We do not have one. I agree with that, and so many others agree with that. We do not have controls. We should have a free market. But having failed to get an energy policy, having failed to have a free market situation, being subjected to spiraling oil, energy, and utility costs not only in New England but generally along the whole eastern seaboard, the Secretary of Energy, recognizing this, filed in the Register an oil entitlements program to give some relief because obviously he found that the relief was needed on the eastern coast.

I cannot see how the Senator not just because he comes from Connecticut, and I think Connecticut is still in the East, is opposed to that, because he is opposed to controls and he is opposed to the fact that we do not have an energy policy. He is opposed to the loss of revenue. But certainly I cannot understand why the Senator from Connecticut is opposed to an entitlements program and now to an even weakened entitlements program which is a result of a compromise entered into by Senators from the oil-producing States and generally Senators from the consuming States of the East and the Northeast. That is the question I raised.

Mr. WEICKER. I shall be glad to answer the question of the Senator from Massachusetts. He has made my point. The compromise is between the Senators from the Eastern States and Senators from the oil-producing States. What about the United States? That is the whole problem with this energy bill.

When we come to the business of why did the Secretary of Energy propose these entitlements regulations, I have quite a good memory of exactly what happened because I was a part of the energy conference which was going on at the time the pronouncement was made by the Secretary of Energy. At that time there was some pretty heavy lobbying going on on the House members of the conference by the administration. So I take this an-

nouncement as just part of the then maneuvering, if you will, to go ahead and get an energy bill, and what I am saying here is——

Mr. BROOKE. Is the Senator suggesting there was no finding by the Department of Energy that some relief was due to the Eastern States and due to some of the Midwestern States as well in promulgating this rule?

Mr. WEICKER. I am saying the sooner we get away from controls and entitlements, the sooner the prospect will be that we can have lower prices in New England. All that we are doing by the present system of controls is to guarantee that we are going to live with today's prices or higher.

Mr. BROOKE. I agree with that. No one is disagreeing with that.

If the people are going to be compelled to pay high prices time after time and pass that on to their consumers, obviously they need some relief, and this was an attempt to give them some relief.

Mr. WEICKER. I have great respect for the Senator from Massachusetts.

Mr. BROOKE. And I agree.

Mr. WEICKER. There is no finer representative of the State of Masschusetts or indeed of the Nation than he is. But I have lived with this wheeling and dealing that has been going on in this energy conference now for a year, and we have no bill. All we have out there is a series of compromises among various philosophical, partisan, and special interests, and basically what I am saying out here today is, I will have no more of it. I would rather start from scratch, if you will, than to end up in an aberration that is going to be Rube Goldberg in nature and that is going to end us up in exactly the same position we are in today, which is that our destiny energywise and indeed diplomatically is dictated to us by those who have their hands on the spigot, and those are not Americans.

So I am sorry that this is the bottom line. But certainly anyone of commonsense, when he asks himself the questions concerning price and supply, can only come to the same conclusion. When was the embargo? Four years ago. What has happened to price and supply? Price has soared and supply is erratic. What has happened to consumption? It soared. What has happened to the price that we pay? It soared.

What has happened in the Congress of the United States? Nothing. That has to deliver some kind of message. Believe me, it just is not a peculiarity on my part. These are the facts and figures that confront this Nation and stare it in its face. However, we continue to avoid them.

Do you not think it was amazing the other day, regardless of what your position was on the Arab arms deal, that this town, in its editorials. all of them and, I might add, New York and all over, automatically made that quantum jump to the fact that we had to make that accommodation because of our weak position oilwise and energywise? That is a heck of a statement to make that all of a sudden our foreign policy is no longer based on facts but, rather, is based on the particular position we are in in relation to another foreign power.

It goes on and on. Economically, were you proud of your President at Bonn, pushing peanuts down the streets of Bonn, economic peanuts, the greatest Nation in the world? Why was he in that position? Because he could not stand on his own two feet energywise, and that was not just his fault. It is the fault of every Member of this Congress, House and Senate, Republican and Democrat, that that man could no longer represent the greatest Nation in the world.

So, you know, we can go on in this artificial world of controls and entitlements and compromises. But, believe me, the minute we really strike pay dirt, we will have the respect, we will have the prices, and we will have the supplies this Nation deserves.

I yield the floor.

Mr. ROBERT C. BYRD. Mr. President, I wonder if we could agree on a time to vote on this amendment. This is my poor little bill. My poor little bill has been in the deep freeze now for 2 days. Its pulse is just about stilled, its temperature is very low, its blood pressure cannot be measured. I would hope that someone would come to the rescue of my poor little bill.

Can we reach a time agreement on this? We have discussed it—

Mr. McCLURE. Mr. President, will the Senator yield for a comment?

Mr. ROBERT C. BYRD. No, I will only yield for a question.

Mr. McCLURE. Mr. President, will the Senator yield for a question?

Mr. ROBERT C. BYRD. Yes.

Mr. McCLURE. Forty minutes ago the Senator from Connecticut made a point of order. Other Senators were making speeches, and I have been seeking recognition. Until I have gotten recognition on my own, there will be no unanimous consent.

Mr. ROBERT C. BYRD. Let me say I hope the unanimous consent might include the Senator for 30 minutes, so I hope he will not say there will not be any unanimous consent.

Mr. McCLURE. Mr. President, will the Senator yield for a question?

Mr. ROBERT C. BYRD. Yes.

Mr. McCLURE. Would the Senator be willing to withhold the unanimous-consent request until after the Senator from Idaho has been recognized?

Mr. ROBERT C. BYRD. How long would the Senator want to talk?

Mr. McCLURE. I would like to be recognized on my own right, and I am sure the Senator from West Virginia will not be disappointed by the length of time that I take.

Mr. ROBERT C. BYRD. I am reassured, and I believe the Senator when he says that. I just do not want my poor little bill to stay in the deep freeze for very much longer. So I yield the floor. I hope the Senator from Idaho will get recognition and speak for a reasonably short length of time, and then let us see if we cannot vote on this amendment. We have had it before the Senate. We have had a vote on the question of germaneness which indicates that the votes are here to pass the amendment, and I hope the Senate will do that. Let us get on and get my little bill out of the deep freeze and get on with the agriculture appropriations bill.

I yield the floor.

Mr. McCLURE. Mr. President, I thank the Senator from West Virginia, and I am sure he understands my sense of frustration that led me to make that remark that I did.

I agree with what the Senator from Connecticut has been saying with regard to the patchwork nature of our—I was going to say—energy policy, but it is not a policy; it is a nonpolicy or, perhaps, I should say the policy that we have is one of dependence, dependence upon OPEC. That is the only policy we have been able to develop, and it has developed by default and not be design.

We do have a policy today of dependence upon OPEC oil. That is the only energy policy which fills the gaps. I would agree with my friend from Connecticut that when we finish work, if indeed we are successful in finishing work, on the natural gas compromise and the conference, and even if this Senate should adopt it, which does not look likely, and even if it should then go to the House and be adopted in the House, we still would not have an energy policy even if all the four bills that have passed the Senate and gone to conference were ultimately adopted.

We still would have only a part of a policy. I agree with my friend from Connecticut that by patchwork measures of this nature we are not going to solve the energy problems of this country. This is the product of not having a policy.

The bill we are talking about today is the product of failing to come to grips with energy policy. I agree with the criticism the Senator from Connecticut has made concerning our failure in Congress as well as in the administration to come to grips with energy policy.

I would agree with my friend from Connecticut, too, as to what the appropriate remedy for that policy is, for that policy failure, and that is to get back to the free market and allow the market to supply the energy needs.

I would caution, however, my friend from Connecticut and others from New England that if we get to a free market, that does not mean automatically that energy prices go down. It means that energy prices will be lower than they otherwise would be, and it might indeed mean they are higher than they are now but not as much higher as they would be if we did not have a freely operating market.

But that, Mr. President, is a sideligh of the question we are being asked to consider here today. The entitlements program grew out of and because of the attempt of the Government to control a portion of our economy. You can control what is domestic. You cannot possibly control that which is brought in from outside the United States unless you want to simply cut off the imports and do without.

We are not in a position, Mr. President, to do that. We all know what our dependency has been. It was slightly over 20 percent at the time of the embargo a

little over 4 years ago, and it is now nearly 50 percent.

It was nearly 30 percent actually in January of 1974, but we have gone from 30 percent to 50 percent in just 4 years in a time when we are addressing a crisis.

I agree with my friend from Connecticut that we have not done what we should. The only positive thing that has happened in those 4 years to make our problem today less severe than it otherwise would be is the passage by Congress of the Alaska Pipeline Act which allowed the Alaskan oil in Prudhoe Bay to reach the markets in this country. We are having problems with that, too, I might say, because of some of the restrictions that have been placed upon the shipment and the transshipment of that oil into the markets in the United States. But at least that was a positive increase in production that will aid this country.

We also, of course, as my friend, the Senator from Oklahoma knows, and as he reminded me, did free up the price of oil from stripper oil wells largely as a result of the efforts of my good friend, Senator BARTLETT, because he was dogged and determined and he finally managed to just by sheer weight of determination and pursuit of the issue get Congress to agree with that proposal.

But we have not come to grips with the energy problem. Why are we here today? Because the entitlements program was put in to equalize the position between people who have different sources of crude oil. That was the purpose of the entitlements program.

There were people, some refiners and marketers, in this country that had to depend upon domestic oil and some who had to depend upon imported oil. Domestic oil was controlled at artificially low prices. The imported oil went to much higher prices. There is no way that the importer, the refiner of imported oil, could compete with the marketing of the refiner of domestic oil because the base price of the crude was so much different. Therefore, in order to overcome some of the bad effects of the attempt to control the market, we installed this aberration which is called entitlements, and it was to equalize to the refiner the price of the crude oil that was going into the refinery so they could compete openly and fairly in the market.

What has happened since then is a perversion of the purposes of the entitlements program. Suddenly, the administration has found that they have a way to reward, cajole, or ease the plight of those who are otherwise affected by price imbalances in the marketplace—not what Congress decided in passing the entitlements program, not what was directed in the statute, and I would say to my friend from Massachusetts, Senator BROOKE, if he were still on the floor, that there is, as a matter of fact, a question as to whether the administration of the entitlements law is pursuant to the law. They have gotten a 30-percent subsidy from the rest of the country, which is probably in violation of the law, and they are not satisfied with that. They want a 100-percent subsidy on some items that were not included in the original entitlements act.

There is likely to be a court challenge of that subsidy, because not being satisfied with a $215 million subsidy that they are getting now, they want another $500 million, which would be given to them through the compromise. They would be getting nearly a billion dollar subsidy if they got their way.

If the Secretary of Energy is successful in doing what he has suggested in his proposal, the rest of the country will pay a billion dollars a year in order that the people in New England may have a lower price for home heating oil and for residual oils that are burned in utilities.

Mr. President, that may be fair. It may indeed be fair. But that is not what Congress voted for. The compromise would validate something that has been invalid. It would put a stamp of congressional approval on something Congress has not yet approved. It would say what is being done is done with congressional consent, when as a matter of fact it is a violation of current law, in my opinion.

It is not only a violation of current law that they get the 30 percent that they have now, but it is a violation of law that will permit them to have a $700 million subsidy on top of that.

Mr. President, that is wrong: A $700 million subsidy on one kind of energy to one section of the country.

In my section of the country we have to import our energy from Canada. There is no one to pay us a subsidy because we import that natural gas from Canada. We have not requested it. We have said, however, it is not fair for you to ask us to pay the full cost of imported natural gas for ourselves, and share with New England their cost for imported oil.

Mr. President, there is nothing fair about this proposal. I hope the Senate will turn it down. Then when we have turned it down, maybe we will begin to exercise some of the discretion the Senator from Connecticut has suggested we should with regard to fashioning a rational energy policy for this country—one that will begin to recognize that you cannot have low prices when you have short supply, that you cannot guarantee protection to the consumers by creating governmental controls that in turn create shortages; that would just drive prices up. We cannot have liberty, equality of opportunity, and a sound policy for this country, and we cannot presume to have a rational energy policy in this country that requires the marketplace to assign priorities in the use of energy.

The marketplace will provide conservation. I agree we can also stimulate conservation, and I have consistently voted for that and will continue to do so. But you cannot allocate supplies by Government edict without creating problems exactly like the one we are dealing with here now, and when we try, we end up with a Department of Energy that has a second-year budget in excess of the profits of all of the major oil companies combined.

How many people in America really realize just what DOE is doing today? We are building a massive bureaucracy to handle what could be handled in the marketplace. We are doing that to save money? Who is kidding whom?

We are advocating cutting back on the size, shape, and weight of Government, and then at the same time adding to the burden. We create a monstrous Department of Energy, which will consume more of the taxpayers' money rather than less, and they will do that without adding 1 barrel of supplies to alleviate the suffering of people in New England, the Midwest, Wyoming, Michigan, or Idaho.

I thank the distinguished Senator for yielding, and I yield the floor.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the vote on this amendment occur in 15 minutes, with the remaining time to be divided 5 minutes to the Senator from Louisiana and 10 minutes to the managers of the bill.

Mr. BARTLETT. Mr. President, if the Senator will yield, will he make that 15 minutes?

Mr. ROBERT C. BYRD. Very well; 5 minutes to the Senator from Louisiana and 15 minutes to the opposition.

The PRESIDING OFFICER (Mr. BAYH). Is there objection? The Chair hears none, and it is so ordered.

Mr. BARTLETT. Mr. President, I wish the distinguished Senator from Maine were still on the floor. It is my recollection of Occidental's effort to locate a refinery in the free port zone of Machiasport, Maine—if I heard him correctly he said the refinery would willingly have purchased the oil domestically if it were available, but it was not available.

It is my recollection that at the time of the effort to locate a refinery at Machiasport, we had a surplus of oil in the Southwest, and that a part of the deal with Occidental was to be able to provide an additional outlet for their Libyan oil and sell it at a lower price than the price of domestic oil.

The mandatory controls that were on at that time were designed for the purpose of protecting the domestic industry from the cheap foreign imports, and it was recognized that it was important that the producers in this Nation have enough income to keep the oil and gas industry viable, alive, and productive.

The request of Occidental was to have a free port, and I believe to have a special area where, in addition to providing the jobs here for the processing of gas from oil, they would have been able to have shipped gasoline to this country rather than ship all the products outside. In addition, there was a request for an additional increase in the mandatory import allowable, so that Machiasport would have their oil industry, too.

I would have been in favor of regulations at that time which were in the interest of strengthening our economy and guaranteeing our national security by limiting the importation of crude or refined products. So I can see why the distinguished Senator from Maine would be very proud of this proposal in the State of Maine, but I am not so sure I know why he is so proud of it on a national basis, because the effort was certainly made in the best interests of Maine at the expense of the best interests of the remainder of this country.

I would like to ask the Senator from

Louisiana if paragraph (c) on the first page of the substituted matter of his amendment provides that gulf coast refineries must pay a penalty if they ship refined products to the east coast, unless they ship in American bottoms?

Mr. JOHNSTON. The answer to the Senator's question is that there are presently in effect reverse entitlements which would require that penalty. This amendment would take off the penalty if they ship in American bottoms, but would keep the penalty on if they do not ship in American bottoms.

Mr. BARTLETT. So the answer to my question is, "Yes," that the gulf coast refineries must pay a penalty if they ship refined products to the east coast unless they do it in American bottoms.

Under the Jones Act, gulf coast refiners which ship refined products from one part of America to another presently are required to ship in American bottoms.

Mr. BARTLETT. Does my good friend the Senator from Louisiana disagree with my statement that unless the gulf coast refineries, such as those of his own State, ship in American bottoms they would be assessed a penalty if they shipped refined products to the east coast?

Mr. JOHNSTON. If they violated the Jones Act, which they cannot do. By the provisions of the Jones Act, then, they would have a pay a penalty. The situation is such as that when you make moonshine whisky. You violate one law in doing it, but have to pay the excise tax on it if you do.

What we are trying to do is to take off the penalty, not to put it on. This takes away the penalty for gulf coast refiners who ship in American bottoms today. Now they have to pay a penalty if they ship in American bottoms. What this does is to remove that penalty from the gulf coast refiners who ship to the east coast. This is what the gulf coast refiners want.

Mr. BARTLETT. Let me ask, Is this going to result in a lowered cost for the delivery of refined products to the east coast or a higher cost? It is known that shipping in American bottoms is considerably more expensive than shipping in foreign bottoms, most of which are owned by U.S. interests.

Mr. JOHNSTON. Right now they have to ship in American bottoms. That is the law of the land under the Jones Act. Right now they are shipping very little, if any, refined products from the gulf coast to the east coast because under present law they have to pay a reverse entitlement on anything in excess of 5,000 barrels per month. They must pay that penalty now. They must ship in American bottoms now. What this amendment does is to take off the penalty if they ship in American bottoms. So this is very much a provision which is in favor of gulf coast refiners or, indeed, any domestic refiner.

Mr. BARTLETT. Is the Senator then saying that this will result in a reduction in the cost of delivered products laid down on the east coast?

Mr. JOHNSTON. As compared to what? A reduction compared to today's prices or the rulemaking to go into effect on August 26? Which one does the Senator mean?

Mr. BARTLETT. Reduction in the present regulations, in the present law.

Mr. JOHNSTON. Provided two things, provided the President continues the import fee licensing exemption, and further providing that the Caribbean refiners do not raise their price, this should result in a price decrease of about 60 cents a barrel.

Mr. BARTLETT. I am sorry, I could not hear the Senator.

Mr. JOHNSTON. A decrease in the price of imported resid on the east coast of approximately 60 cents a barrel, but there are the two provisos: The President to continue the import fee license exemption, and that the Caribbean refiners do not increase their price.

Mr. BARTLETT. This provision C is in the other amendment which would place the entitlement at 30 percent instead of increasing it to 50 percent.

Mr. JOHNSTON. The Senator is correct. That does include that. The elimination of the reverse entitlement is also included in the rulemaking.

Mr. BARTLETT. I thank the Senator from Louisiana.

I would like to compliment my distinguished friends from Wyoming and Idaho for their statements covering this amendment and covering the entitlement question in general. I think it is very important to realize that the reason for entitlement is political in nature and not done for the best interests of this Nation. It is not done out of a sense of fair play. I believe, as the distinguished Senator from Wyoming, that the original amendment by the distinguished Senator from Louisiana is preferable to this one. This one, of course, is a compromise.

I do think the equitable decision for this body to reach is to pass the original amendment by the distinguished Senator from Louisiana, which will be, as I understand it, the pending business if this is defeated. I urge my colleagues to defeat it.

The PRESIDING OFFICER. Who yields time?

Mr. JOHNSTON. Mr. President, we are under a time agreement. I have only 5 minutes. I will use a little less than that and then we will vote.

First, I will yield 1 minute of my time to the distinguished Senator from New York.

Mr. MOYNIHAN. Mr. President, I rise only to confirm the interests of the State of New York in this matter. There seems to have been, in the rhetoric of this debate, a focus on New England. This is a general eastern phenomenon. The State of New York consumes 30 percent of the residual oil imported into the United States. We are very concerned with the outcome of this debate. We accept the compromise, and I hope the distinguished Senator from Louisiana will understand my meaning when I say we see it as a compromise. It is not a matter which would reflect our sense of equity and what we would hope for and expect, but it is what we can obtain. We accept it and we will support it on those grounds. I thank the Senator from Louisiana.

Mr. JOHNSTON. Mr. President, we have had an interesting debate this afternoon—and I agree with almost every word which has been said—but none of it is really relevant to the issue before the Senate at this time.

The situation we are faced with is that the present law provides a 30-percent entitlement or a subsidy of about 60 cents per barrel, which is in the law now, for the eastern seaboard, principally the Northeast as the principal consumer of home heating oil. The Department of Energy presently has a rulemaking, which will go into effect in August of this year unless the Senate or the Congress takes action, which will increase that 30-percent entitlement to 100 percent, or grant a subsidy of about $2 a barrel. Unless this Senate and this Congress acts with a bill that winds its way through the whole process, that $2 subsidy goes into effect.

I have tried to stop that in the Energy Committee and in the Appropriations Committee. I can tell you, Mr. President, that I believe the original Johnston amendment ought to be agreed to. It prohibited anything more than what we have now in effect from going into effect. It prohibits the subsidy on the northeast coast.

However, in the spirit of compromise, recognizing that a lot of things can happen to an amendment before it gets to the President's desk, I thought it better to come up with a compromise that assures a savings to the rest of the country.

What can happen between here and the President's desk? Plenty. We lost this in the Appropriations Committee by 1 vote.

I might say to my friend from Connecticut that he voted against the Johnston compromise in the Appropriations Committee.

It is possible to lose this matter somewhere between here and the President's desk. For that reason, we came up with a compromise.

This compromise saves the consumers of petroleum products in the 36 States which are not included in PAD 1 a total of $180 million a year. It grants to PAD $70 million a year. In other words, two-sevenths we give and five-sevenths we get. That is the trade.

It is arbitrary, classic compromise.

I surrender nothing of my conviction that the original Johnston amendment is the best thing to have, but five-sevenths of a victory when we are reasonably sure of that, and when we are sure that all of this subsidy phases out on July 1 of next year and is not permanent as the present rulemaking is, I think is a real compromise and great progress over the present situation.

If we vote this compromise down, then we may not pass the Johnston amendment, or if we pass it, it may fail in conference.

Let me remind you, Mr. President, that the Speaker of the House is from Massachusetts and wants the full entitlement, and he has some influence on the floor of the House.

And let me remind you, Mr. President,

that the administration is strongly backing and indeed proposing the full 100 percent entitlement. It is in that spirit that a five-sevenths victory is, I think, a good and decent compromise. I believe all Senators who are parties to this negotiation have approached it in that sense of compromise, which is good and adequate. I hope the Senate will adopt the amendment.

Mr. President, I yield back the remainder of my time. Is there an order for the yeas and nays?

The PRESIDING OFFICER. The yeas and nays have been ordered. The time of the Senator from Louisiana has expired. The Senator from Oklahoma has 5 minutes; the Senator from New Hampshire has 5 minutes.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the privilege of the floor be granted during the remainder of consideration of the pending bill to Ron Shiflett of Senator McCLURE's staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURKIN. Mr. President, I ask unanimous consent that the privilege of the floor be granted to Marea Murray and David Thompson of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURKIN. Mr. President, this has been adequately debated. I am prepared to yield back the remainder of my time and vote.

I might point out that it is not necessary to debate in this Chamber, but the east coast, especially New England, has been discriminated against in Federal energy policy for at least the last 15 years. Many of those decisions were administrative, not legislative in nature. Nonetheless, the impact on my people has been the same. I urge adoption of the amendment.

I yield back the remainder of my time.

The PRESIDING OFFICER. Does the Senator from Oklahoma yield back the remainder of his time?

Mr. BARTLETT. Yes, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment in the second degree offered by the Senator from Louisiana. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. ROBERT C. BYRD (after having voted in the negative). Mr. President, on this vote, I have a live pair with the distinguished Senator from Maine (Mr. HATHAWAY). If he were present and voting, he would vote "aye." I have already voted in the negative. I therefore withdraw my vote.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK, the Senator from Delaware (Mr. BIDEN), the Senator from Maine (Mr. HATHAWAY), and the Senator from Minnesota (Mrs. HUMPHREY) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "nay."

Mr. STEVENS. I announce that the Senator from New York (Mr. JAVITS) and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

The result was announced—yeas 53, nays 40, as follows:

[Rollcall Vote No. 303 Leg.]

YEAS—53

Allen	Ford	Moynihan
Brooke	Glenn	Muskie
Bumpers	Gravel	Nelson
Burdick	Hart	Nunn
Byrd, Harry F., Jr.	Heinz	Pell
	Hodges	Percy
Cannon	Huddleston	Proxmire

Goldwater	Magnuson	Weicker
Griffin	Mathias	Young
Hansen	McClure	Zorinsky

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Mr. Robert C. Byrd, against.

NOT VOTING—6

Abourezk	Hathaway	Javits
Biden	Humphrey	Wallop

So the amendment in the second degree was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DURKIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the yeas and nays on the amendment, as amended, be vitiated, because it would simply be voting on the same thing over again.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The question is on agreeing to the amendment, as amended.

The amendment, as amended, was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the amendment, as amended, was agreed to.

Mr. HUDDLESTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

● Mr. RIEGLE. Mr. President, I want to thank Senator ROBERT C. BYRD and the Interior Subcommitte for recognizing the importance of the Indian health service facility at Kincheloe Air Force Base in Michigan's upper peninsula by including in H.R. 12932 an appropriation of $947,000 for the clinic. These funds will open the first direct care, outpatient facility for Michigan Indians in the upper peninsula.

A unique aspect of this project is the immediate availability of the facility, which was constructed by the Air Force. Therefore, no new construction is necessary, and the unmet health needs of Michigan Indians can be served without delay.

In addition, putting the hospital back into operation as an outpatient clinic will be one more part of the economic revitalization of the Kincheloe area. It puts a vacant facility into productive use, and will provide economic stimulation to Chippewa County, which faced an unemployment rate of more than 32 percent after the Air Force Base was closed in October 1977.

These funds will be used largely for professional medical staff and other personnel, including a physician, a dentist and dental assistant, a registered nurse and a public health nurse, a mental health professional, and laboratory and X-ray technicians. Health care services available to Michigan Indians today is well below acceptable standards, and the opening of this facility will provide some very necessary care and services.

The entire community is very supportive of this Indian Health Service project, and has come to the aid of the Intertribal Council in their efforts to obtain funding. Endorsements have come from the Keweenaw Bay Indian community, the Saginaw Chippewa Indian Tribe, Bay Mills Indian community, Hannahville Indian Reservation, and the Sault Ste. Marie Tribe of Chippewa Indians. The State of Michigan has expressed its strong support of the project, and local governments have come to the aid of the council, including the city of Sault Ste. Marie, the Chippewa County Board of Commissioners, and the Economic Development Corp. of Chippewa County.

I am very pleased that these funds have been appropriated for the Indian Health Service Clinic, and that the Indians of the Upper Peninsula will have the facility and resources necessary for adequate outpatient health care.●

Mr. HARRY F. BYRD, JR. Mr. President, the bill before us, providing appropriations for 1979 for the Interior Department and related agencies, contained budget authority of $11,560 million as reported by the Committee on Appropriations. More than $65 million has been added to the bill by amendment on the floor.

The legislation as it now stands would increase appropriations by 8.5 percent over the level of the current year, 1978. The increase in dollars is $905 million.

This is a large increase.

I recognize that inflation can be expected to raise the cost of many Government programs, including the ones covered in this legislation.

Moreover, the vast majority of the programs included in this bill are important and worthwhile. Few things are more critical for the Nation than the energy program, and I have always attached great importance to the land and water conservation efforts of the Department of the Interior.

At the same time, some of the increases in funding included in this legislation are out of line.

Let me call to the attention of the Senate what some of these increases are:

For the historic preservation fund, $55 million, or 122 percent over 1978. This amount is $55 million over the budget and $40 million over the House bill.

For the Institute of Museum Services, a 100-percent increase, from $4 million to $8 million. This may be a small amount in dollars, compared to the total for the bill, but it is hard to see the necessity for doubling such a program at this time.

For the National Foundation on Arts and Humanities, $49 million over 1978 or 20 percent. I ask this, Is this program that must be greatly expanded in a time of high deficits and high inflation?

Other large percentage increases over 1978 include these:

Office of Territorial Affairs, 17 percent; Indian education, 20 percent; Pennsylvania Avenue Development Corporation, 29 percent; Fish and Wildlife Service, 21 percent; Office of Surface Mining Reclamation and Enforcement, 87 percent.

I do not quarrel with the merits of these programs. I do suggest, however, that we need to apply a sharper knife to the budget.

The No. 1 issue in this country is inflation. It is No. 1 in importance to our economic well-being, and it is No. 1 in the concerns of the public.

The huge deficits—$50 billion a year—which the Federal Government is continuing to run make a major contribution to that inflation. In fact, if the Government continues to follow its present stimulative policies, it is entirely possible that the present double-digit inflation which we are experiencing could continue for some time, and lead to a sharp recession in the future.

That is the biggest challenge which the President and the Congress face.

It is absolutely essential that the Government check its runaway spending.

So while this legislation supports a number of sound and needed programs, it also includes increases in spending which in my judgment cannot be justified in the light of present economic conditions.

I must, therefore, vote against the passage of H.R. 12932.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read the third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistance legislative clerk called the roll.

(Mr. LEAHY assumed the chair.)

Mr. ROBERT C. BYRD (after having voted in the negative). Mr. President, on this vote I have a pair with the distinguished Senator from Maine (Mr. (HATHAWAY). If he were present and voting, he would vote, "yea." If I were at liberty to vote, I would vote, "nay." I withdraw my vote.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Delaware (Mr. BIDEN), the Senator from Maine (Mr. HATHAWAY), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from New York (Mr. MOYNIHAN), the Senator from Mississippi (Mr. STENNIS), and the Senator from Illinois (Mr. STEVENSON), are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY), would vote "yea."

Mr. STEVENS. I announce that the Senator from New York (Mr. JAVITS), and the Senator from Wyoming (Mr. WALLOP), are necessarily absent.

The result was announced—yeas 85, nays 5, as follows:

[Rollcall Vote No. 304 Leg.]

YEAS 85

Allen	Goldwater	Melcher
Anderson	Gravel	Metzenbaum
Baker	Griffin	Morgan
Bartlett	Hansen	Muskie
Bayh	Hart	Nelson
Bellmon	Haskell	Nunn
Bentsen	Hatch	Packwood
Brooke	Hatfield,	Pearson
Bumpers	Mark O.	Pell
Burdick	Hatfield,	Percy
Cannon	Paul G.	Randolph
Case	Hayakawa	Ribicoff
Chafee	Heinz	Riegle
Chiles	Hodges	Sarbanes
Church	Hollings	Sasser
Clark	Huddleston	Schmitt
Cranston	Inouye	Schweiker
Culver	Jackson	Scott
Curtis	Johnston	Sparkman
Danforth	Kennedy	Stafford
DeConcini	Laxalt	Stevens
Dole	Leahy	Stone

NAYS—5

Byrd,	Helms	Proxmire
Harry F., Jr.	Lugar	Roth

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Mr. Robert C. Byrd, against.

NOT VOTING—9

Abourezk	Humphrey	Stennis
Biden	Javits	Stevenson
Hathaway	Moynihan	Wallop

So the bill (H.R. 12932), as amended, was passed.

Mr. HUDDLESTON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make clerical and technical corrections in the engrossment of the Senate amendments to H.R. 12932.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUDDLESTON. Mr. President, I move that the Senate insist upon its amendments and request a conference with the House of Representatives, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer (Mr. LEAHY) appointed Mr. ROBERT C. BYRD, Mr. HOLLINGS, Mr. BAYH, Mr. JOHNSTON, Mr. HUDDLESTON, Mr. LEAHY, Mr. DECONCINI, Mr. BURDICK, Mr. STEVENS, Mr. YOUNG, Mr. MARK O. HATFIELD, and Mr. BELLMON conferees on the part of the Senate.

ORDER OF PROCEDURE

UNANIMOUS-CONSENT AGREEMENT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, following the disposition of Calendar Order No. 922, the public works appropriations bill, the Senate proceed to the consideration of Calendar Order No. 989, the tuition tax credit bill, and that, following the disposition of that, the Senate proceed to the consideration of Calendar Order No. 585, the education grants bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, upon the disposition of the pending measure—if I may have the attention of my friends to my left—the Agriculture appropriation bill will come up next. So that Senators may be informed as to what the evening may appear to be like, I wonder if we could ascertain now how many amendments there will be on the Agriculture appropriations bill?

Mr. WEICKER, Mr. STEVENS, Mr. LUGAR, Mr. CLARK, Mr. MELCHER, Mr. METZENBAUM. Six amendments.

Mr. DOLE. I think there are nine all together.

Mr. ROBERT C. BYRD. There is a time agreement on the bill, so we will sail ahead for a while at least and see how things look.

I thank all Senators.

PRIVILEGE OF THE FLOOR

Mr. LEAHY. Mr. President, I ask unanimous consent that if the Senate proceeds to the consideration of the agricultural appropriations bill this evening, Ken Pierce, of my staff, have the privilege of the floor during the debate and votes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I make the same request for Ken Dameron of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CLARK. Mr. President, I make the same request for Bill Motes of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

(At this point, several Senators requested the privilege of the floor for staff members.)

The PRESIDING OFFICER. The Chair hears voices, but so many people are standing that the Chair does not know who is speaking.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to proceed for 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order.

CONFEREES ON S. 2152

Mr. HARRY F. BYRD, JR. Mr. President, I would like to address a parliamentary inquiry to the Chair.

The PRESIDING OFFICER. The Senator will state it.

Mr. HARRY F. BYRD, JR. Would the Chair inform the Senate whether conferees have been appointed, on S. 2152 and, if so, who the conferees are and when the appointment was made?

The PRESIDING OFFICER. If the Senator will withhold for just a moment we will get that information.

Mr. HARRY F. BYRD, JR. I thank the Chair.

The PRESIDING OFFICER. Our records do not show any or do not have any indication that a conference has been requested, the Chair would advise the Senator from Virginia.

Mr. HARRY F. BYRD, JR. I thank the Chair for that information.

I have been advised that the conferees had met and have made tentative decisions in regard to S. 2152. I note that the calendar of business for Wednesday, August 9, does not carry anything in regard to conferees on this bill, and the Chair has just indicated that no conferees have been appointed. It is a very unusual step for a conference to be held before conferees are appointed.

As one Senator, I would like to protest that.

BUDGET ACT WAIVER

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 996, S. Res. 530.

The PRESIDING OFFICER. Without objection it is so ordered.

The resolution (S. Res. 530) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2640, was considered and agreed to, as follows:

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of that Act are waived with respect to the consideration of S. 2640, a bill to reform the civil service laws.

Such waiver is necessary to permit consideration of S. 2640, a bill to reform the civil service system. While the bill authorizes to be appropriated such funds as may be necessary, the Congressional Budget Office estimated the cost of the bill at $13,600,000 for the fiscal year beginning October 1, 1978.

The President only submitted the bill to Congress on March 3, and the number of hearings required and the complexity of the subject made it impossible for the committee to report the bill before the May 15 budgetary deadline.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES APPROPRIATIONS, 1979

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of H.R. 13125, which the clerk will state by title.

The assistant legislative clerk read as follows:

Calendar 982, H.R. 13125, an act making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1979, and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Appropriations with amendments.

Mr. THURMOND. Mr. President, I ask unanimous consent that Ed Twilly of my staff be allowed the privileges of the floor during the consideration of this bill and the votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that John MacIlroy of my staff be granted the privileges of the floor during the consideration of the Agriculture appropriations bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MELCHER. Mr. President, I ask unanimous consent that Ned Leonard of Senator McGOVERN's staff may have the privilege of the floor during the consideration of and votes on this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. I ask unanimous consent that the following staff members, for the following Senators, be accorded the privilege of the floor during the consideration of this measure: Bill Seale of Senator HUDDLESTON's staff, Joe Kinney of Senator MORGAN's staff, and Tom Dougherty of Senator GLENN's staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENSON. Mr. President, I ask unanimous consent that Mary Helen Miller of my staff have the privilege of the floor during the consideration of this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BELLMON. Mr. President, I ask unanimous consent that Jennifer Oldfield of Senator HATFIELD's staff and Brad Gungoll of my staff be accorded the privilege of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, the bill before the Senate, the 1979 Agriculture appropriations bill, includes $23,362,064,000 in new budget authority, plus $1,411,575,000 in section 32 transfers to the Food and Nutrition Service, for total obligational authority of $24,773,639,000. Making adjustments to the House bill for full funding of Commodity Credit Corporation reimbursements, $5 billion of permanent new borrowing authority, and full funding of new watershed projects, the bill is actually $120,780,000 below the House-passed bill, but $271,912,000 above the 1979 budget request.

Let me emphasize that, Mr. President, for the purposes of the debate. When you do away with the funny business with figures, whether you include all the borrowing authority for the Commodity Credit Corporation, as well as reimbursement for losses when you look at it, in reality, our bill is roughly $120 million below the House-passed bill, but, in all candor, it is $271.9 million over the President's budget.

Mr. President, review of this bill has been a difficult task this year, made so by a tight budget request, the pressure to hold down Federal spending, and the many needs of the agricultural sectors of our economy. The committee held 20 hearings, including a special "appeals" hearing with the Secretary of Agriculture, and an indepth review of research facilities.

One of the hearings was devoted to testimony from Senators. Considering those who appeared at that hearing, plus other letters and written communications, the subcommittee received the views of 85 different Senators in over 200 letters and other communications. The interest in the bill was very substantial, and in every case, the desire was to add funding. Providing for all of the items requested by Senators would have added well over $900 million above the budget request to this bill.

Mr. President, many of the items requested have great merit. However, in view of the need to keep Federal expenditures down, as well as the strong hint of a Presidential veto of the bill should it be as high as the House bill, which was some $400 million again I add, above the budget, the committee attempted to fund only the highest priority items.

The committee report contains a section on pages 6 through 8 of highlights of major changes to the House bill, and I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the excerpt from the committee report was ordered to be printed in the RECORD, as follows:

HIGHLIGHTS OF MAJOR CHANGES RECOMMENDED TO HOUSE BILL

Highlights of major recommendations and changes to the House bill are:

Science and Education Administration (Agricultural Research Service).—The Committee does not concur in the House action shifting major new budgeted extramural—contractual—work to inhouse labs, but does propose to shift $2 million in-house. In addition, a $7.7 million reduction is recommended in the $55 million account for processing, storage and distribution research, as proposed in the budget but restored by the House. House increases for staffing of the Baylor child nutrition laboratory and staffing and construction of the Regional Veterinary School at Virginia Polytechnic Institute have been deleted.

Research Construction.—The Committee recommends deferral of all new construction starts proposed in the House bill except the North Central Dairy-Forage laboratory, soil erosion laboratory and planning for relocation of an animal disease laboratory. Also, construction of a new greenhouse/headhouse is proposed.

Animal and Plant Health Inspection Service.—The Committee has added $5.7 million for range caterpillar, noxious weed, and brucellosis eradication above the House bill, but deleted House add-ons above the budget for imported fire ant, tuberculosis in live-

stock, pink bollworm, cattle scabies, and fever tick.

Cooperative research.—The Committee recommends an appropriation for Hatch Act grants at a $114 million level. The Committee recommends funding a competitive grants program of $30 million, the same as the budget request, but has also recommended deleting $15 million of House-added special grants and $5.5 million of House increases for rural development, range caterpillar and solar research projects.

Extension Service.—The Committee deleted House-proposed increases for rural development, farm safety, urban gardening, expanded food and nutrition program, and farmer-to-consumer direct marketing, as well as solar farms. An increase of $11.6 million above the budget and House bill is recommended for formula grants.

Agricultural Stabilization and Conservation Service.—Reduces funds for county office staffing by $10 million pending review of workload by the General Accounting Office.

Commodity Credit Corporation.—Fully funds reimbursements for prior year losses, which the House had cut by $410 million. Also, provides $10.5 billion in new borrowing authority, which the administration has indicated it supports, even though the extra $5 billion has not been formally requested, nor included in the House bill.

Farmers Home Administration.—Generally concurs in House actions on Farmers Home programs, but does provide a $500 million above-moderate rural housing loan program and an additional 10,000 rural rent supplemental units above the House bill. Provides a total of $20 million ($13 million above the House) for 1,188 new FmHA positions.

Conservation.—Deletes House add-on of $7 million for new watershed planning because of large backlog, and fully funds $75 million in the President's budget for new Public Law 566 watersheds which the House had only partially funded. Provides $17 million for Resource Conservation and Development, instead of $32 million in House bill, and eliminates new area authorizations.

Agricultural conservation programs.—Provides $85 million for long-term enduring conservation practices, $105 million below the House level for the agricultural conservation program. Also, funds the new section 35 (section 208—Clean Water Act) agricultural conservation program at $100 million, with $75 million in an appropriation for nonpoint source pollution—grant agreements and technical assistance for the Soil Conservation Service, and the other $25 million in a separate appropriation for direct cost-sharing payments by the Agricultural Stabilization and Conservation Service. The Secretary of Agriculture is given authority to transfer up to 50 percent between each appropriation.

Feeding programs.—Deletes House add-on of $8 million for equipment assistance, and restores budget request to draw down section 32 to a balance of $225 million. Concurs in House bill and budget request for food stamps, food donations, special milk, and food program administration. Funds the special supplemental feeding program (WIC) at $550 million. Also restores the Department's authority to regulate use of formulated grain fruit products in feeding programs

Public Law 480.—Recommends deletion of the provision prohibiting Public Law 480 aid to Korea.

CCC export credit sales.—Proposes a limitation of $2.2 billion instead of the $1.7 billion level in the House bill.

Regulatory proceedings.—Deletes House provision prohibiting payment of expenses of parties intervening in agency regulatory proceedings.

Personnel ceilings and separate salaries accounts.—Deletes minimum ceilings stipulated in House bill and restores the budget approach of a combined salaries and expenses account.

Food and Drug Administration.—Restores $5 million reduced by House for salaries, since manyear requirements will more closely approximate budgeted levels.

Commodity Futures Trading Commission.—Deletes $900,000 of a budgeted increase for staffing that was approved by the House.

Mr. EAGLETON. Now, I would like to summarize what is in the bill by title. The largest items in title I, agricultural programs, include:

A sum of $358,541,000 for all appropriations associated with the Agricultural Research Service. This is $17 million less than the House and $27.5 million above the budget estimate. It includes many new items of in-house research, plus construction of new dairy-forage and soil erosion laboratories.

A sum of $228,150,000 for the Animal and Plant Health Inspection Service. This is $7.9 million above the budget, but $2.7 million less than the House bill. Included here are funds for plant and animal disease and pest control, including increases for brucellosis eradication, control of noxious weeds and other smaller control programs.

A sum of $271,104,000 for the activities of the Food Safety and Quality Service. This principally involves meat, poultry and egg inspection, as well as voluntary grading activities.

A sum of $179,520,000 for the Cooperative Research Service and $273,926,000 for the Extension Service. These appropriations are $21.8 and $11.9 million over the budget to fund a higher level of effort. Also included is $30 million for a competitive grant research program requested by the President but deleted by the House.

A sum of $217,527,000 for salaries and expenses of the Agricultural Stabilization and Conservation Service, principally to run the farm price support programs.

A sum of $10.5 billion in new borrowing authority for the Commodity Credit Corporation. These funds will be needed to implement the 1977 farm bill and associated programs.

A sum of $990.9 million to reimburse the Commodity Credit Corporation for all losses incurred through 1977. The House had deleted $411 million of this reimbursement, but it must be paid eventually.

In title II, rural development programs, the bill provides $4.3 billion in authority for loans from the Rural Housing Insurance Fund. This includes $800 million for moderate-income insured housing, $500 million for similar guaranteed housing. Low-income housing loans are also provided at a level of $2,067,000,000.

This title also provides $2,308,600,000 in authority for Agricultural Credit Insurance Funds. This includes $800 million for farm operating loans and such funds as may be necessary for emergency loans, which are estimated at $578 million.

For the rural development insurance fund, total loans of $2,250,000,000 are authorized in the bill consisting of $900 million for water and waste disposal loans, $250 million for community facility loans and $1.1 billion for business and industrial loans.

A number of grants for rural development programs are also contained in the bill including: First, $300 million for water and waste disposal grants, $38 million for farm labor housing grants, $24 million for home repair grants, and $5 million for rural development planning grants.

In addition to reimbursement for losses previously incurred by the rural housing insurance fund ($320.2 million), the agricultural credit insurance fund ($143.6 million) and the rural development insurance fund ($107.3 million) which are provided in the bill, a total of $219,566,000 is also provided for salaries and expenses of the Farmers Home Administration. This includes an increase of $20 million above the budget for approximately 1,200 new positions to aid Farmers Home in administration of loan and grant programs.

For the Rural Electrification Administration, the bill includes an authorization of $850 million in electric loans, $250 million in telephone loans, and $30 million for capitalization of rural telephone banks.

For the Soil Conservation Service, $255,296,000 is included for conservation operations and technical assistance. A total of $227,522,000 is included for watershed and flood prevention operations. This finances the installation of planned works of improvement for conservation and flood prevention as authorized by Public Law 566 and Public Law 534. The committee concurred in the budget proposal for full funding of new starts. Also included is $16.8 million for the resource conservation and development program. This is $10 million above the budget estimate but does not fund 10 new area authorizations that were included in the House bill. For nonpoint source pollution control, authorized by section 35 of the Clean Water Act, the committee recommended a total of $100 million with $75 million provided to the Soil Conservation Service for grant agreements and technical assistance and $25 million provided to the Agricultural Stabilization and Conservation Service for direct cost-sharing payments. Authority is included in the bill to transfer up to 50 percent of these appropriations between the two agencies involved.

The bill also provides $85 million for the agricultural conservation program. It includes language reforming the program to place emphasis on enduring conservation practices, as recommended by the administration, the General Accounting Office, and the 1977 Farm Bill. Other conservation programs in the bill operated by the Agricultural Stabilization and Conservation Service include $17.5 million for the forestry incentives program, $10 million for the Water Bank Act program and $10 million for emergency conservation measures.

For title III, the domestic food programs, the bill includes $7.9 billion in appropriations and $1.4 billion in transfers. Child nutrition programs are funded at a $2.7 billion level including transfers and finances the school lunch and school breakfast programs, equip-

ment assistance, State administrative expenses and the summer food services and child care food programs. Also included in the bill is $569.5 million for the special supplemental food programs, including the commodity supplemental food program and the program to provide food for women, infants and children (WIC). The special milk program is funded at a level of $142 million in the bill. The food stamp appropriation totals $5,779,200,000, the same amount as the budget estimate and House allowance. In addition, for administration of all the feeding programs, $74,275,000 is provided. Mr. President, we have received a letter from the Department indicating that although various reestimates have been made for the food stamps and child nutrition programs, they have reevaluated them and recommend that we remain with the budget estimate. Accordingly, no changes have been made.

Included in title IV, international programs, of the bill is $56,403,000 for the Foreign Agricultural Service to promote U.S. agricultural exports and development of foreign markets. In addition, this title provides $805.9 million for Public Law 480, food for peace, assistance consisting of $339.4 million for titles I and III credit sales and $466.5 million for title II loan programs. The committee recommended striking the House prohibition on use of Public Law 480 funds for aid to Korea.

Title V of the bill includes funding for related agencies consisting of $305.9 million for the Food and Drug Administration, $15 million for the Commodity Futures Trading Commission and $1.5 million for the National Alcohol Fuels Commission.

Title VI includes general provisions that have previously appeared in Agriculture Appropriations Acts. Also, in this title the committee recommends reform of general provisions relating to the agricultural conservation programs and the types of practices that will be permitted. A House provision (Sec. 613) which prohibited payment of expenses of parties intervening in agency regulatory proceedings has been recommended for deletion by the committee, in order to permit and encourage full participation by all those affected by agency decisions.

Mr. President, I yield to my distinguished ranking minority colleague, the Senator from Oklahoma (Mr. BELLMON).

Mr. BELLMON. Mr. President, I would like to begin by thanking and congratulating the distinguished Senator from Missouri, chairman of the Agriculture, Rural Development and Related Agencies Subcommittee of the Senate Appropriations Committee. His leadership during our deliberations on the measure we have before us today can be characterized as nothing short of outstanding. This is apparent to anyone who has examined the bill.

Senator EAGLETON has taken over this responsibility only recently, and he has mastered the complexities of this highly complex legislation, and has done, in my judgment, an outstanding job in bringing us a fine bill. He has worked hard to take care of the highest priorities in this area, and has had tremendous pressures brought on him to add significant quantities of money to the bill, but has been able to reduce those and has brought out a bill that, in my judgment, is very tight.

This is the first time in my recollection that the Agriculture appropriations bill, as recommended by the committee, is less than the House passed bill. The bill as reported contains $23,362,064,000. The House bill, after adjustments for nonprogrammatic changes, amounts to $23,420,629,000. This is $58.6 million more than the Senate committee recommendation.

I would add that an unprecedented amount of pressure was brought to bear on the committee to increase funding for a wide variety of programs and special interests. Had the committee yielded to these pressures, this bill would exceed the House passed version by nearly a billion dollars.

Never has such a concerted effort been made to hold down the total size of this bill. Never before has each item in the bill received such a thorough and critical examination. Never before has the committee had to refuse increases for so many worthy programs. In short, never has our task been so difficult. I can add, however, that never have I been more impressed nor more satisfied with the strength and quality of the bill we have reported.

I commend the Senator from Missouri for his dedication and his forthright leadership. I would also note the continuing support and guidance of the Senators from Washington and North Dakota, who as chairman and ranking minority member of the full Appropriations Committee, have contributed greatly to the consideration of the bill.

Mr. President, the bill as recommended is $272 million more than was contained in the President's budget request. This increase is principally composed of modest adjustments in three critical areas: agricultural research, rural development and conservation.

For the Agricultural Research Service, the committee recommends a total increase of $27 million. Half of this increase is for critically needed facilities, the balance is for program adjustments. Other increases are $21 million for cooperative State research and $12 million for extension activities. As noted in the committee report, the President's budget is sorely deficient in addressing the critical need for agricultural research. Spending in the agriculture sector was to be reduced by 10 percent in real terms while space and defense research and development expenditures in current dollars were provided 7 and 10 percent increases, respectively. While the increases recommended by the committee for agricultural research will barely provide sufficient funding to keep pace with inflation, it was the maximum that could be provided in view of pressing budgetary constraints and repeated demands by the administration to not significantly exceed the budget estimate. It is our hope that in the future, the President's budget will more realistically reflect the high priority and value of agricultural research.

The committee also recommended increases for the critical rural development programs. Rural residents, especially those who are poor or elderly, endure many of the difficulties facing their urban counterparts. Often, however, they are denied many of the governmental assistance programs taken for granted by the urban residents. This disparity is greatest in housing, water facilities, and economic development. The bill as recommended makes modest adjustments toward rectifying some of the most critical of these. Also the committee has recommended an increase over the House bill to provide for increased staffing of the Farmers Home Administration to allow for more adequate program support, bringing the total increase for this agency to $78 million. Again, the committee was constrained in fully addressing these needs because of overall budgetary considerations.

The third major area of increase was $114 million for soil and water conservation programs. The committee has recommended $100 million to initiate the Rural Clean Water program. It has also recommended continuation of the Great Plains Conservation program and the Resource Conservation and Development program. These increases were offset by limiting the Agricultural Conservation program to enduring conservation practices. This program has in the past paid for both production oriented as well as conservation practices. The committee's recommendation of $85 million will maintain past years levels of funding for those activities which are of an enduring conservation benefit to the Nation. This is $15 million less than was included in the President's budget and $105 million less than was contained in the House bill.

The committee received requests to add over a billion dollars to the measure we have before us today. I understand that some of these requests will be offered as floor amendments during our consideration of the bill. This is ironic, in that I also understand that another amendment to delete 2 percent of the appropriations for nonmandatory activities will also be offered. This irony is characteristic of the consideration of the measure. The administration has on several occasions expressed its concern over the size of the bill and has indicated that it is likely to be vetoed if it is as large as the House passed version. On the other hand, many worthwhile and valuable programs have been denied funding.

I can only say that in my estimation, this is a fair and well balanced measure. The committee worked hard to assure that all the increases were only those absolutely critical to the soundness of programs of the Department of Agriculture and other agencies funded in the bill. As ranking minority member of the Budget Committee, I am satisfied that this measure reflects the intent of the congressional budget process in living within overall budgetary ceilings, while assuring that all available resources are put to the best possible use.

Mr. President, I would conclude by urging my colleagues to join in supporting this measure as we have it before us, and to resist efforts which will be made to add significant amounts of money to the bill.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. BELLMON. I yield to the Senator from North Carolina.

Mr. HELMS. Mr. President, I ask unanimous consent that George Dunlop of my staff be accorded the privilege of the floor during the consideration of the pending business and any votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, I ask unanimous consent that the committee amendments be agreed to en bloc, and that the bill as thus amended be regarded for the purpose of further amendment as original text, provided that no point of order shall be regarded to have been waived by reason of agreement to this request.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments agreed to en bloc are as follows:

On page 2, line 6, strike "$3,791,000" and insert "$4,310,000";

On page 2, line 17, strike "$2,340,530" and insert "$2,790,530";

On page 2, line 18, strike "$1,550,650" and insert "$1,844,650";

On page 2, line 22, strike "$7,721,170" and insert "$7,921,170";

On page 2, line 23, strike "$17,483,000" and insert "$18,647,000";

On page 3, line 22, strike "$22,945,000" and insert "$31,564,000";

On page 5, line 8, after "$100," insert "except that the foregoing limitation shall not apply to the acquisition of lands for the United States Biological Control Laboratory in Valbonne, France,";

On page 5, line 10, strike "$334,100,000" and insert "$337,791,000";

On page 5, line 11, strike ", of which $215,309,000 is for personnel compensation and benefits and $118,791,000 is for other expenses";

On page 6, line 9, after the colon, insert *"Provided further,* That the limitations on construction contained in this Act shall not apply to the establishment of a fruit and nut germ plasm repository at Corvallis, Oregon:";

On page 7, line 7, strike "$35,720,000" and insert "$15,000,000";

On page 8, line 10, strike "$230,817,000" and insert "$228,150,000";

On page 8, line 11, beginning with "(including" strike through and including "expenses)" in line 12;

On page 8, line 21, beginning with "That" strike through and including "further," in line 24;

On page 10, line 16, strike "$271,019,000" and insert "$271,104,000";

On page 11, line 14, strike the semicolon and insert "and";

On page 11, line 15, beginning with the semicolon, strike through and including "1961" in line 18;

On page 11, line 22, strike "$109,066,000" and insert "$113,866,000";

On page 12, line 9, strike "$16,360,000" and insert "$17,060,000";

On page 12, line 16, following the semicolon, strike through and including "expenses" in line 23, and insert in lieu thereof the following:

$37,398,000 for contracts and grants for agricultural research under the Act of August 4, 1965, as amended (7 U.S.C. 4501), of which $5,398,000 is for special research grants, $30,000,000 is for competitive research grants, and $2,000,000 is for grants in accordance with Sec. 1419 of Public Law 95–113, including administrative expenses;

On page 13, line 10, strike "$163,057,000" and insert "$179,520,000";

On page 13, line 22, strike "$176,031,000" and insert "$186,831,000";

On page 13, line 24, strike "$53,060,000" and insert "$50,560,000";

On page 13, line 25, after the semicolon, strike through and including the semicolon in line 3 on page 14;

On page 14, line 4, strike "payments for the farm safety program under section 3(d) of the Act, $1,020,000;";

On page 14, line 9, after the semicolon, strike through and including the semicolon in line 13;

On page 14, line 17, strike "$10,013,000" and insert "$10,412,000";

On page 14, line 20, strike "$270,204,000" and insert "$267,383,000";

On page 14, line 21, strike "of which not less than $75,579,000 is for Home Economics";

On page 15, line 11, strike ", of which not less than $2,029,000 is for Home Economics";

On page 16, line 19, strike "$80,137,000";

On page 17, line 22, strike ", and for administration and coordination of payments to States";

On page 18, line 1, strike "$46,502,000" and insert "$49,070,000";

On page 18, beginning with line 8, strike through and including line 12;

On page 19, line 18, strike "$227,552,000" and insert "$217,527,000";

On page 18, line 24, strike "$327,417,000" and insert "$317,392,000";

On page 19, line 24, strike "of which $63,100,000 is for personnel compensation and benefits and $264,317,000 is for other expenses";

On page 33, line 18, beginning with the comma after "$16,487,000", strike through and including "expenses" in line 20;

On page 34, line 5, strike "to remain available until expended, $12,587,000" and insert "$5,759,000";

On page 34, line 6, beginning with the comma, strike through and including "expenses" in line 7;

On page 34, line 22, strike "$169,607,000" and insert "$227,522,000";

On page 34, line 23, after the comma, strike through and including "which" in line 25, and insert "(of which $20,876,000";

On page 35, line 23, strike "including authorization of 10 new areas,";

On page 36, line 4, strike "$31,979,000" and insert "$16,797,000";

On page 36, line 4, beginning with the comma, strike through and including "expenses" in line 6;

On page 36, beginning with line 22, insert the following:

NONPOINT SOURCE POLLUTION CONTROL GRANT AGREEMENTS AND TECHNICAL ASSISTANCE

For making grants to conservation districts, State soil and water conservation agencies, and State water quality agencies for cost-sharing payments to landowners or operators for application of measures incorporating best management practices to control nonpoint source pollution for improved water quality and for technical assistance in accordance with the provisions of section 208(j) of the Federal Water Pollution Control Act of October 18, 1972, as amended (33 U.S.C. 1251, 1288) and regulations promulgated by the Secretary of Agriculture in 7 CFR 2.19 (f), (g), 7 CFR 2.62(a)(11), and 7 CFR 634–634.41, $75,000,000, to remain available until expended: *Provided,* That the Secretary of Agriculture may transfer up to 50 per centum of this amount to the appropriation "Nonpoint Source Pollution Control—Cost-Sharing" under the Agricultural Stabilization and Conservation Service head.

On page 38, line 21, strike "$190,000,000" and insert "$85,000,000";

On page 38, line 25, beginning with the comma, strike through and including "program" in line 14 on page 39, and insert in lieu thereof the following:

: *Provided further,* That such amounts shall be available for financial assistance to agricultural producers for carrying out enduring conservation and environmental enhancement measures and practices to be selected by the county committees and approved by the Secretary of Agriculture under programs provided for herein: *Provided further,* That primary emphasis of such financial assistance will be directed toward the solution of critical soil and water conservation problems and pollution abatement problems on farms and ranches, and such assistance will not be used for carrying out measures and practices that are primarily production oriented or that have little or no conservation or pollution abatement benefits

On page 41, line 8, after "channels" insert a colon and the following:

Provided further, That unexpended funds previously appropriated to liquidate outstanding obligations for the 1975 through 1978 Agricultural Conservation Programs shall be merged with the 1979 appropriation as of December 31, 1978

On page 41, beginning with line 14, strike through and including line 23, and insert in lieu thereof the following:

NONPOINT SOURCE POLLUTION CONTROL COST-SHARING

For necessary expenses for making cost-sharing payments to landowners or operators for application of measures incorporating best management practices to control nonpoint source pollution for improved water quality, in accordance with the provision of section 208(j) of the Federal Water Pollution Control Act of October 18, 1972, as amended (33 U.S.C. 1251, 1288), and regulations promulgated by the Secretary of Agriculture in 7 CFR 2.19 (f), (g); 7 CFR 2.62(a)(11), and 7 CFR 634–634.41, $25,000,000, to remain available until expended: *Provided*, That the Secretary of Agriculture may transfer up to 50 per centum of this amount to the appropriation, "Nonpoint Source Pollution Control—Grant Agreements and Technical Assistance" under the Soil Conservation Service head.

On page 42, line 20, after "in" strike through and including "1510)" in line 22 and insert in lieu thereof "section 4 of the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2103)";

On page 42, line 24, strike "$15,000,000" and insert "$17,500,000";

On page 43, line 19, strike "$2,786,300,000" and insert "$2,778,300,000";

On page 43, line 21, strike "$1,336,575,000" and insert "$1,411,575,000";

On page 44, line 3, strike "$28,000,000" and insert "$20,000,000";

On page 44, line 7, beginning with the colon, strike through and including "amended" in line 10;

On page 44, line 15, beginning with the comma, strike through and including "1981" in line 16;

On page 45, line 1, strike "$580,000,000" and insert "$569,500,000";

On page 45, line 1, strike ", to remain available until September 30, 1981";

On page 45, line 6, beginning with "That" strike through and including the comma in line 9;

On page 46, line 2, strike "to remain available until September 30, 1981";

On page 46, line 5, strike "$71,300,000" and insert "$74,275,000";

On page 46, line 21, strike "$53,645,000" and insert "$56,403,000";

On page 46, line 21, beginning with the second comma, strike through and including "Expenses" in line 23;

On page 47, line 24, after the comma, insert "not more than";

On page 47, line 25, after "which" insert "$339,400,000 is hereby appropriated and the balance";

On page 48, line 1, strike "$500,874,000 shall be";

On page 48, line 3, after the comma, insert "repayments on long-term credit sales and carryover balances; and";

On page 48, line 4, strike "and from repayments made on long-term credit sales; and";

On page 48, line 6, after "Act," insert "not more than";

On page 48, line 7, strike "$106,506,000 shall be derived" and insert "$466,500,000 is hereby appropriated and the balance to be derived by temporary financing from the Commodity Credit Corporation pending reimbursement in subsequent year or";

On page 48, line 11, beginning with the colon, strike through and including "Korea" in line 14;

On page 49, line 3, strike "$289,854,000" and insert "$295,454,000";

On page 49, line 15, strike "$15,804,000" and insert "$14,974,000";

On page 51, beginning with line 1, insert the following:

NATIONAL ALCOHOL FUELS COMMISSION

For necessary expenses of the National Alcohol Fuels Commission, $1,500,000.

On page 51, beginning with line 16, strike through and including the semicolon in line 17;

On page 51, line 18, strike "Resource Conservation and Development;";

On page 51, line 19, strike "Emergency Conservation Measures;";

On page 15, line 21, after "Service;" insert "Agricultural Conservation Program;";

On page 51, beginning with line 25, strike through and including page 52, line 11;

On page 52, line 12, strike "610" and insert "608";

On page 52, line 15, strike "611" and insert "609";

On page 52, line 19, strike "612" and insert "610";

On page 53, beginning with line 1, strike through and including line 7;

Mr. EAGLETON. Mr. President, I have just a few more words to add and then I believe the distinguished Senator from South Dakota (Mr. McGOVERN) has an amendment to offer.

I want to add my personal feelings in respect to the superb work Senator BELLMON has contributed to this bill. I have had some very fine working relationships in the Senate during my 9½ years in the body, Mr. President, but none have I treasured more than working with Senator BELLMON. Insofar as agriculture is concerned, I guess I might be considered a theoretician, maybe more bluntly a rank amateur, but as far as Senator BELLMON is concerned, he is a practicing professional. I leaned very heavily on him for his insight and knowledge into the actual day-to-day workings of our agricultural programs. It has been a relationship that I shall treasure for the rest of my life.

UP AMENDMENT NO. 1629

Mr. McGOVERN. Mr. President, on behalf of myself, Senators BURDICK, HATFIELD of Montana, CHURCH, MELCHER, WALLOP, CURTIS, ABOUREZK, and CLARK, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Dakota (Mr. McGOVERN), for himself and Mr. BURDICK, Mr. HATFIELD of Montana, Mr. CHURCH, Mr. MELCHER, Mr. WALLOP, Mr. CURTIS, Mr. ABOUREZK, and Mr. CLARK, proposes an unprinted amendment numbered 1629.

Mr. McGOVERN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 35, line 23, after the word "development" insert the following ", including authorization of 10 new areas,".

On page 36, line 4, strike out "$16,797,000" and insert in lieu thereof "$31,979,000".

Mr. McGOVERN. Mr. President, this amendment would restore funding for the resource conservation and development program to approximately the fiscal 1978 level, or more specifically to the level recommended in the other body in H.R. 13125.

I want to say first of all, Mr. President, that I realize the Subcommittee on Agriculture Appropriations under Senator EAGLETON's chairmanship, has considered this issue and rejected it. I know Senator BELLMON and others who sit on that committee have looked at this matter very thoughtfully. I appreciate that the committee's budget recommendation is actually $10 million more than recommended by the administration. But it ought to be pointed out that this amount is still $15 million less than the House has recommended, and approximately $15 million less than we appropriated for this program last year.

The administration's recommended reduction has disappointed a great many people who believe in this program, who have watched its success in rural communities across the country, and who can testify to the role R.C. & D. programs have played in improving the quality of life in their communities.

The administration was candid enough to say that the budget they submitted was meant to phase out the R.C. & D. program. Their budget was not designed as a reduction, really; it was designed to ultimately terminate the resource conservation and development program.

While I think we have to give credit to the administration's candor, the flood of constituent mail that I have received, and I am certain other Senators have received, indicates that this was not a popular recommendation or one supported where our constituents are familiar with the benefits of the program.

I can say to my colleagues in good conscience that in terms of improving our people's ability to coexist with their environment and properly utilize our land and water resources, in terms of our stewardship of resources, perhaps no other single USDA program has been as successful and as popular in rural areas as this one, which the Congress first authorized with the Food and Agriculture Act of 1962.

You may well ask, then, why does the administration propose to phase this program out of existence?

The USDA is taking this action in responsible to a document published in 1975 entitled "An Evaluation of Selected Impacts of the Resource Conservation and Development Program" prepared by the USDA's soil conservation service economics, program planning, and evaluation staff. The rationale used by USDA has been adopted by the subcommittee in its review of the program. What, then, did this report say and does the argument in the report stand up under scrutiny?

Detailed analysis of change over time in total employment, median income, and per capita income showed no statistically significant difference attributable to RC&D projects. This aspect of the study was somewhat limited by the availability of data and sensitivity of the methodology. It cannot be said that no increases in employment or income were generated in project areas, but it is clear that any such effects that may

have occurred did not have a statistically significant impact on total county employment or income levels.

It is a question, then, of economics. But what role is economics expected to play in measuring the success of the R.C. & D. program?

The purposes of the program, as defined by the USDA evaluation team are twofold. First, the R.C. & D. program is to promote the orderly development, improvement, conservation, and utilization of natural resources and thereby to provide employment and other economic opportunities to people of the project area. Second, the other principal objective of the program is to assist local leadership to utilize existing agricultural programs as well as new programs in planning and carrying out a program of natural resource development and conservation.

In other words, using employment and economic opportunities as a measure of the program's success is a secondary component of the program's primary objective. I sincerely believe that the program measures up to all other criteria.

Additionally, the committee's report on this agriculture appropriations bill says in reference to the R.C. & D. program that it has accomplished "little of national importance," yet I see no reference to the program having to have national impact. Perhaps even more importantly in addressing the economics question, the USDA evaluation team says this in their report:

The issue of program goals involves the relative status of economic growth versus resource development. If strengthening the rural economy is of paramount importance, actions that contribute substantially to that goal should receive special emphasis.

I must insert parenthetically at this point that USDA is not now emphasizing the economic growth possibilities of the program. The report goes on to say:

Alternatively, one may emphasize the need for measures that enhance the environment and maintain resource stocks whether or not any discernible economic impact results. It is suggested that more attention be given to identifying reasonable operational project goals to guide the utilization of RC&D technical and financial assistance.

USDA has not shown such a willingness to identify more reasonable operational project goals, either. In summary then, the R.C. & D. program has been placed in a "no win" situation and having not "won" is to be phased out.

I disagree very sharply with the circumstances in which the R.C. & D. program has been placed.

Mr. President, both the Department of Agriculture and the distinguished members of the Appropriations Committee have made much of the fact that the Department is currently performing an evaluation of all departmental soil and water conservation programs. They claim this evaluation will assist in making a determination of the appropriate future direction for the R.C. & D. program.

Based on the prospect that they will be able to come up with something better, hopefully in time for the next appropriations cycle, it is suggested this worthwhile and popular program be scrapped to make way for something else which is expected to come along.

I must say at this time that until the Congress has had a chance to see what the new program is, how it will work to supplant R.C. & D., and what the revised goals are, we would be premature and ill-advised to scrap this existing and ongoing program, or to even substantially reduce it below last year's level.

On the other hand, once we know what the proposed program is and are satisfied it can effectively supplant R.C. & D., only then should we phase it out.

If there is some attractive and practical and feasible alternative, I would be ready to look at that sympathetically as a replacement. However, at this time we do not know what that alternative is. Here we have an ongoing program, with strong testimony from the participants as to its effectiveness.

The question is, Why do I believe in the R.C. & D. program and support its continuation? I believe in it because I have heard from R.C. & D.'s not only from my own State but throughout the Nation as to their successes. Many of my colleagues who are familiar with the program have joined me in cosponsorship of this amendment.

Those who know of the program support it. That is important. As the USDA evaluation team writes:

The image of RC&D Councils is generally regarded as very favorable among those who know of their existence and activities. . . . Although widespread public recognition has not been achieved, the Council has been successful in building political support for the RC&D program locally and in communicating this support to the Congress.

These are not my words; they are the words of the evaluation team. I do not think we can ignore the message of local success that is coming to us. What are those successes?

In South Dakota my constituents write:

The RC&D has proved they are able to work with many different landowners, local units of government plus SCS and local sponsors. We only use RC&D projects for conservation practices that are too large and too expensive for private landowners or local units of government to finance. We have already done much with critical erosion areas. . . . Work done in local water development would alone justify the program.

In that example, the program fulfills its primary objectives.

This program is doing a good job in South Dakota in helping the farmers and ranchers to protect our most important resource, our agricultural lands. If American agriculture is to continue to produce at its present level or to increase production in the future, those programs which help the farmer to protect his land must be retained.

I believe this is an important point. This constituent is not saying R.C. & D. creates a boom economy, he is saying it is contributing to stabilizing production in his area, is stabilizing critical erosion problems and is stabilizing the rural economy in times of stress. That is an economic impact which does not show itself as a dramatic increase in economic activity or regional employment—but it is staving off a decline in both. This is in its way a significant economic impact and I do not see how USDA can overlook it in their effort to fulfill a secondary goal of the program.

There are examples of R.C. & D.'s contributing to a boom economy, however.

I received a telephone call from the Lincoln Hills R.C. & D. Council coordinator in Cannelton, Ind., who told me about the Citizens National Bank in Tell City, Ind.

In 1950, that bank had total assets of $5 million. Fourteen years later, when the Lincoln Hills R.C. & D. came into being, total assets were at the $7 million level. The bank president, Raymond Schulthise, says his bank's assets 14 years after that, in 1978, are now at $50 million and growing, and he attributes that growth to the activity of the R.C. & D. Council.

What did the R.C. & D. Council do? It certainly did not use its limited funds to alone spark economic development. The council, a group of local sponsors with a personal interest in their four-county, 100,000 population, 1-million acre rural community acted as a catalyst for community development. Mr. Schulthise says they were the only body working for furtherance of economic activity. They encouraged a local businessman to use a local product, pine trees, to build a $250,000 business in 1 year, selling treated wood poles and logs for cabins. His business dollars and success generated other successes in the region.

The R.C. & D. Council sponsored planting of 7 million trees on 10,000 acres of badly gullied farmland, areas of roadside erosion, and on abandoned farmland. This action staved off erosion of 200,000 tons of soil. By stabilizing their soil they stabilized their agricultural production by conserving their primary resource, their land.

They encouraged tourism, causing a 60-percent increase in tourist visitations.

In Springfield, Mo., the home State of the distinguished chairman of the Subcommittee on Agricultural Appropriations, the Southwest Missouri R.C. & D. Council prudently invested their limited funds in their local area and let me tell you what their projects sparked.

A $60,000 invested in a dam as part of the crane flood protection plan resulted in another $150,000 being invested by the FmHA, $40,000 in recreational development below the dam and another $40,000 in an industrial park protected from floods with their initial investment.

The local R.C. & D. knew an abandoned mine at Aurora was creating a ground water pollution problem. They found $55,000 to reclaim the mine site and that resulted in a $250,000 grant to improve sewers and streets in the area. Additional housing was added in an area that before the R.C. & D.'s bold action had started to become increasingly unfit to live in.

The Rockaway Beach bank stabilization project cost some $90,000 from the Bureau of Outdoor Recreation, but it resulted in water improvements which sparked a walnut industry in the area, accelerated technical help, and resulted

in another $70,000 grant from the Forest Service.

When train tank cars exploded in Noel, Mo., leveling three city blocks, it was the R.C. & D. Council who coordinated the disaster recovery. Soil surveys were performed, HUD housing units were brought in to house 50 families, water and sewer projects were begun, the SBA helped small businesses, and the EDA contributed to their economic recovery.

The R.C. & D. program can be a real catalyst. The examples go on and on and come in from all around the country.

Therein rests the fatal flaw in the USDA's analysis which the committee has so readily accepted. The R.C. & D. program is not, in a comparative sense, a "big budget item." The money for R.C. & D. alone does not cause an economic boom. But in the R.C. & D. council, we have a local mechanism in place to address local problems which may be remedied with local and State matching funds, USDA assistance, HUD, SBA, BOR, the Forest Service, EDA, or some other entity and its program which R.C. & D. seeks out and applies to their problem.

In this way, R.C. & D. is meeting one of its primary objectives. There is ample evidence it is meeting its other primary objective. What more can we demand of the program?

I urge my colleagues to accept my amendment, allow this program at least to go along as it has in the last few years, and when and if the USDA finds something better to replace it, then we can debate that question and that proposal on its merits.

I urge my colleagues not to vote against this program, not to vote to phase it out, not to vote to reduce it below last year's level. I hope that Members will recognize that they are doing the program a great disservice by settling on the committee's apparent compromise on this program's funding. Anything short of the fiscal year 1978 budget, some $32 million, is not really a compromise at all. It is instead a painfully crippling slash in this important program.

What the committee's recommendation really means is simply a slower death for the program than the sudden death proposed by the administration.

Mr. President, I hope that the committee will see fit to reconsider its action and accept this amendment restoring some $15 million to the program above the amount they have recommended. We are talking about a tax cut here, later on, designed to stimulate the economy. In my own judgment, it would be far better to look critically at the total size of that tax cut if its major purpose is to stimulate economic development and stimulate economic expansion, and to consider some of the alternatives that might be open to us, including this very modest amendment that I suggest here this afternoon.

Mr. EAGLETON. Mr. President, I ask unanimous consent that a staff member from Senator ALLEN of Alabama's staff, Mr. Tom Kay, have the privilege of the floor during consideration of this measure and during votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, I am opposed to adding funding above the committee's recommendation for resource conservation and development (R.C. & D.). It should be noted that this entire amount is unbudgeted. The Carter administration proposal was to provide only $6.8 million for R.C. & D. in order to complete many of the ongoing project areas without starting new ones. To this amount, the committee recommended adding $10 million for additional financial assistance to help assist ongoing R.C. & D. areas. The reason for the committee's position was explained in the report, and I ask unanimous consent that page 63 relating to R.C. & D. be printed at this point in the RECORD.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Resource conservation and development

1978 appropriation	$31,033,000
1979 budget estimate	6,797,000
House allowance	31,979,000
Committee recommendation	16,797,000

The Soil Conservation Service has general responsibility for assisting local sponsoring groups accelerate planning and development of land and water resources in multiple county areas. Projects may include such measures as flood prevention; developing water resources for recreation, wildlife, agricultural, municipal, or industrial use; conservation planning and establishment on individual land units; improving recreation facilities, including historical and scenic attractions; encouraging new industries to locate in the area and to process products of the area; improving markets for crop and livestock products; upgrading and protecting the quality of the environment; and long-range planning to coordinate public efforts in the area.

Activities include investigations and surveys to help develop programs and plans of land conservation and utilization, technical services and financial assistance to sponsors, local groups, and individuals, and making loans for resource improvements and developments in approved projects. The Farmers Home Administration administers the loan program.

The Committee does not concur in the House recommendation for 10 new area authorizations and an increase of $25,182,000 above the budget request. Additional assistance of $10 million above that requested in the budget is provided in the bill. The Resource Conservation and Development program has accomplished little that is of national priority. Furthermore, there is very little evidence, and indeed some specific departmental evaluations which cast doubt on the ability of the program to achieve significant conservation objectives as compared to areas without a similar program.

The Committee notes that the Department is currently performing an integrated evaluation of all departmental soil and water conservation programs under the direction of the Senate Committee on Agriculture, Nutrition and Forestry. This evaluation should assist in making a determination of the appropriate future direction for the Resource Conservation and Development program. Accordingly, the Committee recommends an amount sufficient to maintain the ongoing operations of existing areas, and has deleted the balance of the House increase.

For Resource Conservation and Development for fiscal year 1979, the Committee recommends an appropriation of $16,797,000. This is $14,236,000 less than was appropriated for fiscal year 1978, $10 million more than the budget request and $15,182,000 less than the amount provided in the House bill.

Mr. EAGLETON. First, the Department's own evaluations cast doubt on the ability of the program to achieve its objectives. There are two departmental studies, one done in 1971 and one in 1975, neither of which demonstrates a significant increase in economic or conservation objectives in the areas with R.C. & D. projects compared with areas that do not have them.

The Department of Agriculture acknowledged this in hearings held before the Appropriations Committees. Assistant Secretary of Agriculture Cutler testified:

We are concerned about program results, particularly in generating measurable economic impacts, in its (R.C. & D.'s) current form.

Also, he said:

We have been unable to document clearly that the program leads to increased economic development or to reductions in soil erosion from levels that would otherwise have occurred.

At first, it appeared that the administration might be proposing to phase out or eliminate the program. However, in the hearings, they clarified that it was their intent to redesign the program, and simply to reduce the general levels of assistance and new starts until a study being done jointly by the Office of the Assistant Secretary for Rural Development and Dr. Cutler—Assistant Secretary for Conservation, Research, and Education—had been completed in order to determine how to reorient the program. The study and evaluation is not expected until the fall.

In this connection, I think the Senate should recognize that the Committee on Agriculture, Nutrition, and Forestry is also conducting, through the Department and with the assistance of the General Accounting Office, a study of the R.C. & D. program. The same problem of program results caused this study to be made.

With all of this emphasis on program reorientation, the committee just could not agree with the House proposal to begin 10 new area starts, and increase the budget estimate by $25,182,000—which is what the House did and what this amendment seeks to accomplish, if it is enacted. The committee recommendation does provide for $10 million above the budget request, to fund some additional financial assistance, recognizing that there are some unmet needs in existing areas where additional money could probably be utilized.

Mr. President, I urge defeat of this amendment.

Mr. EAGLETON. Mr. President, I yield to the Senator from Delaware. How much time does the Senator need?

Mr. ROTH. I think 2 minutes.

Mr. BELLMON. I yield 2 minutes to the Senator from Delaware.

Mr. ROTH. Mr. President, I ask unanimous consent that my remarks appear immediately before Senator LUGAR offers his amendment at a later stage in consideration of this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, I yield such time as he may need to my colleague from Oklahoma.

Mr. BELLMON. I thank my friend, the Senator from Missouri.

Mr. President, as the chairman said, and I hope the Senator from South Dakota has noted, the bill contains $16.8 million for the R.C. & D. program.

The amount recommended by the committee is $10 million more than was requested in the President's budget. It is, however, $15.2 million less than passed the House of Representatives, and the level for fiscal year 1978.

I would like to make the point that we are trying to get a bill that will be signed and not be vetoed.

As ranking minority member of the Subcommittee on Agriculture, Rural Development and Related Agencies of the Senate Appropriations Committee, I recommended the $16.8 million level. I am very much aware that this reduction from the current level of operations will have an adverse effect on program operations. This amount, however, will allow existing R.C. & D. areas to continue construction activities though no new R.C. & D. areas will be authorized and no new project planning starts will be allowed.

For the past several years, it has been apparent that the funding of this program has been inadequate. The net result has unfortunately been like so many other Federal programs that got started with high hopes, but never allowed to really serve the need for which they were established. Consequently, we have a proliferation of partially funded efforts with overlapping goals and poor coordination.

The administration, in requesting a termination of this program, specifically cited this problem, and further claimed that it had no significant conservation benefits. The Soil Conservation Service's own evaluation of the program reaffirmed this point as did the General Accounting Office audit of the program. Under these circumstances, it was very difficult to justify maintenance of the program at its current level of operations.

The administration has also threatened to veto the Agriculture Appropriations bill on several occasions and identified the R.C. & D. program as being high on its list of programs to be terminated.

I appreciate the particular problem of established R.C. & D. areas which have been forced to wait on funding for projects, especially those where easements are about to expire or other matching funds will be lost unless construction is initiated. I am hopeful the additional $10 million accepted by the committee for fiscal year 1979 will cover much of the high priority projects currently awaiting funding. I think this is a concern of the Senator.

It was also our intent to force the administration to complete its comprehensive program evaluation within the next year so that the future of this program can be determined once and for all. If it is found that the purposes of the R.C. & D. program can be better served through other programs, then that is the way we should proceed. If, however, it is determined that R.C. & D.'s constitute the most effective means of assisting multicounty planning and coordination and delivery of development and conservation improvements, then it is my hope that the program be adequately supported to achieve those objectives. The goal of the committee's actions on the fiscal year 1979 budget for R.C. & D's is to keep the program alive, within the pressing budgetary constraints, until this evaluation can be completed.

If this amendment is adopted, it will merely continue the R.C. & D. program at last year's levels. This has been shown to be far from adequate to keep up with the growing backlog of projects now being planned and only defers the hard decision which must be made.

I urge the Senate to defeat this amendment.

Mr. McGOVERN. Will the Senator yield?

Mr. BELLMON. I am happy to.

Mr. McGOVERN. I have recognized what the Senator says is correct about the committee adding some $10 million above the administration request.

Is it the Senator's conviction that the committee's action will sustain the existing R.C. & D. programs?

It is $15 million below the authorized amount for fiscal year 1978.

Mr. BELLMON. Let me say to the Senator that it is our feeling that this amount of money that we put in, which is $16.7 million, continue the project areas that have already started construction and keep the program viable until the needed studies can be completed.

It will not start new program areas or new planning, but we feel we ought to go ahead and try to provide funding so the projects already under way can continue, but not go ahead and provide for more planning or new program areas until the Department finds out what it wants to do with the program.

Mr. McGOVERN. Did I hear the Senator say that it is his judgment, if this add-on I suggested here, and others that are proposed, were to be added to what the committee recommended, we stand in danger of a Presidential veto of the entire bill?

Mr. BELLMON. That is our concern.

Mr. McGOVERN. Mr. President, without in any way changing my own position on the importance of this program, I do not want to jeopardize the passage of the entire Agriculture appropriation by a veto. If this is an overriding factor in the committee's thinking, I would like to withdraw my amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Does the Senator from Illinois seek recognition?

UP AMENDMENT NO. 1630

(Purpose: To earmark funds for research on industrial uses of agricultural products)

Mr. STEVENSON. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Illinois (Mr. STEVENSON) proposes an unprinted amendment numbered 1630.

Mr. STEVENSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 5, line 11, strike out "$337,791,000" and insert in lieu thereof: "$340,791,000".

On page 5, line 24, insert after "research:" the following:

"Provided further, That of the appropriations hereunder, not less than $3,000,000 shall be available for research on industrial uses of agricultural products conducted by the Regional Research Centers:"

Mr. STEVENSON. Mr. President, my amendment would restore a portion of the funds cut from the research programs of the four USDA regional research laboratories which are located in Peoria, Ill., Wyndmoor, Pa., Albany, Calif., and New Orleans. The basic programs of these labs have been funded under the item "Industrial Uses of Farm Products."

The administration had recommended cuts in this category amounting to some $3.8 million—$1,996,000 from the lab at Peoria, $1,647,000 from the Wyndmoor, Pa., lab, and $164,000 from the lab in New Orleans. The House restored these amounts, but the Senate committee apparently agreed with the administration position and deleted them. I urge that we restore at least $3 million with the understanding that it will be allocated among the labs so as to restore the same percentage of the amounts cut from each of their industrial uses categories.

Mr. President, the rationale for cutting this research program was that much of the research could be carried on by industry. I am not familiar with the other regional research centers but I have visited the center in Peoria and I do have some understanding of the value of the research going on there. I am puzzled by the conclusion that industry will fill the void. It is certainly true that the Peoria lab has carried out much basic research that has led ultimately to industrial applications, but for a variety of reasons this kind of research is not initiated by industry. The term "industrial uses" covers a far broader range than it suggests. The Peoria center has generated fundamental knowledge of the composition and properties of natural components in grains and oilseeds. This knowledge is basic for both food and nonfood uses. It benefits the farmer, the processor, and the consumer alike.

Industrial research is carried only to the point where industry can develop commercial applications. The center does not compete with industry but does make its findings freely available through publications and patents. Thousands of visitors from science and industry come to Peoria each year, including many from other countries.

One outstanding accomplishment of the Peoria lab demonstrates the broad public interest as well as commercial and industrial value of this research—the development of a starch-derived product with unique properties for absorbing and retaining more than 1,000 times its weight in distilled water or about 500 times its weight in tap water.

It is called super slurper and it holds immense promise for agriculture, wastewater and sewage management, medical practice, and industry. Several companies are already manufacturing products based on super slurper, but no company had undertaken the basic research to develop the product. Its inventors have received several national awards, and in a recent letter to Dr. William Doane who directed the project, Dr. Wayman Spence, a medical doctor wrote:

I want to personally thank you for the tremendous contribution you and your associates have made to the field of medical care through the development of your absorption copolymers. We have just begun to tap the basic research you so generously gave to our country. I am speaking conservatively when I say that I feel this development may literally be worth the Nobel Prize someday. I am only jealous of you in that I wish I could say I had done the basic research because I think it will lead in the years ahead to great benefits for mankind in the medical field, not just in the agricultural field, which you may have originally been working with.

Mr. President, I ask unanimous consent that the letter from Dr. Spence be printed in the RECORD at the close of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. STEVENSON. Mr. President, although industry and medicine are already using super slurper, scientists at the center are working on variations that promise great benefits to agriculture and protection of the environment. Because it not only holds water but allows its uptake by plants, it has possibilities for soil amendment, seed coating, and the seeding of disturbed lands for restoration of vegetation and erosion control. And finally, research is underway to develop a super slurper that would absorb oils and other hydrocarbons. Such a product would be useful in cleaning up oil spills and in thickening gasoline, alcohols, and chemicals for safer transportation.

Mr. President, I could review several other research projects which are already shown promising results for agriculture as well as industry, such as insoluble starch xanthate for removing heavy metals from industrial effluent, encapsulated pesticides, herbicides, and fertilizers, and biodegradable plastics, which are not only a superior product for several purposes but which may reduce the consumption of petroleum based plastics. These are all "industrial uses," but they serve a wide range of public interests, not simply those of industry.

The cut in this appropriations bill will reduce the Peoria center's fundamental research program by nearly 20 percent. In my view this is a tragically shortsighted form of economy. The nation is falling behind in research and technology. That is an underlying cause of our persistent trade deficit. We cannot compete with other countries on the basis of cheap labor. We have acute problems with capital formation. In the past we have maintained our preeminence through technology. It is no longer easy, and here, in this small item in an appropriations bill, is one of the reasons. In the interest of cutting this year's budget by a few million dollars we are irreparably damaging or destroying some of the basic research that would put us ahead in the future.

Mr. President, the Senate in recent months has done a great deal of useful work on our trade deficit, the declining dollar, and the overall competitive position of the United States in the world. One of the strong conclusions that emerges from this work, much of it done through the Subcommittee on International Finance, some through the Subcommittee on Science, Technology, and Space, is that the United States for many years has been unable to compete with cheap labor. It now faces serious capital formation problems. It always has relied on a strong capacity for technological innovation, strong technology. Agriculture itself is based in the United States on technology. It has become a technology-intensive industry.

This cut is an example of what is wrong with the economy of the country. It strikes at research; it strikes at our capacity for technological innovation; and it is becoming harder in the world to maintain that capacity, as other countries make the investment in R. & D. that we are not beginning to make.

Mr. President, I could describe at some length the kind of work that is done in Peoria. That research, among other things—and I will not describe its activities at length—led to the development of the high-fructose sweeteners, which has opened up a vast new market throughout the world for corn. It is developing means of using a starch-based product to remove heavy metals from industrial effluents. It is producing means of encapsulating pesticides, herbicides, fertilizers—which I recounted earlier—and developing biodegradable plastics.

Recently, it produced a form of starch that will absorb 1,000 times its weight in water, with significant potentials in medicine and in industry, as well as in agriculture. The substance could be used to soak up oil spills.

This bill ignores these activities. It would cut the Peoria lab's fundamental research program by nearly 20 percent. In my view, this is a tragically shortsighted form of economy, and I hope, therefore, that the managers of the bill will look with favor on this amendment.

Mr. President, I should like to ask some questions of the managers about funding for research.

The funding for so-called industrial research has been cut, but in the case of the Peoria lab, $2 million has been put in for research on alcohol fuels. Alcohol fuels is another of the many subjects upon which this lab has done some very useful work. In fact, it is regarded as the leader in research on alcohol fuels.

The report of the committee says that it anticipates that a major portion of this research on alcohol fuels can be done with laboratory space, equipment, and a core of scientific expertise already available at the Northern Regional Research Center of Peoria.

I was very pleased that the committee recognized the center's expertise in this area, but I am perplexed about the meaning of the phrase "a major portion." Can the managers clarify that expression?

Is there any intention as to what proportion of this research and of the $2 million would be assigned to Peoria?

Mr. EAGLETON. If I may respond to my colleague from Illinois, although I cannot give a precise arithmetical definition of "major portion," that we had in mind. The alcohol fuels money I might add, was included at the suggestion of the Senator from Indiana (Mr. BAYH), who has taken the lead in this matter. He felt that not, all but a substantial portion of the $2 million would be done through that Northern Regional Research Center at Peoria, Ill.

Let me elaborate a little further, in order to tidy up this debate.

This account to which the Senator from Illinois is referring is not the only item on the bill on the subject of alcohol fuels. I direct the Senator's attention to page 23 of the committee report. Under "Cooperative State Research Service," we set forth $2 million to implement a competitive grant program on alcohol fuels for colleges and universities, in accordance with section 1419 of the 1977 farm bill.

Finally, to wrap it up and to show once again that the committee, through the leadership of Senator BAYH, is keenly interested in this area, I direct the attention of the Senator from Illinois to page 87 of the report. There he will find the item "National Alcohol Fuels Commission" and an appropriation of $1.5 million. This commission is to be made up of various Members of Congress and members of the public, and it will examine closely the potential for use of alcohol fuels and make policy recommendations to Congress not later than December 1979. This perhaps will be the most intense, specialized, and focused study on the question of alcohol fuels ever done in this country.

What I am trying to do is to weave together a cohesive picture, to show the Senator that we are not inattentive to this matter. Specifically with respect to Peoria, we want to retain the expertise that exists at the Peoria lab, but redirect it somewhat.

Mr. STEVENSON. I thank the Senator for that clarification.

My concern is not confined to Peoria. As chairman of the Subcommittee on Science, Technology, and Space, I am concerned with science, technology, and basic agricultural research, and I have a strong concern at the moment that basic research for agriculture may be subordinated to research on alcohol as a fuel and that the research on alcohol fuels may be narrowly defined.

Mr. EAGLETON. Will the Senator give me some illustrations as to what he would like to see encompassed under a somewhat broader definition of "alcohol fuel"?

Mr. STEVENSON. The report language indicates that some of the research will be directed toward identifying crops with high Btu content and developing harvesting techniques. I am told that identi-

fying crops is not the real problem, that scientists already know what crops have a high Btu content. But the research should be focused on low-costs, energy-efficient, conversion techniques.

Are they intended to be included within the phrase "alcohol fuels"?

Mr. EAGLETON. Will the Senator please repeat that? My attention was diverted elsewhere.

Mr. STEVENSON. I am told that the identification of high Btu crops, which is mentioned in the committee's report, is not the real problem, that scientists already know which crops and plants have a high Btu content. I am told that the research should be focused not on the identification of the plants as much as it should be on low-cost, energy-efficient conversion techniques—in other words, the extraction of the energy from the plants which are already identified.

Would the development of those techniques be within the meaning of this phrase?

Mr. EAGLETON. I think it certainly would. I believe that by the nature of this exchange, we will expand upon what the Senator is correct in pointing out—the apparently narrow, precise words on page 24 of the report.

Mr. STEVENSON. I thank the Senator again and ask also of him:

The report refers to utilization of forest products. Does the committee have any intention as to where research on forest products would be conducted and is the reference to forest products intended to exclude research on other agricultural sources of fuel?

Mr. EAGLETON. If the Senator could give me an illustration or two of what he is driving at perhaps we could agree.

Mr. STEVENSON. The report refers to research on utilization of forest products for alcohol. Other agricultural products can be used to produce alcohols. My question is twofold. Is there any intention of excluding other plants from this research?

Mr. EAGLETON. No.

Mr. STEVENSON. The second part then: Is there any intention on the part of the committee to locate that research on utilization for forest products at one lab or another?

Mr. EAGLETON. No; we did not intend to exclude other agricultural or other products related to forestry, and we did not intend to stipulate one lab or another, but we did place emphasis on Peoria.

Mr. STEVENSON. Then may I ask my good friend one more question? I understand that alcohol fuels research would produce information on hydrocarbons and chemical feedstocks. It would be unfortunate if alcohol fuels research were so narrowly construed that the research program could not include these related areas on hydrocarbons and chemical feedstocks. Is there any intention to exclude those related fields of research?

Mr. EAGLETON. No; there is no intention to exclude those related fields of research. May I say that I think I can speak for Senator BAYH in this regard. He thinks that alcohol fuel research has a bright potential in America. He wants to see it researched and tested from a wide range of possible approaches and perspectives, and I know he would fully agree, as do I now on his behalf, with the points that are well taken by the Senator from Illinois.

The PRESIDING OFFICER. The time of the Senator from Illinois has expired.

Mr. EAGLETON. I yield to the Senator from Illinois 5 minutes on my side of the amendment.

The PRESIDING OFFICER. The Senator from Illinois is recognized for 5 additional minutes.

Mr. STEVENSON. Mr. President, I thank the distinguished Senator from Missouri for the 5 minutes. I also thank him for clarifying the intent of the committee.

While the action of the committee would clearly terminate some research now loosely called research for industrial uses of farm products, it appears as a result of this colloquy that the inclusion of additional funds for alcohol fuels will pick up some of the research that is now conducted in that area and that, as the Senator indicated, not all but substantially all of his alcohol fuels research would be maintained or conducted at Peoria so as not to disband, dissipate, or waste an extremely important national resource.

With that clarification and my gratitude to the Senator——

Mr. EAGLETON. If the Senator will yield before he concludes his remarks, may I suggest this to the Senator from Illinois? This will be helpful to me. I ask that he might give us some additional views of his for inclusion in the statement of the manager's of the conference report to broaden what may have been the overly narrow definitions that he has pointed to on page 24 of the report. Then we can be precise while broadening the scope of this kind of research. I think his point is well taken.

Mr. STEVENSON. I accept that offer with enthusiasm and assume that there will be some accommodation of differences between the two bodies on industrial uses. With this colloquy and the invitation from the distinguished manager of the bill, Mr. President, I with draw the amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

EXHIBIT 1

UNIQUE PRODUCTS
FOR BETTER HEALTH

July 21, 1978.

Dr. WILLIAM DOANE,
U.S. Department of Agriculture, Northern Regional Research Center, Peoria, Ill.

DEAR DR. DOANE: I have enclosed with this letter some copies of literature explaining the new Spenco Absorption-Flakes. These have application in the ostomy care field, as well as the general incontinent field.

We are doing quite a bit of further research into the medical uses of the copolymers your department developed for absorption of fluids. I am highly optimistic that we may literally change the way medicine treats opened wounds and ulcers of the skin. I hope to present medical papers on this subject in 1979, and I will keep you posted as we make progress.

I want to personally thank you for the tremendous contribution you and your associates have made to the field of medical care through the development of your absorption copolymers. We have just begun to tap the basic research you so generously gave to our country. I am speaking conservatively, when I say that I feel this development may literally be worth the Nobel Prize someday. I am only jealous of you in that I wish I could say I had done the basic research because I think it will lead in the years ahead to great benefits for mankind in the medical field, not just in the agricultural field—which you may have originally been working with.

If I can help you in any way, please let me know. I'm looking forward to meeting you personally in the near future.

Sincerely,

WAYMAN SPENCE, MD.
President.

Mr. BENTSEN. Mr. President, I wish to make a unanimous-consent request.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. BENTSEN. Will the Senator yield for a unanimous-consent request?

Mr. DOLE. I yield to the Senator.

Mr. BENTSEN. I ask unanimous consent that a member of my staff, Mr. Marty Clayton, be accorded the privilege of the floor during consideration of the appropriations bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1631

(Purpose: To provide $3,500,000 to the Animal and Plant Health Inspection Service for the eradication of cattle scabies)

Mr. DOLE. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes unprinted amendment numbered 1631:

On page 8, lines 10 and 11, strike out "$228,150,000 and insert in lieu thereof "$231,150,000".

Mr. DOLE. Mr. President, I shall take just about 1 or 2 minutes on this amendment.

Mr. President, the amendment would provide an additional $3 million for the Animal and Plant Health Inspection Service to carry out a program for the eradication of cattle scabies.

The incidence of scabies, according to our staff research, has risen dramatically in the past 2 years and has now become a major concern of the cattle industry. Six States which had previously been free of the disease for 10 to 20 years experienced outbreaks during fiscal year 1978. There are now scabies infestations in 15 States, and direct losses could approach $60 to $80 million annually, according to some estimates, within the next year or two if the disease is left unchecked.

The cattle industry has requested Federal involvement in a full-scale eradication program. The technical expertise already exists in the Animal and Plant Health Inspection Service, which has carried out many successful animal disease eradication programs over the years. No further studies or plans are needed, as provided by the Senate bill.

Mr. President, the amendment will permit APHIS to get on with the job of eradicating scabies from the cattle population of the United States.

Mr. President, I have discussed this particular amendment. I understand it

is not supported by the committee, and I am prepared to accept a voice vote.

Then I shall have one other amendment I can dispose of just as quickly.

Mr. EAGLETON. Mr. President, both on behalf of Senator BELLMON and myself we do respectfully disagree with Senator DOLE.

Mr. President, I am opposed to this amendment and support the committee position to provide funds for study of the eradication of cattle scabies at this time.

We have been informed by the Animal and Plant Health Inspection Service that although an eradication program is possible, it would be quite difficult to obtain the full cooperation of the cattle industry. Cattle in feedlots that have scabies need to be treated by "dipping." Apparently, this causes the disruption in their normal feeding and weightgain schedule. Accordingly, APHIS expects that it would be very difficult to obtain the needed cooperation in order to execute an eradication program effectively.

If some way could be found to insure cooperation so that eradication was possible, then a program of this sort might very well make sense. But at this time, including these funds in the bill which were not asked for in the budget request is inadvisable.

I urge the defeat of this amendment.

Mr. DOLE. I yield back the remainder of my time.

Mr. EAGLETON. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kansas. (Putting the question.)

The noes appear to have it. The noes have it.

The amendment was rejected.

UP AMENDMENT NO. 1632

(Purpose: To provide a $3,000,000 for grasshopper control)

Mr. DOLE. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kansas Mr. DOLE (for himself, Mr. ZORINSKY, and Mr. DANFORTH) proposes unprinted amendment numbered 1632:

On page 8, lines 10 and 11, strike out "$228,150,000" and insert in lieu thereof "$231,150,000 of which $3,000,000 shall be for grasshopper control and other purposes,".

Mr. DOLE. Mr. President, the purpose of my amendment can be stated very simply: It is to provide $3 million to the Department of Agriculture for an expanded program of grasshopper control during the spring of 1979.

These additional funds are needed to combat a grasshopper infestation of major proportions that is now attacking nine States in the Great Plains region. Grasshopper populations that normally range from 3 to 10 per square yard, are now averaging 20 to 30 per square yard in many areas; in some cases even more than that.

Apparently the grasshoppers out in the Midwest do not know about our budget procedure and the appropriations process and they did not show up for the hearings. But they have now shown up in about 11 States throughout the Midwest, and we had a great infestation in my State and the States of Missouri, Oklahoma, Idaho, the Dakotas, Wyoming, Colorado, and Nebraska. There is a great deal of interest in this amendment.

I see the distinguished Senator from Nebraska now in the Chamber.

The full extent of crop damage has not yet been determined, but it is certain to reach the tens of millions of dollars. Damage caused by this infestation exceeds anything we have seen in recent decades, including the hopper outbreak of 1958.

More than 11 million acres of cropland are now infested principally in the States of Colorado, Iowa, Kansas, Nebraska, Oklahoma, Missouri, North Dakota, South Dakota, and Wyoming. Infested crops include alfalfa, flax, soybeans, corn, milo, and sugar beets.

Unfortunately, it is too late in the season for an expanded Federal grasshopper control program to have much effect this year. The existing program, which is operated by USDA's Animal and Plant Health Inspection Service (APHIS), involves less than 1 miliion acres of rangeland. Bv the time the program could be expanded into croplands, most of the damage would already have occurred.

Moreover, pesticides are far less effective this late in the season because the hoppers are mature, and because the leafy ground cover stops the pesticides from getting on the ground where hoppers breed.

It is too late for the Federal Government to take any further action this year. But it is not too late to provide for an expanded program next spring.

I might add that the winter wheat crop is just coming on and we can have a great impact in that area.

The Department of Agriculture predicts that we will have a major grasshopper infestation next summer unless massive control measures are undertaken next spring, soon after the hoppers begin to hatch. I might say to those Senators who have not yet experienced the grasshopper boom, they do not give any advance notice, they do not stay within any one State. They are spreading, and I would guess by next spring they will be in nearly every State.

My amendment provides an additional $3 million so that the Department of Agriculture may operate its grasshopper program not only on rangelands but also on 3 to 4 million acres of croplands where hoppers have laid their eggs.

We are not saying they have to spend the money. We hope they do not have to spend the money, but it would make that much additional money available.

An expanded program is needed next spring, because a major infestation will occur unless timely and coordinated control measures are taken. Greater involvement by the Department of Agriculture will make possible a coordinated control strategy and provide farmers and local governments with financial and technical assistance.

Greater involvement by the Department of Agriculture will mean that pesticides are used more effectively, and with more restraint.

My amendment adds $3 million, because $3 million represents the maximum Federal cost of a control program available to farmers in all affected areas. It provides enough funding for two separate treatments on 4 to 5 million acres of infested cropland.

Mr. President, I call your attention to the fact that my amendment does not require USDA to spend $3 million. It simply makes this money available on a cost-sharing basis to help farmers control the infestation early in the season with a degree of coordination and in a manner that is ecologically sound.

It makes more sense to spend a relatively small amount on preventive action now than to do nothing and wind up paying far more money on crop disaster payments next summer.

Mr. EAGLETON. Mr. President, I think Senator DOLE raises a very, very important subject matter. I realize that the grasshopper problem is a significant one which operates in nine States affecting many different crops. Among those nine States, I might add, obviously is the State of Kansas. I believe it is a problem in part of Oklahoma; it is a problem in a portion of Missouri, and perhaps in other States reflected by Senators here on the floor. The Department of Agriculture has told us that they have no way of knowing what the cropland grasshopper population will be in 1979, and further, that this year's problem was quite abnormal, being the first large grasshopper outbreak in 20 years. Of course, nothing we do in this bill could help the problem this year. We are talking about spending authority that commences October 1.

The bill before the Senate does include funds for survey work and reporting to farmers of population buildups of grasshoppers as they occur. However, there are no funds for a control program during fiscal year 1979.

One of the big problems is determining what next year's grasshopper problem will actually be. According to the Department of Agriculture, the grasshopper population is likely to return to normal, and under those circumstances, farmers can easily handle the problem. I have been advised that this depends to great extent on the weather conditions, and other factors not under our control.

But I, like this Senator from Kansas, am concerned about the need for action against the contingency that the grasshopper population does not return to normal. In such a case, consideration should be given to a program for control on croplands. I recognize that there is a potential problem here with Federal participation in routine farm control of insects, and a potential problem with agreements made over 25 years ago to discontinue cropland treatments.

Notwithstanding all of the potential problems, this is a matter that needs to be examined. Accordingly—I would like to see if the Senator from Kansas might consider this proposition—I would propose, say, an amount of $5 million in the animal and plant health inspection

service contingency fund for grasshopper control, with such funding to be available only after a program is formulated and the appropriate congressional committees are notified.

I would expect that any such program would be done on a shared-cost basis similar to the rangeland grasshopper control programs that the Department has operated. Under these programs, the States and the landowners each contribute one-third with USDA providing the remainder of the cost.

In effect, this $5 million provides for $15 million of control effort. Mr. President, I do not know if this is enough or too much. By taking this action today we provide the potential for a program, which could be implemented if the details are worked out, and if it is needed. Should additional efforts be required, once we know the extent of the problem and the outlines of a specific program solution, I would be very willing to examine possible supplementals.

Does the proposal that I have roughly outlined excite any interest on behalf of the Senator from Kansas?

Mr. DOLE. I might say I think it is exactly in accordance with my thinking and, I believe, the thinking of the distinguished Senator from Nebraska. It would be cost shared. It would apply to cropland just as the present program applies to rangeland. We hope we do not use $1 of it. We hope this is an abnormal year, and I would certainly support either that modification or however the Senator wishes, to substitute or whatever.

UP AMENDMENT NO. 1632, AS MODIFIED

Mr. President, I ask unanimous consent that the amendment be modified with the modification of the distinguished Senator from Missouri (Mr. EAGLETON).

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment, as modified, is as follows:

On page 8, line 10, strike out "$228,150,000" and insert in lieu thereof "$233,150,000".

On page 8, line 13, strike out "$3,000,000" and insert in lieu thereof "$8,000,000".

On page 8, line 15, after the word "conditions" insert ": *Provided*, That $5,000,000 of this amount shall be available for control of grasshoppers only after notification is provided to the Committees on Appropriations of the Congress;".

Mr. DANFORTH. Mr. President, I rise in support of the amendment offered by my colleague from Kansas. While I am firmly opposed to any unnecessary increases in Federal spending—as evidenced by my cosponsorship of various proposals to reduce the fat that surely exists in every Federal program—I am sensitive to those situations where there is a real need for Federal assistance. The grasshopper infestation that is sweeping throughout the Great Plains is such a case.

More than 11 million acres of cropland in Colorado, Iowa, Missouri, Kansas, Nebraska, Oklahoma, Wyoming, North Dakota, and South Dakota are now being attacked by uncommonly large swarms of grasshoppers. While no official estimates have been made yet, it is certain that the infestation will result in tens of millions of dollars worth of damage to this year's alfalfa, soybean, corn, and milo crops. Unfortunately, there is nothing that can be done to cut those losses this year. The farmer, the consumer, the Federal Government, and the taxpayer will have to suffer the consequences of the grasshopper infestation in the form of reduced yields, lower profits, higher food prices, and increased Federal disaster payments.

There is something, however, which we can do right now to help avoid what USDA believes will be a major grasshopper infestation next summer. We can make available for fiscal year 1979 an extra $3 million for a cost-sharing control program that will enable farmers and ranchers to protect 4 to 5 million acres of cropland from ravaging grasshoppers. That is a $3-million investment—a little over one/one hundredth of 1 percent of a $23-billion budget—that will save the U.S. Treasury four to five times that amount in disaster payments alone during the next fiscal year. I think those figures should speak very loudly to my colleagues who are really intent on saving the taxpayer money and at the same time maintaining the capability of the Federal Government to step in and help avert a natural disaster.

It goes against my grain to stand up and ask for more money than what the Appropriations Committee, under the guidance of my able friend, Senator EAGLETON, has seen fit to provide. I believe, however, that the modest amount that I request for the expansion of the grasshopper control program will reap large returns in the future if we only have the foresight to act now.

Mr. EAGLETON. I yield such time as the Senator from Nebraska may desire.

Mr. ZORINSKY. Mr. President, I thank my distinguished friend, the Senator from Missouri.

I strongly support the amendment offered by my colleague from Kansas, Senator DOLE, and I am pleased to be a cosponsor of it, and I hope to be a cosponsor of the modification, the amendment as modified.

The grasshopper infestation of some of our Nation's most fertile farmland reached crisis proportions this summer. My colleague from Kansas has cited grasshopper populations of 20 to 30 per square yard in many areas. Some regions of my own State of Nebraska have suffered with populations of over 50 grasshoppers per square yard.

The economic damage inflicted by these pests has been severe. In parts of Nebraska entire fields of alfalfa have been devoured by swarms of hoppers. Preliminary estimates indicate crop value loss may total as much as $17 million in the most severely affected areas of Nebraska alone. Damage to fall-seeded wheat and to late-cut alfalfa may be as much as 15 to 20 percent. Corn, milo, and other feed crops may be reduced by 8 percent in parts of Nebraska.

Drought and low prices have plaqued the farmers of America's Corn and Wheat Belts for the past several years. This year brought an additional hardship: The worst grasshopper infestation in two decades.

The grasshoppers now are in the egg-laying stage in many parts of the Great Plains, and ground cover reduces the effectiveness of available pesticides. It is too late to help these afflicted areas. The damage for this year has been done. Now we can only lessen the financial aftereffects with USDA crop disaster payments and low-interest loans. That process is beginning. The Secretary of Agriculture recently announced that producers in five Nebraska counties are eligible for Farmers' Home Administration emergency loans because of damage to their crops by grasshoppers.

More importantly we can prevent the recurrence of this disaster, multiplied tenfold next spring. The USDA estimates that 4 to 5 million acres of croplands, in addition to the usual breeding grounds in range areas, will be infested with grasshopper eggs this spring. An expanded Federal cost-sharing program for both range and cropland is the logical antidote. The Animal and Plant Health Inspection Service of the USDA has the necessary facilities. It has the statutory authority. APHIS needs only the funding we now can supply to avert another farm disaster next year.

The amendment Senator DOLE and I offer together with the modified amendment, would give APHIS adequate funding to accomplish this goal. The amendment would make available $5 million to combat the grasshopper emergency on a cost-sharing basis. Two-thirds of the cost would be borne by the Federal Government and the States, one third by the individual rancher or farmer. The expanded program will allow APHIS to treat not only rangeland as has been the practice since the 1930's, but also critical areas of cropland.

Under normal circumstances such action would be unnecessary. But we are faced this year with an extraordinary crisis; 2 years of drought have increased the hazard of grasshoppers. The more potent and residual pesticides used in the past are no longer available to our farmers. The Environmental Protection Agency has prohibited their use, which can be hazardous to the environment and to human health.

The EPA restrictions have tied our hands. The most cost-effective and sure remedy is unavailable. We must pursue the only other responsible course. A repetition of this summer's grasshopper onslaught is unacceptable. To prevent future crop damage and resulting high disaster payments, a coordinated, cost-share, spraying program must be funded now.

I thank the Senator from Missouri for the time allotted me.

Mr. DOLE. I ask unanimous consent that the name of the distinguished Senator from Nebraska (Mr. ZORINSKY) be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, I am prepared to yield back the remainder of my time on the amendment.

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER. All remaining time having been yielded back, the question is on agreeing to the amendment of the Senator from Kansas, as modified.

The amendment, as modified, was agreed to.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, I yield to the Senator from Rhode Island for a unanimous-consent request.

Mr. HELMS. Mr. President, I ask unanimous consent that Mrs. Cora Peterson and Mr. Peter Harris of my staff be accorded the privilege of the floor for the duration of this debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1633

(Purpose: To provide funds for carrying out animal health and disease research programs authorized by sections 1433 and 1434 of the Food and Agriculture Act of 1977)

Mr. MELCHER. Mr. President, I have an amendment at the desk. I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Montana (Mr. MELCHER) for himself, Mrs. ALLEN, Mr. CLARK, Mr. HODGES, Mr. HANSEN, Mr. MCGOVERN, Mr. WALLOP, Mr. PAUL G. HATFIELD, Mr. HATCH, Mr. ZORINSKY, Mr. CURTIS, Mr. NELSON, Mr. GOLDWATER, Mr. STONE, Mr. STAFFORD, Mr. BENTSEN, Mr. TOWER, Mr. CHURCH, Mr. MCCLURE, Mr. LEAHY, Mr. DECONCINI, Mr. EASTLAND, Mr. WILLIAMS, Mr. BIDEN, Mr. GRAVEL, Mr. MOYNIHAN, Mr. LAXALT, and Mr. DOMENICI proposes an unprinted amendment numbered 1633.

Mr. MELCHER. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 12, line 23, strike out "$37,398,000" and insert "$57,398,000".

On page 13, after the semicolon in line 3, insert the following: "$15,000,000 for the support of animal health and disease research programs authorized by section 1433 of Public Law 95–113; $5,000,000 for the support of research on specific national or regional animal health or disease problems authorized by section 1434 of Public Law 95–113;".

Mr. MELCHER. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BELLMON. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. MELCHER. I am delighted.

Mr. BELLMON. I ask unanimous consent that Michael Shorr of Senator JAVITS' staff have floor privileges during the debate and votes on this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MELCHER. Mr. President, almost a score of years ago it became apparent that the total of our health research could be better utilized if the facilities and the opportunities available at veterinary colleges and agricultural experiment stations would have adequate funding for animal research in their veterinary research laboratories. In a variety of ways Congress has funded the broad field of health research—through the National Institutes of Health, the Animal Research Service, the Animal and Plant Health Inspection Service, and other methods. We have spent billions of dollars in this process. It is difficult to measure cost-effectiveness in basic health research. Our quest continues and we have consistently assigned high priority for this work.

The types of research that are involved embrace the whole broad spectrum: from basic research in chemistry, biology, virology, bacteriology, study of molds, funguses, and insects, experimentation—humanely—using laboratory animals, and the collection of statistics to discover facts in epidemiology. The United States has assumed world leadership in medicine because of this research coupled with modern engineering, thorough understanding, and application of physics. All of this has been American ingenuity intertwining of knowledge to prevent, cure or ease diseases. It has not always been that way. European and British Isles knowledge and research in medicine for decades overshadowed American capabilities.

But that work in the old or new countries has had notable breakthroughs in our understanding and application of medicine where a combination of animal and human medicine were addressed in the proper relationsnip of the various species of animals, including man, that populate our planet. The long line of discoveries of disease control—cure or prevention—where medical findings made through animal research, then applied to the human species, reads like a litany of marvelous accomplishments. Pasteur's development of a vaccine for rabies; Jenner's use of cowpox virus to immunize people against smallpox; pioneer work by Bruce and Bangs leading to the identification of Brucella as the cause of brucellosis in both animals and man; the brilliant findings of Budd, Gaffky, and Salmon to identify salmonella organisms as the cause of several diseases in animal and man; Kilborne's discovery that the contagious spread of the dreaded Texas fever of cattle was by a tick vector opened the scientific eyes of the world that the transmission of malaria and yellow fever was by mosquitoes; all of these developments have dramatically intertwined the knowledge and advancement of medicine of animals and man.

But these are only a few of the legendary medical breakthroughs that have made modern medicine what it is today. The findings that I briefly described could be documented with hundreds of additional examples where the knowledge and understanding of one species of animals regarding disease has helped to understand disease in other species. The patient work of medical research continues in thousands of laboratories which depend upon the ingeniousness and thoroughness of the scientist's work for successful results.

Each of us could list a dozen or more disease problems that we are anxious to see alleviated. Despite the marvelous accomplishments of the past, we are humbled when we think of the yet unsolved riddles of cure or prevention of: cancer, in its various forms; arthritis; diabetes; muscular dystrophy; nutritional deficiencies; and scores of others demand our attention.

Throughout recorded history, man has grappled with disease. One can assume that the common cold, defined by Webster as "a bodily disorder, popularly associated with chilling" was first inflicted upon Adam and Eve soon after they were dispossessed unclothed from the Garden of Eden; at least, all of their descendants—including the present occupants of Earth—are afflicted with the susceptibility to nasal discharge, sneezing and depression so loosely described as "a cold."

Our nomenclature of diseases often points to the ancient recognition and description of a particular ailment. Consider "influenza." This term correctly describes a disease that is acute, highly contagious, and is caused by a number of different viruses causing various serious diseases. But the word itself, "influenza," is derived from Medieval Latin when the scientific world believed that epidemics were due to the influence of the stars.

Veterinary medicine has its oddities in nomenclature of diseases, too. "Distemper," the title of specific respiratory diseases in dogs and cats, is also commonly used in referring to the respiratory diseases in horses and other species. Yet all have different causative agents and there are different characteristics and pathologies of the diseases in different species. The word itself is used to indicate "bad humor" which, in turn, traces back to ancient times when the Greeks identified any disfunction of the body due to disease as a change in fluids or "humors" of the body, such as the changes in blood or lymph within the body. A respiratory debilitating contagious disease often fatal, of cattle is graphically described as "shipping fever."

I have mentioned these few respiratory diseases to draw your attention to a few respiratory diseases of animals and man that are highly contagious and difficult to cure. An old saw relates of a doctor advising his patient, who was afflicted with a bad cold, to go out in the wet snow to get thoroughly wet and tired so he would develop pneumonia, which the doctor assured him he could cure. It reminds us that the specific cure or prevention of colds still escapes us. For humans we have had some success in developing immunizations against several strains of flu as is also the case with successful immunization of several species of animals to prevent distemper.

When and if we have a better understanding of any of these particular respiratory diseases—in any of these species—we shall be better able to treat respiratory diseases in the other species. It should be obvious that a breakthrough on man or on animals in just this one limited field will likely benefit other species.

The basis of this amendment to implement for the first time the Animal Health Research Act is a 50/50 cost-sharing to augment and enhance medical research in facilities that are now underfunded.

We have carefully documented that prior to both times that Congress has overwhelmingly passed Animal Health Research Act and authorized $46 million per year on a 50–50 Federal-State cost sharing as a modest sum to carry out its purpose.

Our amendment seeks only $20 million for the first year of implementation of the program. You will naturally be concerned during this period of budgetary restraints as to whether this money is really needed. You may ask, "Why are not we doing enough through programs already funded in the bill before us?"

The proper answer to that question is that animal research work accomplished through those two groups, Animal Research Service, Animal and Plant Health Inspection Service, which is principally done at Beltsville, Ames, and other U.S. Department of Agriculture facilities, should not be discounted nor criticized. But their work, as well as the work of other medical researchers, has been greatly expanded and enhanced with work that is done at non-Federal institutions throughout the various States.

If my memory is correct, pioneer work on swine erysipelas control occurred many decades ago at an agricultural experiment station in North Dakota. Hadleigh Marsh, at the Veterinary Research Laboratory at Montana State University, patiently but brilliantly delved into the diseases of sheep; swine cholera work at Ames, Iowa, at my alma mater, Iowa State University; dairy work at the University of Minnesota including Fenstermacher's work with a number of the diseases affecting both domestic and wild animals; Cornell and dog diseases; I could go on, but the proof of the value of these efforts and the contribution made at these non-Federal institutions is neither debated nor questioned among medical researchers.

You could logically ask, "How do they get their money?" My answer is that for 15 years States have had an increasingly difficult time funding not only their educational but also their research facilities. That has resulted in facilities and opportunities being underused and understaffed. To correct this is the purpose of the bill, with matching funds for selected research programs approved in a federally coordinated manner.

We will do better in our entire effort on animal research and we will get more mileage—in fact, twice as much—out of every Federal buck invested.

The argument may be offered during times of inflation, high unemployment, weakness of the dollar and Federal deficits, "Why consider this amount?" Read the letters of knowledgeable advocates of the bill.

The National Milk Producers Federation, in asking for approval of this amendment, states:

> Several herd health problems need attention * * * none cause greater loss than mastitis * * *. The annual loss runs into the hundreds of millions of dollars, resulting in increased production costs and higher consumer prices.

The National Cattlemen's Association points out that:

> The largest economic losses in cattle production today are due to disease and animal health related disorders * * * these losses clearly deny the consumer a larger supply of beef.

These kinds of losses are draining us annually and add up to the $4 billion annual loss in poultry and livestock that is so economically damaging to the producers and, at the same time, is also factored into the consumers' costs and directly contributory to inflation.

But there is even more than these values benefiting medical research and in its broadest scope benefiting human health.

And it goes beyond the economic values I have just briefly described to a question of humaneness.

The Animal Health Research Act specifically calls for improved "methods of controlling the births of predators and other animals." It is because of this that I direct attention to the letter of August 8 that all of you have received from the Society for Animal Protective Legislation, subscribed to by the Defenders of Wildlife, the Fund for Animals, Friends of the Earth, and the Washington Humane Society. We have it almost within our grasp to provide for humane methods of controlling predators, decreasing the population of unwanted and uncared-for dogs and cats. All of us who have dealt with either problem can attest to the need for humane improvements of control. We who are in sheep producing areas know that work in coyote depradation is imperative. Stray dogs and cats in almost all communities are a drain financially, a public health problem and humane control through lower birth rates is in my judgment a necessary and prime goal.

Then, there is the vast field of nutrition. In many respects I believe we have made better progress in the nutrition of animals than we have in the nutrition of humans.

Veterinarians trained in medicine have for the past several decades found that unless they understood nutrition and applied sound nutrition they had left out a big part of good application of medicine. It is a vital part in health research in both animals and man. Because of the shorter life spans, animal nutrition has more easily lent itself to experimentation, with dramatic results to prove nutritional values.

Pasteur began his life's work of brilliant accomplishments by providing the French winemakers a knowledge of the fermentation process that would result in a controlled safe method for the great winemaking industry of France. It was an economic problem. Pasteur moved on from the knowledge of fermentation and an understanding of yeasts and molds in relationship to temperature to apply to other problems connected with man's health. His genius led Pasteur into contributions of useful knowledge on numerous diseases of animals and man.

The path I ask you to follow today in approval of the amendment is a continuation of the same path Pasteur trod, to further advancement of knowledge through a basic research; to permit the use of the knowledge in basic research to be applied to animal and man; and to lead us to the control of diseases in animals and man that are not now controlled; to lead us to apply to the understanding of nutrition and its relationship to animals and man in preventing or curing diseases; to provide us with the understanding of better application of methods to advance the public health.

It is a path you shall not want to shirk.

I can assure you that you are following that path in a responsible and conscientious way with approval of this amendment. I can assure you that there is no doubt—none in the least—that the vote you cast—funding the Animal Health Research Act—will be a vote that benefits all mankind through the work that willl be accomplished.

Mr. President, I reserve the remainder of my time.

● Mr. DOLE. Mr. President, I rise in support of the amendment offered by the distinguished Senator from Montana (Mr. MELCHER).

This amendment would add $20 million to fund the animal health research program—a cost sharing program in which the Department of Agriculture and States or producer groups equally share the cost of research projects carried out in the Nation's veterinary colleges and veterinary research laboratories.

A $20 million Federal investment will raise $40 million in research funds to combat diseases which annually cost the livestock and poultry industry $4 billion in losses. These staggering losses are passed on to the Nation's consumers in the form of higher prices for meat and meat products.

Research on animal diseases is costly because experimental animals cannot be salvaged. However, such research is absolutely necessary if our population is to be adequately nourished, and if we are to maintain world leadership in food production research. Twenty million dollars is a cheap enough price to pay for better means of treating and preventing livestock and poultry diseases.●

The PRESIDING OFFICER. The Senator from Missouri.

Mr. EAGLETON. Mr. President, as I understand it, this amendment would add $15 million under a $25 million authorization in section 1433 of last year's farm bill for allocation to veterinary schools on a formula basis, and would be used for animal health and disease research, publishing results, administration and equipment and supply purchase. In addition, the amendment would provide $5 million out of a $15 million authorization in last year's farm bill for research on specific national or regional animal health or disease problems.

Mr. President, I am opposed to this amendment. No budget request was submitted for this, and the authorization was passed less than 1 year ago. Before a large sum of this nature is added for a new grant program, I would like the op-

portunity to have a detailed hearing with the Department and find out more about what they are doing in the area of animal health and determine in detail to what extent this authorization is needed.

I can tell you this: States are currently using part of their Hatch Act grant funds—about $5 million in 1978—for research on this same subject area. They could redirect more of the Hatch Act funding into this area if there are problems that are not currently being addressed. In addition to the grant funds, the Department of Agriculture has a very large in-house research program on animal health and diseases, amounting to some $42 million. This involves work on brucellosis, respiratory and intestinal diseases of newborn animals, reproductive diseases, and various exotic diseases.

The Department of Agriculture advised the subcommittee that the $47 million already being spent on research in this area is sufficient to address the priority needs, and there is no compelling reason, no significant reason, to add more funds.

During the course of consideration of this bill, many attempts have been and will be made to add various items.

Let me make a few remarks on that. Mr. President, this will now be the first amendment that we will take to a rollcall vote. I hope my colleagues will bear with me for the purpose of my repeating just an item or two from my introductory remarks.

We had before our committee, Mr. President, letters or requests from 85 Members of the Senate seeking amendments to this bill. Not one Senator wrote us a letter asking us to cut anything. Eighty-five wrote to us to add more money. Some of these, I might add, Mr. President, are some of the most tightfisted conservative spenders in this august body. Their message was add, add, add. If you add up the 85 letters, it is some $900 million above the budget that they want.

This is the first vote. Senator MELCHER will say, "Well, I only want $20 million, leave the $880 million to some others."

Senator HATHAWAY is back there. He has one for $105 million. I am looking around. I do not think Senator TALMADGE is going to hit us with a heavy one. I hope not.

But I think probably, in this body, we could have 200 million dollars' worth of amendments. We might as well realize it and face up to it on this first one: If we "open 'er up" for the $20 million Melcher amendment, it will be difficult to exclude others. We will then have HATHAWAY'S $105 million amendment and then some other ones. A total of some $900 million is what my colleagues asked be added to this bill over the budget.

You know, there are a lot of nice things in those 85 letters. I am for most of them. Who is not for protecting animals?

Senator MELCHER went beyond the veterinarian field and health research on animals. He refers to the Washington, D.C. Animal Protective Society. They wrote us a tearjerking letter: Please put in $20 million—I guess they said—in the U.S. Department of Agriculture bill to protect wayward pets in the District of Columbia.

Mr. MELCHER. Will the Senator yield?

Mr. EAGLETON. I shall be through in a minute.

Is that not a dandy endorsement to have in the Senate Agriculture appropriations bill?

I think this is the amendment that will test whether we are going to be able to hold this budget. I can assure you of this, Mr. President, and this is no idle threat: If we take the Melcher $20 million and the Hathaway $105 million, we shall be right at the House level which is $400 million over the budget. I am certain that once we go to conference, Mr. WHITTEN over there will want us to take some of their higher figures in return for their taking some of our higher figures. If this bill gets up over $400 million over the budget, it is veto-certain; not veto-risk, not veto-if, not veto-maybe; it is veto-certain.

In fact, I might even recommend, myself, that the President veto it. There is just no earthly reason to take the lid off on this bill. We have been extremely generous insofar as research is concerned.

Hatch Act formula grant funds are made available for the kind of research that Senator MELCHER desires and already, $42 million is being spent on research in the area within the Agricultural Research Service.

I say that this is the time to draw the line. We may as well just test the will of the body.

I am pleased to yield to my colleague from Montana.

Mr. MELCHER. May I ask the distinguished subcommittee chairman if the figure I read on page 32 out of the report is correct, $178,520,000 recommended to be appropriated under Hatch Act funds?

Mr. EAGLETON. Let me get the report. What is the page?

Mr. MELCHER. Page 32, Cooperative State Research Services.

Mr. EAGLETON. The Hatch Act is a part of that. The Hatch Act grants involve $113,866,000 of that amount.

Mr. MELCHER. I thank the distinguished chairman. I note that $5 million out of the Hatch Act funds identified for cooperative State programs for research on animals is the most compelling argument that could be presented tonight on this Senate floor for the need to fund the animal health research program. We are asking for $20 million to be cost shared, 50–50. Mileage out of the Federal dollar, mind you; twice as much mileage.

I might point out to the Members of this body that if it is a question of the hearings to be held on an authorization act of an authorizing committee, to be held by a subcommittee of the Appropriations Committee, they should take the initiative. We took the initiative in the Agriculture Committees, both the House and the Senate, on two occasions. We passed this act authorizing $46 million, in almost the exact same language as presently in the law, in 1974. President Ford thought it should not be voted. He vetoed it with his first veto. He called me up to tell me he was sorry, John, he had to veto my bill. He thought it was a new program.

Animal health research is not a new program.

Mr. EAGLETON. May I interrupt the Senator?

Mr. MELCHER. Yes.

Mr. EAGLETON. I am notified that the Senator from Montana has used up his time. I do not care to constrain him. How much time does he desire of my time?

Mr. MELCHER. Five minutes.

Mr. EAGLETON. I yield 5 minutes to the Senator.

Mr. MELCHER. I thank the Senator very much.

Animal health research is as old as land-grant colleges are. But doing it on this basis is new and it is bad—50–50 matching. The States are not utilizing their laboratory facilities, they are not utilizing all the proper personnel they should have at those laboratories doing veterinary research nor at our veterinary colleges. This is a cost-effective, money-saving, positive way of getting some research done in a sensible way. That is the only thing new about it: It is more sensible, more practical, and more conscious of taxpayers' dollars.

Yes, the Washington Humane Society supports this amendment, as do all of the other animal protective groups that I know of. They are specifically interested not in $20 million; they are interested in $1 million out of the $20 million to be directed at research in controlling birth in predators and other animals. And their interest, and we should applaud them for it, because I welcome their support in controlling coyotes, is a humane way of controlling coyotes and a humane way of controlling stray cats and dogs. I do not care which mayor or which county you talk to, they have a problem that cost them untold millions of dollars throughout this country because of too many stray cats and dogs. It is a very sensible approach.

My distinguished friend from Missouri says that his priority needs will be met by other funds in this bill for this type of research. We have been through that for at least 7 years that I know of, pointing out that the priority needs are not quite met. The dairy people, the National Cattlemen's Association, the poultry people continually come to us and tell us of their problems and what they need in research, and it is not being met.

They offer, sometimes, industry money as part of the matching funds for the States, and the States would like to accept it, and they do. It is a common practice. Accepting that industry money for this type of research enhances medical research for animals and the part it plays in human health is also enhanced. They can do it through the States and this is the very mechanism to provide that.

Mr. President, I think on all cases, on all criteria, this amendment is not only meritorious, it is absolutely essential. I not only ask for a majority of votes on this amendment; it is good enough to get every vote, including every vote of

the Appropriations Committee, of which a great number are cosponsors of this amendment, and I hope before the night is out we have every vote.

Mr. EAGLETON. Mr. President, I will be brief and we will go to the vote.

It is not a good enough amendment to get my vote. Perhaps others, but certainly not mine.

Just to summarize, this is the one that may well determine, Mr. President, whether we are prudent spenders or budget busters. The time for posturing is over. The time for gamesmanship is over.

This amendment may set the trend of the others yet to come: $105 million, $50 million, or others. It will test whether we mean what we say when we go back home and announce that we are for controlling inflation, bringing the budget down, and are fiscally prudent.

We all give those pious speeches to the Kiwanis Club and the Rotary Club. The question is whether we will then come back and vote for every Senator's pet project, which on this bill total $900 million.

Over $5 million of Hatch Act funds. The States can spend Hatch money any way they want. They just decided it was only worth $5 million in their priorities.

That is not my fault. That is not Senator MELCHER's fault. That is, the States themselves on the local level do not relate this to being a top priority need.

There is another $42 million in the Agricultural Research Service budget, Mr. President, for animal health research, respiratory, intestinal diseases of newborn animals, reproduction, as well as various other exotic diseases of animals.

This budget is not lacking in funds in the areas to which the Senator addressed his attention.

Mr. MELCHER. The Senator has been so kind, would he yield just for one question?

Mr. EAGLETON. One question, and then we will vote.

Mr. MELCHER. Is the distinguished Senator prepared to offer an amendment this evening, during the course of the consideration of this bill, as a substitute for the 2 percent Roth amendment that was anticipated and would, indeed, strip this of $100 million?

Mr. EAGLETON. We have a couple of concoctions hidden within secreted briefcases to offer as possible substitutes for a 2 percent reduction amendment.

We have a lot of secret packages here that I am not even permitted to divulge to the CIA.

Mr. MELCHER. I thank the Senator and compliment him on being prepared for the uncertainties of guiding an appropriation bill through this process.

Mr. EAGLETON. But we will offer no amendment to cut the Melcher amendment, or the Hathaway amendment. Once we vote, we lock those in.

Senator BELLMON and I will have to do a lot of razzle-dazzle and cut some other programs we have already put in this bill, including all these that other Senators are interested in.

Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time has expired. The question is on agreeing to UP amendment No. 1633 offered by the Senator from Montana. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Delaware (Mr. BIDEN), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Hawaii (Mr. INOUYE), and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY), would vote yea.

Mr. STEVENS. I announce that the Senator from New York (Mr. JAVITS), the Senator from Nevada (Mr. LAXALT), the Senator from Delaware (Mr. ROTH), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

The result was announced—yeas 68, nays 23, as follows:

[Rollcall Vote No. 305 Leg.]

YEAS—68

Allen	Hansen	Morgan
Anderson	Hart	Moynihan
Baker	Haskell	Nelson
Bartlett	Hatch	Nunn
Bayh	Hatfield, Mark O.	Packwood
Bentsen	Hatfield, Paul G.	Percy
Brooke	Hathaway	Riegle
Bumpers	Heinz	Sarbanes
Burdick	Hodges	Schmitt
Cannon	Hollings	Schweiker
Case	Jackson	Sparkman
Church	Johnston	Stafford
Clark	Leahy	Stevens
Cranston	Long	Stevenson
Culver	Magnuson	Stone
Curtis	Mathias	Talmadge
DeConcini	Matsunaga	Thurmond
Dole	McClure	Tower
Domenici	McGovern	Weicker
Durkin	McIntyre	Williams
Eastland	Melcher	Young
Ford	Metzenbaum	Zorinsky
Goldwater		
Gravel		

NAYS—23

Bellmon	Garn	Muskie
Byrd, Harry F., Jr.	Glenn	Pearson
Byrd, Robert C.	Griffin	Pell
Chafee	Hayakawa	Proxmire
Chiles	Helms	Randolph
Danforth	Huddleston	Ribicoff
Eagleton	Kennedy	Sasser
	Lugar	Scott

NOT VOTING—9

Abourezk	Inouye	Roth
Biden	Javits	Stennis
Humphrey	Laxalt	Wallop

So Mr. MELCHER's amendment (No. UP 1633) was agreed to.

Mr. MELCHER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. EAGLETON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the chair.

The PRESIDING OFFICER (Mr. ZORINSKY). The Senator from West Virginia is recognized.

Mr. ROBERT C. BYRD. Mr. President, will the Chair recognize one of the two Senators there and have them yield to me?

The PRESIDING OFFICER. The Senator from North Carolina is recognized.

AMENDMENT NO. 3439

(Purpose: To provide $200,000 to fund a National Academy of Science study to review the cotton dust standards promulgated by the Occupational Health and Safety Administration)

Mr. MORGAN. Mr. President, I call up amendment No. 3439 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. MORGAN) for himself, Mrs. ALLEN, and Mr. HELMS, proposes an amendment numbered 3439.

Mr. MORGAN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 5, line 11, strike out "$337,791,000" and insert in lieu thereof "$337,991,000".

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. MORGAN. I yield to the majority leader.

The PRESIDING OFFICER. Will Senators please take their seats or retire to the cloakroom. The Senate is not in order. The Senate will be in order.

The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the time I consume not be charged against the Senator whose amendment is up.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I take the floor to ascertain the number of amendments that remain to be called up on this bill. Five amendments have been disposed of thus far with one rollcall vote. Will Senators please indicate if they have amendments. Mr. CURTIS, Mr. WEICKER, Mr. BELLMON, Mr. STEVENS, Mr. LUGAR. That is five. Mr. PELL, six; Mr. HATHAWAY, seven. Mr. MORGAN had one pending. Mr. LEAHY has one.

Mr. LEAHY. Mine can be dispensed with if I have about 3 or 4 minutes to speak on the matter.

Mr. ROBERT C. BYRD. All right. Mr. LEAHY has an amendment. That is eight.

Mr. PELL. Mine can be done in a 5-minute time limitation as far as I am concerned.

Mr. ROBERT C. BYRD. Let us see. I say to the Senator from Kentucky that the Senator from Rhode Island indicates he would be willing to proceed with a 10-minute time limitation on his amendment.

Mr. PELL. I had not yet had a chance to check with the Senator from Kentucky.

Mr. ROBERT C. BYRD. Check right now.

Mr. FORD. What is his amendment?

Mr. ROBERT C. BYRD. While the Senators are conferring in view of the fact we have nine amendments pending, now may I get a reading of how many Senators expect to ask for rollcall votes on their amendments.

Five rollcall votes.

Mr. FORD. May I ask the majority leader a question?

Mr. ROBERT C. BYRD. Yes.

Mr. FORD. How much time limit do we have on it?

Mr. ROBERT C. BYRD. Thirty minutes each equally divided.

Mr. FORD. Thirty minutes.

It is surprising how many amendments we get where we only have 15 minutes to a side. I understand the distinguished Senator from Rhode Island and what he is doing for his colleague because his colleague had endorsed other bills that would put the tobacco industry out of business. That is very, very important to us.

Mr. President, I ask unanimous consent that no time limit be given to the amendment by the distinguished Senator from Rhode Island.

Mr. ROBERT C. BYRD. I hope the Senator will not press that because I would be constrained to object. I see others who would, so I will not have to. I would not want to break the order.

Mr. FORD. Mr. President, let the Senator object to it then, and I understand why he is objecting, and if it is necessary, but I see other Senators here fighting for the life for their States, and I think that is just as important to Kentucky as d2 lands is to Alaska, and I know that there has been a lot of flipping and flopping around on the floor as to who is going to introduce this amendment. It all gets back on the so-called bootlegging bill and that will come up one of these days before long, too. If that is the way to play the game, I want you to know I am here ready to play it.

Mr. ROBERT C. BYRD. So there will not be a reduction on time on that amendment, Mr. President, I think we should have another rollcall tonight, and then if we could have someone immediately after that, or before we go out, lay down amendment so that in the morning we would have an amendment before the Senate on which we could start.

The Senator from North Carolina has an amendment now which he says—do I understand the Senator to say this probably will not require a rollcall vote?

The Senator from Maine is going to call up an amendment that will require a rollcall vote.

Mr. HATHAWAY. Yes, the Senator is correct.

Mr. STEVENS. What time are we coming in?

Mr. ROBERT C. BYRD. Nine o'clock tomorrow morning.

Who would lay down an amendment tonight for action in the morning?

Mr. STEVENS. I will call mine up.

Mr. ROBERT C. BYRD. Very well.

There will be one more rollcall vote tonight. I thank the Senator from North Carolina.

Mr. FORD. Only one more. Point of information to the majority leader, only one more vote tonight?

Mr. ROBERT C. BYRD. One more rollcall vote tonight.

Mr. FORD. That would be on what amendment?

Mr. ROBERT C. BYRD. That would be on what?

Mr. FORD. Senator MORGAN's amendment?

Mr. ROBERT C. BYRD. Mr. HATHAWAY's if Mr. MORGAN does not ask for rollcall vote on his.

Mr. FORD. Would the leader advise the junior Senator from Kentucky how many times the amendment to the second degree can be filed to the amendment by the distinguished Senator from Rhode Island?

Mr. ROBERT C. BYRD. It depends on how much of his amendment is affected by the second degree amendment. It will leave room for another change, depending what the status is.

Mr. FORD. I say to the distinguished majority leader it could be several amendments and a long period of time consumed as it relates to the amendment by the distinguished Senator from Rhode Island. That is 30 minutes.

Mr. ROBERT C. BYRD. I am in no position to answer the question.

Mr. FORD. It could be if it is parliamentarily correct.

Mr. ROBERT C. BYRD. It is possible.

Mr. STEVENS. Let us take 5 minutes on mine.

Mr. FORD. It is possible depending on the circumstances of which I am acquainted in connection with it.

Mr. GRAVEL. May I advise the distinguished Senator?

Mr. ROBERT C. BYRD. May we proceed?

The PRESIDING OFFICER. The Senator from North Carolina seeks the floor.

Mr. MORGAN. My amendment would add only $200,000 to the budget for fiscal year 1979. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate is not in order. Senators, please refrain from conversation and give attention to the Senator from North Carolina, who has the floor.

The Senator from North Carolina.

Mr. MORGAN. Mr. President, today I offer an amendment to H.R. 13125, the agriculture, rural development, and related agencies appropriations bill for fiscal year 1979. My amendment would increase the appropriations for the Agricultural Research Service by $200,000 for fiscal year 1979.

The purpose of this increase would be to fund a study, to be conducted by the National Academy of Sciences, which would make determinations as to whether the record made in connection with the cotton dust standard promulgated by the Occupational Safety and Health Administration on June 23, 1978 (43 Federal Register 27350) establishes conclusively that the standards are the most appropriate means of assuring safe and healthful workplaces for cotton industry employees and are technologically and economically feasible.

In this amendment, I anticipate that the National Academy of Sciences will attempt to establish conclusively, first, that byssinosis can definitely be diagnosed; second, that it is possible to identify the incidence and prevalence of byssinosis or other respiratory diseases that are caused by exposure to cotton dust as opposed to other agents; third, that the incidence of respiratory disease is greater in each sector concerned by the standard as promulgated by OSHA and the standards are both technologically and economically feasible; fourth, that the standards as promulgated are cost-effective means of assuring safe and healthful workplaces for cotton industry employees; fifth, that the state of the art in pulmonary function testing is sufficiently developed to ascertain whether a 5-percent daily change in pulmonary function, as measured by industrial screening procedures specified by OSHA, is abnormal or evidence of a significant health problem; sixth, that it is possible to accurately measure a 5-percent change in pulmonary function using industrial screening procedures as depicted by the training requirements of the standards; seventh, that the number of medical and health professionals with skills in pulmonary function testing is sufficient to allow industrywide compliance with the standards' medical surveillance provisions; eighth, that a questionnaire typically used by the medical profession (such as the questionnaire required by the standards) is appropriate for industrial screening applications which may be administered by nonmedical personnel; and ninth, that the state of the art in dust measurement is sufficiently developed to permit accurate measurement of worker exposure to lint-free respirable dust.

Mr. President, the cotton dust standard promulgated by OSHA has great importance for thousands of workers in my home State, North Carolina, and for industry and workers over much of the Nation. The study which shall be conducted by the National Academy of Sciences will determine with independence and scientific integrity if the standard promulgated by OSHA serves the interests of these workers and the Nation.

Some of my colleagues will no doubt think that OSHA has prepared the standard it reached in June with independence and scientific integrity. We know that OSHA received over 500,000 pages of testimony and supporting documents. If some of my colleagues believe that to be the case, I simply say that OSHA is not at dispute here, the purpose of this amendment is to have another body assess what OSHA has done.

There are plenty of precedents for the action I bring today. The Congress has insisted many times in the past that the National Academy of Sciences review the action of another agency. In fact, there is $5 million in the bill before the Senate today to have the Academy review standards that are being promulgated by the Environmental Protection Agency.

Mr. President, I have had discussions with officials of the National Academy of Sciences concerning the capacity of this institution to perform such a study in a brief period of time. I have had assurances from the Academy that it can conduct such an evaluation.

In closing, I would like to stress again that the health and safety of the workers of the State of North Carolina are of utmost importance to me and the standards set by OSHA are of utmost importance to those workers. Also, I

would like to stress that this amendment is in no way designed to provide an opportunity for delay in the implementation of standards promulgated by OSHA. The workers of the Nation deserve to know, from an impartial body, that the standards are scientifically correct and that if implemented they can be reasonably enforced.

Mr. President, I yield to the Senator from Georgia.

Mr. TALMADGE. Mr. President, I appreciate the distinguished Senator from North Carolina yielding to me.

Mr. President, as chairman of the Committee on Agriculture, Nutrition and Forestry, I fully support the amendment offered by the Senator from North Carolina.

This amendment would appropriate funds for an intensive study by the National Academy of Sciences with respect to cotton dust standards which were set forth by the Occupational Safety and Health Administration in June.

It will be the purpose of this study to untangle a bureaucratic regulatory mess which has confused the American textile industry and Government officials alike.

The problem is this: We are confronted here with another example of Federal regulators rushing in to lay down standards and requirements before all the facts are clearly established, and before the impact of the new regulations upon the affected industry have been taken into account.

With respect to the cotton dust standards, what we have are stringent regulations based upon arbitrary standards that not even various departments and agencies of the Federal Government can agree on.

Because these standards are arbitrary and because there is so much disagreement about them—in Government and in industry—it is imperative that we have a study such as that proposed today to arrive at and sort out the facts and to resolve this controversy in the best interests of everyone concerned.

For decades, cotton production, processing, and marketing have been the heart of the agricultural economy in many of the Southern and Western States.

I can personally attest to the importance of the cotton industry in my own State of Georgia. It is not only of great economic importance to many Georgia farmers, it also is vital to the jobs and the security of tens of thousands of Georgians who earn their living by working in the cotton textile and related industries.

Ever since I have served on the Agriculture Committee, Congress has consistently supported the cotton industry through the enactment of various pieces of legislation designed to maintain production and to develop and promote new uses for cotton, domestically and on the export market.

Despite this, however, the cotton industry is struggling for survival and farmers and workers in the industry are severely threatened.

Cotton consumption has declined by a third over the past 10 years alone. Competition with synthetic fibers has made segments of the cotton industry only marginally profitable.

Textile manufacturers in my own State, for example, already are experimenting with fabric blends that would contain even more polyester, and less cotton.

If our Government persists in pursuing policies which have the dual effect of forcing textile manufacturers to use less and less cotton and make enormous capital outlays to meet unwarranted or arbitrary Federal regulatory requirements, we will be turning over our domestic textile market to the foreign manufacturer.

And, when I talk about turning our domestic market for a vital American industry like textiles and apparels over to foreigners, I should add: What there is left of it, what already has not been turned over to low-wage imports.

What we are talking about, Mr. President, are American jobs. I am talking about jobs that the United States has been exporting in the textile and apparel industries by allowing imports from abroad to flood the domestic market at a time when the American industry is having to knuckle under the Federal regulatory requirements which cost billions of dollars.

As my colleagues know, there has been considerable controversy surrounding the OSHA regulations that are intended to establish firm cotton dust standards in mills.

These regulations would require workers to wear a facemask in areas where the presence of cotton dust is found to be above certain levels.

I have here to show the Senate the kind of mask, specified by OSHA, that workers would have to wear at their work station.

It is designed to act as a filter and keep cotton dust out of the worker's nostrils. I have put one of these masks on—and while I do not know how good a job it does in keeping out cotton dust—I do know it does a pretty good job of keeping out air.

After wearing the mask for only a few minutes, labored breathing is required and I can only imagine what the situation would be like in a full 8-hour day.

At any rate, I am hopeful that safe and feasible alternatives to resolving the cotton dust problem can be found. That is the purpose of the amendment of the Senator from North Carolina.

Also, I understand that the Secretary of Agriculture has called a meeting for next week to permit representatives of the industries involved to discuss all aspects of this difficult matter, including the far-reaching effects and foreseeable results of OSHA's standards and requirements.

The health of American workers must be protected in any industry wherever a threat is found.

But, in order to do so we must first arrive at a better understanding of the problem so remedies can be devised that are both environmentally effective and economically realistic.

In short, we need better information about the cotton dust problem. We need more information on what is the best way to attack this problem.

We do not yet have this information. That is what this amendment would seek to find. I strongly urge its adoption by the Senate.

One of the problems, of course, we have in the textile industry is breathing cotton dust creates what is known as the brown lung disease, byssinosis.

Unfortunately OSHA has approached the problem with a mask that looks like this. I ask that all Senators look at it. Now, I have several on my desk. If you will come over here, I will be happy to give you one of them and ask you to put it on as I am putting it on at the present time and it has not only the capacity of cutting out cotton dust but it also has the capacity of cutting out oxygen. And we think that is an overkill. So what we are asking the committee to do and I hope the committee will agree to it is ask the National Academy of Science to study this problem so we can come up with a remedy to remedy the problem that we are confronted with in the textile industry of breathing cotton dust that creates what is known as brown lung disease and at the same time do it in a reasonable manner that will not asphyxiate the people who work in the textile industry.

And the textile industry is one of the great important industries in our country. It is under dire problems——

The PRESIDING OFFICER (Mr. HART). Will the Senator suspend until we have order in the Senate. The Senator has a right to be heard. There is no order in the Senate. Senators take their seats or retire to the cloakroom.

Mr. TALMADGE. It is undergoing problems at the present time because we have imports from foreign countries that do not have OSHA, that do not have a minimum wage, do not have health regulations, and do not have any of the things that we maintain here in the United States. I hope the distinguished managers of the bill will agree to this amendment. It addresses itself to serious problems with minimum cost and I think it is desirable that we do so.

Mr. MORGAN. I reserve the remainder of my time.

Mr. EAGLETON. Mr. President, the inhalation of cotton dust does create a serious health problem and there are varying approaches on how best to cope with this dilemma. I know the Senator from Georgia (Mr. TALMADGE) and the Senator from North Carolina (Mr. MORGAN) do not take lightly the respiratory illnesses that can be engendered by the constant inhalation of cotton dust. We do not know how to cope with it, what kind of safety standards are needed, et cetera. That and a lot of other things. Perhaps we will know more if we had a study of the kind that is contemplated by my two colleagues. So on behalf of myself and Senator BELLMON, who is briefly away from the Chamber, we are willing to accept the amendment of the Senator from North Carolina.

The PRESIDING OFFICER. Do Senators yield back their time?

Mr. MORGAN. I yield back the remainder of my time.

Mr. EAGLETON. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back the question

is on the amendment of the Senator from North Carolina.

The amendment was agreed to.

Mr. TALMADGE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. EAGLETON. Mr. President, the first order of business tomorrow is going to be the Hathaway amendment. I ask for the yeas and nays on the Hathaway amendment.

The PRESIDING OFFICER. That would require unanimous consent.

Mr. EAGLETON. I ask unanimous consent that we can garner the yeas and nays on the Hathaway amendment when he calls up the amendment tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS and Mr. EAGLETON addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. EAGLETON. Mr. President, this debate will not take long. This will be the last rollcall vote tonight.

Mr. STEVENS. I shall ask for the yeas and nays, and I ask that the time be limited to 5 minutes to each side.

The PRESIDING OFFICER. Will the Senator submit his amendment?

UP AMENDMENT NO. 1634

(Purpose: To delete $1.6 million from office of Secretary and departmental administration)

Mr. STEVENS. Mr. President, I have an amendment at the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes unprinted amendment numbered 1634.

Mr. STEVENS. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 6, strike "$4,310,000" and insert in lieu thereof "$3,791,000".

On page 2, lines 16 and 17 strike out "for Public Participation, "$220,000;".

On page 2, line 17, strike "2,790,530" and insert in lieu thereof "2,340,530".

On page 2, line 18, strike "$1,844,650" and insert in lieu thereof "$1,550,650".

On page 2, line 22 strike "$7,921,170" and insert in lieu thereof "$7,721,170".

On page 2, line 23 strike "$18,647,000" and insert in lieu thereof "$17,483,000".

Mr. STEVENS. Mr. President, I ask for rollcall vote on this amendment. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS. Mr. President, I ask that the time be limited to 5 minutes on each side.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, this is a very simple amendment.

It was brought to my attention because I am a member of the Governmental Affairs Committee. We had a reorganization submitted to us. It was estimated that it would cost $276,000 for fiscal 1979 if the plan was approved.

This amendment would delete $1,683,000 that the committee has allowed for the Office of the Secretary and for Department administration.

This amendment would approve the amount that was approved by the House of Representatives but delete the Senate add-ons.

The amount that has been requested for the reorganization that we were told would cost $276,000 has been covered by a budget request of $5.2 million in this year's budget.

The Office of Assistant Secretary in the Department of Agriculture has increased their staffing by 55 percent in 18 months, a 55-percent increase despite the reorganization. This would result in a 12½-percent reduction in the staff and as I say it would come down to the House level. It would leave a 43-percent increase in staffing allowance for this area of the Department of Agriculture.

Mr. President, this amendment would delete $1,683,000 from the committee allowance for the Office of the Secretary and for Departmental Administration. My amendment would reduce the Senate figures to those allowed by the House. Even with these reductions, the net increase for the Office of the Secretary and Departmental Administration would be 25 percent over the comparable allowance for the current fiscal year.

Last year the Secretary of Agriculture presented a reorganization proposal to the Committee on Governmental Affairs. The Senate report on the reorganization proposal (95–598) provided the estimate of an additional cost of $276,000 for fiscal 1979 if the plan were approved. Well, we approved the proposal and were rewarded with a budget request of $5.2 million over last year's appropriation for these two activities.

Mr. President, as noted in the House report, the staff of the Offices of Assistant Secretaries within the Department of Agriculture has increased by 55 percent in the last 18 months—a 55-percent increase in an administration committed to streamlining the Federal bureaucracy. The reduction of $219,000 my amendment seeks in this area would only result in a 12.5-percent reduction in this staff, leaving an increase of 43 percent which is a far higher rate of growth than any other agency that I know of.

I, personally, view this extraordinary increase in executive staff as an attempt by the Secretary of Agriculture to establish his own executive corps within the Department. This is a concept which many of us find disturbing in the President's proposed civil service reform package, and I believe that the recent actions by the Department of Agriculture in this area lend credence to our fears that such action could lead to further politicize Federal agencies.

The Senate committee also saw fit to establish a new office of public participation at a cost of $200,000. There is no House allowance for this office and my amendment would delete this new layer of bureaucracy. From the numbers of farmers who were in Washington earlier this year, it appears to me that there is little justification for a program to encourage more public participation in the operation of the Department.

This amendment would delete the Senate increase of $200,000 providing the House allowance of $7,721,170 which should be more than sufficient for the Department to responsibly fulfill the requirements placed on this office by Congress and general public for information relating to departmental programs.

Last, I would propose returning to the House allowance of $1,550,650 for the Office of Equal Opportunity within the Department.

Mr. President, the Senate committee allowance currently provides for an increase in the office of the Secretary and departmental administration of 35.7 percent—more than a one-third increase within the space of 1 year. No matter what the worth of any one program, it is exceedingly difficult to justify such an increase—and when this increase is just for administration I find it unconscionable. As I stated earlier, adoption of my amendment will still provide the department with more than a 25-percent increase in funds available for administration.

I would urge my colleagues to act favorably on this amendment.

Again I point out this is a rifle and not a shotgun. This is a deserving decrease in the requests of the Department because we were told it would cost only $276,000 and now the budget request is for $5.2 million to do the same thing.

I yield back the remainder of my time.

Mr. EAGLETON. Mr. President, indeed this is a rifle, not a shotgun. This is a single bullet designed to emasculate the Secretary of Agriculture, from a bureaucratic point of view, that is, and that is clearly what Senator STEVENS has in mind. This cuts his personal staff operation by $1.6 million and takes the matter out of the scope of conference. So I am very much opposed to this amendment.

We considered this matter very carefully in committee. We held a special hearing that covered this matter.

We heard from the Secretary of Agriculture that these cuts represented a 12-percent reduction in the Office of the Assistant Secretaries, and a 25-percent reduction in certain functions of the Office of Government and Public Affairs. That is what is at stake in this amendment.

As the Secretary pointed out to us, the Agriculture Department runs 250 separate programs, employs 83,000 full-time employees, and spends over $20 billion in total, annually. We are going to add to their budget tonight and tomorrow.

The Secretary of Agriculture has traditionally maintained one of the smallest policy staffs in the executive

branch. That is who Senator STEVENS is taking a rifle shot at—the policy advisers to the Secretary of Agriculture.

Mr. CURTIS. What is wrong with that?

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. EAGLETON. No, I only have 5 minutes. You not only want to sock it to Bergland, but to use up my 5 minutes.

Mr. CURTIS. Good.

Mr. EAGLETON. This will cut out close advisors to the Secretary on basic agricultural policy. It would severely hamper him.

Mr. CURTIS. I like this amendment.

Mr. EAGLETON. So I think the amendment should be rejected. Nothing would do more to hamper the effectiveness of the Secretary of Agriculture than this amendment of the Senator from Alaska.

Mr. STEVENS. Mr. President, I ask for 30 seconds of my time back, to read from the House report.

The PRESIDING OFFICER. Without objection, the Senator from Alaska is recognized.

Mr. STEVENS. It reads as follows:

During the last 18 months, the personal staff employed by the various Assistant Secretaries has increased by 55 percent. From the committee's observation, there may be too many people between the Secretary and those in the agencies who are experienced in the Department's programs. These Assistant Secretaries should look to the expertise and experience available in the agencies and staff bureaus for much of the advice they need. Consequently, the Committee recommends a reduction of $219,000 in the funding requested for the Offices of the Assistant Secretaries, which leaves $1,511,335 available for those purposes. The Committee will expect the Department to give attention to, and expedite enforcement of existing law regarding transfer of funds and personnel.

Consequently, the House committees cut this money out, and I do not think it should be put back in.

I yield back the remainder of my time.

Mr. EAGLETON. I yield back the remainder of my time.

The PRESIDING OFFICER. All remaining time having been yielded back, the question is on agreeing to the amendment of the Senator from Alaska. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Delaware (Mr. BIDEN), the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Mississippi (Mr. STENNIS), the Senator from Mississippi (Mr. EASTLAND), the Senator from Hawaii (Mr. INOUYE), and the Senator from Illinois (Mr. STEVENSON) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY), would vote "nay."

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Michigan (Mr. GRIFFIN), the Senator from New York (Mr. JAVITS), the Senator from Nevada (Mr. LAXALT), the Senator from Kansas (Mr. PEARSON), the Senator from Wyoming (Mr. WALLOP), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

The result was announced—yeas 35, nays 51, as follows:

[Rollcall Vote No. 306 Leg.]

YEAS—35

Allen	DeConcini	Proxmire
Baker	Dole	Randolph
Bartlett	Domenici	Ribicoff
Bentsen	Garn	Roth
Brooke	Hansen	Schmitt
Byrd, Harry F., Jr.	Hatch	Schweiker
	Hayakawa	Scott
Cannon	Heinz	Stafford
Case	Helms	Stevens
Chafee	Lugar	Stone
Curtis	Mathias	Thurmond
Danforth	McClure	Tower

NAYS—51

Anderson	Hatfield, Mark O.	Metzenbaum
Bayh		Morgan
Bellmon	Hatfield, Paul G.	Moynihan
Bumpers		Muskie
Burdick	Hathaway	Nelson
Byrd, Robert C.	Hodges	Nunn
Chiles	Hollings	Packwood
Church	Huddleston	Pell
Clark	Jackson	Percy
Cranston	Johnston	Riegle
Culver	Kennedy	Sarbanes
Durkin	Leahy	Sasser
Eagleton	Long	Sparkman
Ford	Magnuson	Talmadge
Glenn	Matsunaga	Williams
Gravel	McGovern	Young
Hart	McIntyre	Zorinsky
Haskell	Melcher	

NOT VOTING—14

Abourezk	Humphrey	Stennis
Biden	Inouye	Stevenson
Eastland	Javits	Wallop
Goldwater	Laxalt	Weicker
Griffin	Pearson	

So Mr. STEVENS' amendment (UP No. 1634) was rejected.

Mr. EAGLETON. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DURKIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER FOR HATHAWAY AMENDMENT TO BE PENDING BUSINESS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the amendment by Mr. HATHAWAY be the pending question on tomorrow as soon as we resume consideration of this bill.

The PRESIDING OFFICER (Mr. SPARKMAN). Without objection, it is so ordered.

RANGE CATERPILLAR CONTROL

Mr. SCHMITT. Mr. President, I would like to commend my colleagues on the Appropriations Committee for the excellent work they have done on this legislation. Obviously, there are amendments yet to be offered. I would particularly like to express my support for the increase in funds for range caterpillar control and the work done by my colleague from New Mexico, Mr. DOMENICI, in achieving that increase.

The range caterpillar poses a severe threat to agriculture in New Mexico and is spreading into Colorado, Oklahoma, and Texas. Losses this year in New Mexico alone are estimated to exceed $3 million.

Last year, a 5-year research program on long-term control of range caterpillars was established. The ultimate solution to this problem can come only from this kind of extensive research. In the meantime, however, it is essential to contain the spread of this pest to the extent possible with current methods, not only to restrict economic losses, but to facilitate long-term control programs that, of course, will be in part dependent on the area infested.

This year in New Mexico, the State Agriculture Department was forced to obtain emergency State funds for a spraying program because Federal funds were insufficient to meet the Federal share of a control program. Under normal procedure, the ranchers, the State and the Federal Government each pay one-third of the cost for control on State and private land. The Federal Government pays full cost for caterpillar control on Federal land.

I might add also that if you only control one part of the land and not on others, you have not done anything very worthwhile. The pest will spread very quickly.

Cost for the control program is $1.65 per acre. New Mexican acreage requiring control of range caterpillars this year approached 1½ million. Total Federal funds required were $1,033,750, of which only $350,000 was received out of an appropriation of $500,000 for fiscal year 1978. That, in itself, is some indication of the administrative cost of doing business.

Further spread of this pest into neighboring States is anticipated and monetary requirements for control will naturally increase. The Senate's addition of an appropriation of $1 million for range caterpillar control to the original $506,000 allocated by the House is crucial if we are to avoid extensive agricultural losses and give the research effort a chance to find a more permanent solution.

At a time when other insects such as the grasshopper and fire ant are devastating crops in Kansas, Nebraska, Missouri, Colorado, and the Dakotas, we simply cannot afford the spread of another destructive insect.

If this problem should continue into 1980, I hope that the Congress will continue control funding until adequate long-term solutions can be reached. I will continue to support this control program, Mr. President, and I hope my distinguished colleagues will do the same.

Once again, I thank them for their support in the committee.

Mr. BELLMON. Mr. President, I thank the distinguished Senator from New Mexico for his comments in support of the program on range caterpillars. The committee provided $1½ million for this purpose. This is three times last year's level; we are aware of this threat and attempting to respond in an effective way. I am not sure how fast the research efforts or control efforts can be accelerated, but we want to do all we can to be sure that this pest does not spread through the region.

The fact is that range caterpillars are spreading. They are now a multistate problem and the time to try to eradicate the pest or at least learn how to control it effectively, is before it spreads any further.

I want the Senator from New Mexico to know we are aware of the importance of this threat and the danger. I can give him my word that we will do all we can to make certain that whatever resources are necessary to bring about effective control will be provided.

Mr. SCHMITT. That is a very excellent word to have. I know my distinguished colleague (Mr. DOMENICI) is also very appreciative of this and will have further remarks. He has been one of the leaders in assuring that adequate control measures were enforced while we try to find out if they can, in fact, be eradicated. I am not an expert in this field of research, but I will say there is considerable interest in a number of techniques, not the least of them being the irradiated sterile male approach, which looks like it may be as effective here as it is on the screw worm.

Mr. EAGLETON. Mr. President, the committee has given some attention to this matter—perhaps not as much as the Senator from New Mexico would like, but it is a beginning and we do appreciate the insight the Senator from New Mexico has brought to this subject matter.

Mr. SCHMITT. I would say this year's effort is as much as the committee could hope to expect. Now, with a good solid control program started, and with its continuation in the successful research program within a few years, maybe even within 5 years, this particular pest will no longer be of significance to the Congress and, more specifically, no longer of significance to the ranchers that have to deal with it.

Mr. CRANSTON. Mr. President, I am pleased to note in the Senate report on H.R. 13125, the fiscal year 1979 Agriculture appropriations bill, that the Senate Appropriations Committee has directed the Department of Agriculture to continue to operate the Shafter Research Station in California in 1979 using funds provided for the Agricultural Research Service.

The Acala cotton seed breeding program conducted at Shafter is an essential agricultural program in the State. In fact, the program is mandated by California State law. For more than 50 years, California cotton farmers have successfully produced Acala cotton derived from seed developed at the Shafter station. California Acala cotton enjoys strong demand and premium prices in the international markets as well as the domestic textile markets and has been the source of millions of dollars in extra income to the cottongrowers in my State. More specifically, the success of the program is reflected in the fact that the growers have contributed over $4 million during the past 10 years. These producer contributions have accounted for a large amount of the cost of Shafter station operations over the years.

The Senate report states that the committee expects the Department of Agriculture to continue to operate the Shafter Research Station for 1 more year after which the State of California would take over. It is my understanding, however, that Secretary Bergland has given his assurances that the Department will continue to operate the research facility indefinitely, and that the Department will continue financing the Acala cotton seed breeding program until such time as the growers—not the State of California—can assume the full cost themselves. The California Planting Cotton Seed Distributors are willing to make such monetary contributions. However, it may take a little time to make the appropriate changes in the State of California's one variety cotton districts law. Thus, the Department will need to fund the Shafter research program fully in fiscal year 1979 and perhaps beyond. This is my understanding of the situation. I would like to ask the floor manager of the bill if this is also his current understanding, the report language aside.

Mr. EAGLETON. I thank the Senator from California for his comments. Secretary Bergland has indicated that such an agreement exists—that the Federal Government would continue to fund the research activities at Shafter, Calif., until such time as the growers can assume the total cost and California State law has been amended, even if it takes longer than 1 year. It is the committee's intent to be consistent with the Department's agreement.

Mr. CRANSTON. I thank the floor manager for this clarification. I am pleased to be assured that this is the case.

ROUTINE MORNING BUSINESS

(Routine morning business transacted and additional statements submitted are as follows:)

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Marks, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

ENROLLED BILLS SIGNED

At 9:34 a.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the Speaker has signed the following enrolled bills:

S. 2424. An act to amend the Act incorporating the American Legion so as to redefine eligibility for membership therein; and

S. 2821. An act to authorize appropriations for certain insular areas of the United States, and for other purposes.

The enrolled bills were subsequently signed by the President pro tempore (Mr. EASTLAND).

At 2:19 p.m., a message from the House of Representatives delivered by Mr. Berry, announced that the House disagrees to the amendments of the Senate to H.R. 13467, an act making supplemental appropriations for the fiscal year ending September 30, 1978, and for other purposes; agrees to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. MAHON, Mr. WHITTEN, Mr. BOLAND, Mr. FLOOD, Mr. STEED, Mr. SHIPLEY, Mr. SLACK, Mr. MCFALL, Mr. LONG of Maryland, Mr. YATES, Mr. MCKAY, Mr. CEDERBERG, Mr. MICHEL, Mr. CONTE, Mr. MCDADE, and Mr. ANDREWS of North Dakota were appointed managers of the conference on the part of the House.

At 3:59 p.m., a message from the House of Representatives delivered by Mr. Hackney, one of its reading clerks, announced that the House agrees to the report of the conference on the disagreeing votes of the two Houses on the amendment of the Senate to H.R. 2777, an act to provide for consumers a further means of minimizing the impact of inflation and economic depression by narrowing the price spread between costs to the producer and the consumer of needed goods, services, facilities, and commodities through the development and funding of specialized credit sources for, and technical assistance to, self-help, not-for-profit cooperatives, and for other purposes.

The message also announced that the House disagrees to the amendments of the Senate to H.R. 12927, an Act making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1979, and for other purposes; agrees to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. MCKAY, Mr. SIKES, Mr. MURTHA, Mr. STEED, Mr. FLYNT, Mr. LONG of Maryland, Mr. MAHON, Mr. MCEWEN, Mr. REGULA, and Mr. CEDERBERG were appointed managers of the conference on the part of the House.

ENROLLED BILL SIGNED

The message further announced that the Speaker has signed the following enrolled bill:

H.R. 10787. An act to authorize appropriations for activities and programs carried out by the Secretary of the Interior through the Bureau of Land Management.

The enrolled bills was subsequently signed by the President pro tempore (Mr. EASTLAND).

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, August 9, 1978, he presented to the President of the United States the following enrolled bills:

S. 2424. An act to amend the Act incorporating the American Legion so as to redefine eligibility for membership therein; and

S. 2821. An act to authorize appropriations for certain insular areas of the United States, and for other purposes.

COMMUNICATIONS

The PRESIDING OFFICER laid before the Senate the following communications, together with accompanying re-

ports, documents, and papers, which were referred as indicated:

EC–4119. A communication from the Deputy Assistant Secretary of Defense (Installations and Housing), reporting, pursuant to law, on 4 construction projects to be undertaken by the Air National Guard; to the Committee on Armed Services.

EC–4120. A communication from the Assistant Secretary of Defense, reporting, pursuant to law, on contract award dates for the period July 15, 1978 through October 15, 1978; to the Committee on Armed Services.

EC–4121. A communication from the Director, Office of Legislative Affairs, Department of the Navy, reporting, pursuant to law, on the intention of the Navy to donate certain surplus property to the Admiral Nimitz Center, Fredericksburg, Texas, a historical museum which is an instrumentality of the State of Texas; to the Committee on Armed Services.

EC–4122. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Lack of Authority Hampers Attempts to Increase Cosmetic Safety," August 8, 1978; to the Committee on Governmental Affairs.

EC–4123. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "An Overview of Benefit-Cost Analysis for Water Resources Projects—Improvements Still Needed," August 7, 1978; to the Committee on Governmental Affairs.

EC–4124. A communication from the Chairman, Council of the District of Columbia, transmitting, pursuant to law, an act adopted by the Council on June 27, 1978, which would provide for the licensing by the District of Columbia of the business of selling, issuing or delivering checks, drafts and money orders as a service or for a fee or other consideration in the District of Columbia, and for other purposes (Act 2–241); to the Committee on Governmental Affairs.

EC–4125. A communication from the Chairman, Council of the District of Columbia, transmitting, pursuant to law, an act adopted by the Council on July 11, 1978, which would provide that federally assisted housing make payments in lieu of real property taxes (Act 2–243); to the Committee on Governmental Affairs.

EC–4126. A communication from the Chairman, Council of the District of Columbia, transmitting, pursuant to law, an act adopted by the Council on June 27, 1978, which would eliminate harassment and unfair practices in consumer lay-away plans, and for other purposes (Act 2–242); to the Committee on Governmental Affairs.

EC–4127. A communication from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, orders in the cases of aliens who have been found admissible to the United States under the Immigration and Nationality Act; to the Committee on the Judiciary.

PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions and memorials, which were referred as indicated:

POM–771. A joint resolution from a citizen relating to a constitutional amendment dealing with income taxes; to the Committee on the Judiciary.

POM–772. A resolution adopted by the American Library Association, relating to Extension of the ERA; to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. LEAHY, from the Committee on Appropriations, with amendments:

H.R. 13468. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1979, and for other purposes (Rept. 95–1076).

By Mr. GLENN, from the Committee on Governmental Affairs, without amendment:

S. 2543. A bill to amend title 39 of the United States Code to provide better enforcement procedures for preventing fraudulent solicitations through the mails (Rept. No. 95–1077).

By Mr. RIBICOFF, from the Committee on Governmental Affairs, with an amendment:

S. 991. A bill to establish a Department of Education, and for other purposes (together with additional views) (Rept. No. 95–1078).

By Mr. BAYH, from the Select Committee on Intelligence, with amendments:

S. 2236. A bill to effect certain reorganization of the Federal Government to strengthen Federal programs and policies for combating international and domestic terrorism (together with minority and additional views) (Rept. No. 95–1079).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary:

James Dickson Phillips, Jr., of North Carolina, to be U.S. Circuit Judge for the Fourth Circuit.

Harry E. Claiborne, of Nevada, to be U.S. District Judge for the District of Nevada.

Thomas A. Wiseman, Jr., of Tennessee, to be U.S. District Judge for the Middle District of Tennessee.

Norma Levy Shapiro, of Pennsylvania, to be U.S. District Judge for the Eastern District of Pennsylvania.

By Mr. EASTLAND, from the Committee on the Judiciary:

Sidney I. Lezak, of Oregon, to be U.S. Attorney for the District of Oregon.

Edward R. Korman, of New York, to be U.S. Attorney for the Eastern District of New York.

(The two above nominations to be U.S. attorneys were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committed of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. WALLOP:

S. 3388. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income payments made under certain Federal and State cost-sharing programs; to the Committee on Finance.

By Mr. MUSKIE (for himself, Mr. HATHAWAY, Mr. MOYNIHAN, Mr. DOMENICI, Mr. KENNEDY, and Mr. RIBICOFF):

S. 3389. A bill to amend title II of the Public Works Employment Act of 1976; to the Committee on Environment and Public Works.

By Mr. RIEGLE:

S. 3390. A bill for the relief of Sonia Maria Alvarado Marin and Maria Virginia Alvarado Marin; to the Committee on the Judiciary.

S. 3391. A bill for the relief of Rosa Del Carmen Sanchez Brenes and Alvaro Sanchez Brenes; to the Committee on the Judiciary.

By Mr. MATSUNAGA (for himself, Mr. ANDERSON, Mr. DOMENICI, Mr. DURKIN, Mr. MARK O. HATFIELD, and Mr. MATHIAS):

S. 3392. A bill to provide for an accelerated program of research, development, and demonstration of solar photovoltaic energy technologies leading to early competitive commercial applicability of such technologies to be carried out by the Department of Energy, with the support of the National Aeronautics and Space Administration, the National Bureau of Standards, the General Services Administration, and other Federal agencies; to the Committee on Energy and Natural Resources.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. WALLOP:

S. 3388. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income payments made under certain Federal and State cost-sharing programs; to the Committee on Finance.

Mr. WALLOP. Mr. President, today I am introducing legislation that will clarify the tax treatment of cost-share payments in two innovative and important environmental programs. This bill will change the tax treatment of cost-share payments given to landowners under the Clean Water Act of 1977 and the rural abandoned mines program. The Internal Revenue Service has notified the Soil Conservation Service that cost-share payments will be treated as taxable income. Participation in these voluntary programs will be severely restricted if the tax treatment intended for these payments is not clarified by Congress. This bill will exclude from gross income, payments made under the rural clean water program (section 208(j)) of the Federal Water Pollution Control Act (33 U.S.C. 1288(j)) and payments received under the rural abandoned mines program, which was authorized by section 406 of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1236).

Mr. President, to demonstrate the importance of this bill, it would be useful to explain the intent of Congress in authorizing the cost-share program for the Rural Clean Water Act and the rural abandoned mines program.

The Senate Committee on Environment and Public Works took a large step forward in improving water quality in America by passing the Clean Water Act of 1977, Public Law 95–217. This bill paid attention not only to water pollution in our urban areas, but also to the growing problem of water pollution in rural and agricultural regions of the country. In an effort to reduce water pollution in rural areas, Congress approved a program to assist farmers and ranchers in implementing long-term soil conservation practices that will reduce nonpoint source pollution. Voluntary participation in this water pollution control program is encouraged by the Soil Conservation Service, which would provide cost share payments to farmers and ranchers. The SCS will provide payments of up to 50 percent of the cost of installing water control mechanisms, but only to farmers

in areas with approved water management plans.

Clearly, the cost share arrangements were intended to ease the financial burden of farm operators and owners in implementing soil conservation practices, specifically designed to improve water quality.

Regrettably, the Internal Revenue Service has indicated that cost share payments under the Clean Water Act of 1977 will be treated as taxable income. This tax treatment will push participating farmers and ranchers into higher income brackets, increase their tax liability, and create a penalty for participation.

Mr. President, I seriously doubt that Congress wished to establish a voluntary environmental program based on the principles of self help and incentive, only to have the IRS destroy the program by taxing the incentive away. I submit that the benefits derived from this program accrue to the public as a whole. A few ranchers and farmers should not be asked to pay the total cost of a program that benefits so many Americans. By exempting cost share payments from taxable income. Congress can help assure the successful implementation of the Clean Water Act of 1977.

The successful implementation of the rural abandoned mines program is threatened by the same tax problem concerning cost share payments. The rural abandoned mines program (RAMP) came into being as a part of Public Law 95–87, the Surface Mine Control and Reclamation Act of 1977.

The RAMP program is a long overdue effort to reclaim 1.1 million acres of abandoned coal mined lands in 29 States. Under the RAMP program, landowners are encouraged to reclaim abandoned surface mined lands through cost share payments provided by the Soil Conservation Service. Cost share payments are provided to participating owners of land and water rights for reclamation of up to 320 acres of surface mined lands. The Secretary of Agriculture determines what percentage of the total cost of reclaiming these lands will be covered. If the Secretary determines that the main benefits derived under the program are related to improving offsite water quality, aesthetic values, or other offsite benefits, then the Soil Conservation Service can cover a larger proportion of the reclamation cost.

Similarly, if the matching share requirement would burden the landowner financially to such an extent that participation would be withdrawn, the Secretary of Agriculture can authorize larger cost share payments. Under these administrative guidelines, Ramp reclamation projects receiving cost share payments are scrutinized as to the extent of the public benefit from the reclamation efforts.

As with the rural clean water cost shares, the IRS has determined that cost sharing under the rural abandoned mines program will be treated as taxable income. The result of this action is an increase in the tax burden of participating landowners, and inevitably it will deter participation in the voluntary RAMP program.

Mr. President, to give you an idea of the magnitude of this program, I ask unanimous consent that this list of States eligible for participation in the RAMP program be included in the appropriate place in the RECORD. As you can see, over 29 States have coal lands needing reclamation. Pennsylvania has the most acres of eligible lands, with 240,000 acres needing reclamation. My own State of Wyoming ranks 14th on this list, with 9,657 acres needing reclamation. It would be a tragedy if this program were to fail and over 1 million acres of land remained unreclaimed due to the capricious decision of the IRS.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

Rural abandoned mine inventory data: Status of lands disturbed by surface mining in the United States

State	Rank	Coal lands needing reclamation (acres)
Pennsylvania	1	240,000
Ohio	2	196,709
Illinois	3	118,711
Kentucky	4	101,637
West Virginia	5	84,868
Alabama	6	72,292
Missouri	7	70,688
Kansas	8	41,256
Oklahoma	9	36,118
Tennessee	10	29,583
Indiana	11	25,882
Virginia	12	23,724
Iowa	13	13,997
Wyoming	14	9,657
Colorado	15	7,089
Arkansas	16	5,623
Texas	17	3,310
Maryland	18	2,804
Alaska	19	2,700
Montana	20	1,955
Georgia	21	1,680
North Dakota	22	1,050
South Dakota	23	890
Utah	24	635
Arizona	25	400
Michigan	26	142
Washington	27	42
New Mexico	28	22
California	29	10
Total		1,093,520

SOURCE.—Soil Conservation Service, 1977.

By Mr. MUSKIE (for himself, Mr. HATHAWAY, Mr. MOYNIHAN, Mr. DOMENICI, Mr. KENNEDY, and Mr. RIBICOFF):

S. 3389. A bill to amend title II of the Public Works Employment Act of 1976; to the Committee on Environment and Public Works.

INTERGOVERNMENTAL ANTIRECESSION ASSISTANCE ACT OF 1976

● Mr. MUSKIE. Mr. President, I am introducing today, for myself, Mr. HATHAWAY, Mr. MOYNIHAN, Mr. DOMENICI, Mr. KENNEDY, and Mr. RIBICOFF, legislation to extend the Intergovernmental Anti-Recession Assistance Program Act—the so-called countercyclical assistance program.

When I first introduced the countercyclical aid bill 3 years ago, I had no idea that debate on the bill would become an annual congressional event.

Congress first enacted countercyclical assistance at a time of very high employment. Our purpose was to provide short-term aid to State and local governments whose budgets were squeezed by the pressures of recession. With this Federal help, we hoped to enable these governments to avoid tax increases and job lay-offs that only make recession worse.

Countercyclical was more than just another Federal aid program. It contained a unique feature: When the National economy improved, when unemployment dropped below 6 percent, the program was to shut itself off. Countercyclical was designed to put money into the economy fast, where it was needed most, and then terminate itself when the need no longer existed.

As we approach the termination point written into the law, there are two points I believe we should keep in mind.

First, countercyclical assistance is and has always been intended as an anti-recession tool. As the recession becomes a thing of the past, it is appropriate and fair that fewer governments receive countercyclical funds.

Second, even when national unemployment has bottomed out, there will be some communities which are left behind—communities where economic problems remain because of long-term structural ills. Were countercyclical aid to these governments to terminate abruptly, the budget consequences could be severe.

I have kept these two facts in mind in drawing up the legislation I am introducing today.

Under the proposed legislation, the current program would be extended as is, and allowed to terminate when national unemployment drops below 6 percent. To insure that the program does not shut on and off repeatedly as unemployment hovers around 6 percent, the new bill would require that unemployment remain below that mark for two consecutive quarters before the program shuts off.

The idea of a program which terminates when no longer needed is very important—and I believe it should be retained.

Yet at the same time the legislation I am introducing today recognizes that some States and communities have lagged behind the national recovery rate. To help those communities this bill would distribute aid to State and local governments whose unemployment remains above 6 percent when the national rate falls below that mark.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3389

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Intergovernmental Antirecession Assistance Act of 1978".

FINANCIAL ASSISTANCE AUTHORIZED

SEC. 2. Section 202 of the Public Works Employment Act of 1976 is amended—

(1) by striking out "five" in subsection (b) and inserting in lieu thereof "eight",

(2) by striking out "July 1, 1977" in subsection (b) and inserting in lieu thereof "October 1, 1978",

(3) by striking the period in subsection (b) and inserting in lieu thereof ", plus",

(4) by adding at the end of subsection (b) the following new paragraph:

"(3) such sums as may be necessary to implement section 210(c) of this Act.",

(5) by striking out "five" in subsection (c) and inserting in lieu thereof "eight" and by striking out "July 1, 1977" in subsection (c) and inserting in lieu thereof "October 1, 1978", and

(6) by striking out subsection (d), and inserting after subsection (c) the following new subsection:

"(d)(1) Suspension of Assistance.—Except to the extent necessary to make the payments required by paragraph (2), if the average rate of unemployment for the United States is less than 6 percent for each of 2 consecutive calendar quarters—

"(A) no amount may be appropriated under this Act for the fourth calendar quarter of the 4 calendar quarter period which begins with the first of such 2 calendar quarters, and

"(B) any amounts previously appropriated under this Act for such fourth calendar quarter shall be withheld from payment.

"(2) Whenever assistance is suspended under paragraph (1), it shall remain suspended until the fourth calendar quarter of the 4 calendar quarter period which begins with the first of 2 consecutive calendar quarters during which the average rate of unemployment is or exceeds 6 percent.".

ADJUSTMENTS FOR PAYMENTS

SEC. 3. Section 210(b) is amended to read as follows:

"(b) Adjustments.—

"(1) Payments under this title may be made with necessary adjustments on account of overpayments or underpayments.

"(2) For any previous quarterly payment allotted pursuant to sections 202 and 203 in which a local government's allocation has been reduced as a result of a change in the methodology used to calculate the local unemployment rate as determined or assigned by the Secretary of Labor, the Secretary immediately shall make available sufficient funds to assure that such local government receives a lump sum supplemental payment such that the total prior allocations made pursuant to this Act are not less than the amount that otherwise would have been allotted to such local government under the methodology used prior to January 1, 1978. For purposes of this paragraph, eligibility is limited to those units of government which encompass or are within a standard metropolitan statistical area or central city for which current population surveys were used to determine annual unemployment date prior to January 1, 1978.

"(3) For any quarterly payment allotted pursuant to sections 202 and 203 in which a local government's allocation would be reduced as a result of a change in the methodology used to calculate the local unemployment rate as determined or assigned by the Secretary of Labor, the Secretary immediately shall make available sufficient funds to assure that such local government receives a supplemental payment such that the allocation made pursuant to this Act is not less than the amount that otherwise would have been allotted to such local government under the methodology used prior to January 1, 1978. For purposes of this paragraph, eligibility is limited to those units of government which encompass or are within a standard metropolitan statistical area or central city for which current population surveys were used to determine annual unemployment date prior to January 1, 1978.".

ELIMINATION OF CUT-OFF FOR LOW UNEMPLOYMENT; REPEAL OF PROGRAM STUDIES AUTHORITY

SEC. 4. (a) Section 210 (c) of the Public Works Employment Act of 1976 is repealed.

(b) Section 215 of such Act is repealed.

AUTHORIZATION OF APPROPRIATIONS FOR PUERTO RICO, GUAM, AMERICAN SAMOA, AND THE VIRGIN ISLANDS

SEC. 5 (a) Section 216 (a) of the Public Works Employment Act of 1976 is amended by—

(1) striking out "five" and inserting in lieu thereof "eight"; and

(2) striking out "July 1, 1977" and inserting in lieu thereof "October 1, 1978".

(b) Section 216 (b)(3)(C) of such Act is amended by striking out "206,".

TITLE II—SUPPLEMENTARY FISCAL ASSISTANCE

SEC. 201. This title may be cited as the "Supplementary Fiscal Assistance Act of 1978".

FINDINGS OF FACT AND DECLARATION OF POLICY

SEC. 202. (a) Findings.—The Congress finds and declares that—

(1) State and local governments represent a significant segment of the national economy whose sound fiscal and economic condition is essential to national economic prosperity;

(2) long-term economic decline has imposed considerable hardships on the budgets of many State and local governments;

(3) general purpose fiscal assistance can be especially helpful to those State and local governments suffering with long-term economic problems; and

(4) a targeted general assistance program which aids the State and local governments with the most severe fiscal problems is an essential component of a comprehensive urban policy.

(b) Policy.—The Congress declares it to be the policy of the United States and the purpose of this title to provide general purpose fiscal assistance to State and local governments with severe long-term economic problems, as measured by an unemployment rate above six percent in periods when the national unemployment rate is below six percent. It is the intention of the Congress that amounts paid to a State or local government under this title shall not be substituted for amounts which the State would have paid or made available to the local government out of revenues from State sources.

AUTHORIZATION OF PAYMENTS

SEC. 203. (a) In General.—Whenever the seasonally adjusted national unemployment rate is between 5 percent and 6 percent, the Secretary of the Treasury (referred to in this title as the "Secretary") shall, in accordance with the provisions of this title, make payments to State and local governments with unemployment rates above 6 percent.

(b) Payments to Recipient Governments.—The Secretary shall pay, not later than five days after the beginning of each calendar quarter, to each State and local government which has filed a statement of assurances under section 206, an amount equal to the amount allocated to such government under section 204.

(c) AUTHORIZATION OF APPROPRIATIONS.—Subject to the provisions of subsection (d), there are authorized to be appropriated for each of the consecutive calendar quarters beginning after September 30, 1978, $125,000,000 plus such sums as may be necessary to implement section 211, for the purpose of making payments to State and local governments under this title.

(d) SUSPENSION OF ASSISTANCE.—If the average rate of unemployment for the United States is in excess of 5.99 percent or below 5.0 percent for each of 2 consecutive calendar quarters—

"(1) no amount may be appropriated under this title for the fourth calendar quarter of the 4 calendar quarter period which begins with the first of such 2 calendar quarters, and

"(2) any amounts previously appropriated under this Act for such fourth calendar quarter shall be withheld from payment.".

ALLOCATION

SEC. 204. (a) RESERVATIONS.—

(1) ELIGIBLE STATES.—The Secretary shall reserve one-third of the amounts authorized to be appropriated under section 203 in each calendar quarter for the purpose of making payments to eligible State governments under subsection (b).

(2) ELIGIBLE UNITS OF LOCAL GOVERNMENT.—The Secretary shall reserve two-thirds of such amounts for the purpose of making payments to eligible units of local government under subsection (c).

(b) STATE ALLOCATION.—

(1) IN GENERAL.—The Secretary shall allocate from amounts reserved under subsection (a)(1) an amount for the purpose of making payments to each State equal to the total amount reserved under subsection (a)(1) for the calendar quarter multiplied by the applicable State percentage as defined in paragraph (2).

(2) APPLICABLE STATE PERCENTAGE.—For purposes of this subsection, the applicable State percentage is equal to the quotient resulting from the product of the State excess unemployment percentage multiplied by the State revenue sharing amount, divided by the sum of all such products for all the States.

(3) DEFINITIONS.—For the purposes of this section—

(A) the term "State" means each State of the United States;

(B) the State excess unemployment percentage is equal to the difference resulting from the subtraction of 6 percentage points from the State unemployment rate for that State, but such excess employment percentage shall not be less than zero;

(C) the State unemployment rate is equal to the rate of unemployment in the State during the appropriate calendar quarter, as determined by the Secretary of Labor and reported to the Secretary; and

(D) the State revenue sharing amount is the amount determined under section 107 of the State and Local Fiscal Assistance Act of 1972 for the most recently completed entitlement period, as defined in section 141 (b) of such Act.

(c) LOCAL GOVERNMENT ALLOCATION.—

(1) IN GENERAL.—The Secretary shall allocate from amounts reserved under subsection (a)(2) an amount for the purpose of making a payment to each local government, subject to the provisions of paragraph (4), equal to the total amount reserved under subsection (a)(2) for the calendar quarter multiplied by the local government percentage.

(2) Local government percentage.—For purposes of this subsection, the local government percentage is equal to the quotient resulting from the product of the local excess unemployment percentage, multiplied by the local revenue sharing amount, divided by the sum of such products for all local governments.

(3) Definitions.—For purposes of this subsection—

(A) the local excess unemployment percentage is equal to the difference resulting from the subtraction of 6 percentage points from the local unemployment rate, but such local excess unemployment percentage shall not be less than zero;

(B) the local unemployment rate is equal to the rate of unemployment in the jurisdiction of the local government during the appropriate calendar quarter, as determined or assigned by the Secretary of Labor and reported to the Secretary, except that in the case of a local government for which the Secretary of Labor cannot determine a local unemployment rate, he shall assign such local government the local unemployment

rate of the smallest unit or subunit of local government for which he has determined a local unemployment rate which is within the jurisdiction of which such local government is located, unless—

(i) the Governor of the State in which such local government is located has provided the Secretary of Labor with a local government rate for such local government, and

(ii) the Secretary of Labor finds that such local unemployment rate provided by the Governor has been determined in a manner consistent with the procedures and methods used by the Secretary of Labor in determining local unemployment rates,

in which case the Secretary of Labor shall assign such local government the local unemployment rate provided by such Governor,

(C) the local revenue sharing amount is the amount determined under section 108 of the State and Local Fiscal Assistance Act of 1972 for the most recently completed entitlement period, as defined in section 141(b) of such Act; and

(D) the term "local government" means the government of a county, municipality, township, or other unit of government below the State which—

(i) is a unit of general government, determined on the basis of the same principles as are utilized by the Bureau of the Census for general statistical purposes, and

(ii) performs substantial governmental functions.

The term "local government" includes the District of Columbia and also includes the recognized governing body of an Indian tribe or Alaskan Native Village which performs substantial governmental functions. Such term does not include the government of a township area unless such government performs substantial governmental functions.

(4) Special limitation.—If the amount which would be allocated to any unit of local government under this subsection is less than $250, then no amount shall be allocated for such unit of local government under this subsection.

USES OF PAYMENTS

SEC. 205. Each State and local government shall use payments made under this title for the maintenance of basic services customarily provided to persons in the area under the jurisdiction of such State or local government. State and local governments may not use payments made under this title for the acquisition of supplies and materials or for construction, except for normal supplies or repairs necessary to maintain such basic services.

STATEMENTS OF ASSURANCES

SEC. 206. (a) Statement Required.—Each State and local government may receive payments under this title only upon filing with the Secretary a statement of assurances, at such time and in such manner as the Secretary may prescribe by rule. The Secretary may not require any such government to file more than one such statement during each fiscal year.

(b) Contents of Statement.—Each statement of assurances required under subsection (a) shall contain assurances that—

(1) the requirements of section 205 will be complied with:

(2) the State or local government filing the statement will—

(A) use fiscal, accounting, and audit procedures which conform to guidelines established by the Secretary after consultation with the Comptroller General of the United States, and

(B) provide to the Secretary and to the Comptroller General of the United States access to and the right to examine such books, documents, papers, or records as the Secretary, after reasonable notice, may reasonably require for the purpose of reviewing and determining compliance with the provisions of this title;

(3) reasonable reports will be furnished to the Secretary in such form and containing such information as the Secretary may reasonably require to carry out the provisions of this title;

(4) the requirements of section 207 will be complied with;

(5) the requirements of section 208 will be complied with; and

(6) such government will spend amounts received under this title only in accordance with the laws and procedures applicable to the expenditure of its own revenues.

NONDISCRIMINATION

SEC. 207. (a)(1) In General.—No person in the United States shall, on the ground of race, color, national origin, or sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity of a State or local government which receives funds made available under this title. Any prohibition against discrimination on the basis of age under the Age Discrimination Act of 1975 (42 U.S.C. § 6101 *et seq.*) or with respect to an otherwise qualified handicapped individual as provided in section 504 of the Rehabilitation Act of 1973 (29 U.S.C. § 794 *et seq.*) shall also apply to such program or activity. Any prohibition against discrimination on the basis of religion, or any exemption from such prohibition, as provided in the Civil Rights Act of 1964 (42 U.S.C. § 2000e(2)) or title VIII of the Act of April 11, 1968 (42 U.S.C. § 3601 *et seq.*), shall also apply to such program or activity.

(2) Exceptions.—

(A) Funding.—The provisions of paragraph (1) of this subsection shall not apply where any State or unit of local government demonstrates, by clear and convincing evidence, that the program or activity with respect to which the allegation of discrimination has been made is not funded in whole or in part with funds made available under this title.

(B) Construction projects in progress.—The provision of paragraph (1) relating to discrimination with respect to an otherwise qualified handicapped individual under section 504 of the Rehabilitation Act of 1973 shall not apply to construction projects commenced prior to January 1, 1977.

(b) Enforcement and Remedies.—Subsection (a) of this section shall be enforced by the Secretary in the same manner and in accordance with the same procedures as are required by sections 122, 124, and 125 of the State and Local Fiscal Assistance Act of 1972 (31 U.S.C. § 1221 *et seq.*), to enforce compliance with section 122 (a) of such Act. The Attorney General shall have the same authority, functions, and duties with respect to funds made available under this title as he has under section 122(g), 122(h), and 124(c) of such Act with respect to funds made available under such Act. Any person aggrieved by a violation of subsection (a) of this section shall have the same rights and remedies as a person aggrieved by a violation of subsection (a) of section 122 of such Act, including the rights provided under section 124 (c) of such Act.

LABOR STANDARDS

SEC. 208. All laborers and mechanics employed by contractors on all construction projects funded in whole or in part by payments under this title shall be paid wages at rates not less than those prevailing on similar projects in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act (40 U.S.C. § 276a to § 276a-5). The Secretary of Labor shall have, with respect to the labor standards specified in this section, the authority and functions set forth in Reorganization Plan No. 14 of 1950 (15 C.F.R. 3176) and section 2 of the Act of June 13, 1934, as amended (40 U.S.C. § 276c).

LIMITATION OF PAYMENTS TO STATES

SEC. 209. (a) No State shall receive a payment for any calendar quarter under this Title which exceeds the amount of the payment such State received uder Title I of this Act for the most recent calendar quarter for which payments were made under such Title I.

(b) The Secretary shall reallocate any amounts withheld from payment under subsection (a) to units of local government in accordance with the provisions of Sec. 204 (c).

WITHHOLDING

SEC. 210. Except as otherwise provided by section 207(b), whenever the Secretary, after affording reasonable notice and an opportunity for a hearing, finds that a State or unit of local government has failed to comply substantially with any assurance contained in the statement filed pursuant to section 206 of this title, the Secretary shall notify such government that further payments will not be made under this title until he is satisfied that there is no longer any such failure to comply. The Secretary shall make no further payments to such government under this title until he is satisfied that the State or unit of local government is in substantial compliance with the provisions of this title.

ADJUSTMENTS FOR PAYMENTS

SEC. 211. Adjustments.—

(a) Payments under this title may be made with necessary adjustments on account of overpayments or underpayments.

(b) For any quarterly payment allotted pursuant to sections 203 and 204 in which a local government's allocation would be reduced as a result of a change in the methodology used to calculate the local unemployment rate as determined or assigned by the Secretary of Labor, the Secretary immediately shall make available sufficient funds to assure that such local government receives a supplemental payment such that the allocation made pursuant to this Act is not less than the amount that otherwise would have been allotted to such local government under the methodology used prior to January 1, 1978. For purposes of this paragraph, eligibility is limited to those units of government which encompass or are within a standard metropolitan statistical area or central city for which current population surveys were used to determine annual unemployment data prior to January 1, 1978.

RULEMAKING

SEC. 212. The Secretary is authorized to prescribe, after consultation with the Secretary of Labor, such rules as may be necessary to carry out his functions under this Act. Such rules shall be prescribed initially by the Secretary not later than ninety days after the date of enactment of this Act.

REPORTS

SEC. 213. The Secretary shall report to Congress as soon as is practical after the end of each calendar year during which payments are made under the provisions of this title. Such reports shall include detailed information on the amounts paid to each State and unit of local government under the provisions of this title and any amounts withheld by the Secretary pursuant to sections 207 and 209.

● Mr. HATHAWAY. Mr. President, I am pleased to join with the senior Senator from Maine (Mr. MUSKIE) in introducing legislation to extend the Antirecession Fiscal Assistance Act.

The program was developed in 1976 as a Federal response to the fiscal plight of State and local government units during the recent recession. Countercyclical revenue sharing has been invaluable in maintaining vital Government functions

without raising local taxes during the financial dislocations caused by high unemployment and economic stagnation.

Senator MUSKIE helped introduce this concept to the Senate and saw through its enactment. I have had the opportunity to review the program as chairman of the Senate Finance Subcommittee on Revenue Sharing. We believe this program is essential to hard-pressed Government units during periods of high unemployment.

For this reason, I am introducing this bill as a reauthorization of the countercyclical assistance program with special provisions for those governments with excessive unemployment as the national program terminates.

The Senate Finance Committee plans to act on reauthorization this week. I am confident that this legislation will be favorably received by my colleagues.●

By Mr. MATSUNAGA (for himself, Mr. ANDERSON, Mr. DOMENICI, Mr. DURKIN, Mr. MARK O. HATFIELD, and Mr. MATHIAS):

S. 3392. A bill to provide for an accelerated program of research, development, and demonstration of solar photovoltaic energy technologies leading to early competitive commercial applicability of such technologies to be carried out by the Department of Energy, with the support of the National Aeronautics and Space Administration, the National Bureau of Standards, the General Services Administration, and other Federal agencies; to the Committee on Energy and Natural Resources.

SOLAR PHOTOVOLTAIC ENERGY RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACT OF 1978

● Mr. MATSUNAGA. Mr. President, together with Senators ANDERSON, DOMENICI, DURKIN, HATFIELD, and MATHIAS, I am introducing legislation to provide for the establishment of a solar photovoltaic energy, research, development, and demonstration program in the Department of Energy.

The Solar Photovoltaic Energy Research, Development, and Demonstration Act of 1978, which I am proposing, is intended to accelerate the use of solar energy as a source of electricity throughout the country.

Much has been written and said in recent months concerning the virtues of solar energy, and the contribution it is expected to make toward solving our energy problem. Solar energy is attractive because it is universally available, abundant and renewable by nature. Its use poses minimal risks of damage to our environment, and its effects on our economy can be beneficial. While no one would suggest that solar energy is the only answer to our current energy problem, the contribution it can make to increasing our domestic reliance upon energy can be substantial indeed.

In order for solar energy to become a major source of energy, its technological and economic feasibility must be further advanced and demonstrated. This is especially true in the case of photovoltaic conversion, a concept which shows great promise for the future.

Photovoltaic conversion of sunlight to electricity is a technology which has already proven itself as a dependable method of providing power for our space vehicles during the past 20 years. The basic scientific principles are well known, and the technology for specialized uses, such as in remote terrestial applications, is now relatively advanced. However, widespread use has not been achieved because of the high costs associated with this technology, and its commercialization cannot be achieved, unless certain technical problems are resolved.

Mr. President, it is apparent that if photovoltaic conversion is to play a significant role in supplying energy to the Nation, the Federal Government must be an active participant, just as it has in the development of other energy sources.

The bill I am introducing today provides for the Federal Government to play an active part in assisting the emerging industry to advance the technology and achieve economies of scale. The strategies set forth in the bill are several: First, the bill commits the Nation to a 10-year research, development, and demonstration program in solar photovoltaic technologies. Second, it sets clear but adjustable goals for the program to meet. These goals relate to both advances in the State of the art of the technology and reduction in the cost per unit of energy produced. Third, the bill proposes to double the total U.S. production of photovoltaic systems each year for 10 years, starting in 1979, so that by fiscal year 1988, production will be 1,000 times what it is today. Thus, the production in the year 1988 will be 2 million peak kilowatts of photovoltaic capacity, with a cumulative total of 4 million peak kilowatts of photovoltaic capacity produced during that 10-year period. Fourth, the bill sets forth a predictable program that clearly declares that the Federal Government is serious about this technology, and is dedicated to facilitating its adoption by the private sector.

Mr. President, I am pleased to report that a similar bill, H.R. 12874, has already been adopted by the House, which passed the measure without opposition on June 28, 1978, under the leadership of Congressmen MCCORMACK, TEAGUE, and GOLDWATER. This body should do likewise.●

ADDITIONAL COSPONSORS

S. 1587

At the request of Mr. STONE, the Senator from Texas (Mr. TOWER) was added as a cosponsor of S. 1587, a bill to amend the Internal Revenue Code of 1954 to exempt certain State and local government retirement systems from taxation, and for other purposes.

S. 2860

At the request of Mr. MELCHER, the Senator from Arizona (Mr. GOLDWATER) was added as a cosponsor of S. 2860, the Solar Satellite Research, Development and Demonstration Program Act of 1978.

S. 2867

At the request of Mr. GOLDWATER, the Senator from Georgia (Mr. TALMADGE) was added as a cosponsor of S. 2867, a bill to remove residency requirements and acreage limitations applicable to land subject to reclamation law.

S. 3027

At the request of Mr. HART, the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 3027, a bill to provide for a program of review of State laws with regard to solar energy.

S. 3037

At the request of Mr. DECONCINI, the Senator from Wisconsin (Mr. NELSON) was added as a cosponsor of S. 3037, a bill to provde for the administration of the Internal Revenue Code of 1954 without regard to certain Revenue Rulings relating to the definition of the term "employee."

S. 3111

At the request of Mr. PACKWOOD, the Senator from Rhode Island (Mr. CHAFEE) was added as a cosponsor of S. 3111, a bill to allow taxpayers to deduct charitable contributions whether or not they use the standard deduction.

S. 3285

At the request of Mr. TOWER, the Senator from Idaho (Mr. MCCLURE) was added as a cosponsor of S. 3285, a bill to extend the investment tax credit to certain agricultural structures.

S. 3330

At the request of Mr. CULVER, the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 3330, to require agencies to consider alternative proposals in the promulgation of agency rules, regulations, and reporting requirements.

SENATE JOINT RESOLUTION 146

At the request of Mr. GLENN, the Senator from Indiana (Mr. BAYH) was added as a cosponsor of Senate Joint Resolution 146, to authorize and request the President to proclaim October 7, 1978, as "National Guard Day."

SENATE RESOLUTION 536—SUBMISSION OF A RESOLUTION RELATING TO CERTAIN INTERNATIONAL AGREEMENTS

Mr. GLENN (for himself and Mr. CLARK) submitted the following resolution, which was referred to the Committee on Foreign Relations:

S. RES. 536

Resolved, That this resolution may be cited as the "International Agreements Consultation Resolution".

SEC. 1. It is the sense of the Senate that, in determining whether a particular international agreement should be submitted as a treaty, the President should, prior to and during the negotiations of such agreement, seek the advice of the Committee on Foreign Relations.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President.

● Mr. GLENN. Mr. President, the Senate recently addressed the problem of the use of executive agreements to circumvent the power the Senate is given under article II, section 2 of the Constitution to advise and consent in the making of treaties. It was the clear intent of the framers of the Constitution that the Sen-

ate should participate in the making of major international commitments. In order to ensure that the President should seek the advice of the Senate in making such commitments, as the Constitution presumes, the Senate adopted without objection an amendment to the State Department authorization bill which provided that it is the sense of the Senate that the President should seek the advice of the Committee on Foreign Relations, prior to and during the negotiation of international agreements, in determining whether a particular agreement should be submitted as a treaty.

On Monday, however, the provision was dropped from the State Department authorization bill by House-Senate conferees. Since I believe it is crucial that we maintain consultation between the President and the Senate in the making of major international agreements, today I am submitting the text of the provision as a Senate resolution.

I am sure my colleagues share my concern and hope they will again support the principle of consultation as they did when the text of this resolution was adopted as an amendment to the State Department authorization bill. I sincerely hope the administration will support it as well. Commendably, this administration has committed itself to consultation and cooperation with Congress in this area. In an exchange of letters with Senator SPARKMAN, chairman of the Committee on Foreign Relations, Douglas T. Bennett, Assistant Secretary for Congressional Relations of the Department of State, has expressed the State Department's willingness to consult on the form of any significant international agreement. Passage of this resolution would be useful in reinforcing that understanding, insuring that this administration adheres to its commitments, and paving the way for similar commitments by future administrations.

Mr. President, I have on prior occasions on the Senate floor discussed this problem with my colleagues, citing the recent growth in total numbers of executive agreements and in the important commitments made by executive agreements. Passage of this resolution would be an important step in reaffirming for the future the Senate's proper role in the constitutional powers shared by the executive and the legislative branches. One of the most important of these powers is that of determining the course which this Nation will take in its relations with other nations.●

AMENDMENT SUBMITTED FOR PRINTING

THE MILLER ACT—S. 3359

AMENDMENT NO. 3444

(Ordered to be printed and referred to the Committee on Governmental Affairs.)

Mr. HEINZ submitted an amendment intended to be proposed by him to S. 3359, a bill to amend the act commonly known as the Miller Act to raise the dollar amount of contracts to which such act applies from $2,000 to $25,000.

TUITION TAX CREDIT—H.R. 12050

AMENDMENT NO. 3445

(Ordered to be printed and to lie on the table.)

Mr. GOLDWATER (for himself, Mr. HATCH, and Mr. MCINTYRE) submitted an amendment intended to be proposed by them, jointly, to H.R. 12050, an act to amend the Internal Revenue Code of 1954 to provide a Federal income tax credit for tuition.

FEDERAL-AID HIGHWAY AUTHORIZATIONS—S. 3073

AMENDMENT NO. 3446

(Ordered to be printed and to lie on the table.)

Mr. RANDOLPH (for himself and Mr. HUDDLESTON) submitted an amendment intended to be proposed by them, jointly, to S. 3073, a bill to amend title 23, United States Code, to authorize Federal-aid highway programs through fiscal year 1980, and for other purposes.

AGRICULTURE, RURAL DEVELOPMENT AND RELATED AGENCIES APPROPRIATIONS, 1979—H.R. 13125

AMENDMENT NO. 3447

(Ordered to be printed and to lie on the table.)

Mr. WEICKER submitted an amendment intended to be proposed by him to H.R. 13125, an act making appropriations for Agriculture, rural development, and related agencies programs for the fiscal year ending September 30, 1979, and for other purposes.

AMENDMENT NO. 3448

(Ordered to be printed and to lie on the table.)

Mr. CURTIS submitted an amendment intended to be proposed by him to H.R. 13125, supra.

NOTICES OF HEARINGS

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. PROXMIRE. Mr. President, the Committee on Banking, Housing, and Urban Affairs will hold meetings on August 21 and 22 on new types of mortgage instruments. The hearings will focus on S. 2455, the Home Owners' Equity Act of 1978, S. 70, the Homebuyers Assistance Act of 1977, and regulations recently proposed by the Federal Home Loan Bank Board to permit federally chartered savings and loan associations to offer alternative mortgages in States which permit them under State law. The committee's inquiry will particularly examine the variable interest rate mortgage and its derivatives.

The hearings are scheduled for 10 a.m. each day, in room 5302 of the Dirksen Senate Office Building.

The committee would welcome statements for inclusion in the hearing record the week of the 7th.

SUBCOMMITTEE ON LABOR

● Mr. WILLIAMS. Mr. President, I wish to announce that the Subcommittee on Labor will be conducting a hearing on S. 517, a bill to authorize employees and agencies of the Government of the United States to experiment with flexible and compressed work schedules. The hearing will be held on August 21, 1978, at 11 a.m. For further information you may contact the Labor Subcommittee office on 224–3674.●

ADDITIONAL STATEMENTS

POPE PAUL VI

● Mr. RIEGLE. Mr. President, His Holiness, Pope Paul VI, Bishop of Rome and religious leader of 600 million is dead. All the world, Roman Catholic or not, mourns the death of a man of peace, a man of gentleness, and a man of very real courage.

Born 80 years ago in Concessio, Italy, Giovanni Montini, who took the name Paul upon his election to the papacy in 1963, sought peace both within his church and among the nations and peoples of the world. He used the offices of the church in a quest for peace and understanding that brought deserved praise to him, and hope to multitudes.

His Holiness was a gentle man, full of compassion and mercy. His concern for the poor, the powerless, and the forgotten of the Earth was real and in the highest tradition of the church and humanity.

And Paul VI was a man of courage, daring to break new ground in seeking to make the teachings of Christ relevant to today's Christians; in fighting for recognition of the world's oppressed, challenging abuses of power within the church and within temporal governments he demonstrated the mixture of love and courage that won the admiration of men and women of all faiths, of all political beliefs, of all nationalities.

We in the United States feel a particular closeness for this man, the first Pope to visit our country. But the high regard which the world felt for him is seen in the act of the Polish Government, which sent flowers to Stefan Cardinal Wyszynski in sympathy for his grief, a most unusual action for a Communist state. Rabbi Marc Tanenbaum, of the American Jewish Committee, noted: "It was during his papacy that major strides forward took place in advancing understanding and mutual respect between Catholics and Jews."

This man was a giant among us, and his shadow is with us still.●

DWINDLING RESPECT FOR THE UNITED STATES

● Mr. GOLDWATER. Mr. President, appearing in the New York Times of Monday, July the 24th, is a column by Mr. Henry Scott-Stokes that expresses very vividly a concern that many Americans are carrying with them and the concern is growing and rightly so. Mr. Stokes speaks of the dwindling respect for the United States by the Japanese, but many Americans, including myself, who have reasons to travel or study other parts of the world, feel that this lack of respect for the United States is not confined to Japan, but is growing worldwide.

We seem to be a weak country. We do not appear to have any real reason in our policies or to have outlined for our country any road to travel that will lead to the solutions of the problems bothering this world. I ask that this article be printed in the RECORD.

The article follows:

JAPANESE VIEW OF U.S.: DWINDLING RESPECT

(By Henry Scott-Stokes)

TOKYO, July 20.—Two weeks ago a Japanese Cabinet minister spoke out in criticism of the United States in a way that one has come not to expect from the Japanese since World War II. Kiichi Miyazawa, head of the Economic Planning Agency and the man who more than anyone else runs the Japanese economy, accused President Carter of inadequate leadership in advance of the economic summit meeting in Bonn, tore into Congress for "dragging its feet on the energy bill" and said Washington was mismanaging the American economy.

Since the end of the Allied military occupation in 1952, Japanese Government spokesmen—among whom Mr. Miyazawa now ranks only one rung below Prime Minister Takeo Fukuda—have usually been extremely cautious in offering even the most veiled criticisms of the United States.

"It is a great disappointment that President Carter seems to be coming to Bonn empty-handed," Mr. Miyazawa said in an interview with The New York Times. "It's not his doing. Congress is dragging its feet on the energy bill, particularly Part 5, but the bill is long overdue, and I certainly hope that the President will tell the Bonn meeting that by a certain date the U.S. will have its own comprehensive energy program."

DEFICIT AND INFLATION NOTED

He continued: "Our Government has been doing its best under given circumstances to behave well while none of the fundamentals are being tackled in the U.S. Not only does your Government have the energy bill to complete, but you have a budget deficit of $60 billion, which is going to climb further, and you now have inflation of 7 percent, which is also going up."

The toughness of Mr. Miyazawa's remarks points to a change in Japanese opinion. In recent years, and especially since the end of the Vietnam War in 1975, many Japanese in government and in business have lost much of their old respect for all things American.

In private conversations senior officials ask brutal questions such as, "Is America really to be relied on in the future as a kind of big brother, guarantor of our security? Is the United States not withdrawing from the Far East as a whole in military terms, all protests notwithstanding?"

Business leaders are even sharper in their attacks, though always declining to be quoted by name. They have come to regard most of American industry as chronically noncompetitive and American workers as habitually lazy. Some go so far as to ask whether America, in view of its economic weakness, is "finished" as the leader of the democratic forces in the world.

"HIGH TIME" FOR SUCH CRITICISM

"In a sense, it was high time that someone gave voice to this undercurrent of vicious criticism," said a close associate of Mr. Miyazawa. "It's just unhealthy that the Americans should remain in a state of ignorance about the way many Japanese actually feel."

The vehemence of Mr. Miyazawa's statements is explained in part by the timing. He was eager to influence the outcome of the Bonn meeting by putting the Japanese case in advance, encouraging the President to commit himself to getting an energy bill through Congress "by a certain date" and joining ranks with the West Germans. Chancellor Helmut Schmidt has been just as outspoken in bringing pressure on the United States.

This was purely tactical and may have contributed somewhat to the promise made by President Carter at Bonn to strengthen the dollar by saving oil and fighting inflation. But the more important feature of Mr. Miyazawa's remarks was that they were designed to lay bare long-term and keenly felt Japanese concerns.

RISE IN OIL PRICE FEARED

The lack of Congressional approval of energy legislation has a dual effect in Japanese eyes. First, it detracts from efforts to get the American balance of payments under control and hence helps to undermine the dollar. Second, it tends to reinforce those within the Organization of Petroluem Exporting Countries who want higher oil prices. Both these tendencies are of great concern to Japan, which would "lose more than anyone else from a rise in the oil price," according to Mr. Miyazawa.

This country is 99 percent dependent on imported oil, mainly from the Middle East, Japan paid $23.6 billion for its oil last year, and this accounted for one-third of all its imports. A 10 percent rise in the price of crude oil would cost Japan well over $2 billion a year.

The plunge in the dollar is crucial to Japan in other ways. It tends to snuff out economic growth in Japan, because it discourages companies from investing. Japan has committed itself to a 7 percent real growth rate this year, the highest target of any major industrial country. Prime Minister Fukuda repeated that commitment at the Bonn meeting.

But it is already certain that Mr. Fukuda will have to propose a big supplementary budget this fall to keep the Japanese economy fueled up. Wtihout that extra budget the economy could go languid in the middle of this fiscal year as it did last fall.

RECORD TRADE SURPLUS

Japan's biggest concern, however, is that the United States could slip back into economic protectionism after the November elections. This could hit Japan much harder than an oil-price increase or even a further rise in the yen, which still looks enormously strong given that Japan is running a record trade surplus estimated at $23 billion this year and a surplus on current account estimated at $18 billion. The current account surplus last year was a record $14 billion.

For Japan it is just as vital that Robert S. Strauss, the President's trade negotiator, should be successful in his efforts first in getting a package of tariff cuts and other measures under the current "Tokyo round" of talks on the General Agreement on Tariffs and Trade and then in persuading the new Congress in early 1979 to vote for the package. "If Congress goes against the package, then the whole thing will collapse there," said Mr. Miyazawa in his interview.

From a Japanese viewpoint, the problem is that this country is running a record trade surplus with the United States, a surplus of $8.9 billion in the last fiscal year and probably considerably more in fiscal 1978, which ends next March 31. Japan has to make its contribution to international economic stability by reducing its overall surplus. The flood of Hondas and Toyotas into the United States has to be checked. Only then will Congress be impressed.

REGULATING MAJOR EXPORTS

"We are regulating exports of eight major items that account for over 50 percent of our exports to the U.S.," Mr. Miyazawa said. "This regulation is without any strict legal basis and is admittedly hard for the Ministry of International Trade and Industry, but still we've been doing it since April this year, and the record for April-May-June shows that we've been able to restrict quantity exports of six out of the items and only two, cars and motorcycles, have gone up slightly over April-June last year.

"The rub is that pricing in the U.S. of export items tends to rise because of inflation in America, and our exporters have every motive to try to jack up prices, which Toyota has done six times in the past 18 months and is preparing to do for a seventh time, making a total price rise of about 26 percent," he continued.

"There's got to be a limit beyond which Americans cease to buy and switch to American cars. And this must eventually diminish our dollar intake at long last."

A glance at the overall trade figures shows why the Japanese are primarily concerned about this aspect of American-Japanese relations. In fiscal 1977 Japan had a trade surplus on customs clearance figures of $12.9 billion, of which $8.9 billion, equivalent to two-thirds of the whole, was with the United States.

Meanwhile, Japan exported in the last fiscal year 1.89 million vehicles to the United States and imported from the United States only about 15,000 cars—a disparity of over 100 to one in favour of the Japanese car makers.

JAPANESE SURPLUS WILL RISE

What disturbs men like Mr. Miyazawa and accounts primarily for his outburst may be the prospect that these figures will be still more unbalanced this year. The Japanese trade surplus with the United States is certain to leap once again to new records. Sales of Japanese autos are no longer rising, but in dollar terms they will be worth much more than last year's $5 billion plus.

The ultimate source of Mr. Miyazawa's concern is that Americans may observe that there is a relationship between trade and jobs. On a rough rule of thumb, $1 billion in trade is worth 100,000 jobs, though the figure varies greatly according to the industry involved. On this basis the loss of jobs in the United States because of Japanese products runs close to a million.●

A BUILDING WITHOUT FRILLS

● Mr. CLARK. Mr. President, during consideration of the legislative appropriations bill last Friday, there was considerable debate over continued funding for the new Philip A. Hart Senate Office Building, now under construction. As I was necessarily absent on Friday—due to a long-standing commitment to visit a number of important Iowa projects with Interior Secretary Andrus—I wanted to take this opportunity to briefly explain my position on the new building.

No one can dispute that, with inflation climbing toward double digit levels, the need to cut wasteful and unnecessary Government spending is greater than ever. However, in the search for appropriate places to cut "fat" out of the budget, we must be careful not to be "penny wise, but pound foolish."

That was the problem with Senator CHAFEE's amendment to halt construction of the Hart Building, in my judgment, and that is why I announced in favor of tabling the amendment.

I was not a member of the Senate in 1972 when the decision to construct this

building was made. However, I believe few would dispute the pressing need to relieve the overcrowded conditions in existing Senate office buildings. Presently, Senate employees have an average of only 67 square feet of office space each, compared to a standard of 150 square feet in the private sector. It is not uncommon to find seven or eight aides crammed into one small room, with typewriters clattering and phones ringing constantly. Clearly, if we expect Senate employees to conduct the public's business in a more efficient, effective manner, then these conditions simply must be improved. Under the circumstances, additional office space is the only feasible alternativc.

Under the Chafee amendment, the $16 million that has already been spent on construction of the new building would have been wasted. So would an additional $15 million necessary to close out existing contracts. After spending $31 million, we would have been left with a mass of steel girders and a huge hole in the ground.

If we had followed Senator CHAFEE's additional proposal to convert the site to a park and an underground garage, the cost would have reached nearly $50,000,000—an incredible $100,000 per parking space. That's not my idea of fiscal responsibility.

But while the sensible alternative may be to complete the building, rising construction costs must continue to be a matter of real concern. Some estimates for completion now run as high as $200 million, a figure that is clearly unacceptable.

That is why I announced in favor of the amendment of Senator MAGNUSON, placing a $135 million ceiling on the cost of the building. As far as I am concerned, that should be the last we hear about additional construction costs; I intend to oppose any further appropriations for completing the Hart Building.

In addition, I believe it is necessary to look further at cuts that should be made in the cost of the new facility. Taxpayers will support additional office space if they know it is necessary. But they will not and should not be expected to—tolerate frills like a new Senators' gym, a new Senators' rooftop restaurant, and expensive wood paneling in Senators' offices. They will support a reasonable building—not a luxury high-rise. I urge my colleagues on the Senate Office Building Commission to implement design changes to eliminate these excesses at the earliest opportunity. If such changes are not forthcoming, I will certainly support efforts to cut all unnecessary items from the building, through legislation if necessary.●

MINORITY ENTERPRISE INVESTMENTS

● Mr. TOWER. Mr. President, the select Committee on Small Business is to be commended for reporting H.R. 11318 which is designed to improve the Small Business Administration's aid to minority enterprise. Title I of the Senate version of the bill contains an important provision which would enhance the Minority Enterprise Small Business Investment Co. (MESBIC) program as a means for Hispanic Americans and blacks to become owners of new businesses in their communities.

The need has long been recognized in our country for the formation of capital in disadvantaged minority communities, if the harsh cycle of poverty is to be broken and its victims are to have a chance to work their way to decent standards of living and to the dignity that accompanies self-reliance and self-support. The MESBIC program is one of the means to facilitate capital formation in the minority community generally, and is a self-help approach to curing poverty and unemployment.

A MESBIC is a private investment corporation licensed by the Small Business Administration to provide long-term venture capital and management assistance to economically disadvantaged entrepreneurs. Initial capital for a MESBIC is provided by private sector sources such as banks and corporations which become stockholders in the MESBIC. Funds thus generated are invested directly in the minority enterprise as stocks or loans. Because of the extraordinary risk involved in funding new enterprises, the Federal Government aids the MESBIC through low cost loans and stock purchases.

The MESBIC program has not lived up to the expectations we had for it when we passed the Minority Enterprise Business Investment Act in 1972 because of confusion in its administration. Title I of H.R. 11318 as reported by the committee has as an important purpose of curing some of the defects in the program by providing improved borrowing terms for MESBIC's to create a favorable venture capital investment. It is designed to eliminate confusion in the program.

This proposal is of particular interest to me because it closely follows S. 2613 which I sponsored in the 94th Congress as a result of testimony given by my constituent, Walter W. Durham, president, MESBIC Financial Corp. of Dallas.

The importance of the MESBIC program may be seen by some of the activities of the Dallas MESBIC.

Recently, the MESBIC Financial Corp. of Dallas with a group of private investors joined in financing to assist in the establishment of the first minority owned cosmetic business in the Southwest.

In 1977, the Dallas MESBIC aided in the financing of the first minority-owned wholesale distributor of oilfield equipment in North Central Texas. That same year it participated in the financing of the first minority-owned wholesale distributor of electronic components in the Southwest. It also participated in the joint financing of a plate glass firm which has now become one of the largest black-owned businesses in Texas.

Mr. President, the Governmental Affairs Committee has asked for sequential referral of H.R. 11318. Because of the importance of this legislation to the black and the Hispanic communities I urge that that committee and this body promptly take action on this legislation in order that a conference may resolve differences between the Senate and House versions of other titles in the bill prior to adjournment of this body.●

ALASKAN WILDERNESS BILL

● Mr. FORD. Mr. President, I ask that three newspaper articles relative to the Alaska wilderness issue be printed in the RECORD.

The articles follow:

[From the Lexington, (Ky.) Herald, May 30, 1978]

ALASKAN WILDERNESS BILL A CHANCE TO PRESERVE VAST, UNSPOILED LAND

The Alaska wilderness bill now before the Senate deserves all the support Sens. Walter Huddleston and Wendell Ford can give it.

If passed in its present form, the bill will protect 100 million acres. "There will be no greater land-conservation decision made in our lifetime," says Dr. Edgar Wayburn, chairman of the Sierra Club's Alaska Task Force.

It has passed the House but faces stiff cpposition in the Senate. The opposition comes from many Alaskans and the mining and oil industries as well as other business interests.

It is a now-classic confrontation. Environmentalists want to ensure that the land is preserved. Mining and oil people want to be able to go after the natural resources that may be there.

Actually it is not an all or nothing argument. The dispute will be over exactly how much land will be protected and in what ways. The questions involve the amount of land—federal land, by the way—to be set aside in national parks, national forests, wildlife refuges and wilderness areas and which rivers to designate as wild and scenic.

The Senate should approve a bill preserving no less than the House bill does. There is plenty of federal land not included in the bill, sufficient acreage to keep the mining and oil companies busy for years. Furthermore, the lands with the most potential for natural resources have been excluded from the bill.

Alaska's lands provide the nation with an cpportunity to preserve some of the world's largest remaining areas of unspoiled wilderness. Too often in the past, this nation has made the wrong choices when it came to the environment. A drive for more energy shouldn't be allowed to ruin Alaska's wilderness.

Obviously, once the land is spoiled, the opportunity to save it is gone. That's why the Senate should pass the bill. That's why Huddleston and Ford should do their part.

[From the Paducah (Ky.) Sun-Democrat, June 21, 1978]

A BALANCED PROPOSAL FOR ALASKAN LAND

In most disputes over conservation we have urged that a balance be struck between legitimate development interests and the need to preserve some of the native splendor of this country.

In what may be the most important decision on conservation of this generation it seems the balance already has been struck, but many are fighting it. We are speaking of the Alaska Lands legislation now before the Senate.

The House of Representatives has passed a compromise bill designating 102 million acres of Alaska as national parks, national wildlife refuges and wild and scenic rivers areas. These areas would be protected from future development. In addition, another 23

million acres in the North Slope National Wildlife Refuge would be used primarily for oil and gas exploration.

That might sound like an awful lot of land and it is. But one should consider Alaska's huge size; the land in question is only about one-third of the 49th state's total mass.

When admitted to statehood, Alaska was given the right to select for its own use 104 million acres after the federal government designated various parks and refuges (the federal government at one time owned almost the entire state). There is another one million acres in private ownership, and native Alaskans (Indians and Eskimos) are to be given the right to select another 44 million acres for their purposes once the federal government picks the land it wants. The government must make its decision this year.

That still leaves open to development by private interests more than 100 million acres. But various mining, oil and timber interests aren't happy. They want more.

It seems to us these private interests are being a little greedy. Their interests already have been taken into consideration.

Approximately 70 percent of the hard rock mineral deposits in Alaska would be left out of the protected lands, along with 95 percent of the potential oil and gas reserves. Boundaries are drawn in the bill (HR39) so that, whenever possible, the deposits would be left out of the protected areas.

Then there's the fact that the bill would place in conservation many acres that are already federal lands. Nobody is really "losing" anything. People who presently draw their living from the land would be able to continue to do so, at least for a while.

Should there be a national emergency or other reason to develop the land, Congress could change the law. Even as it stands now, there is room for limited development at the discretion of the Secretary of the Interior.

Meanwhile, America will get some truly great national parks if the bill is approved. Among these are the Gates of the Arctic, 8.1 million acres of rugged peaks and valleys in the Brooks range in north central Alaska; Lake Clark, often called the "Switzerland of Alaska" because of its glacier-created lakes, lush vegetation and wildlife; Wrangells-St. Elias, which encompasses most of three mountain ranges and contains 10 of the highest peaks in North America; and a 3.4 million acres expansion of Mt. McKinley National Park.

It seems a good ideas to pass HR 39 pretty much intact. Nobody would lose much and we would be preserving part of this nation's greatest natural heritage. We hope the Senate feels the same way.

[From the Sebree (Ky.) Banner, May 25, 1978]

THE GREENING OF ALASKA

Alaska is a vast piece of real estate. It is appropriate, therefore, that the House Interior Committee has put in a vast amount of time writing a bill that will be fateful for Alaska's future. The full House is now preparing to decide what will become of millions of acres of federal land that still lie virtually untouched in our remote northern state.

Secretary of Interior Cecil Andrus has referred to Alaska as the "crown jewels" of our nation—an apt description of its mountain ranges and forests teeming with wildlife. The jewel box, however, also contains oil, gas, minerals and timber resources which the country needs

Although the issue of an oil pipeline route through Alaska was settled several years ago, echoes of that battle will be heard in the debate on the proposed Alaska National Interest Lands Conservation Act. Again, Congress faces the question of where to draw the line between preservation of unspoiled wilderness and development of natural resources important to the Alaskan economy and the nation as a whole.

Compromises are inevitable, but most of them have been made in the years of deliberation now coming to a head. The bill which emerged from the House committee strikes us as a rational balance between the interests of conservation and jobs, the two forces in a familiar tug-of-war.

The statistics of the Alaska bill are mindboggling. It would expand the state's three national parks and create 10 new ones, increasing park area from 7.5 million to 50.2 million acres. It would add 25.1 million acres to four existing wildlife refuges and create new ones totaling another 25.7 million acres. Segments of 22 rivers would be protected by the National Wild and Scenic Rivers System.

The point of greatest controversy is the designation of 74.2 million acres within those parks and refuges as wilderness, off-limits to any further incursion by roads or other facilities. Significantly, however, none of the known oil, gas and mineral deposits in Alaska is included in the protected areas. The bill does not appear to be "locking up" a significant amount of underground resources.

Alaska provides an opportunity for America to avoid mistakes that were made by previous generations in the rush to settle and develop the pristine wilderness of the "lower 48" states. The bill now before Congress does not affect the 148 million acres placed under state and tribal jurisdiction when Alaska joined the Union, and the fate of that considerable area remains in Alaskan hands. What is at issue is the future of "unreserved federal lands," which are a national heritage. They have come down to us with their desolate majesty unspoiled, and it is now up to Congress to assure that this priceless treasure is passed on to generations yet to come.●

SOLAR POWER SATELLITE PROGRAM—S. 2860

● Mr. GOLDWATER. Mr. President, the future of mankind requires the development of new sources of socially acceptable energy at reasonable costs. I believe America can do the job, and even become a net exporter of energy within one or two generations.

As matters now stand, there are only two real candidates to supply our long-range energy needs: nuclear fusion and solar energy. Because we do not know which of these candidates will be a winner, we need to keep several horses in the race until we see which one can run the fastest.

Where solar energy is concerned, there is a debate on how to tap this limitless source of energy. Some would place collectors on individual buildings and houses. Others advocate solar farms on Earth. For some years now, there have been advocates of solar energy collecting satellites.

While the initial cost of these satellites would be great, so would the yield. Cloud cover and the Earth's atmosphere can greatly reduce the amount of solar energy reaching the Earth. A satellite would capture the Sun's energy nearly 365 days a year and would not be subject to the Earth's atmosphere and day and night cycles. Little maintenance would be required.

For the foregoing reasons, I believe the Department of Energy should get going with a program to demonstrate the capability of a solar energy satellite. I congratulate the Senator from Montana (Mr. MELCHER) for introducing S. 2860 and I ask to be added as a cosponsor.●

AUGUST 21, 1978—10 YEARS LATER

● Mr. BAYH. Mr. President, on August 21 all who are truly committed to the internationally recognized political right of self-determination will observe a most solemn occasion. Ten years ago on that date tanks of the Soviet-dominated Warsaw Pact rumbled into the streets of Prague, Czechoslovakia, and other cities of that country to put down in brutally short order the Czech movement for a more liberal style of socialism. The "Prague Spring" sought to openly accommodate divergent views and honestly debate political differences. It was also based on the proposition that democracy can only thrive when the rights of those committed to peaceful change are protected. However, such a notion of political rights struck at the heart of the Marxist-Leninist dogma that there can be no democracy for those who challenge in any manner the authority of the Communist Party to rule. To the Soviets, such a thought represented a stark, fundamental, and alarming departure from the "traditional" thinking on political "rights."

In asserting the doctrine of the "socialist commonwealth," the Soviet Union was successful in extinguishing the immediate threat to the Soviet-style rule in Czechoslovakia. However, the brutal Soviet aggression and occupation did violate a number of provisions of the United Nations Charter. Specifically, the invasion put the U.S.S.R. in violation of:

First. Article 2, section 1, relating to the sovereignty of a member state of the United Nations;

Second. Article 2, section 4, prohibiting the use of military force in the relations between individual members of the United Nations;

Third. Article 1, section 2, regarding the principle of self-determination of peoples;

Fourth. Article 2, section 7 prohibiting outside intervention in matters essentially within the domestic jurisdiction of any State; and

Fifth. A number of resolutions of the General Assembly of the United Nations, particularly resolution 2131 (XXI) adopted at the meeting of December 21, 1965, upon the Soviet Union's own motion, prohibiting any intervention in the domestic affairs of any state and guaranteeing its independence and sovereignty.

We are reminded at this time that the Soviet invasion not only meant an end to the short-lived resurgence along a path toward restoration of human rights, it also signaled the beginning of the Brezhnev doctrine of the "Socialist Commonwealth" which provided the Soviet Union with the unilateral right to intervene in the internal affairs of another socialist state. In view of such a declaration of "principle" it is particularly interesting that President Brezhnev recently chose Czechoslovakia as the country from which to criticize President Carter for

the administration's proper concern over Soviet-inspired Cuban activities in Africa. Such an exercise pioneered a new concept in the meaning of hypocrisy in international affairs.

However, such hypocrisy and brutality can at most only delay the desire for political liberty by the brave people of Czechoslovakia. The spirit of the charter '77 group affirms once again the determination of the Czech and Slovak peoples to rid themselves of outside political domination. Despite renewed repression by the Husak regime, the memory of the 10-year-old Prague Spring lives on. In an interesting way this particular anniversary recalls the early struggles of the labor movement in this country confronted by adversity and brutality in the quest to realize certain basic human rights. Fortunately, the American system permitted and facilitated such movements and continues to do so today in contrast to countries of the authoritarian right and totalitarian left. However, in the words of that old labor ballad about the "Poet Laureate of the Working Class," Joe Hill, we find a message which might be suited to Czechoslovakia today. Three stanzas for that ballad might be appropriate to recall on this occasion:

I dreamed I saw Joe Hill last night alive as you and me,
Said I, "But Joe you're ten years dead,"
"I never died" says he.
"I never died" says he.

"The copper bosses killed you, Joe
They shot you, Joe," says I.
"Takes more than guns to kill a man,"
Says Joe, "I didn't die."

And standing there as big as life,
And smiling with his eyes,
Joe says, "What they forgot to kill
Went on to organize."

The yearning for freedom in Czechoslovakia is not 10 years dead. It has gone on to organize and as free men and women, we have every right and obligation to lend our voices in support of this most worthy cause.●

A TIME FOR TRUTH

● Mr. HATCH. Mr. President, I would like to bring to the attention of the Senate Hon. William Simon's speech at the annual meeting of the Committee for Monetary Research and Education. This distinguished American points out that we have an unprecedented degree of freedom. We are free to deal in drugs and pornography, criticize our country, and print anything we want. But we are not free to produce. With the Government claiming 40 percent of the national income we are not free to save, invest, or even decide where those confiscated dollars will be handed out. Therefore, Simon points out, we are morally free, but economically dependent.

To what can we attribute this fatal state of affairs? To the Government and its layers of bureaucrats who, acting in the name of humanity, rob productive Americans of their economic freedom. We have created a system whereby those who are productive are punished and those who are not are rewarded. In effect, Simon says, the producing members of this country are no better than slaves or serfs—working hard while others reap their profits. Is this freedom?

I ask that excerpts from William Simon's speech be printed in the RECORD.

The excerpts follow:

A TIME FOR TRUTH

(By William E. Simon)

ECONOMICS: THE BUSINESS OF EVERYDAY LIFE

I would like to share with you some of the thoughts and fears about the direction in which our country is headed and a little about my experiences in Washington. It is the only city I've ever been in where sound travels faster than light. Therefore it defies the conventional wisdom one might have in attacking the problems that we all must attack in our different missions down there.

I found Washington to be, among other things, a very lonely place; lonely, that is, if you choose to attack the conventional wisdom and fight for fiscal and financial responsibility, for individual freedom and for limited government.

Indeed, anyone who wishes to attempt to reverse the disastrous direction that our country is headed in is held to be, at best, a 19th century thinker, a Neanderthal. Yet we must quickly begin to slow down and reverse the drift to the welfare state. This drift, while it may have its own special "Made in U.S.A." label, is still, in Hayek's chilling phrase, the road to serfdom.

I like to look at economics the way Marshall did, as the business of everyday life. It is not a subject that ought to bore you, because, while it is boring you, it is shaping your everyday life. Most people have forgotten, or they never learned or understood, that economic and personal freedom are indivisible. They don't understand that there are two types of threats to our freedoms. One is the quite obvious threat that we have always marshalled our resources and mobilized to repel in the wars. But the other is so insidious that not one in a million recognizes that it is occurring. That is the threat to freedom from the all-pervasive government that is dominating our lives.

Despite all the rhetoric—and I devoutly hope the Proposition 13's of this world signify a trend in this country—nothing has changed yet. The budget remains completely out of control, growing at three and four times the rate of our real gross national product. Government consumes 40% of national income. The federal debt doubled in the past ten years. The American people had to work until May 11 of this year just to pay their federal, state and local taxes before they could begin to keep the fruits of their own labors. Anyone who pays that much of his income for the munificences of this all-powerful government, and who doesn't believe he has lost his freedoms, obviously doesn't understand the problem.

THE FUTURE OF THE SYSTEM

We now have regulations coming out of Washington at a 25% faster rate than just two years ago. These regulations cost approximate $150 billion a year. In a nutshell, goverment domination continues unabated, with inflation dominating our economic affairs. It is ultimately going to destroy our society unless we overcome it.

This is the point that is so difficult to explain. When we speak of inflation and recession brought on by the all-powerful government, we are speaking not of narrow economic issues, but of fundamental issues of equity and social stability. Throughout history, whenever government dominated the economic affairs of its citizens, a free society was eroded and destroyed and a minority government ensued. The most important point to be derived is that the free enterprise system and a free society are indivisible. It is impossible to have a politically free society unless the major portion of its economic resources are operating under the free enterprise system. The real issue in human freedom, recognizing that the future of the system is also the future of a free society.

The question we have to ask ourselves in analyzing our situation here in America is: Are we going to reverse the trend of the last forty years toward a collectivist society or are we going to ignore history and suffer the inevitable fate of all the countries throughout history with all the tragic consequences?

I left Washington a freightened man, as I said in my book. I'm no less frightened today. That is the main reason why I decided to write the book. It is dedicated to my children, meaning all the children of the world, so they could not look back on my stewardship and ask: "Why weren't we told?".

The fact is that we have been told, and we've been told and told again. In attempting to express my fears and support them intellectually with facts and from personal experience, the book goes to a larger point, namely that we in the United States are far down the road to losing our freedoms.

That is a preposterous charge, it is often said by people who receive these warning about declining freedom in America. This is impossible. There is no freer society on earth.

In a sense that it true, but it is immensely deceptive. I agree, there never has been such freedom before: to speak freely, to wag one's tongue to the entire nation, to publish anything and everything, to take drugs, to propagandize for bizarre sexual practices, to watch bloody and obscene entertainment. Conversely, compulsion rules the world of work and there never has been so little freedom in America before to plan, to save, to invest, to build, invent, hire, fire, to resist coercive unionization, to exchange goods and services, to risk, to profit, to grow. Yes, even to fail.

The strange fact is Americans are constitutionally free today to do almost anything our cultural traditions have previously held as immoral and obscene, while the police powers of the state are being invoked against almost every single aspect of the productive process.

PLANNING AND ECONOMIC CHAOS

Some years ago, Arthur Krock, who is retired editor of the Washington bureau of the *New York Times*, wrote that the U.S. merits the dubious distinction of having discarded its past and its meaning in one of the shortest spans in history. In recognizing this truth in writing my book, it became my judgment that the single most important job I could do in the realm of American political life was to make Americans aware of what is happening: that the fundamental principles of American life have been reversed and that we are careening with frightening speed toward collectivism and away from individual sovereignty; toward coercive centralized planning and away from free individual choice. In every case, the bureaucrats, politicians, and the government itself, don't know what they do when they intervene in our economy. The operations of our free market are so incredibly complex that no small group of men can possibly anticipate the effects of their actions. Furthermore, they never do and they never have. They have been engaging in intellectual fraud.

Another important point is that the chaos caused by this ignorant and fraudulent intervention is always remedied by more intervention. Sages in government never admit to the people that they don't know what they are doing. Since Liberals, who dominate our culture, believe in the state as some omniscient god, all failures of state intervention are attributed to insufficient intervention. Yet, the result of piling intervention on intervention creates further chaos and greater economic destruction and a steady and inexorable trend toward state control of all aspects of our lives.

When will we learn that the extraordinary wealth of our nation emerges from the lack of any direction of the economic process; from the lack of economic control; from the lack of state-imposed or so-called national goals. The capitalist miracle occurred in the United States, the most politically free nation in the world, precisely because this explosion of wealth is the unique result of individual liberty.

Today our state is a redistributionist machine which has run amuck and in which a relatively small group of people keep taking the wealth from everybody's pockets to redistribute it for a variety of reasons only they deem important.

Allegedly this redistribution process has humanitarian goals but actually it simply gives a small group of people the power to run the lives of their countrymen. What is actually going on in the process is coercive egalitarianism, the political curse of our era. It pretends to draw its moral force from the Constitution which talks of equality, but it is not equality of the Constitution which is really being sought. Constitutional equality means every man in liberty is entitled to go as far in life as his wit, ambition, desire to work and ability will take him. That is simply equality of opportunity.

Egalitarianism is the precise opposite. It punishes the hard working and ambitious and rewards those who are not. It seeks equality of results regardless of individual differences. One of the most serious falsehoods being told the American people is that our present system represents the Constitutional vision of equality.

REGAINING OUR BALANCE

There is only one way to generate a public awareness of the issues I have listed and to launch a broad challenge of the assumptions and goals presently underlying our political life. It can't and will not emerge from the ruling intellectuals because they have no interest in challenging their own assumptions and goals.

What we desperately need in America today is a powerful counter-intelligencia that will issue the challenges. There are many thousands of authentic intellectuals who are not of the authoritarian breed, who don't aspire to dictate the course of the lives of their fellow citizens. Millions of people in every trade and craft have come to distrust big government and the ruling intellectuals. This powerful group can and must be organized to challenge the so-called "ruling new class." This counter-intelligencia must be dedicated consciously to the political value of individual liberty above all and must understand its relationship to meritocracy. It must be consciously aware of the value of private property and the free market in generating innovative technology, jobs and wealth.

Business would also do well to take up the cudgel and practice free enterprise instead of just preaching it. Funds generated by business have to rush to the aid of liberty where she is beleaguered. Business has to cease the mindless subsidy to colleges' and universities' departments of economics, government and the social sciences that are hostile to free enterprise and whose faculties won't hire scholars whose views are otherwise. Business money should flow away from the media that serve as megaphones for anti-capitalist opinion and to the media that are either pro freedom or at least professionally capable of fair and accurate treatment of pro capitalist ideas, values and arguments. Above all, business, individuals—everyone has to stop asking the government for free goods and services, however desirable and necessary they may seem to be. They aren't free. They are simply extracted from the hide of your neighbors and they can be extracted from you by force.

In these times our balance has been lost, mainly because politicians, for selfish reasons, have misled people into believing the system can deliver more than is being put into it. The pursuit of political favor by these leaders has tilted the balance in favor of narrow, organized concerns at great cost to the questing, productive spirit which gave this nation its momentum. We can regain this spirit and regain the balance and momentum, but it is going to take a lot of straight thinking, and more importantly, a lot of straight talk.

In my judgment, the American who chooses to fight for the sanctity of the individual and for limited federal government, has nothing for which to apologize.●

MINI-CARRIERS FOR THE NAVY

● Mr. BAYH. Mr. President, during the Senate's debate on the Department of Defense authorization bill, I supported amendments which would promote the study and development of alternatives to future large-deck carriers designed to accommodate fixed-wing aircraft which will improve our ability to protect the sea lanes for ourselves and our allies. It is especially important that we carefully examine the probems inlvolved in proceeding in this direction with full knowledge that the large-deck carriers now in inventory should be retained and their missions tailored to protecting the sea-lanes vital to the resupply and replenishment of our ground forces in Europe and elsewhere in the event of an emergency as well as projection of power ashore, where necessary. These considerations led me to support the vertical/short take-off and landing (VSTOL) AV–8B+ Sea Harrier program and oppose the fixed-wing F–18 single-seat Hornet fighter/attack aircraft.

The Soviet submarine and antiship cruise missile threat to the fleet requires us to take appropriate steps to maximize our ability to meet this growing challenge. I am concerned that we take the necessary steps to insure that our Navy continues to be fully capable of fulfilling its important role. Because of this concern, I was especially interested in an article which appeared in the most recent issue of the American Legion magazine by Calvin E. Patton discussing the ARAPAHO concept in basing anti-submarine helicopters and aircraft to provide us with greater numbers of platforms for our ASW efforts. At this time, I ask that this article be printed in the RECORD.

The article follows:

MINI-CARRIERS FOR NAVY?

As dollars and politics point to fewer aircraft carriers and a smaller surface fleet, Navy men are concerned about the reduced number of tactical aircraft—strike, ASW, reconnaissance—that can be deployed at sea.

Their concern grows as they consider Soviet gains and development of KIEV-class and MOSKVA-class aviation ships with helicopter and V/STOL aircraft capability. And it becomes critical when Navy planners study U.S. petroleum imports and the long, vulnerable sea lanes tankers must travel to reach American ports.

A number of alternatives are being studied.

One involves our merchant marine and it makes sense from a cost standpoint. The Navy calls it Project ARAPAHO. It envisions construction of small, modular air facilities—hangars, shops, living quarters, flight decks and fueling provisions—that can be cheaply procured and distributed to Navy and Marine Corps air units at their bases ashore. Individual steel modules are dimensionally identical to the standard 40-foot and 20-foot freight containers in use on railroads and highways throughout the world. Their interiors are modified to support aircraft maintenance, repair and servicing. With a light steel "roof" and doors, they form hangars that can house four or more large helicopters or new, high-performance V/STOL (vertical short takeoff or landing) fighter-attack aircraft. Flight personnel and support crews would live in self-contained modules configured with bunks, heads, galleys, a small dispensary and other facilities. The flight decks, consisting of modular sections of steel grid, are equally mobile, strong enough for most tactical helos and V/STOLS. They could be moved by truck, train or cargo aircraft.

This opportunity to take additional aircraft to sea lies in a revolutionary transition in merchant ship design. Today's modern freighters are the size of Essex and Midway-class aircraft carriers. They steam at 28 to 33 knots and are manned by small crews, as few as 24 persons. They are highly automated, efficient and well-equipped. Newer container ships are virtually free of the topside cargo handling gear that has always precluded serious consideration of aircraft usage. Instead, they offer a vast expanse of open, clear deck. Since container-type cargo ships are already fitted for standard freight containers over main-deck hatch covers, it is relatively simple to design and develop an aviation facility that attaches in the same manner. Planners estimate that an entire, self-sustaining air facility—compatible with container ships, bulk carriers and even huge 500,000-ton tankers—can be installed in less than 24 hours at a total cost of $5 million to $7 million.

Such a capability could permit the United States and its allies to maintain and train air groups at home, yet rapidly deploy them abroad a range of commercial ships. Aircraft would be used for convoy and sea lane defense or mine sweeping. Marine amphibious forces could use merchantmen to deploy "Harrier" V/STOL fighter-attack aircraft. These moves would reduce the burden now imposed on the Navy's few remaining carrier task forces.

The idea is definitely no substitute for the aircraft carrier and the Navy's surface strike forces, but it opens a new range of tactical alternatives. In today's unsettled world, we can't afford to ignore any such alternatives.●

PUBLIC HOUSING AS SEEN BY TENANTS

● Mr. HATCH. Mr. President, many aspects of the lives of lower-income people in this country are directly affected by Government intervention. On major area in which the Government has provided aid is public housing. This area has existed since the depression and as the years have passed its purpose has changed, creating a more negative image than ever before.

There never seems to be any question about the problems of public housing. One needs only to look at slovenly yards and dilapidated houses to see problems. There has not been much dispute con-

cerning the cause of these problems either, but a new study reveals that there should have been. A book entitled "Case Workers or Police? How Tenants See Public Housing" coauthored by Alvin Rabushka and William G. Weissert presents a new view of the problems and their causes—the occupants view.

This book destroys our preconceived notions of what the tenants in public housing want. When we think about public housing we make the mistake of judging that standard of living by our own. We suppose that everyone detests public housing. Many people may, but most of the people who occupy these houses like them. These houses are of a lower standard than our own, but for the vast majority of those who live in them they are of a higher standard than the housing they previously occupied. Public housing is also inexpensive compared to the market prices of regular housing which most tenants of public housing are unable to afford.

Although those occupying public housing have a lower standard of living, their preferences concerning social services are not really different from those of the upper income groups. Rabushka and Weissert base this conclusion in interviews conducted with more than 1,000 tenants of public housing in Wilmington, Calif. These tenants were not surveyed once—they were interviewed repeatedly as different programs were implemented. Rabushka and Weisserts' findings destroy many of our negative perceptions of public housing.

The tenants themselves were both elderly and young, both families and single persons. The image they entertain about public housing is far from negative. Only 1 in 40 elderly persons feels ashamed to live in public housing. Less than 30 percent of the nonelderly find their neighborhood unattractive. In fact, the elderly have virtually no complaints about their apartments, and the families have complaints dealing only with the maintenance of their houses. Both groups complain about security, but neither group has any complaints concerning social services. This would seem to indicate that all the people and money involved in producing social services are operating at their full potential. Rabushka and Weissert prove, however, that the tenants of public housing do not value these social services, so no matter how effectively these resources are utilized they are but another bureaucratic waste.

They found that although the resident services division cut back its staff by nearly three-quarters because the State terminated funds, the tenants exhibited no increasing need for social services. They did, however, continue to demonstrate a desire for security. In compliance with these requests a program was implemented which employed off-duty policemen to patrol public housing for a year. This program had a great effect on the tenants of public housing, as their feelings illustrated when the program was gradually forced out of action due to insufficient funds.

As the police protection tapered off there was a huge increase in the tenants' fear of crime. Fear of drugs and rape tripled, and fear of car theft doubled. Fear of assault, vandalism, and robbery also rose appreciably. With the termination of the security force the tenants were generally less satisfied with their housing and management.

Thus, the tenants of public housing demonstrated a definite need for police, but not one for social services. These tenants were only a small cross section of all the tenants of public housing in this country, so their preferences are not necessarily representative of the preference of all others. Their preferences clearly suggest, however, that the occupants of public housing prefer protection to caseworkers. But the Government prefers to provide "social services" instead of protection. From the standpoint of the occupants, if public housing is to become a success, resources must be allocated differently. More police are needed and less caseworkers.

Rabushka's and Weissert's book points out the fact that those who occupy public housing, like you and I, want protection, not caseworkers and internal interference.●

MR. JACK COHEN

● Mr. MATHIAS. Mr. President, in this day, when cynicism and selfishness seem so prevalent, I never cease to be proud of the good works of Marylanders. Mr. Jack Cohen, of Silver Spring, Md., has been helping poor people in Montgomery County and the District of Columbia for decades.

Although crippled with polio, Mr. Cohen formed a charitable fund in his name 50 years ago, and has since trudged through the streets of Washington, D.C., in search of food, furniture, and clothes for others. He used his talents as a salesman to convince city merchants to donate vegetables and meats to his charity campaign and persuade dry cleaning establishments to turn over to him clothes which were abandoned in their shops. An unfortunate accident now prevents Mr. Cohen from crusading as actively, but he still seeks furniture and clothing donations.

Jack Cohen has received more than 20 awards in appreciation of his years of work for the poor and needy. Among them is the State of Maryland's certificate of distinguished citizenship, and certificates of appreciation from the Maryland House of Delegates and the Knights of Columbus.

It is truly inspiring to know of Mr. Cohen's efforts. His work should serve as a fine example to all citizens.

In order that my colleagues may fully appreciate Mr. Cohen's efforts, I ask that an article which appeared in the Baltimore Afro-American be printed in the RECORD.

The article follows:

[From the Afro-American, Nov. 12, 1977]

JACK COHEN HONORED BY UPO

The mentioning of the name Jack Cohen often brings to the minds of many Washington area residents visions of a person devoted to the services of others.

A man who has, for the past 15 years been partially disabled, Cohen is well known in southeast, northeast and northwest Washington, and in many of the surrounding surburan communities.

Jack Cohen was again honored recently by one of many citizens organizations which recognized him as a person with a "good heart." Last Wednesday, the United Planning Organization's (UPO) Neighborhood Development Center 1, 1336 8th St., N.W. held a citizens appreciation awards night at the Miles Memorial Church.

Cohen was honored for his most recent work collecting and distributing clothing to those in need.

Cohen has, in the past, been honored by the city of Hyattsville, supplied a house full of furniture to a northwest family burned out of their previous dwelling and honored by the Department of Human Resources' Anacostia Project for his "one man crusade" to help the needy.

"We are all human beings," Cohen stated recently, adding, "We must all help each other."

Jack Cohen, along with his parents, came to the United States from Russia over half a century ago. He left school at the age of twelve to help support his family, and worked at a laundry for $3 a week.

Although an unsuccessful fight against polio left him partially crippled years ago, Cohen has over the years appealed to Washington-Maryland area clothing, laundry and warehouse establishments to benefit over 20,000 needy families.

"God has been good to me," Cohen stated following the most recent honoring by UPO. "For 14 years I've worked with the blind and crippled at St. Elizabeths. I care less about race, nationality or religion. We're all God's children."

Cohen now uses a support to get around. He insists that he will continue to work to help those who need assistance. When asked what keeps him going, Jack Cohen does not hesitate to say what he believes the contributing factor to his continued work.

"I never smoked in my life. I never drank in my life," he stated, then repeated a statement that has become a phrase often uttered by the "man with a heart:"

"God has been good to me," Jack Cohen, active citizen, concluded.●

U.S. VISA POLICY

● Mr. McGOVERN. Mr. President, on July 26 the Senate dealt a potentially serious blow to our human rights efforts abroad by moving to restore the requirement that the Secretary of State must decide on a waiver whenever a member of a Communist party applies for a visa to visit the United States. We effectively dropped that obstacle in 1977 when the Congress accepted my amendment as a step to conform our own practices to the freedom of travel emphasis of the Helsinki Final Act. After just 1 year the Senate has now accepted an alternative amendment that amounts to backtracking on our own human rights standards. The matter will come up next in a Senate-House conference which will be meeting tomorrow to resolve the differences between the two versions of the security assistance bill.

In my view the recent Senate action was ill-considered. We acted in the charged atmosphere that understandably followed the Shcharansky and Ginzburg trials in the Soviet Union. But we chose a completely inappropriate and self-defeating method of demonstrating

our displeasure toward the Soviets' sorry approach on human rights.

The nature of that mistake is described most succinctly in today's New York Times in a column by Mr. Daniel Yergin, a lecturer at the Harvard Business School. He points out, among other things, that the Senate amendment—

Would re-erect a barrier to increased contacts, undercutting American credibility and indeed our claim to the very Helsinki principles from which we argue.

Mr. Yergin further notes that while the recent Senate action was aimed at the Soviet Union, it will fall most heavily on members of the more flexible Western parties who will likely be excluded, thus undermining our relations with the European left at a time when we should be seeking to increase their exposure to our values.

Because I regard it as an extremely useful and helpful analysis of an issue before the Congress, I ask that the column I have described be printed in the RECORD.

The column follows:

LETTIN' IN THE COMMIES

(By Daniel Yergin)

PARIS.—It is not surprising that the recent show trials in the Soviet Union have stimulated Congress to look for appropriate responses. But those responses should be chosen with care. For actions generated in a burst of self-righteousness could end up advancing Soviet interests at the expense of America's.

That certainly would be the paradoxical result of a little noticed amendment added by Senator Howard Baker to the military-assistance bill. Given its intent, the amendment could end up providing Moscow with a powerful propaganda victory.

The Baker amendment concerns visa policy for visitors to the United States, which may sound like a rather technical matter. In this case, it is not. It is of primary political importance.

Until 1977, a legislative relic of the McCarthy era made it very difficult for foreign Communists to visit the United States. They were not allowed in unless the State Department requested a special waiver. A Leonid Brezhnev could always get in, could even get invited to the House. But not the Italian or Spanish Communists who had publicly criticized his doctrine—and his regime. It was odd—the rigid ruling Communists could visit but not the non-ruling Western Communists somewhat closer to Western pluralist values. This was changed in 1977 with passage of the McGovern amendment, which permitted Communists to enter on the same basis as other visitors, unless the State Department requested otherwise.

But now comes the Baker amendment, which would effectively revoke the McGovern amendment and return to the former restrictive practice. The Baker amendment was passed two weeks ago by the Senate, with the A.F.L.-C.I.O's support, and is scheduled for discussion in a Senate-House conference committee tomorrow.

Howard Baker explains that his amendment would be a "visible reminder to the Soviet Union" of American concern about repression. But much of this concern is couched in terms of the Helsinki agreement, which is supposed to promote increased contacts between peoples and ideas, East and West. Yet the amendment would re-erect a barrier to increased contacts, undercutting American credibility and indeed our claim to the very Helsinki principles from which we argue.

The amendment would also unnecessarily complicate the conduct of our foreign policy. Each decision on each application by Communists would be read as a political statement in his home country. Granting a visa would be seen as a form of approval; rejection, as a sign of unmitigated hostility; either way, the decision would embarrassingly end up on the front pages of local newspapers. The resurrection of the barrier would be regarded as offensive in Western Europe, not only by Communists but by Socialists, centrists, even by some conservatives—fulfilling old stereotypes about McCarthyism.

While the amendment is supposedly aimed at the Soviet Union, its most ill effect would be on our relations with those Western European countries where the left—composed variously of Communists and Socialists—is strong and could become stronger if there is no economic recovery.

Italy is the most obvious and important example. Its Communist Party, representing about a third of the electorate, is, along with the Christian Democrats, one of the two key parties in the parliamentary majority that runs the country. Virtually everyone who has examined the question agrees that the party has been evolving away from the Soviet model, from Stalinism. Considerable disagreement exists even among the most informed analysts as to how far, sincere, and deep—and how beneficial—that evolution is. We should want to find out. We should want to increase communication, without having each exchange appear to be graced with our seal of approval. No purpose is served by excluding Italian and other Western Communists. It will not lose them votes, and may well win them some. The amendment would hardly keep out genuinely subversive elements.

Western European Communists should have the opportunity to see American society as it is. Their vision of America has been doubly distorted—first by our habit of being the most self-critical society in the world, then refracted yet again through the ideological prisms of the left. Many, though not all, in the Italian Communist Party are deeply curious about the United States. To exclude them is to deny one possible influence on the evolution of their party, and to strengthen the position of the Stalinists and, in so doing the hand of the Soviet Union itself.

We have nothing to fear from letting Western Communists make the comparison themselves between the realities of Soviet and American societies, and perhaps even something to gain. This will be better done through a normalized visa process, and not through the self-defeating mechanism of the Baker amendment, which would turn each application, at the very least, into an awkward Federal case.●

LNG TRANSPORT NEEDS NEW SAFETY STANDARDS

● Mr. KENNEDY. Mr. President, I would like to call the attention of my colleagues to an article in the August 7 edition of the New York Times, "Liquid Propane Tank Car Derails and Explodes Near Illinois Town." It describes an accident in which a railroad car carrying liquefied petroleum gas (LPG) exploded, injuring two bystanders and forcing the evacuation of 200 people.

I have long been concerned about the potential danger to the public posed by unsafe handling of hazardous materials such as LPG and liquefied natural gas (LNG). In fact, the Office of Technology Assessment, for which I serve as chairman, reported last September that rigorous new safety standards are needed for LNG transport, particularly in vessels. More recently, I was shocked to read in a July 31 General Accounting Office report that present standards for safe transport of liquefied energy gases in ships, trucks, and trains are vastly inadequate.

Last week, I asked the Secretary of Transportation to come up with a series of firm new safety standards governing the safe transport of hazardous cryogenic materials. I am awaiting his reply.

The accident which occurred last Sunday in Collinsville was not an isolated incident. According to the GAO, LPG cars are involved in many of the 10,000 rail accidents which happen in this country each year. About 10 percent of our 1.7 million freight cars carry hazardous materials. This most recent LPG accident only hinted at the potential damage an LPG explosion could cause. When an LPG railcar was punctured in a 1974 accident in Decatur, Ill., the resulting explosions killed 7 people, injured 349, and wreaked $24 million in damages.

I hope that every member of Congress will take an interest in this vital matter of public safety. Without objection, I ask that the New York Times article be printed in the RECORD.

The article follows:

LIQUID PROPANE TANK CAR DERAILS AND EXPLODES NEAR ILLINOIS TOWN

COLLINSVILLE, Ill., Aug. 6.—About 200 residents were evacuated from their homes early today because of an explosion and fire in a derailed railroad tank car carrying liquid propane gas.

Two persons were injured, one of them seriously, in the explosion a few minutes before midnight north of the city limits. Flames were visible as far as 30 miles to the west across the river in St. Louis County.

The authorities evacuated residents from nearby homes for fear that three other derailed cars containing propane would explode. No serious property damage was reported, although several homes are within a few hundred feet of the railroad tracks. A number of trees caught fire and were extinguished by firemen. The cause of the derailment was under investigation.

Firemen stood by during the day and let the contents of the tanker burn out. They hoped to prevent three other derailed tank cars from rupturing by pouring water on them to keep them cool.

5 TANK CARS WITH GAS

The authorities said five tank cars carrying the propane gas were among the 69 cars of the train. One tanker exploded and three others turned on their sides but did not explode. The fifth tanker remained upright.

The explosion injured the two occupants of a pickup truck stopped at a crossing. Wilburn Alford, 37 years old, of Troy was hospitalized with burns and was reported in serious condition. Another occupant of the truck, Gina Pendleton, 17, was released from a hospital.

The train was operated by the Illinois Terminal Railroad, which handles switching operations on the Illinois side of the St. Louis area.

The General Accounting Office said last week in a report to Congress that trains and trucks carrying liquefied natural gas. propane or butane should be banned from highly populated areas because accidents or sabotage could cause disasters.

On July 11, a truck carrying liquid propylene gas overturned and exploded in Spain, killing at least 170 people and injuring 150.●

GAO REPORT ON FEDERAL FUNDING FOR BARNWELL NUCLEAR FUEL PLANT

Mr. THURMOND. Mr. President, on July 25 of this year, the General Accounting Office released a report entitled "An Evaluation of Federal Support of the Barnwell Reprocessing Plant and the Department of Energy's Spent Fuel Storage Policy." The GAO was requested to prepare this report by Senator GLENN, chairman of the Energy, Nuclear Proliferation and Federal Services Subcommittee on the Committee on Governmental Affairs.

The report specifically concludes that Congress should continue to fund short-term research at Barnwell until the international study on alternative fuel cycles is completed. The International Nuclear Fuel Cycle Evaluation (INFCE) is a 2-year, 40-nation study initiated by the administration to evaluate alternative fuel cycles which will reduce the danger of nuclear proliferation. Congress, in appropriating $12 million for research at Barnwell in fiscal year 1978, directed that the results from that program be input into the INFCE.

The GAO report supports continued funding for Barnwell because this course of action would keep the facilities and key people available in the event the United States decides, as a result of the INFCE, that some method of reprocessing is consistent with nonproliferation concerns. If funding is not provided for research so that this unique, modern facility may remain in operational status, the owners of the plant may be forced to "mothball" their entire operation.

While the plant could be brought from mothballed to operational status, the GAO report states that this would probably take about 4 years and cost between $75 million and $115 million. Recently, in hearings held by the Energy, Nuclear Proliferation and Federal Services Subcommittee, Senator GLENN informed Deputy Secretary of Energy John O'Leary that he wanted the Barnwell facility alive at the time the INFCE releases its results.

Mr. President, aside from simply keeping this plant in operational status, continued funding for Barnwell for research is a good investment and is producing results. Recently, I announced on the floor of the Senate a technological breakthrough achieved through the Barnwell R. & D. program for fiscal year 1978. The very talented staff there has developed a method of making the nuclear fuel cycle less susceptible to the threat that terrorist groups will be able to fashion crude nuclear explosives from the end products of that cycle. This new fuel cycle has been submitted to the INFCE for further evaluation.

On Monday of this week, the Appropriations Committee approved $18.5 million for fiscal year 1979 research at Barnwell. I urge my distinguished colleagues in the Senate to support continued funding for this unique facility, and I recommend to them the recent GAO report which supports my position on this matter.

Mr. President, I ask unanimous consent that the parts of the GAO report evaluating Federal funding for Barnwell Nuclear Fuel Plant be placed in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

AN EVALUATION OF FEDERAL SUPPORT OF THE BARNWELL REPROCESSING PLANT AND THE DEPARTMENT OF ENERGY'S SPENT FUEL STORAGE POLICY

In April 1977 the President deferred indefinitely the commercial reprocessing of nuclear spent fuel to (1) minimize the availability of plutonium and (2) reduce the risks of nuclear weapons proliferation. To carry out the policy, the President proposed that neither Federal funding nor support should be given to complete a large commercial reprocessing facility being constructed at Barnwell, South Carolina. Later in 1977 the Department of Energy announced that the Federal Government would, at some unspecified future date, begin accepting and taking title to spent nuclear fuel that previously was to be reprocessed.

GAO concludes that (1) Federal funding of short-term research activities at the Barnwell reprocessing plant should continue until the completion of a major international study of alternative fuel cycle technologies and (2) the Department of Energy should not build a Government financed spent fuel storage facility until other alternatives are fully explored and the work of an interagency task force on waste management is completed.

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, D.C.

Hon. JOHN GLENN,
Chairman, Subcommittee on Energy, Nuclear Proliferation and Federal Services, Committee on Governmental Affairs, U.S. Senate.

DEAR MR. CHAIRMAN: In response to your requests of November 22, 1977, and January 3, 1978, here are the results of our evaluation of the Barnwell reprocessing plant and the Department of Energy's spent fuel storage policy. As both topics are outgrowths of the President's April 1977 policy decision to defer indefinitely the commercial reprocessing of spent nuclear fuel, we decided to respond to the two requests in one report. This report, as we agreed with your staff, will be available for unrestricted distribution.

We provided selected officials of the Department of Energy and the Nuclear Regulatory Commission an opportunity to review a draft of this report. Their oral comments have been incorporated in the report as we believe appropriate.

The report contains recommendations to the Secretary of the Department of Energy on page 23. As you know, section 236 of the Legislative Reorganization Act requires the head of a Federal agency to submit a written statement on actions taken on our recommendations to the House Committee on Government Operations and the Senate Committee on Governmental Affairs not later than 60 days after the date of the report and to the House and Senate Committees on Appropriations with the agency's first request for appropriations made more than 60 days after the date of the report.

Sincerely yours,

ELMER B. STAATS,
Comptroller General of the United States.

COMPTROLLER GENERAL'S REPORT TO THE SUBCOMMITTEE ON ENERGY, NUCLEAR PROLIFERATION AND FEDERAL SERVICES, COMMITTEE ON GOVERNMENTAL AFFAIRS, U.S. SENATE

DIGEST

For many years, the Government and utilities assumed that spent nuclear fuel from commercial reactors would be routinely reprocessed to separate the nuclear wastes and recover the residual uranium and plutonium. The radioactive wastes would be concentrated, packaged, and turned over to the Federal Government for disposal while the uranium and plutonium would be used again to fuel either light water or breeder reactors.

In April 1977, however, the President announced a new policy on nuclear power which deferred indefinitely the commercialization of technologies that reprocess or depend on the recycle of plutonium. The reason for the policy was to reduce the availability of plutonium and to minimize the risks of nuclear weapons proliferation.

To carry out the policy, the President has proposed to indefinitely defer the development of the Liquid Metal Fast Breeder Reactor and has said that Allied-General Nuclear Services, Inc., would not receive either Federal funding or support to complete a large commercial reprocessing facility being constructed at Barnwell, South Carolina.

Later in 1977 the Department of Energy announced that the Federal Government would, at some unspecified future date, begin accepting and taking title to spent nuclear fuel from utilities that previously was to be reprocessed. Under this policy, spent fuel from utilities would be accepted upon payment of a one-time fee. The fee would cover the full cost to the Government for interim storage and final disposal of the spent fuel.

FEDERAL SUPPORT OF THE BARNWELL REPROCESSING PLANT

Barnwell is the first large-scale commercial reprocessing venture in the United States. It is designed to reprocess 1,500 metric tons of spent reactor fuel per year. The Nuclear Regulatory Commission approved construction of some of the facilities before 1970 and three of the five major facilities at the complex are essentially complete.

Allied-General has already invested about $250 million in the Barnwell complex. A recently completed Department study on alternative uses at Barnwell estimates that before the plant could operate continuously at design capacity, an additional capital investment of $380 million to $585 million would be needed. It is possible, however, that spent fuel could be reprocessed prior to the completion of the entire complex.

Barnwell, as well as other reprocessing plants here and abroad, separates spent fuel into almost pure streams of uranium and plutonium. The Administration considers this unacceptable from a nuclear weapons proliferation standpoint and has taken initiatives to study, along with other countries, alternative fuel cycles and methods of reprocessing that might prevent proliferation. Until this international study is complete, Allied-General has said there is very little it can do to complete the Barnwell facility.

The President's decision to indefinitely defer commercial reprocessing reflects a major change in the Federal attitude toward Barnwell. While the Government did not provide any direct financial support to Allied-General, it created—through its previous policies and programs on nuclear power—an atmosphere favorable to reprocessing. The former Atomic Energy Commission, for example, offered verbal encouragement to Allied-General, provided it access to reprocessing technology, and sold it land on which to build the reprocessing complex. Likewise, the Nuclear Regulatory Commission, while imposing strict requirements, had not previously given Allied-General reason to believe that reprocessing and recycling activities could not eventually meet safety and environmental licensing criteria.

Faced with the withdrawal of official Government support for conventional reprocessing and the termination of licensing proceedings, Allied-General's position was improved—at least temporarily—when Congress required the Department of Energy to

spend $13 million of its fiscal year 1978 research budget at Barnwell. Congress said, however, that the work at Barnwell should be consistent with the Administration's nonproliferation objectives and that the money not be used to further prepare the plant for reprocessing. In addition, committees in both houses of Congress have tentatively added between $13 million and $18 million to the Department's current budget request to continue work at Barnwell through fiscal year 1979.

The Department, after receiving the money from Congress, contracted with Allied-General for several studies and research activities relating to (1) spent fuel transportation, receiving, handling, and storage; (2) security and safeguards; and (3) alternative fuel cycles. The Administration believes this work duplicates other research efforts and should not be continued. GAO, during its review, discussed this with Department officials. Generally, high-level management agreed with and even helped develop the Administration's position. Other staff levels, however, do not believe that the work at Barnwell is duplicative but recognize that the Department should do a better job of matching any future work to its program objectives.

If Congress agrees with the Administration's position and discontinues funding, Allied-General has said that it will decrease operations and consider putting the plant in a mothballed status. While the plant could be brought from mothballed to operational status at some future time, the Department estimates that it would take about 4 years and cost between $75 million and $115 million. It is also an option, according to Allied-General, that it would eventually dismantle the plant and take legal action to recoup its losses from the Federal Government. In any event, the lack of continued Government funding is likely to result in the termination of some or all activities at the plant and the loss or transfer of people key to the reprocessing operation.

If funding is continued by the Congress, money could be used to continue research activities, assist in the development of other facilities at the plant, expand the onsite spent fuel storage facility, or purchase Barnwell for use either as a national or international fuel cycle center. The Administration believes, however, that such funding would hinder its international nonproliferation objectives and cause other countries to doubt the U.S. commitment to the deferral of commercial reprocessing technologies.

GAO believes that the Congress should continue to fund short-term research studies at Barnwell until the completion of the international study on alternative fuel cycle technologies. This will keep the facilities and key people available in the event the United States decides, as a result of the study, that some method of reprocessing is consistent with its nonproliferation objectives.

GAO believes, however, that it is important that the Department not wait on congressional initiatives to plan work at Barnwell and make it compatible with existing programs. Also, GAO emphasizes that this should be a short-term option only. If, at the completion of the international study, the Administration maintains its current policies, GAO would recommend that the Congress terminate its funding initiatives. At that time it would be Allied-General's decision to either maintain or reduce the operating status at Barnwell.

CHAPTER 1

Introduction

For many years, the Government and utilities assumed that spent nuclear fuel from commercial reactors would be routinely reprocessed to separate the nuclear wastes and recover the residual uranium and plutonium. The radioactive wastes would be concentrated, packaged, and turned over to the Federal Government for disposal while the uranium and plutonium would be used again to fuel either light water or breeder reactors. This was desirable as a means of conserving fuel and because it was considered more cost effective to recover the uranium and plutonium than to dispose of the spent fuel as nuclear waste.

By the mid-1970s, however, the attitude toward commercial reprocessing was beginning to change. Some studies predicted that existing uranium supplies would last until at least the end of the century; the high cost of commercial reprocessing raised questions about the benefits of reprocessing except to fuel advanced breeder reactors; a Federal court prohibited the interim licensing of facilities that use plutonium until a rulemaking proceeding on environmental issues was completed; Nuclear Fuel Services, Inc. closed down its small commercial reprocessing operations in West Valley, New York; and during October 1976 President Ford decided to delay commercial reprocessing in the United States until uncertainties regarding nuclear weapons proliferation were resolved.

New Nuclear Policy

On April 7, 1977, President Carter announced a new policy on nuclear power which deferred indefinitely the commercialization of technologies that reprocess or depend on the recycling of plutonium. This was done to limit the spread of these technologies to other countries and to minimize the further proliferation of nuclear weapons. The key points of the policy were to increase support for current light water reactors and the once-through fuel cycle but to defer further development and support for the liquid metal fast breeder reactor and the reprocessing plants needed to fuel it with plutonium.

To carry out the policy, the President has proposed to terminate the construction of the Clinch River Breeder Reactor and has said that Allied-General Nuclear Services, Inc., would not receive Federal funding or support for completing a large commercial reprocessing facility being constructed at Barnwell, South Carolina. Last year, the Department of Energy (DOE) announced that the Federal Government would, at some unspecified future date, begin accepting and taking title to the spent nuclear fuel that previously was to be reprocessed and which is accumulating at reactor sites. The intent of DOE was to store spent fuel until either a decision on reprocessing is made or geologic disposal is available. Under this policy, spent fuel from utilities would be accepted upon payment of a one-time fee. The fee would cover the full cost to the Government for interim storage and disposal of the spent fuel.

Previously, we have prepared two reports which have application toward the new nuclear policy and the spent fuel storage and disposal policy. The first report examined the problems of safely disposing of hazardous radioactive wastes including spent fuel elements.[1] The report concluded that it may be optimistic to expect a repository by 1985 because of social, geological, and regulatory obstacles. The second report evaluated the Administration's proposed nuclear nonproliferation strategy.[2] It recommended that Congress not authorize funds to commercially demonstrate or to commercialize reprocessing technology until alternatives are evaluated. On the other hand, the report recognized the continued need for a viable research and development program for nuclear fuel reprocessing. Also, it recommended that Congress be consulted before the United States announces any policy, concerning the return of foreign spent fuel or participation in international spent fuel storage centers.

Scope of Review

During our review, we evaluated a DOE contract with Allied-General Nuclear Services, Inc., in Barnwell, South Carolina. The contract provided for studies of spent fuel transportation, receipt, handling, and storage. We reviewed the options available for the Barnwell facility in light of the new nuclear policy.

We also evaluated the domestic storage aspect of DOE's spent fuel storage and disposal policy. We reviewed the present spent fuel situation in the United States to determine if there is a storage problem and we examined the alternative strategies being considered by DOE to resolve the problem.

The following chapters highlight our evaluation of each of these areas as well as our observations on related matters. Comments from selected officials of DOE and the Nuclear Regulatory Commission (NRC) have been incorporated and in the report as we believe appropriate.

CHAPTER 2

Federal support of the Barnwell reprocessing plant

Allied-General Nuclear Services, Inc. has partially constructed a large nuclear fuel reprocessing complex in Barnwell, South Carolina. If completed, this plant, known as the Barnwell Nuclear Fuel Plant, would chemically separate the plutonium and unused uranium in spent nuclear fuel so it could be recycled and used again in current or future generation commercial powerplants.

On April 7, 1977, however, the President announced that due to the risks of worldwide nuclear weapons proliferation, the United States would indefinitely defer reprocessing and the recycling of plutonium. In response, NRC terminated licensing proceedings for Barnwell and all work toward completing the complex was stopped. In the interim, the United States has taken initiatives to (1) study alternative fuel cycles and methods of reprocessing that might be more acceptable from a proliferation standpoint and (2) seek an international consensus on the ways to minimize the proliferation risks associated with reprocessing.

Allied-General, faced with the loss of its $250 million investment, believes that it should receive Federal support at least until national and international studies on alternative fuel cycles are complete and the U.S. position on reprocessing is finalized. Congress, apparently in agreement with Allied-General, required DOE to spend up to $13 million of its fiscal year 1978 fuel cycle budget at Barnwell. This is enough, according to Allied-General, to maintain the current staffing and operating levels at the plant through September 1978. In addition, Congress provided DOE with $1 million to study potential uses for Barnwell that would be consistent with this country's nonproliferation objectives. Also committees in both houses of Congress have tentatively added between $13 million and $18 million to continue work at Barnwell through fiscal year 1979.

A $13 million cost type contract was awarded in January 1978 to Allied-General. The Administration and DOE believe that this and any future work at Barnwell will be only marginally beneficial in the near term. Additionally, the Administration believes that continued congressional funding of Barnwell could cause other countries to doubt this country's commitment to its nonproliferation objectives and refuse to fol-

[1] Nuclear Energy's Dilemma: Disposing of Hazardous Radioactive Waste Safely, September 9, 1977 (EMD-77-41).

[2] An Evaluation of the Administration's Proposed Nuclear Non-Proliferation Strategy, October 4, 1977 (ID-77-53).

low our leadership in restricting the widescale recycling of plutonium.

The remainder of this chapter provides a history and status of Barnwell and discusses present and future funding arrangements for the complex.

History and Status of Barnwell

Barnwell is the first large-scale commercial reprocessing venture in the United States.[1] It is designed to reprocess 1,500 metric tons of spent reactor fuel per year and, if completed, would consist of five major facilities: (1) a spent fuel storage facility capable of storing between 400 and 750 metric tons of spent fuel; (2) a separations facility which chemically processes spent light water reactor fuel assemblies into liquid uranium, liquid plutonium, and liquid waste; (3) a uranium hexafluoride facility which converts the liquid uranium into uranium hexafluoride for re-enrichment by the Government; (4) a plutonium conversion facility to convert the liquid plutonium to an oxide and store it for eventual use as a light water reactor fuel or in breeder reactors; and (5) a waste solidification facility to solidify the liquid wastes and temporarily store them before shipment to a permanent repository.[2]

NRC approved construction of some of the facilities before 1970 and the spent fuel storage, separations, and uranium hexafluoride facilities are now essentially complete. Conceptual designs have been partially prepared for the plutonium conversion facility and waste solidification plant, but these are unproven parts of a reprocessing complex and have not yet been submitted for NRC review. More importantly, Allied-General does not believe that either of these two facilities can be built and licensed in today's environment without extensive involvement and funding by the Federal Government. It believes that such facilities should first be built and operated by the Government as large-scale demonstration projects.

In a previous report on the Administration's nuclear nonproliferation strategy (ID-77-53, October 4, 1977), we reported that prior to the President's April 1977 policy statement, the Energy Research and Development Administration (now part of DOE) had studied the problems of waste and plutonium solidification and requested authorization of $30 million to begin the design of commercial-sized waste solidification and plutonium conversion facilities. There was speculation at the time that these plants would have been constructed at Barnwell and that the total complex would have been used to demonstrate, under tightly controlled conditions, the various technical, economic, and safeguards uncertainties of reprocessing. With the President's policy statement, however, these plans were dropped and the request for authorization of $30 million was withdrawn.

Allied-General has already invested about $250 million in the Barnwell complex. The recently released $1 million DOE study on alternative uses of Barnwell estimates that before the plant could operate continuously at design capacity, an additional capital investment of $380 million to $585 million would be needed. This includes the cost to design and construct the remaining two facilities. It is possible, however, that spent fuel could be reprocessed (or chemically separated) prior to the completion of the entire complex.

Licensing requirements would have permitted the separations facility to operate for 5 years before a waste solidification plant is available. Because plutonium cannot be shipped in liquid form, this would have to be stored at Barnwell until the necessary facility is completed.

Barnwell and the Administration's Attitude Toward Reprocessing

Barnwell, as well as other reprocessing plants here and abroad, separates spent fuel into streams of almost pure uranium and plutonium. The Administration considers this unacceptable from a nuclear weapons proliferation standpoint and has taken initiatives to study alternative fuel cycles and methods of reprocessing that might prevent proliferation.

The major study is the International Nuclear Fuel Cycle Evaluation (INFCE)—a multinational study of alternative fuel cycles that is aimed at minimizing the danger of nuclear weapons proliferation without jeopardizing energy supplies or the development of nuclear energy for peaceful purposes. There are 50 participating nations in the INFCE study, but the United States is the main contributor and will have a major technical input to the study results. While this study will not commit any nation to a specific course of action, it is viewed by this country to be very important to the future direction of nuclear energy programs, both here and abroad. It is investigating the full range of nuclear problems and could result in a consensus on the future role of peaceful nuclear energy.

In technical support of the INFCE study, the United States has also initiated the Nonproliferation Alternative Systems Assessment Program (NASAP). This is a major review and analysis of a wide variety of reactors and reactor fuel cycle systems, emphasizing the proliferation risks of each but also considering their safety and their technical, environmental, and commercial feasibility. The specific focus of both of these studies is to identify fuel cycle or reprocessing alternatives which will combine superior proliferation resistance with effective use of uranium resources.

These studies are scheduled to be completed in late 1979, and until then Allied-General has said there is very little it can do to complete the Barnwell facility. The President has indefinitely deferred commercial reprocessing and recycling of plutonium in this country, and he has said that the Barnwell plant would not receive either Federal encouragement or funding for its completion as a fuel reprocessing complex.

In addition, NRC, in consideration of the President's policy, has terminated all licensing proceedings at Barnwell and said it will not consider reopening them until after these major studies are completed.[1] NRC justifies this decision by noting that

Continued licensing could lead other nations to question the U.S. commitment to defer commercial reprocessing and plutonium recycle,

Congressional actions appear to support the President's nonproliferation objectives and policy on plutonium recycling,

Previous court decision and existing regulations give the Commission broad authority to terminate licensing proceedings, and

Final environmental and safety considerations cannot be completed until the INFCE and NASAP studies are completed and all viable alternatives to plutonium recycling are known and evaluated.

These policies reflect a major change in the Federal attitude toward Barnwell. While the Government did not provide any direct financial support to Allied-General, it created—through its policies and programs on nuclear power—an atmosphere

* * * * *

$1 million study commissioned by Congress (1) did not define a single reprocessing related activity that could be done at Barnwell that would aid the present U.S. nonproliferation effort or (2) find any support for changing the decision not to support the completion of Barnwell as a reprocessing facility;

Funding of Barnwell could seriously damage U.S. leadership in general, and the U.S. position in the INFCE study; and

Existing DOE fuel cycle and safeguards wasteful to duplicate these programs at Barnwell.

While this is an extremely strong position and leaves no doubt about where the Administration stands, it fails to recognize two important considerations. First, does the Federal Government have any responsibility to the developers of Barnwell, considering the encouragement given to start a commercial reprocessing industry? Second, will the other nuclear developing countries follow the U.S. lead on proliferation and stop or defer their reprocessing programs? Early indications are that—even with a total U.S. commitment—other countries view the development of breeder technologies and reprocessing as vital to their economic stability, and may not be willing or able to follow the U.S. lead. For instance, Japan, France, West Germany, United Kingdom, and the Soviet Union all have ongoing breeder reactor development programs as well as planned or operating reprocessing facilities. They have not, as of yet, indicated a desire to discontinue these programs.

The Value of Work at Barnwell

Before the President's announcement on the deferral of reprocessing, Barnwell was a commercial facility in the process of being licensed. Therefore, DOE had not developed any plans to use Barnwell for research and development. When money was provided by Congress in August 1977, a program was developed rather quickly to spend the appropriated money before the close of the 1978 fiscal year. On January 12, 1978, a contract was awarded (without profit or fee) to Allied-General with a cost ceiling of $13 million. Included in the contract were studies and research activities relating to (1) light water reactor spent fuel transportation, receiving, handling, and storage; (2) security and safeguards; (3) alternative fuel cycles; and (4) maintenance and mothballing of the facility. According to DOE officials, much consideration went into developing a contract effort to insure it was consistent with authorizing legislation and would not further prepare the plant for reprocessing.

There are some differences of opinion, however, on the value of the work at Barnwell. As mentioned previously, the official Administration position is that the work at Barnwell duplicates other DOE research efforts. High-level DOE management agreed with this assessment and even helped develop the Administration position. Other DOE staff levels, however, do not believe the work is duplicative but recognize that if money is again provided by Congress in 1979, DOE should do a better job of matching the work to its program objectives.

Potential Uses of Barnwell

At the same time the Congress appropriated the $13 million for Barnwell, it also provided $1 million for DOE to study potential uses for Barnwell that would be consistent with U.S. nonproliferation objectives. The results of this study, issued in April 1978, concluded that in addition to

[1] A much smaller commercial reprocessing plant at West Valley, New York, operated between 1966 and 1972. It terminated operations when its owners were unable to economically justify plant modifications necessary to meet new licensing requirements. About 640 metric tons of spent fuel were reprocessed at this plant during its operation.

[2] DOE estimates that a permanent Federal respository for high-level nuclear waste will not be available until at least 1988.

[1] With the exception of the spent fuel storage facility.

reprocessing spent reactor fuel, Barnwell could be used in the short-term to

*—train national and international safeguards and security inspectors and fuel cycle operators;

*—conduct research, development, and demonstration on more proliferation-resistant fuel cycle technologies; and

*—store domestic or foreign spent fuel.

Longer term options include using Barnwell (1) to reprocess spent fuel in ways that do not involve the separation of pure plutonium, such as coprocessing or spiking,[1] (2) as a model for the establishment of an international fuel cycle center, or (3) to reprocess spent fuel from a Government-owned reactor at Richland, Washington. According to DOE's report, these options depend on the Administration deciding that some form of reprocessing can meet this country's nonproliferation objectives.

Barnwell is the only large-scale reprocessing plant in the United States and has not yet been contaminated by nuclear material. Therefore, it could be useful for conducting plant in the United States and has not ties. A DOE official said, however, that there were other less costly ways of conducting research and that the large annual operating costs at Barnwell prohibit DOE from efficiently using it solely as a research and development facility.

If continued Government funding or support is not provided at Barnwell, it is probable that Allied-General will choose to mothball or eventually dismantle the facility. Annual operating costs at the current level of activity are about $19 million and Allied-General has said that it cannot continue this expenditure for very long without Federal support.

Mothballing could be a viable option in certain situations and was considered by DOE in its $1 million study. In effect, the plant would be closed but maintained in some degree of standby condition. This would give time to make decisions on the future of reprocessing without seriously jeopardizing the operability of the plant. DOE has estimated that 18 months and $15 million would be needed to put the plant into a mothballed status. Annual maintenance costs would then range from $3 million to $4.5 million.

Later, if decisions are favorable toward reprocessing, the existing facilities could be brought from mothballed status to operational status in about 4 years at a cost estimated between $75 million and $115 million. Allied-General, however, still believes that reprocessing can be a profitable commercial venture if decisions are made quickly on such pivotal problems as coprocessing and waste disposal and if the Government assists in the development and demonstration of plutonium and waste solidification. Therefore, Allied-General is attempting to keep key people at Barnwell and maintain the plant in a ready state in the event the INFCE and NASAP studies produce some favorable change in the Administration's position.

Conclusions

The United States has embarked on a program to prevent the further proliferation of nuclear weapons. To help accomplish this goal, the President has decided to defer the commercialization of the liquid metal fast breeder reactor and the reprocessing technology that is needed to fuel it with plutonium, This, the President hopes, will convince other conutries to do the same and encourage them to look for alternatives to the recycling of plutonium.

[1] According to the DOE report, Barnwell can be easily adapted in most cases to coprocess or produce combination streams of plutonium and uranium (or nuclear wastes) that are not as susceptible to diversion as conventional reprocessing modes.

The rest of the world, however, does not agree with U.S. positions on breeder reactors and reprocessing. Other countries view these technologies as necessary for economic survival, and they tend to believe that proliferation problems can be solved through such institutional controls as increased inspections and advanced safeguards instrumentation. They have, however, cooperated with the United States in creating INFCE, controlling the spread of reprocessing technology, and looking at technological alternatives to breeders and conventional reprocessing. At this stage it is difficult to judge where the INFCE and other studies will lead. Some DOE officials doubt whether other countries will easily give up or defer technologies they have been developing for many years.

Until the INFCE study is complete, therefore, it is hard to predict what the future of reprocessing will be in this country. In the meantime, Congress is faced with the decision of whether to continue the funding of Barnwell or to cooperate with the Administration and end all financial support.

If funding is not provided, Allied-General has said that it will decrease operations at the plant and consider putting it in a mothballed status. It is also possible, according to Allied-General, that it would eventually dismantle the plant and take legal action to recoup its losses from the Federal Government. In any event, the lack of continued Government funding is likely to result in the termination of activities at the plant and the loss of transfer of key people to the operation. While the existing facilities could be brought from mothballed to operational status at some future time, DOE estimates that it would take about 4 years and cost between $75 million and $115 million.

If funding is continued by Congress, it could be provided in several ways. First, the current operating costs at Barnwell are about $9 million per year. Congress could decide to continue to fund certain types of research activities and studies as was done in 1978. This will help keep the Allied-General staff together and the options open for future long-term uses of Barnwell. The $1 million study performed by DOE identified several possibilities for using Barnwell in this way, but DOE considers them to be relatively inefficient uses of its research funds.

Secondly, money could be provided to assist in the development of waste solidification and plutonium conversion facilities at the plant. These are unproven parts of the reprocessing technology and too risky—according to Allied-General—to design and build without Federal support. This was being considered by DOE at one time, but dropped when the President developed his policy.

Thirdly, money could be provided to expand Barnwell's spent fuel storage pool. As discussed in the next chapter, utilities are running out of spent fuel storage space at nuclear powerplants and DOE is looking at options for providing some type of away-from-reactor storage. At present, Barnwell—depending on the type of storage racks used—could store between 400 and 750 metric tons of spent fuel. Allied-General has estimated that this could be expanded to 5,000 metric tons at a cost of $109 million, but is not interested in commercially operating Barnwell as a spent fuel storage facility. Therefore, any such use would probably involve Federal financing or purchase.

Finally, the Government could decide to purchase Barnwell for use either as a national or an international fuel cycle center. This would, of course, involve substantial costs and be in direct opposition with existing Administration policies.

Whatever decsion Congress makes with respect to Barnwell involves a number of advantages and disadvantages. If funding is terminated, the Federal Government would naturally save whatever money that would have been spent. It is probable, however, that such termination would result in either the temporary or permanent loss of the experienced people and the facilities at Barnwell. This would limit potential uses of Barnwell should the United States subsequently decide that reprocessing is needed or can be consistent with its nonproliferation objectives.

On the other hand, continued funding would keep the key people and the facilities available but might hurt U.S. nonproliferation initiatives abroad. It is also questionable if any short-term use of Barnwell would be worth the $15 million to $20 million needed to keep the Barnwell staff and facilities in a ready state. Continued funding, however, would provide the United States with the greatest degree of latitude if the INFCE study results in any policy change on reprocessing. It also recognizes that Allied-General might have some rights that deserve consideration, at least until major questions on reprocessing have a chance to be resolved.

Therefore, while we did not attempt to evaluate all the available alternatives and determine which would be the most cost effective, we believe that Congress should continue to fund short-term research efforts and studies at Barnwell until the completion of the INFCE study. We believe, however, that it is important that DOE not wait on congressional initiatives to plan work at Barnwell and make it compatible with existing programs. Also, we emphasize that this should be a short-term option only. If the Administration maintains its current policies when the INFCE study is completed, we would recommend that Congress terminate its funding initiatives. At that time it would be Allied-General's decision to either maintain or reduce its operating status at Barnwell.

NEED FOR ADMINISTRATION TO ACCELERATE DEVELOPMENT OF MX MISSILE

Mr. THURMOND. Mr. President, it is with great reassurance that I have read in the newspaper in recent days strong statements by our top ranking Air Force officers urging that the U.S. expedite development of the MX mobile missile.

In the posture hearings before the Senate Armed Services Committee in 1977 then chairman of the Joint Chiefs, Gen. George Brown, warned that our Minuteman missiles in their fixed silos would become vulnerable in the early 1980's to a Soviet attack.

The last budget of the former administration recognized the urgency of this problem and proposed funding development costs of the MX missile at a rate of $294 million in fiscal year 1978 and $1.5 billion in fiscal year 1979. The new administration cut back these efforts sharply, favoring $134 million in fiscal year 1978 and $158 million in fiscal year 1979. The cut of about $1.5 billion in MX spending entails serious risks for the United States.

The excuse used by the Defense Department to date is that studies were inadequate to determine the basing mode of the new missiles. If this is the case they had better double their study efforts, as time is now running against us.

In any event I have noticed the lack of a firm commitment by the administration to the MX missile itself. Now, two of our top military leaders have come out strongly for accelerated development, a

step of some importance in the current environment.

I think these statements are important. While they address to some degree the basing mode, on which we have not had specific testimony, the public pronouncement that we need this misssile and need to get moving is a significant and overdue action.

Mr. President, I ask unanimous consent that two articles be printed in the RECORD at the conclusion of my remarks. They include an article in the July 31, 1978, issue of Aviation Week magazine entitled "MX Missile, Vertical Shelters Urged by U.S. Defense Chief" and an article in the August 6, 1978, issue of the New York Times entitled "Strategic Air Command Chief Endorses MX Missile."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Aviation Week & Space Technology, July 31, 1978]

MX MISSILE, VERTICAL SHELTERS URGED BY U.S. DEFENSE CHIEF

(By Edward W. Bassett)

WASHINGTON.—Gen. David C. Jones, chairman of the Joint Chiefs of Staff, last week urged expediting the development of the MX missile and using vertical shelters within the multiple aim point concept to counter the increasing Soviet capability to knock out the U.S. intercontinental ballistic missile force.

Gen. Jones stated his position clearly on the same day Maj. Gen. Timothy I. Ahern, the Air Force's assistant deputy chief of staff for research, development and acquisition, argued in favor of such an MX system during a speech before the Aero Club of Washington.

The Congressional Budget Office (CBO) recently estimated that procuring 200 MX missiles, building 5,800 shelters for them and operating such a system would cost $28.3 billion through Fiscal 2000. A force of 300 MX missiles dispersed among 8,500 shelters and operated through Fiscal 2000 would cost $37.6 billion, the CBO said (AW&ST July 17, p. 2).

The first option provides for one MX missile for every 29 shelters while the second option plans one missile for every 28 shelters. This is a somewhat lower ratio than that proposed by the Defense Dept., which suggested that there should be one missile for every 20 to 25 shelters.

The Ahern speech and the remarks by Gen. Jones, who also suggested that a new manned bomber was needed, came at the same time the White House called for "a $5-billion cut in the [overall] 1979 budget."

A White House spokesman said: "The President has repeatedly said it's going to be a tight budget year in Fiscal 1980." An Office of Management and Budget official concurred, saying, "We have sent the various departments and agencies their tentative ceilings under which to submit their 1980 budget requests and they [the ceilings] are obviously tight."

Gen. Jones said, "With or without a SALT [strategic arms limitation talks] agreement, the ICBM force will become vulnerable in the days ahead. What we advocate primarily is proceeding with an MX program, because we have two problems—we've got vulnerablity and we've got a great imbalance in throw weight—and we need to address both of these."

In order to insure the survivability of the U.S. ICBMs, "The best solution we see is a multiple aiming point [system]," he said. Confirming an earlier AVIATION WEEK & SPACE TECHNOLOGY report (June 19, p. 22), Gen. Jones said, "As of now, from a cost standpoint and from some other factors, what we call the vertical shelter appears to be the most attractive [system]."

With regard to a new SALT treaty, Gen. Jones emphasized that he "would have deep reservations about not being able to proceed with a survivable ICBM. And my interpretation is that the MAP concept is the very end of the mobile [missile concept]. And therefore, I consider that mobiles are authorized and that therefore the MAP is authorized."

Using fiscal arguments to support his position, the general said it would be cheaper for the U.S. to build vertical shelters than for the Soviets to build enough reentry vehicles to cover these shelters

"In my judgment, depending on the agreement, we may end up spending less than without an agreement," Gen. Jones said: "I just want to dispel any idea that SALT is going to mean a reduction in the strategic force budget in the days ahead."

In detailing the need for an MX system, Gen. Ahern cited "the unprecedented buildup we are seeing in Soviet ICBM force capability. The end result of these improvements is that the Soviets will be able to attack all of the U.S. ICBMs in their hardened silos, with more than one reentry vehicle, if they choose, and inflict heavy damage on the entire force. This means that by the early to mid-1980s U.S. ICBM survivability will approach unacceptable limits."

Improvements in the Soviet ICBM force, Gen. Ahern continued. are a growing problem for U.S. strategic planners. He noted: "The nature of these improvements is such that in the early to mid-1980s the Soviet ICBM force could have sufficient weapons and capabilities to effectively negate the U.S. ICBM force in a first strike, leaving the Soviets a large residual force of ICBM weapons for unhampered use against U.S. cities and industries, U.S. bombers and submarines and U.S. allies."

Gen. Ahern also warned that the Soviets now have a slight edge in boosters and in reentry vehicles along with a substantial lead in throw weights, and added:

"The Soviets are tending toward an ICBM force with the ability to place at risk time-urgent hard targets, specifically the U.S. ICBM force."

With regard to the Soviet Tupolev Backfire bomber, Gen. Jones said the Joint Chiefs of Staff were continuing to recommend that it be counted in any SALT agreement. "One thing we have been concerned about is that some of the restrictions that would be put on the Backfire would not be, in our judgment, realistic restrictions because they could be changed overnight."

If the Backfire is not counted under such a treaty, Gen. Jones said the U.S. has two alternatives: "One is to improve our air defenses" sufficiently and the other "is for us to have an option for our own Backfire."

He added he believes "the manned bomber is required as far into the future as I can see. We are improving the [Boeing] B–52, and I am not talking about just with a cruise missile. I would hope that some day we would have a new manned bomber in this country."

The Defense Dept. has said that a study is in process with the aim toward "maintaining a production option for strategic penetrating bombers. The study is looking at the B–52, the [Rockwell International] B–1 and variants, the [General Dynamics] FB–111H and a conceptual new bomber."

The Strategic Air Command has already provided inputs for the study, which began last February. SAC wants any follow-on bomber to be capable of mixed internal payloads, auto-terrain following flight, high subsonic airspeeds at sea level and intercontinental unrefueled range.

[From the New York Times, August 6, 1978]

STRATEGIC AIR COMMAND CHIEF ENDORSES MX MISSILE

Gen. Richard H. Ellis, chief of the Strategic Air Command, has recommended to Secretary of Defense Harold Brown that "full-scale development" of the mobile MX missile begin this fall.

"There will be a period of time in the early to mid-1980's," the general said, elaborating on his recommendation in a recent interview, when the United States' force of 1,054 intercontinental ballistic missiles "could be at risk," and the military's confidence "in its ability to survive an enemy attack would be low."

He contended that the solution to this problem was the MX missile, which he described as "the most capable advanced missile that American technology can provide."

General Ellis is the second senior officer in recent days to give a vigorous endorsement to development of the MX, which stands for mobile experimental. Gen. David C. Jones, Chairman of the Joint Chiefs of Staff, said in Washington earlier last week, "I consider the mobiles are authorized and therefore M.A.P. is authorized." The chairman added, "To me this is not a matter for discussion or negotiation."

SYSTEM DESIGNED TO CONFUSE TARGETERS

M.A.P. stands for multiple aim point, a system General Ellis described as one that presents Soviet targeters "with so many possible aiming points that they would not be able to afford the expenditure in missiles to attack one target."

The Air Force rationale for deploying the mobile missile is based on the increasing vulnerability of its present force of intercontinental ballistic missile, which, resting in their launching silos, are seen as easy prey to a new generation of Soviet missiles of greater weight and accuracy. The MX missile, which is more elusive to Soviet targeters, is considered much less vulnerable in an attack.

In the multiple-aim-point system, each missile and its launcher could be moved among 20 launching sites, either shelters or trenches. A force of 200 to 300 MX missiles then, according to an Air Force estimate would require a comparable force of 4,000 to 6,000 Soviet missiles to insure its destruction. The system has been compared to a "shell game," in which one has to guess which of several shells hides a single pea.

Air Force intelligence and planning officers doubt that the Soviet Union would be able thus to "cover" the mobile missiles, and that consequently Moscow would be extremely reluctant to launch a first strike against the United States missile force because its retaliatory capability would be largely undiminished.

General Ellis suggested that to limit costs of the new program, a hybrid missile might be developed that could be launched from land or from a nuclear submarine. As it is, he said, the Soviet Union has "a tremendous advantage in throw weight and capitalizes on its high number of warheads." Throw weight is the total weight of a ballistic missile that can be directed to a given target.

Both generals emphasized the importance of the mobile missile, while at the same time stressing the importance of current negotiation to limit strategic arms."To me," General Ellis said, "the alternatives to a SALT agreement are unacceptable: appeasement, economic exhaustion resulting from an arms race or a nuclear holocaust."

The startegic air group's commander sees the the key to any workable strategic arms-limitation agreement the improvement of satellite-surveillance procedure for gathering intelligence on Soviet military moves, he

said, will become increasingly more difficult as technology advances. The long-range cruise missile, for example, is small enough to elude identification by satellites or reconnaissance aircraft.

DEPARTMENT OF DEFENSE COMPETITIVE RATE PROGRAM

Mr. EAGLETON. Yesterday Mr. President, the House passed by an overwhelming majority—269–96—an amendment offered by Congressman CONTE which will allow the Department of Defense to continue to use the competitive rate program in shipping household goods of military personnel overseas. This amendment will allow the Department of Defense—using their own estimates—to save over $50 million annually.

Mr. President, I have often stood on the Senate floor and criticized the Department of Defense for wasting and/or misspending taxpayers dollars, but on this issue I want to go on record as strongly praising the Department of Defense efforts on holding down the cost of moving household goods. I am hopeful that the Senate will not see fit to open a loophole that has recently been closed by the House of Representatives by an overwhelming vote.

In order to further explain the competitive rate program, I ask unanimous consent that the following summary prepared by the Department of Defense be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

COMPETITIVE RATE PROGRAM

The Competitive Rate Program (CRP) for shipping household goods overseas was established to increase competition and reduce costs.

Historically, carriers participating in this $250 million a year business shared equally if they met the established low rate, which most did. This generally led to increasingly higher rates and marginal service. In a 1976 report the General Accounting Office (GAO) recommended that additional competition be introduced to bring the carriers' rates more in line with the reasonable cost of providing this service.

The CRP does this by awarding carriers a prescribed percentage of tonnage on the routes for which they set the low rate. The remaining tonnage is distributed among the others according to the level of their rates.

This program started in January 1975 with Okinawa and, because of appreciable savings, shorter transit time, and reduced loss and damage, was expanded to Germany. Thus far, it has saved DoD approximately $34 million. On May 1, 1978, the CRP was expanded to five additional overseas areas, and others are scheduled to be included on November 1. It is estimated that total savings from this program would exceed $50 million a year, if expanded world-wide. In a July 7, 1978, letter to the Chairman of the House Merchant Marine and Fisheries Committee, the Deputy Comptroller General advised that GAO's preliminary evaluation of DoD's estimate of savings achieved under this program, which was made at the Chairman's request, indicates that both the estimate and the methodology used are sound.

Allegations have been made that the CRP adversely affects small business, causes widespread unemployment, and makes it possible for a few carriers to monopolize the business by filing predatory rates.

Since November 1, 1976, the number of small business carriers in this program has increased from nine to 53, and their share of the total revenue has increased from 23 to 35 percent. Expanding the CRP should have little, if any, effect on overall employment since it will not affect the total workload, which is dependent upon troop strengths and rotation policies, rather than the type of program in effect. Finally, all participating carriers are required to certify that their rates provide equitable and reasonable payment for the services performed.

DoD has two basic responsibilities in administering its household goods shipping program: (1) to provide high-quality service to its members, and (2) to obtain this service at a fair and reasonable price. The CRP fulfills these responsibilities and is consistent with the Congressional mandate that the maximum feasible degree of competition be achieved in the procurement of goods and services.

In view of the foregoing the DoD strongly opposes any effort to restrict the CRP to Okinawa and Germany or to prohibit its further expansion, or establish other restrictions on the DoD household goods shipping program.

EXTENSION OF TIME FOR PRINTING REPORT OF THE INTELLIGENCE COMMITTEE (REPT. NO. 95–1079)

Mr. BAYH. Mr. President, if the leader will yield, I was prepared to submit our report at this time, but I ask unanimous consent that the printing of this report be postponed until midnight, Thursday, August 10, of this year, so that additional and minority views may be included in the report.

Mr. STEVENS. Reserving the right to object, may I inquire what the subject is of the bill?

Mr. BAYH. That is the terrorism bill that was referred to our committee. We have now reported it out with some amendments that have been pretty well agreed to, I think, between our committee and Senator RIBICOFF.

Mr. STEVENS. Is the time reserved in order to file the report?

Mr. BAYH. That is accurate.

Mr. STEVENS. I do not object.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE TOMORROW

Mr. ROBERT C. BYRD. Mr. President, the Senate will come in at 9 a.m. tomorrow morning. There are no orders for recognition of Senators, are there?

The PRESIDING OFFICER. There are not.

Mr. ROBERT C. BYRD. I ask unanimous consent—and this is not needed, but I shall ask it anyhow—that when the two leaders or their designees have been recognized under the standing order, the Senate resume its consideration of the Agriculture appropriations bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. It is correct, is it not, that at that time the pending business will be the amendment by Mr. HATHAWAY?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. Have the yeas and nays been ordered on that?

The PRESIDING OFFICER. That is correct.

Mr. ROBERT C. BYRD. A vote will likely occur as early as 9:30 or 9:45 a.m. tomorrow, then.

The PRESIDING OFFICER. That is correct.

RECESS UNTIL 9 A.M. TOMORROW

Mr. EAGLETON. Mr. President, there being no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until 9 o'clock tomorrow morning.

The motion was agreed to, and, at 8:10 p.m., the Senate recessed until Thursday, August 10, 1978, at 9 o'clock a.m.

NOMINATIONS

Executive nominations received by the Senate August 9, 1978:

DEPARTMENT OF STATE

Nicholas A. Veliotes, of California, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Hashemite Kingdom of Jordan.

THE JUDICIARY

Harold A. Baker, of Illinois, to be U.S. district judge for the eastern district of Illinois vice Henry S. Wise, retired.

INTERNATIONAL COMMUNICATION AGENCY

James David Isbister, of Maryland, to be an Associate Director of the International Communication Agency (new position).

Harold F. Schneidman, of Pennsylvania, to be an Associate Director of the International Communication Agency (new position).

HOUSE OF REPRESENTATIVES—*Wednesday, August 9, 1978*

The House met at 10 a.m.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Lead me, O Lord, in Thy righteousness, make Thy way straight before my face.—Psalms 5: 8.

Eternal God, who has brought us to the beginning of another day, draw near to us as we worship Thee in spirit and in truth.

Bring to our troubled minds, uncertain and afraid,
The quiet of a steadfast faith, the calm of a call obeyed.

Bring justice to our land, that all may dwell secure,
And finely build for days to come foundations that endure.

Bring to our world of strife Thy sovereign word of peace,
That war may haunt the Earth no more and desolation cease.

So may we walk with Thee this day and all our days.

Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the amendment of the House to the amendment of the Senate to a bill of the House of the following title:

H.R. 10787. An act to authorize appropriations for activities and program carried out by the Secretary of the Interior through the Bureau of Land Management.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 12028. An act to amend title 38, United States Code, to improve the housing programs of the Veterans' Administration.

The message also announced that the Senate disagrees to the amendment of the House to the bill (S. 2701) entitled "An act to amend the Water Resources Planning Act (79 Stat. 244, as amended)," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. GRAVEL, Mr. RANDOLPH, Mr. MUSKIE, Mr. DOMENICI, and Mr. STAFFORD to be the conferees on the part of the Senate.

The message also announced that the Senate had passed a bill and concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 3092. An act to amend the Federal Meat Inspection Act to require that meat inspected and approved under such act be produced only from livestock slaughtered in accordance with humane methods, and for other purposes; and

S. Con. Res. 101. Concurrent resolution to correct the enrollment of H.R. 10732.

ADDITIONAL WESTERN HEMISPHERE IMMIGRANT VISAS

(Mr. EILBERG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EILBERG. Mr. Speaker, I would like to draw the attention of my colleagues to pending litigation whose disposition will undoubtedly have far-reaching effects on U.S. immigration policy and procedures for years to come. I am referring to the class action, filed in the U.S. District Court for the Northern District of Illinois, entitled "Silva against Levi."

That case involves the issue of whether immigrant visas issued to Cubans in the past or now to other aliens from the Western Hemisphere should be counted against the 120,000 visa limit for the Western Hemisphere. The Department of Justice "gave in" to plaintiff's demand that some 144,000 visas shall be issued over and above the 120,000 limit established by the Congress in 1965.

When I became aware of the pending litigation and of the intention of the Government to "throw in the towel" on this issue, I communicated with the Attorney General expressing my view that only the Congress, pursuant to its plenary authority to regulate immigration, can decide the number of immigrants to be admitted to this country in any given year. Nevertheless, the legal point was conceded.

This is a clear example of executive action, significantly affecting U.S. immigration policy, that has been taken without congressional input. This lack of cooperation on the part of INS has resulted—too often—in the establishment of immigration policies and procedures which do not reflect the intent of Congress as set forth in our immigration and naturalization laws.

The issuance of an "extra" 144,000 visas greatly erodes the effect of laws passed by the Congress to numerically regulate immigration from the Western Hemisphere and it is regrettable that our Department of Justice did not "see fit" to defend this congressional viewpoint.

TERMINATION OF VIETNAM HOSTILITIES FOR NATURALIZATION PURPOSES

(Mr. FISH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FISH. Mr. Speaker, the Subcommittee on Immigration, Citizenship, and International Law has for a year-and-a-half now been seeking to obtain executive action which would close an existing loophole in our naturalization law. I am referring to the provision of the Immigration and Nationality Act which permits expeditious naturalization for aliens serving in the U.S. Armed Forces during time of war or other military hostilities. That section—section 329—was amended in October 1968 to provide this benefit to aliens who served honorably on a date beginning in February 1961 and ending on a date designated by the President by Executive order as the date of termination of the Vietnam hostilities. Here we are in August of 1978 and that Executive order has yet to be issued.

As a result, aliens who currently serve in the Armed Forces are still provided the naturalization benefits intended by Congress to be provided to service men and women who served during our involvement in Vietnam.

In addition, a newspaper report has indicated that a substantial number of illegal aliens are utilizing this provision of law to get expeditious naturalization by illegally enlisting in the armed services and subsequently obtaining honorable discharges.

The subcommittee chairman, the gentleman from Pennsylvania (Mr. EILBERG), has written to the Attorney General on several occasions on this matter and recently has communicated directly with the President, asking him to issue the needed Executive order at the earliest possible time.

To date, nothing has been done and the loophole in our naturalization law remains in effect.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 12935, LEGISLATIVE BRANCH APPROPRIATION ACT, 1979

Mr. MAHON. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (H.R. 12935) making appropriations for the legislative branch for the fiscal year ending September 30, 1979, and for other purposes.

The SPEAKER pro tempore (Mr. FOLEY). Is there objection to the request of the gentleman from Texas?

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 13467, SUPPLEMENTAL APPROPRIATIONS FOR FISCAL YEAR ENDING SEPTEMBER 30, 1978

Mr. MAHON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 13467) making supplemental appropriations for the fiscal year ending September 30, 1978, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. ASHBROOK. Mr. Speaker, reserving the right to object, I take this time to ask my esteemed colleague and chairman if this is the bill that has funds for the Senate office "palace," or whatever it is called. Is that where the funding for that palace is squeezed in?

Mr. MAHON. I believe that the construction in which the gentleman is interested is in the Senate version of the supplemental bill.

Mr. ASHBROOK. I understand it is not in the House version.

Mr. MAHON. It is not in the House version.

Mr. ASHBROOK. Could the chairman give us any idea whether comity by the House is required, that we roll over and let them spend that money? What is the House position?

Mr. MAHON. Well, as the gentleman knows, normally the Senate does not in-

terfere in so-called housekeeping or such projects for the House, and normally the House does not seek to interfere in programs and construction proposed by the other body. Of course, this does not mean that the matter should not and will not be considered, because the matter will no doubt be considered and discussed in the conference with the Senate.

Mr. ASHBROOK. Further reserving the right to object, I guess the bottom line to what my esteemed colleague is saying—and this does not apply to him, because over the years he has an established record for the taxpayer—but where comity between Houses is involved, the taxpayers really have little input. I can well recall the Rayburn Building. I presume there was comity—or comedy—in that project. At first, it was only going to cost $40 million, but before the comedy was done it had cost about $120 million.

Mr. Speaker, I withdraw my reservation of objection.

Mr. MAHON. I thank the gentleman.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas? The Chair hears none, and without objection, appoints the following conferees: Messrs. MAHON, WHITTEN, BOLAND, FLOOD, STEED, SHIPLEY, SLACK, MCFALL, LONG of Maryland, YATES, MCKAY, CEDERBERG, MICHEL, CONTE, MCDADE, and ANDREWS of North Dakota.

There was no objection.

GENERAL LEAVE

Mr. MAHON. Mr. Speaker, it is anticipated that the House will continue consideration under the 5-minute rule of the Defense appropriation bill for the fiscal year 1979, H.R. 13635.

In connection with that matter, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill H.R. 13635, making appropriations for the Department of Defense for the fiscal year ending September 30, 1979, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

INVESTIGATE MUZZLING OF INFLATION FIGHTER

(Mr. ANDERSON of Illinois asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ANDERSON of Illinois. Mr. Speaker, I have today written to the chairman of the House Banking Subcommittee on Economic Stabilization requesting immediate hearings into the reported muzzling of our Nation's top inflation whistleblower, Barry Bosworth, Director of the Council on Wage and Price Stability.

According to reports in yesterday's press, Secretary of Labor Ray Marshall told the executive council of the AFL–CIO in Chicago that Bosworth would no longer be permitted to speak out on pending wage contracts without clearance by a new wage inflation censorship board to be headed by Marshall himself.

Mr. Speaker, I find it a little curious that President Carter, that self-professed champion of Government whistleblower is now putting the muzzle on his own inflation whistleblower, apparently to placate the labor bosses. I guess the lesson in all this for future whistleblowers is that it is fine to blow your whistle as long as the President and George Meany are calling the tune.

PERSONAL EXPLANATION

(Mr. DICKINSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DICKINSON. Mr. Speaker, those who have been participating in the defense appropriation bill debate for the past couple of days will probably acknowledge the fact that I have been rather diligent in my attendance here, and have been participating in debate. On the occasion of the motion to strike the funds, rollcall No. 654, for the nuclear carrier I was on the floor. I inserted my card into the machine. I depressed the button indicating my vote against striking the funds, but for some reason it did not register, according to the CONGRESSIONAL RECORD.

So at this point I would like to go on record, and have it part of the RECORD, as saying that I support the nuclear carrier and I opposed the striking of the funds. I refer, of course, to the Yates amendment to strike the funds for the CVN nuclear aircraft carrier.

The SPEAKER pro tempore. The gentleman's statement will appear in the RECORD.

TAX CUT LEGISLATION

(Mr. CONABLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONABLE. Mr. Speaker, there is a current song that contains the words: "Time keeps on slipping, slipping, slipping into the future." It is apparent that the tax cut legislation necessary this year is suffering the same fate.

The Ways and Means Committee started markup of this legislation on April 17, suspended its consideration on April 24 and did not resume its markup until July 20. The 3-month hiatus was supposed to give all parties—including the Carter administration and its Treasury Secretary—the time to come up with a bill acceptable to the committee. They failed to do so and a coalition of 13 Democrats and 12 Republicans forged a bill which the committee ultimately reported.

Now Secretary Blumenthal—unhappy with the product—is desperately trying to untrack the committee bill with 13th-hour proposals which have never been seen by the committee. His unprecedented intervention into the orderly procedure of the House could result in further delay of this critical legislation. It is time the Democratic leadership got on with this legislation. They should let Secretary Blumenthal and his proposals—not the tax bill—slip into the future.

LUNCHEON FOR EXILED ARCHBISHOP OF EQUATORIAL GUINEA

(Mr. DORNAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN. Mr. Speaker, I would like to invite my colleagues this noon to a luncheon I am hosting, here in the Capitol Building in room H–128, for the archbishop of Equatorial Guinea who is under a death sentence by the Marxist dictator of his tragic little country.

When I asked one of my colleagues on our side of the aisle to meet the archbishop on Monday, he said: "I have no interest in this matter at all," referring to the genocide in Equatorial Guinea, a genocide in which the population percentile murdered is worse than the holocaust in Nazi Germany, Uganda, or Cambodia.

This uninterested colleague has taken the well to discuss the tragic and wrongful death of Mr. Steve Biko in South Africa but has no desire to inform himself about the murder of tens of thousands. Sad. Again. I point out how cruel it is that people will focus on the slaughter of one human being but have no interest whatever in awesome genocides taking place in other African nations.

I am hoping that those Members who can come to today's luncheon will remember the agony of this Catholic archbishop of Equatorial Guinea, a shepherd whose flock is being decimated while he is in forced exile himself under a sentence of death—sentenced to die for his fellow man—for Jesus Christ.

Mr. Speaker, I cannot tell you how impressed I am with this brave and kindly man. He is aware of the fact that his outspoken protests against the genocide in his country gravely endanger his family. Nevertheless, Bishop Abuy, as with every true man of God, knows his primary duty is to the welfare of his flock.

The events in Equatorial Guinea must be brought to the attention of the civilized world. Unless we shout out a forceful condemnation of these atrocities, they will continue unabated.

Tomorrow, I will be introducing a resolution to the House, calling attention to the continuing murder of black Catholics and all other Christians in this tiny African country. I plead for the support of every one of you, my colleagues.

MILITARY-FUNDED ABORTIONS

(Mr. JOHN L. BURTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JOHN L. BURTON. Mr. Speaker, I guess sometime today we will be called

upon to vote an amendment that could deny the right of a Congressional Medal of Honor winner's daughter getting an abortion if she is raped. I do not think we should do that to the daughter of a Congressional Medal of Honor holder.

DEPARTMENT OF DEFENSE APPROPRIATIONS, 1979

Mr. MAHON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for further consideration of the bill (H.R. 13635) making appropriations for the Department of Defense for the fiscal year ending September 30, 1979, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. MAHON).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ASHBROOK. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 367, nays 4, answered "present" 1, not voting 60, as follows:

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 13635, with Mr. ROSTENKOWSKI in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Tuesday, August 8, 1978, the Clerk had read through line 15 on page 58.

Mr. SIKES. Mr. Chairman, I move to strike the last word.

Mr. Chairman, it will be noted that this year's defense appropriation bill carries no restriction on contracting out by the Department of Defense. Last year the committee approved language—later accepted by the Congress—to limit the growth of contracting out. The committee rejected similar language this year. This may prove to be a serious mistake.

The fact is that, despite restrictions, there has been a very significant increase in service support contracts is disturbing. The overall increase between fiscal year 1977–79 is over $600,000. It can be anticipated that without congressional restraints contracting out may balloon.

There is a continuation and extension of the policy of contracting out some functions previously performed by Government employees such as food service, laundry operations, automotive repair, et cetera. There is also an increase in contracting out for services which previously were performed in-house. These services include studies and analysis, management support and consultant services. Our committee is particularly concerned with the growth of the last type of contracting out because these services can be used to reduce headquarters manning and can be used by management to avoid or postpone difficult decisions.

The subject of contracting out is discussed in detail in the committee report under the heading "Service Supports Contracts." It begins on page 157. The report goes into detail on the subject and expresses concern about the continued expansion of contracting out. It is difficult to comprehend that this "concern" can be expected to keep contracting out at a reasonable level in view of the rapid growth in recent years in this practice.

Contracting out is one means of concealing the number of people who are in fact paid by the government. It makes the budget look better to those who are critical. Additionally, it discourages the retention of skilled individuals who are particularly needed in times of emergency.

The report states that the committee has very little confidence in the overall accuracy of the estimates provided by the Department of Defense for support service contracts. To me this is an indication that we may expect continued

rapid growth of contracting out, which was programed last year and which was checked by the language in the bill. This is a situation which should be watched carefully by Congress.

It is worthy of some note that the committee has made a reduction of $40,000 in studies and analysis, management support and employment of consultants. This results from an obvious excess in studies by the Department of Defense. It is an attempt to bring more realism in the Department's practice of having studies on top of studies which are never ending. It has been obvious for years that there are careerists in the government who do nothing but carry on studies, many of which are nonproductive. They simply result in more paper work which require more files for more storage. In my opinion, there should have been more reduction.

Mr. BOB WILSON. Mr. Chairman, will the gentleman yield?

Mr. SIKES. I yield to the gentleman from California.

Mr. BOB WILSON. Mr. Chairman, I want to strongly commend my colleague, Mr. HILLIS, for his outstanding efforts to restore the CHAMPUS reimbursement rate to the 90th percentile.

This is a belated and much-needed improvement in the military health care system. The 90th percentile rate has been strongly endorsed by the House Armed Services Committee after an extensive series of hearings on military medical care conducted by our Military Personnel Subcommittee. I think it is important to note that this level of reimbursement was recently approved by both the House and Senate as a part of the defense authorization bill for fiscal year 1979, presently awaiting signature into law at the White House.

In 1966 Congress established the CHAMPUS program in order to assure medical care to eligible beneficiaries who were unable to receive health care at uniformed services medical facilities. As doctor and other shortages at military facilities have accelerated in the succeeding years, an increasing number of dependents and retirees have found that they must seek treatment from civilian sources under CHAMPUS.

By contrast, the thrust of recent defense appropriations bills has been to restrict CHAMPUS access, limit the rate of reimbursement, and send beneficiaries to uniformed services facilities. While I fully share the concern of the distinguished members of that committee with respect to the need to tighten our belts on all Government-funded programs, I feel that the course on which they have set CHAMPUS afloat over the past few years is ill advised.

At the behest of the Appropriations Committee, the Defense Department several years ago reduced the level of reimbursement from the 90th percentile of the customary charges made for similar services in the same locality to the 75th percentile. What this means in dollars and cents is a substantial increase in the out-of-pocket expenses for CHAMPUS beneficiaries. In these days of rapidly escalating medical costs, the dependents of low-grade enlisted personnel and older retirees are particularly hard hit. By the time that CHAMPUS pays, after the deductible, either 80 or 75 percent (depending on whether the beneficiary is an active duty dependent or retiree) of the reasonable or customary charge, based on the 75th percentile reimbursement rate and fee schedules several years out of date, the CHAMPUS beneficiary is lucky to be reimbursed for even half the bill. This is a cruel hoax at best.

This year the Appropriations Committee had recommended an increase in the percentile rate to 80 percent. Additionally, the committee made special note of the need to use more current fee schedules and provide for greater responsiveness on the part of the fiscal intermediaries who handle CHAMPUS claims. These were overdue steps in the right direction, but they did not go far enough. Simple equity requires no less than the restoration of the 90th percentile rate and I want to congratulate the gentleman from Indiana (Mr. HILLIS) for his fine attention to this problem.

AMENDMENT OFFERED BY MR. ANDERSON OF CALIFORNIA

Mr. ANDERSON of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ANDERSON of California: Add on page 58, after line 15, a new title VIII, section 863, the following: "No funds in this legislation shall be expended after April 1, 1979, for the installation of asbestos in Naval ship construction, unless and until the Secretary of the Navy has submitted to the President and the Congress a study analyzing the effects of asbestos on Naval shipyard and military personnel, evaluating present standards of permissible levels of asbestos in the shipyards and the need for asbestos in new ships, the feasibility of removing asbestos in presently commissioned ships, and promulgating a possible timetable for implementing this removal.".

Mr. MAHON. Mr. Chairman, I reserve points of order on the amendment.

The CHAIRMAN. The gentleman from Texas (Mr. MAHON) reserves points of order on the amendment.

The gentleman from California (Mr. ANDERSON) is recognized for 5 minutes in support of his amendment.

Mr. ANDERSON of California. Mr. Chairman, the problem of indiscriminate use of asbestos in the workplace is one that has been with us for some time. It is a problem that is particularly severe in our Nation's shipyards.

I have urged our Government to impose much stricter standards than presently exist over the use of asbestos in the private sector workplace. I hope these standards will soon be promulgated. It occurs to me, though, that for the Federal Government to expect private employers to abide by stricter health standards, we must first clean up our own shops, if, indeed, they need to be cleaned up.

My amendment would constitute but a first step toward protecting Federal shipyard employees. It asks only that the Navy conduct a study to determine the effects that the current asbestos standards have on these Government workers, and to study the feasibility of removing all shipboard asbestos insulation.

We do know that asbestos is a carcinogen, a cancer-causing agent. We have known that it was a dangerous material for decades. As early as 1918, some Canadian and American insurance companies refused to insure asbestos workers due to the hazardous working conditions in the industry. The principal dangers are asbestosis, lung cancer, and mesothelioma, the last being a disease which is virtually nonexistent among those not exposed to asbetsos.

Even though these dangers have been known, it was not until 1973 that the Navy decided not to contract for the future installation of asbestos as an insulating material. According to the Navy, recently commissioned ships containing asbestos insulation will be the last new ships containing the material for that function.

There are still, of course, hundreds of naval ships at sea which use asbestos for insulation when other materials are readily available. The Navy refuses to remove this material, even in the course of regularly scheduled overhauls, unless it poses an immediate danger. So these ships are returned to sea containing the material that will eventually threaten the well-being of not only shipyard workers, but our naval military personnel as well. That is because the asbestos that appeared safe in port, can easily become dislodged at sea.

A similar study to the one we are asking for today has already been agreed to in a letter of June 29, written to me by Assistant Secretary Pyatt, which I will make a part of the RECORD. He said a study would be conducted comparing the price of partial removal of asbestos from the U.S.S. *Anchorage*, with the amount that total removal would have cost. I hope this study will consider the amount of workman's compensation that will have to be paid by DOD for asbestos-related diseases. Already, HEW has estimated that 11 million Federal workers may have received asbestos poisoning. It has been reported that the Navy is currently facing $300 million in claims from Government shipyard workers injured as a result of working with asbestos. And a study conducted at the Long Beach Naval Shipyard, which is located in the district which I represent, showed that 31 percent of all their employees with 17 or more years of experience; and this is all employees, not just those working directly with asbestos, are suffering from asbestosis.

We cannot afford, financially or morally, not to, at the very least, study this problem.

Present naval standards require that the asbestos level in our Federal shipyards not exceed 2 fibers per cubic centimeter of air. Unfortunately, this is the same as our current private workplace standard. OSHA recommended reducing this level to 0.5 fibers per cubic centimeter. Many feel this is a realistic goal.

It is certainly one that the Navy should investigate. The Nation's largest asbestos manufacturer, Johns-Manville, is to be commended for their efforts to attain this level and, indeed, it has almost been reached in their plants. More recently, the National Institute for Occupational Safety and Health has recommended that the Government not allow occupational exposure to asbestos to exceed 0.1 fibers per cubic centimeter. Let me say again, that if we are to expect private employers to make the effort to protect their workers, we must expect the Federal Government to set the example.

But I am asking for this study with the hope that the Government will do more than set the example. I am asking for a study that may save lives.

Mr. Chairman, the letter from the Assistant Secretary of the Navy, Mr. Pyatt, is as follows:

DEPARTMENT OF THE NAVY,
Washington, D.C., June 29, 1978.

Hon. GLENN M. ANDERSON,
House of Representatives,
Washington, D.C.

DEAR MR. ANDERSON: This is in reply to your letter of April 19th, concerning the Navy's asbestos replacement policy, the costs associated with the various ways of conducting insulation work, and a comparison of such costs with respect to work in U.S.S. *Gridley*.

Your understanding of the Navy's current practice is correct. Asbestos insulation is only removed where it is necessary for the accomplishment of other work or for repairs to the insulation itself. When it is removed for these repairs, it is replaced with non-asbestos insulation.

Unfortunately, cost data from work performed on U.S.S. *Gridley* do not contain the detail necessary to make a valid economic trade-off comparison on this practice versus total removal and replacement. However, the U.S.S. *Anchorage* overhaul underway at the Long Beach Naval Shipyard will produce this type of data. Preliminary analysis indicates that the cost of total thermial asbestos replacement in one engineering space ($300,000) exceeds the cost of apply current practice ($30,000) by a factor of 10. This high cost differential tends to discourage wholesale insulation replacement. Nevertheless, the Navy will correlate data obtained from the U.S.S. *Anchorage* overhaul with other factors, such as potential exposure, total cost, and ship completion schedules, to give you a more definite response within three months.

In implementing an asbestos-control program, the Navy has established airborne asbestos exposure limits which meet or exceed those established by the Occupational Safety and Health Administration. Thus, regardless of the ultimate decision on the degree of asbestos replacement, adverse personnel exposure will be averted.

I certainly agree with you that it is desirable to remove as much asbestos today as is practical to eliminate the problems of potential exposure to asbestos in the future, and the Navy will continue to do so.

Sincerely,

EVERETT A. PYATT,
Assistant Secretary of the Navy (Logistics).

Mr. MAHON. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON of California. I yield to the gentleman from Texas.

Mr. MAHON. Mr. Chairman, I want to commend the gentleman from California for bringing this matter to the attention of the House. There is merit in the proposal he has made. I just want to express interest in what he has brought to the attention of the House. I have already reserved a point of order on the amendment, but I will not make the point of order until the gentleman has concluded.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON of California. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I thank the gentleman for yielding, and I would like to associate myself with the remarks of the gentleman.

Mr. Chairman, I have had a bill in for over a year, concerned with asbestos-related diseases. It is most important. Every shipyard from California to Virginia has had this problem, and I am most happy to see it being addressed.

Mr. ANDERSON of California. Mr. Chairman, I thank the gentlewoman for her contribution.

POINT OF ORDER

The CHAIRMAN. The gentleman from Texas (Mr. MAHON) is recognized on his point of order.

Mr. MAHON. Mr. Chairman, I make a point of order on the amendment because it requires the Secretary of the Navy to make a report to the President and to the Congress that will impose additional duties on the executive branch. This constitutes legislation on an appropriation bill.

The CHAIRMAN. Does the gentleman from California (Mr. ANDERSON) wish to be recognized on the point of order?

Mr. ANDERSON of California. I do, Mr. Chairman.

The CHAIRMAN. The gentleman is recognized.

Mr. ANDERSON of California. Mr. Chairman, while I recognize the gentleman's good intentions in making this point of order, I would like to bring to the Chair's attention the overriding importance of this amendment. It is an amendment I surely would have offered during our consideration of the defense authorization bill in May, but information which we currently have available, was unknown to this body, and this Member at the time. This is also information that was not available to the committee when it was marking up the bill we have before us today.

Further, Mr. Chairman, the study which we would be requesting is already being conducted by the Navy. In a letter which I received from Secretary Pyatt, dated June 29, he indicated to me that the Navy would be correlating data on a very related matter, and report to me within 3 months. I am merely placing a time limitation, a liberal one, on their ongoing study. I am not requiring that an executive official take on a new or burdensome responsibility that he had not already assumed.

Further, I feel certain that the Secretary of the Navy has legislative responsibility for the health of those in his Department. I am merely asserting that he should be required to conduct this study, a study on a widely recognized problem, in pursuit of this responsibility.

Finally, Mr. Chairman, let me cite from Jefferson's Manual and Rules of the House of Representatives, rule XXI, section 843.

The House may specify that no part of the appropriation shall go to recipients lacking certain qualifications.

We would be placing as a qualification that the asbestos study to completed.

Mr. Chairman, it is about time we got to the bottom of this asbestos problem, and I would suggest that today we can do it under the rules of the House.

The CHAIRMAN (Mr. ROSTENKOWSKI). The Chair is ready to rule.

The language in the amendment to which the gentleman from Texas (Mr. MAHON) refers, "unless and until the Secretary of the Navy has submitted to the President and the Congress" has consistently been held to be legislation on an appropriation bill.

Based on a long line of precedents, the Chair sustains the point of order.

Mr. ADDABBO. Mr. Chairman, I move to strike the last word.

UNOBLIGATED BALANCES

Mr. Chairman, it would have been my intention at this point to offer an amendment to cut unobligated balances by $3 billion, but in view of the House action on the 1-percent cut and 2-percent cut, I realize that this would be an amendment in futility. But, I would ask my colleagues to look at the defense budget next year, and they will see that unobligated balances will be $3 billion higher, and unexpended funds will be increased by $9 billion.

Mr. Chairman, on Friday, Chairman MAHON cited an interesting as well as alarming statistic. The amount of the first defense appropriations bill he presented to this House was $13 billion. In the bill we have before us today, not only is the total much, much higher but the amount of the Pentagon's unobligated balances fund is well over $16 billion. Today, that one fund is more than $3 billion higher than the total defense budget of 1949.

My amendment would have done one simple thing. It would reduce the amount of the unobligated balances fund by $3 billion. That, in turn, would reduce the total dollar figure in the bill, reducing the overall budget deficit somewhat.

It would seem to me that all Members of this House who are worried about deficit spending and the taxpayer revolt that is spreading throughout the country could support my amendments no matter how enthusiastically they support the defense budget itself.

These moneys do not go to buy ships or planes. These moneys do not contribute whatsoever to national defense. What they do contribute to is the comfort and the well-being of the movers and shakers within the Pentagon. This is their "goodie" fund and they are understandably anxious to keep it. But since we allow them to keep $13 billion out of their present $16 billion, even the

generals and admirals should not complain too much.

As a matter of practice, by the time actual figures are compiled, the Pentagon might wind up with $16 billion, even with a $3 billion cut. With all due respect to the military accountants, their estimates have always been shamefully smaller than the actual amount of money at the Pentagon's disposal. The original estimate for fiscal year 1978 was $14.3 billion, the revised estimate is $16.3 billion and there is good evidence to suggest the actual figure might well be over $18 billion.

Since the amount of money contained in the unobligated balances fund has doubled since 1972, we in the Congress can only blame ourselves for letting this unsupervised fund grow so quickly and so large.

This unobligated balances fund contains only money that the Department of Defense has not contracted to spend. These dollars are assigned to no specific project. These dollars often represent "found money" for the fertile imaginations of the Pentagon, and can be used for purposes that it might not be wise to include in a regular budget proposal. We have seen many instances of this in the past and we will see this again, unless the Congress asserts itself and takes control of military spending once more.

I cannot emphasize too much that by cutting this fund back, even so slightly as this amendment would have, we do not pare any program, undercut any approved project or scuttle any weapons system. We simply would say to the Pentagon that the Congress believes that in a period of tight money, a $16 billion slush fund is unseemly and will not be tolerated.

Mr. Chairman, the Defense Appropriations Subcommittee has not been stingy with the military appropriations budget this year. In my nearly 18 years of service in this body, it has rarely, if ever, been stingy. Just the opposite is generally true.

There is perfect justification for having a small fund for unobligated balances. Plans change, projects halt. But there is no justifiable cause for that budget to escalate to become a $16 billion monstrosity. That is too large and it is too difficult to justify, even for the most ardent defense supporter. There comes a time when we have to pull the reins on runaway spending, and I believe my amendment would have done just that. I feel sure that if this action were taken, we would have taken one small step toward honesty in budget planning, not only for the Pentagon but for all Federal agencies as well, but as I have previously stated I do not believe I should take the time of the House in view of its turning down 1- and 2-percent cuts on yesterday.

Mr. MAGUIRE. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I regret very much that the amendment offered by the gentleman from California a moment ago was not in order. I simply wanted to commend the gentleman for offering the amendment, and to express the hope that we can find some other way to accomplish this very worthy objective. Asbestosis and cancer of the lung and mesothelioma have proven to be most serious problems for workers in our shipyards. It does require, in my judgment, our action.

Mr. McKAY. Mr. Chairman, will the gentleman yield?

Mr. MAGUIRE. I yield to the gentleman from Utah.

Mr. McKAY. Mr. Chairman, it might be well for the gentleman to know that the Military Construction Subcommittee is already in the process of trying to deal with this in safety standards and buildings and other factors. The Appropriations Committee deals with that, so that the problem the gentleman is working on is already in process. We have anticipated it, and pushed the Department of Defense into a program of safety equivalent to what we have imposed on the rest of the country.

Mr. MAGUIRE. I thank the gentleman for his contribution. I am delighted to hear that the matter is proceeding in that fashion.

(Mr. MAGUIRE asked and was given permission to revise and extend his remarks.)

AMENDMENT OFFERED BY MR. DORNAN

Mr. DORNAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DORNAN: Page 58, after line 15, insert the following new section:

SEC. 863. None of the funds appropriated by this Act may be used to pay for abortions performed by any means except where the life of the mother is in danger if the fetus is carried to term nor may any of such funds be used to promote or encourage abortions.

Mr. DORNAN. Mr. Chairman, my colleagues, it goes without saying that this is the most emotional subject we have debated in the 95th Congress. I burned the midnight oil on researching this issue last night but I will try to be brief.

In a recent article in Legal Aspects of Medical Practice, the journal of legal medicine, there is a fascinating paragraph about the planned increase of abortions in the military. It is rather annoying that it was so difficult for me to find out exactly what is the yearly cost of military abortions. It is difficult for me to think in terms of dollars and cents when we discuss human lives and the cost of death in this House. We have baby Louise Brown alive at home in England, which obviously means that with abortion we are discussing life, human life, in the womb and not an abcessed tooth or a diseased organ.

When we talk about double standards in the military and the fact that I am not able to get from the Surgeon General's Office any funding figures it is infuriating. I have, however, been able to find out that there are 26,000 abortions performed by our military using Defense dollars. I am sure the irony of the word "Defense" in this case comes home to all of us.

Let me quote a paragraph from Legal Aspects of Medical Practice:

DOUBLE STANDARD ON ABORTIONS

Although the federal government has stopped paying for Medicaid abortions, military personnel and their families can still receive abortions at government expense.

And to further create a curious double standard, the Defense Department is currently revising guidelines that will broaden abortion eligibility for military personnel and their dependents.

Since 1971, when the U.S. Supreme Court ruled that states may allow abortions, Defense Department policy has been to pay for elective abortions. This policy includes not only military personnel, active and retired, who use military hospitals, but also military dependents in civilian hospitals who use the Pentagon's CHAMPUS Program (Civilian Health and Medical Program of the Uniformed Services).

I think it is obvious that what we are going to vote on in a moment is the Hyde HEW amendment only applied to the military. I found it unfortunate last spring and last year that the motive of many of us who are opposed strongly to abortion was questioned during that HEW debate. We were characterized with the stupid and ugly charge that we were merely trying to get at the poor. Nothing could be further from the truth. Every single Member that took this well to speak out against abortion has been a consistent fighter for life.

However, here and now, is the clear vote. We are not discussing indigent people or poor people frightened into abortions because of their shaky economic position in life. We are talking about middle-class officers' wives and NCO's wives and other dependents.

We were not willing to cut yesterday in this House, even 1 percent of military money, so why should Congress ask taxpayers to fund any kind of elective surgery—plastic surgery or breast lifting or nose jobs and other types of cosmetic surgery. Let our military people go to civilian hospitals at their own expense. Please, we ask them, spend your own money on elective surgery, do not kill human life with tax dollars out of the U.S. Treasury.

Mr. Chairman, I hope Members will please read in the RECORD tomorrow several articles that in the interest of brevity I will not read.

Mr. Chairman, I submit this amendment, to stop all abortions paid for with Defense funds in full sense of deep responsibility—not only for the preborn children killed with "Defense" money—what irony here in the use of that word "Defense"—but also with high regard for our national policy which should be uniform in spending the people's tax money. Abortions—26,000—in our military hospitals is a disgrace—and that figure was very difficult for me to obtain.

This House has already passed legislation to stop the flow of tax dollars

through HEW for killing unborn life. And the House was critized for this on the grounds that we were denying to the poor the abortion clinics of the rich. Well, let us right now get rid of that criticism.

I point to an article in Legal Aspects of Medical Practice, November 1977, which writes about "Double Standard on Abortions." The article goes on to say that the Department of Defense is currently revising guidelines that will broaden abortion eligibility for military personnel and their dependents. This will include not only abortions in military hospitals but also abortions for military dependents in civilian hospitals—the Pentagon's CHAMPUS program (civilian health and medical program of the uniformed services).

We know that the Defense Department is using tax dollars to perform abortions. I believe one abortion is one too many for rich or poor, and abortion with dollars allocated to keep our Nation strong and our military people healthy is a horrendous act.

However, when our Defense Department takes the killing of the unborn so lightly that it does not even know which facilities are being used, nor does DOD know how many unborn babies are killed. That is incredible. The Defense Department keeps records on all other casualties resulting from Defense actions—why so callous that they do not care about preborn children killed in military facilities through DOD administration.

Nor does the President appear to care. He has repeatedly been informed of his responsibility to issue an Executive order to apply to all executive departments. When March For Life officials met with Mr. Stuart Eisenstadt on January 23, 1978, he was forcefully reminded of the responsibility and power of the Chief Executive to stop the funding of abortions throughout the administration. Because the Chief Executive has chosen to ignore the power of his office and the proper exercise of his office to stop abortions, it is incumbent on this House to show the way, and stop tax dollars from Defense appropriations being used for abortions increasing monthly the casualty list of preborn Americans being killed on domestic and foreign soil.

Mr. Chairman, I know some Members express pity for the viewpoint of those of us who take the floor to fight for the prolife defense of more than 1 million American children being killed in their mothers' wombs. Well, let me express pity for their tragic appeal for death. Little Louise Brown, the test-tube baby born last week in England proves again we are dealing with living human beings in these wombs, not "unwanted" organs. There is a curse upon any military force that funds the killing of its soldiers' young. I plead for your support of the Dornan amendment.

I insert in the RECORD a letter to Mrs. Judie Brown of Washington, D.C., from the Office of the Surgeon General signed by Lt. Col. Joseph F. Constable, MCS, Chief, Patient Administration Office at this point:

DEPARTMENT OF THE ARMY,
OFFICE OF SURGEON GENERAL,
Washington, D.C., November 29, 1977.

Mrs. JUDIE BROWN,
Director of Public Relations, National Right to Life Committee, Inc., National Press Building, Washington, D.C.

DEAR MRS. BROWN: This is in response to your request for information concerning abortions for women in the military service.

Abortion procedures are provided service women in Army medical treatment facilities in accordance with the Supreme Court decision in *Roe* v. *Wade* (1973) as follows:

a. Abortions may be performed during the first three months of pregnancy (the stage prior to the end of the first trimester) by agreement between the patient and her attending physician.

b. Abortions may be performed during the second trimester up to the twentieth week of pregnancy. Concurrence of one qualified obstetric physician consultant is required before an abortion can be performed after the first trimester of pregnancy.

c. Abortions following the twentieth week of pregnancy are performed only for the most stringent of life-threatening medical and psychiatric reasons recognizing that a viable infant may result from the abortion. Concurrence of one qualified physician consultant whose specialty is in the area of the patient's primary disease and one qualified obstetric physician consultant are required before such an abortion is performed. Physicians and other Army Medical Department personnel are not required to perform or directly participate in surgical procedures which violate their moral or religious principles. Because of the policy, the performance of abortions varies with the assignment and reassignment of physicians within the Army system. We are unable, therefore, to maintain a listing of Army medical facilities with obstetrical capability which are providing abortons to service women.

The Army has no special reporting forms for abortions. They are reported on our coding abstracts which are used to report all hospital dispositions.

I trust this information will be of assistance in your research effort.

Sincerely,
JOSEPH F. CONSTABLE,
Lieutenant Colonel, MSC, Chief, Patient Administration Office.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. DORNAN. I gladly yield to the gentleman from Illinois (Mr. HYDE).

Mr. HYDE. Mr. Chairman, I just want to commend the gentleman from California for offering this precise amendment. I think it shows the consistency of those of us who believe that tax dollars should not be used for any abortions. The military people are no different than medicaid users or any others that use tax dollars.

I commend the gentleman.

Mr. DORNAN. I commend the gentleman from Illinois for the courage he has shown over his 3½ years in this House. His constant unrelenting courage in taking the leadership on this critical issue has been nothing short of heroic. We who take the well on this issue fear for our country when we see the lives of hundreds of our citizens, way over a million each year snuffed out in their mothers' wombs. I believe we would place a curse on the Army of this free country if we continue to allow 26,000 military wives and dependents to have their children killed in their wombs.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield so that I may offer an amendment to his amendment?

Mr. DORNAN. I yield to the gentleman from California.

There was a grammatical error or clause error in my amendment.

The CHAIRMAN. The gentleman must offer the amendment on his own time after the gentleman from California (Mr. DORNAN) yields the floor.

AMENDMENT OFFERED BY MR. ROUSSELOT TO THE AMENDMENT OFFERED BY MR. DORNAN

Mr. ROUSSELOT. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. ROUSSELOT to the amendment offered by Mr. DORNAN: In line 3 of the amendment strike out the word "is" and insert the words "would be".

Mr. ROUSSELOT. Mr. Chairman, all this does is change the language to conform to the present HEW language. That is all I seek to do.

Mr. DORNAN. Mr. Chairman, if the gentleman will yield, I thank the gentleman from California (Mr. ROUSSELOT) for clarifying that point.

Mr. MAHON. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, last year on the HEW appropriation bill we had a total of 11 votes in the House on the issue of abortion. The other body had 17 votes. We have held extensive hearings, given extensive consideration and held extensive conferences on the issue. I think everyone in this House knows what his or her position is on this issue.

Earlier this year we had, on the HEW appropriation bill, an amendment which was more moderate than the one that is offered here in connection with abortions. We tried to get it adopted in the HEW bill this year, the same amendment that was finally worked out last year, in the 1978 appropriation bill for HEW, but, by a narrow margin we were defeated. Last evening, the gentleman from California, the author of the amendment, gave me a copy of it indicating that he would offer it at the proper time. The amendment was printed in the RECORD in the proceedings of yesterday.

Let me read the amendment.

None of the funds appropriated by this act may be used to pay for abortions performed by any means nor may any of such funds be used to promote or encourage abortions.

This is slamming the door if the mother is dying and needs an abortion, let her die, that is what this amendment says. It does not leave any exemption at all, it does not leave any escape at all. It is a cruel amendment. It is an unconscionable amendment. It ought not to be adopted.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. MAHON. I will yield to the gentleman from California (Mr. ROUSSELOT) for a question.

Mr. ROUSSELOT. Mr. Chairman, I appreciate the gentleman yielding.

Mr. Chairman, first of all I am not sure the gentleman understood the amendment that was offered. There is a statement in the amendment that says:

* * * except where the life of the mother would be endangered if the fetus were carried to term.

That is a clear exception, just as it is now in the HEW legislation, so that the incident the gentleman just suggested would be properly excepted.

Mr. MAHON. The original amendment that was read did not so state.

Mr. ROUSSELOT. No, it did say "except where the life of the mother would be endangered * * *." We amended that to make sure the language conformed with the HEW language.

Mr. DORNAN. Mr. Chairman, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from California.

Mr. DORNAN. Mr. Chairman, I apologize. This was my fault. I had not added this very important clause, and I accept the critcism based on this clause. And I should have shown the courtesy to the chairman to have gone over at the last minute and shown it to the chairman. I apologize. But that language is in there.

Mr. MAHON. But as I understood it the amendment as read did not include the language.

Mr. DORNAN. He did read it but we did not perceive that change in the reading. Again I apologize to the gentleman.

Mr. MAHON. I regret the confusion surrounding this amendment and the fact that the committee was not notified of the change in the amendment. But, this does not change my opposition to the amendment.

This issue ought to be fought out on the HEW bill, it ought not to be attached to all other bills which are presented to the House.

Let us get this issue behind us so that we can go forward and finish this defense bill and send it to the Senate without this abortion amendment and settle this issue and get the Defense Department going with its program for the forthcoming fiscal year.

Ms. HOLTZMAN. Mr. Chairman, will the gentleman yield?

Mr. MAHON. I yield to the gentlewoman from New York.

Ms. HOLTZMAN. Mr. Chairman, I thank the gentleman for his graciousness in yielding.

Mr. Chairman, this same issue arose in the defense authorization bill, but the House resoundingly defeated a similar amendment because of its effect on our military capability. This amendment—which would prohibit all abortions in military hospitals or by military doctors except where the mother's life was endangered—will adversely affect women in the Armed Forces. It will adversely affect the wives and dependents of our men in the Armed Forces. It will discourage women and married men from entering our Armed Forces. Therefore it will affect the security of the United States. I cannot imagine the gentleman from California would want to do that. I would urge the House to repeat what it did on the defense authorization bill and resoundingly defeat this amendment which will undermine our country's ability to recruit people into our Armed Forces.

The CHAIRMAN. The time of the gentleman from Texas (Mr. MAHON) has expired.

(By unanimous consent, Mr. MAHON was allowed to proceed for 1 additional minute.)

Mr. MAHON. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto do now close.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. ROUSSELOT) to the amendment offered by the gentleman from California (Mr. DORNAN).

The amendment to the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. DORNAN), as amended.

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. DORNAN. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. Ninety-two Members are present, not a quorum.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand by the gentleman from California (Mr. DORNAN) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 226, noes 163, not voting 43, as follows:

Flowers	Rhodes	

The Clerk announced the following pairs:

On this vote:

Mr. Le Fante for, with Mr. Miller of California against.

Mrs. Lloyd of Tennessee for, with Mr. Richmond against.

Mr. Young of Missouri for, with Mr. Diggs against.

Mr. McDonald for, with Mr. Bonior against.

Mr. Kasten for, with Mr. Clay against.

Messrs. BROOKS, RONCALIO, LONG of Maryland, PATTERSON of California, and HANNAFORD changed their vote from "aye" to "no."

Mr. HARKIN and Mr. RISENHOOVER changed their vote from "no" to "aye."

So the amendment, as amended, was agreed to.

The result of the vote was announced as above recorded.

● Mr. MAHON. Mr. Chairman, under permission granted for Members to extend their remarks on the defense appropriations bill and to include extraneous material, I submit a tabulation showing the dollar amounts in the bill as passed by the House. I thought it would be helpful to the Members to have the figures which reflect actions taken during the consideration of the bill.

COMPARATIVE STATEMENT OF NEW BUDGET AUTHORITY

[Fiscal years]

	New budget authority			House bill compared with—	
	Enacted, 1978	Estimates, 1979	House, 1979	1978 enacted	1979 estimate
TITLE I—MILITARY PERSONNEL					
Military personnel, Army	$8,741,800,000	$9,180,000,000	$9,123,499,000	+$381,699,000	−$56,501,000
Military personnel, Navy	6,169,662,000	6,463,000,000	6,456,450,000	+286,788,000	−6,550,000
Military personnel, Marine Corps	1,918,400,000	2,016,500,000	2,015,900,000	+97,500,000	−600,000
Military personnel, Air Force	7,199,900,000	7,576,000,000	7,507,195,000	+307,295,000	−68,805,000
Reserve personnel, Army	555,600,000	532,600,000	546,650,000	−8,950,000	+14,050,000
Reserve personnel, Navy	206,075,000	179,000,000	226,825,000	+20,750,000	+47,825,000
Reserve personnel, Marine Corps	78,700,000	81,200,000	83,725,000	+5,025,000	+2,525,000
Reserve personnel, Air Force	171,400,000	183,600,000	186,325,000	+14,925,000	+2,725,000
National Guard personnel, Army	782,500,000	747,100,000	788,900,000	+6,400,000	+41,800,000
National Guard personnel, Air Force	231,800,000	252,200,000	256,477,000	+24,677,000	+4,277,000
Total, title I, new budget (obligational) authority, Military personnel	26,055,837,000	27,211,200,000	27,191,946,000	+1,136,109,000	−19,254,000
TITLE II—RETIRED MILITARY PERSONNEL					
Retired pay, Defense	9,010,000,000	10,148,938,000	10,139,838,000	+1,129,838,000	−9,100,000

● Mr. PANETTA. Mr. Chairman, I am pleased that the House Appropriations Committee has recognized the importance of professional education in today's military by singling out for special praise the Naval Postgraduate School at Monterey. The committee has recommended that the Navy school be utilized by the services to a much greater extent than is now the case. On August 4, 1978, the distinguished chairman of the Appropriations Committee stated on the floor that the committee is primarily concerned with the use by the services of civilian facilities instead of defense-run institutions like the Naval Postgraduate School. The chairman made it clear that the recommended 10-percent cut in professional education was not aimed at the service schools. The chairman stated:

* * * the reduction is not aimed at the school at Monterey * * * Some reduction might possibly be made at the service schools, but this is aimed at the contracting out that is being done by the Armed Forces.

But the committee also highlighted some weaknesses in the current professional education programs in the services, pointing out with aggregate data the apparent underutilization by the services of professionally trained manpower. Based on these data, the committee draws the conclusion that the services already have an emormous surplus of professionally trained personnel and that a 10-percent reduction in professional education is, therefore, in order. It is to this larger question of professional education within the services that I would now like to turn my attention.

I applaud the committee's desire to contain waste within the Department of Defense. I am not convinced, however, that advanced education for our officer corps—the frontline of our defenses in modern warfare—is the best place to cut back. While better management practices are certainly called for, I am con-

cerned that a cut of this magnitude may have an adverse impact on our ability to perform with the requisite degree of precision and competence in this age of highly complex technological warfare. The current level of graduate education provided in the Navy, for instance, will result in serious shortfalls in officers qualified to supervise and manage the design, development, acquisition and operation of complex and technically sophisticated weapons systems. It has also been pointed out to me that conclusions based on aggregate inventory data, as was used by the committee, fail to recognize the age, rank, and usability of the inventory.

Inventories of officers with graduate education in the Navy have historically constituted about 20 to 25 percent of the Navy Officer Corps. Currently, the figure stands at about 18 percent, with a projected decline to about 6 to 8 percent within the next decade unless prompt action is taken to reverse this trend. I might point out that this decline to less than 10 percent of the Navy Officer Corps with graduate education compares very unfavorably with the figures for the Soviet Navy, which provides graduate-level education to 50 percent of its officers. The Federal German Armed Forces, incidentally, provide 100 percent of their career officers with graduate-level education.

Furthermore, the recommended 10 percent cut ignores substantial and ongoing changes that the Navy has incorporated into the management of its graduate education program. These changes include: Improved utilization policies, reduction of the length of graduate programs, improved billet validation procedures, and development of detailed educational skill objectives for each subspecialty area. It is indeed unfortunate that the committee apparently has not seen fit to take these improvements into account before approving this 10 percent reduction.

In conclusion, let me simply reiterate my main point. Anticipated changes in both technology and force levels necessitate the continued dependence on technology as a force multiplier. It is highly unreasonable to expect the service to operate and utilize the full capacities of our weapons systems without increasing the numbers of officers technically trained at the graduate level to use them. It is because I share the committee's commitment to quality education for our military personnel—provided management is improved to prevent abuses—that I believe this Nation must strongly support and increase its commitment to professional defense education.●

● Mr. BROOKS. Mr. Chairman, I was greatly concerned to read that portion of the defense appropriations report dealing with Federal automatic data processing procurements. This report seems to suggest that the premises underlying enactment of Public Law 89–306 are no longer valid. I cannot agree with this.

Public Law 89–306 provides that Federal agencies shall procure their ADP services in the most economical and efficient manner possible. Throughout its life, enforcement of the act has been premised on the basis that the Government can acquire its ADP services most economically through full and open competition and that this process will provide the most modern technology required to sustain efficient Government operation.

The defense appropriations report appears to reject this position—seemingly advocating sole-source or other noncompetitive procurements. This approach could lock in the use of antiquated software applications and actually retard the acquisition of modern technology.

Mr. Chairman, I ask unanimous consent to revise and extend my remarks in order that I may fully explain this matter.

I have always held the Appropriations Committee in respect. I have viewed this committee as possessing expertise in the operations of Government. It was therefore with dismay that I read the current Defense appropriation report's discussion on Automatic Data Processing Activities. If the advice contained in this part of the report were followed I fear it would seriously undermine the Government's policies and practices in the efficient and economical procurement and utilization of ADP/telecommunications resources. What is worse, I am greatly concerned that if the philosophy underlying the report is widely accepted, the effect would be to impair procurement of all goods and services and not ADP alone.

The Appropriations Committee report challenges the current Government policies and practices of procuring ADP resources on the basis of full and open competition. It suggests that money can be saved by procuring through noncompetitive methods, such as sole-source and brand name or equal. It further states that failure of agencies to take software conversion costs into consideration when procuring new ADP systems conceals the fact that competitive procurements are not as economical as noncompetitive ones. Finally, the report implies that requiring agencies to rely upon procurement policies promoting competition impedes their opportunity to acquire the most advanced technological equipment. If, in fact, these represent the views of the committee, they regretfully represent a lack of appreciation of the true conditions underlying ADP procurement policies and practices in the Federal Government.

Turning to the first charge, it is stated that agencies are procuring their ADP requirements primarily on the basis of competition, without adequate attention being given to significant cost factors. In particular, the report singles out the agencies' failure to apply software conversion costs when considering total procurement costs. When agencies are attempting to operate in nonstandard, low-level languages, the one-time cost of conversion to standard high-level languages can be costly. But the fact which the report loses sight of is the true long-term life-cycle costs savings that will inevitably be realized by converting to a high-level language.

One such cost saving would be the ability of an agency thereafter to utilize any brand name of equipment without being locked into a particular brand which inevitably costs more money when procured on a noncompetitive basis. Even more important is the fact that those agencies which continue to rely upon these low-level, nonstandard languages are retarded from effectively gaining the benefit of modern hardware technology or of utilizing ADP to enhance the management of Federal programs.

The effect of this is that agencies are trying to manage today's programs on technologically sophisticated machines controlled by software which is all to frequently antiquated, fragmented and unusable garbage. As the GAO documented in a recent report, hundreds of millions of dollars are being lost annually as a result of mismanagement of software. Unless agencies are required to properly manage their software, including conversion to standard high-level languages, they will, to an increasing rate, be required to rely on the costly sole-source method of harware procurement. As a result, agencies will become even more inefficient managers of Federal programs.

Of even greater concern to me is the fact that the report suggests that the longstanding national policy of open competition is no longer applicable to today's environment. I find it hard to believe that the Appropriations Committee would support this. The House Government Operations Committee, General Services Administration, General Accounting Office and others have consistently documented that procurement of ADP hardware through full and open competition has saved billions of dollars over time.

The Appropriations Committee report has suggested that in private industry full competition is only attempted when it is cost beneficial to do so. Regardless of what the management of an individual company may conclude as to short-term savings through sole-source procurements, the Federal Government has a far greater array of responsibilities to take into consideration. Primary among these is the national policy of promoting free and open competition which is founded on the proposition that such is not only more economical in the long run, but more conducive sociologically and politically to promoting our free-enterprise system.

With regard to the report's contention that competitive requirements have forced agencies to settle for technologically inferior equipment, the facts once again do not support the conclusion. It is widely recognized that many agencies continue to use older equipment. They do so either because such equipment continues to serve their needs on a cost-benefit basis or because they lack the managerial capability to use more highly advanced categories of equipment.

As pointed out above, continued reliance on outmoded, fragmented, nonstandard low-level languages is a reflection of an agency's managerial sophistication. For that matter, if some agencies, who cannot efficiently manage their present, less complex system, were to be permitted to acquire "leading-edge" equip-

ment, the disruption through mismanagement would probably set the taxpayer back even greater millions of dollars.

However, when an agency has demonstrated its need for and capability to operate an advanced system, they are authorized under existing guidelines to acquire the same and at a far cheaper price competitively than would be solesource. A good example of this is the Navy which recently acquired several of Sperry-Univac's latest advanced model computer system for its Data Processing Service Center (DIPSI) at a 71-percent price discount. What is particularly astounding is that the committee report supports denying the Army money for project VIABLE which is designed to replace its outmoded base operations system with new technology—suggesting that the Army could satisfy its need through emulation. In fact, by requiring the Army to meet its needs through this emulation requirement on a noncompetitive basis it would have the effect of locking them into their old antiquated software and thereby cause the Army to forfeit the benefits it could derive through the new technology and through full and open competition. What the report recommends here is acquiring a racehorse to pull a milk wagon. In sum, if the policies laid down by this report were to be followed, the result would be even more costly and more inefficient ADP operations, causing disruption and not enhancement to Federal program operations.

Mr. Chairman, I understand that the findings and conclusions expressed in the committee report were formulated by the committee's investigative staff. In light of the deficiencies I have found, it is particularly disturbing to note that neither the investigative staff report nor the committee report is supported by firm analyses. In fact, the investigative report, in particular, appears to be a superficial project prepared by individuals drawn from Federal agencies who conducted this review and wrote this report without management control and direction from the full committee to insure accuracy and objectivity of the data presented. This is particularly distressing since the White House ADP reorganization staff, the GAO, and others are in the process of recommending further strengthening of existing competitive practices. I can only say, Mr. Chairman, that if the recommendations, suggestions, and implications of the ADP part of this report are implemented, the taxpayers are in for a heap of trouble.●

● Mr. SIKES. Mr. Chairman there has been considerable dissatisfaction with the requirement that civilian personnel in the Department of Defense use government quarters when on travel status. The purpose obviously is to reduce costs to the Department of Defense in that the rates on government quarters are much lower than those of public facilities. The complaints, and there have been many, are varied. Some of the objections are on the quality of the quarters that are available such as occasional open bay barracks; a lack of satisfactory toilet and bath facilities, lack of access to recreational and entertainment activities, and even overcrowding.

The committee has made a careful study of this matter. It is discussed in detail beginning on page 161 of the committee report. The committee has assumed that there would be some administrative difficulties when this provision was added to the bill but did not anticipate the degree of dissatisfaction which has arisen. It is the committee's desire to save money. This is commendable. The committee has been unwilling to forego that goal when the difficulties that have arisen apparently center on unwillingness or inability by the Department of Defense to define what is adequate quarters and the unwillingness or inability of the services to administer these facilities in a more reasonable manner. The committee has determined that the effort to utilize the Government quarters should be continued but proper guidelines should be established to avoid hardship or the use of inadequate quarters.

This problem is one which should be given careful scrutiny in the ensuing months. The committee expects the Department of Defense to establish realistic policies which are spelled out in the committee report and which should insure satisfactory quarters if civilian employees are to continue to utilize Government facilities while on temporary duty.

Unless an improvement can be made in this requirement, it should be dropped. There should be no delays in seeking a better policy.●

● Mr. GARCIA. Mr. Chairman, I am thoroughly aware of the need for a strong national defense program. And I believe that program should be supported by the most effective, appropriate use of technology available for our strategic defense and equitably treated Armed Forces. And, paradoxically, it is for these reasons that I shall vote against final passage of the Defense Department appropriations for fiscal year 1979.

One of the major reasons for my opposition is the scandalous approval by this body of another nuclear-powered aircraft carrier at a time when we are talking about cost-effectiveness and preventing needless waste. In his testimony to the Subcommittee on Defense Appropriations, Secretary Brown himself told us that this purchase was not necessary and is strategically unwise. And instead of heeding his professional opinion to maintain our strategic alternatives and listening to our own commonsense we went ahead and funded the most expensive carrier in history. Do you know what $2 billion would buy for the south Bronx?

Then, after we wasted $2 billion, we started practicing economics and cut funds for abortions in the armed services. It is ironic that, with his amendment which mandates that women shall bear the responsibility of giving birth to children, Mr. DORNAN did not offer a companion amendment appropriating funds to provide support services for those children.

Mr. Chairman, until my colleagues are willing to take a more realistic look at both national security and constitutional liberties I shall continue to vote against any legislation that contains such reprehensible provisions.●

● Mr. PATTISON of New York. Mr. Chairman, I voted today against the Department of Defense appropriations bill. I regret that such a vote was necessary on my part. I would have much rather supported a bill which would meet our Nation's defense needs at a reasonable cost. The bill which passed however, is a statement to the American people that inflated, and worse, wasteful Government spending is acceptable when it is in the name of national security.

We need a strong national defense program. No one can argue that. What I do argue is that we cannot shed fiscal responsibility when considering defense. Waste buys no defense.

Proposition 13 has focused considerable attention on Government spending; attention from which we can certainly benefit. It is a call for us to scrutinize the budget far more carefully, to weigh the merits of programs and to decide where cuts should be made. It is a call for fiscal responsibility which unfortunately some of my colleagues have ignored. The device often employed is to vote for every specific add-on to please the special interest affected but then to vote for nonspecific percentage cuts in each appropriation bill. The times require surgery, not butchery.

Money spent in the name of national security seems immune to any cutbacks. My colleagues who previously exhibited such zeal in pursuing lean appropriations and authorizations, became strangely silent when considering defense, the largest single portion of the budget. A myth exists that the more money we spend on defense the safer we will be. Not true. The complaint that politicians think they can solve problems by "throwing money at them" is as valid in defense as in other programs. All spending should be subject to the same cost-benefit analysis and efficiency studies—defense included. I realize that defense does not come cheap, but it is our responsibility to be economical. It is our responsibiity to provide the American people with the greatest possible defense at the lowest possible cost. We have not done that in the bill just passed.

The defense program President Carter sent to Congress was a fairly reasonable one. The appropriations bill which emerged from committee, millions above the administration's request, was not. The most obvious example of its wasteful spending was the nuclear carrier.

After listening to hours of debate, I remain unconvinced that the nuclear carrier is an effective way to spend American tax dollars. At a time when the Secretary of Defense and the Secretary of the Navy agree that a greater number of smaller vessels is needed to assure adequate combat power of our fleet, we are denying ourselves this flexibility and sinking approximately 1.8 percent of our defense budget into the most expensive ship ever built. Chance of losing our investment in the carrier are high, should war with another superpower occur. As the Soviet ability to sink it increases, its vulnerability may reach the point where it is obsolete before it even reaches water. Even for normal, operational security,

the nuclear carrier requires escort ships which we do not have at present. Thus we are committing ourselves to enormous costs of questionable value for the future, well beyond the initial price of the carrier itself. The carrier's proponents state that the ship is an answer to the threat of the Soviet buildup, but chances are good that if we ever entered into conflict with the Soviets, it would involve missiles, not carriers. We have 13 afloat and 1 being built. While the Soviets have two carriers which can launch small VSTOL aircraft and helicopters, they have no carriers which have anywhere near the same strike force as ours.

The Appropriations Committee report accompanying this bill states that there is "no single weapons system or single program presented in the defense budget, which if denied, would lead to the military destruction of the United States." Both the chairman of the committee and the ranking Republican member of that committee, both advocates of military security with impeccable credentials, argued against including the carrier. I agree with this and feel that the removal of such a wasteful expenditure as the nuclear carrier would have shown to the American people the fiscal responsibility of Congress in cutting out the unnecessary and unwise in the defense budget. It is easy for us to lose sight of the effectiveness of our defense spending in our effort to assure ourselves that we have the biggest and best defense on the planet.

We are experiencing the serious problem of inflation. Our national debt and trade deficits are both critically high and the value of our currency continues to drop on foreign markets. These are facts I consider painfully obvious but these concerns have been neglected in the passing of this defense appropriations bill. A point often raised in response is that a large military budget is good for the national economy. This argument died with World War II. Military spending is unquestionably the most inflationary form of Government spending. It pumps high wages into the economy without creating any goods for those wages to purchase. The result: More dollars chasing fewer goods.

In the past few months, we have tried to deal with some of the problems stated earlier by curbing our spending. The result has been some painful cuts to social services programs, and a bloated defense budget. We cannot isolate military expenditures from the scrutiny with which we consider the rest of the budget. As I have said before, we cannot continue to fund wasteful military projects and still hope to maintain a strong military posture and a sound economy. Our defense program and our national economy cannot be considered independently of one another. I feel we have done this in our consideration of the defense appropriations bill, and this is why I opposed it.●

The CHAIRMAN. The Clerk will read.

The Clerk concluded the reading of the bill.

(By unanimous consent Mr. PICKLE was allowed to speak out of order.)

TRIBUTE TO THE HONORABLE GEORGE H. MAHON

Mr. PICKLE. Mr. Chairman, I take this time to point out to the House that this is a significant moment in the history of the Congress of the United States. Upon the passage of this Defense appropriation bill, it may be the last time that the Honorable GEORGE HERMAN MAHON will serve as the chairman of the committee which handles directly appropriation matters affecting the defense of this country.

GEORGE MAHON was elected to the Congress in 1934. He went on the Appropriations Committee in 1939. He was assigned to the defense appropriations section of the subcommittee in the days when we had an appropriation for the War Department and for the Navy Department. He was assigned to the Appropriations Subcommittee on Defense in 1949 when the Department of Defense was created. He has handled every Defense measure before this House, except for one small hiatus, and has served as chairman of this Appropriations Subcommittee for 29 years. During that time the appropriations for Defense have exceeded over $1.7 trillion.

I think the House ought to observe this moment and pay our respects to this man who has handled the Defense matters of this Nation so well. Over and above that, although there will be other times to pay our plaudits to this great man, it is good for us to know that here is a man who is the very symbol of what we all think a legislator should be. Gentleman GEORGE MAHON is the finest our country has ever sent to Congress. Surely we can say that we are blessed because this good man, this good Christian man has served this Nation in such a strong capacity. I do not know of another man in America who is more gentle, more kindly, and yet more firm and dedicated in the defense of this Nation than GEORGE HERMAN MAHON.

At this time the House simply ought to recognize that this may be the last time he will ever be handling this appropriations subcommittee bill. We love you, GEORGE MAHON.

[Applause, the Members rising.]

Mr. ADDABBO. Mr. Chairman, will the gentleman yield?

Mr. PICKLE. I yield to the gentleman from New York.

Mr. ADDABBO. Mr. Chairman, I also point out that this is the last time we will have in the presentation of an original Defense appropriation bill the services of the distinguished gentleman from Florida, the ranking majority member, Mr. BOB SIKES, and our other colleague, the distinguished gentleman from Georgia, Mr. JACK FLYNT. Between the gentleman from Texas, Mr. GEORGE MAHON and the gentleman from Florida, Mr. BOB SIKES, and the gentleman from Georgia, Mr. JACK FLYNT, we will be losing 100 years of expertise and dedicated service to the defenses of our Nation, the people of America, and the Congress. They all will be long remembered and missed.

Mr. PICKLE. Mr. Chairman, I propose we give those great gentleman a hand also.

[Applause, the Members rising.]

Mr. MAHON. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. ROSTENKOWSKI, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 13635) making appropriations for the Department of Defense for the fiscal year ending September 30, 1979, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The SPEAKER. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them en bloc.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. FORSYTHE

Mr. FORSYTHE. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. FORSYTHE. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. FORSYTHE moves to recommit the bill H.R. 13635 to the Committee on Appropriations.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

Mr. EDWARDS of Alabama. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 339, nays 60, not voting 33, as follows:

[Roll No. 665]

YEAS—339

Addabbo	Aspin	Bonker

NOT VOTING—33

Abdnor	Hansen	Rhodes
Andrews, N.C.	Jenkins	Richmond
Barnard	Kasten	Rodino
Bonior	Le Fante	Roe
Brown, Mich.	Lent	Rose
Davis	Lloyd, Tenn.	Scheuer
Dickinson	McDonald	Sisk
Evans, Del.	Mathis	Teague
Flowers	Mattox	Tsongas
Fowler	Miller, Calif.	Vander Jagt
Frey	Murphy, N.Y.	Young, Alaska

The Clerk announced the following pairs:

On this vote:

Mr. Davis for, with Mr. Richmond against.

Mrs. Lloyd of Tennessee for, with Mr. Miller of California against.

Until further notice:

Mr. Murphy of New York with Mr. Abdnor.

Mr. Rodino with Mr. Brown of Michigan.

Mr. Bonior with Mr. Lent.

Mr. Jenkins with Mr. Mattox.

Mr. McDonald with Mr. Young of Alaska.

Mr. Teague with Mr. Kasten.

Mr. Le Fante with Mr. Hansen.

Mr. Rose with Mr. Andrews of North Carolina.

Mr. Roe with Mr. Barnard.

Mr. Flowers with Mr. Dickinson.

Mr. Mathis with Mr. Evans of Delaware.

Mr. Sisk with Mr. Frey.

Mr. Tsongas with Mr. Vander Jagt.

Mr. Fowler with Mr. Scheuer.

Mr. MITCHELL of New York and Mr. EDWARDS of Oklahoma changed their vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AUTHORIZING CLERK TO CORRECT SECTION NUMBERS, PUNCTUATION, AND CROSS REFERENCES IN THE ENGROSSMENT OF H.R. 13635

Mr. MAHON. Mr. Speaker, I ask unanimous consent that the Clerk be authorized to correct section numbers, punctuation, and cross references in the engrossment of the bill H.R. 13635, defense appropriations, 1979.

The SPEAKER pro tempore (Mr. BRADEMAS). Is there objection to the request of the gentleman from Texas?

There was no objection.

PERSONAL EXPLANATION

Mr. DOWNEY. Mr. Speaker, I would like the RECORD to show that I was at a press conference during the vote on the Dornan amendment to H.R. 13635 today.

Mr. Speaker, had I been present, I would have noted "no."

PERSONAL EXPLANATION

Mr. CARR. Mr. Speaker, I would like the RECORD to reflect that I was at a press conference during the vote on the Dornan amendment to H.R. 13635 today.

Mr. Speaker, had I been present, I would have voted "no."

PERSONAL EXPLANATION

Mr. GLICKMAN. Mr. Speaker, I would like the RECORD to show that I, also, would have voted "no" on the Dornan amendment to H.R. 13635.

Mr. Speaker, I got confused by the number of bells ringing for fire alarms and for an air raid.

Mr. Speaker, had I been present, I would have voted "no" on the recorded vote.

GENERAL LEAVE

Mr. GIAIMO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the defense appropriations bill just passed, and on the subject of the service and retirement of the gentleman from Texas (Mr. MAHON).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

REQUEST TO MAKE IN ORDER CONSIDERATION OF HOUSE CONCURRENT RESOLUTION 683, SECOND CONCURRENT RESOLUTION ON THE BUDGET, ON TUESDAY NEXT OR ANY DAY THEREAFTER

Mr. GIAIMO. Mr. Speaker, I ask unanimous consent that it may be in order on Tuesday, August 15, 1978, or any day thereafter, to consider House Concurrent Resolution 683, the second concurrent resolution on the budget for fiscal year 1979.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Connecticut?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, last night the gentleman from Connecticut (Mr. GIAIMO) was kind enough to discuss this request with me. Having had the chance to think it over, overnight, it occurs to me that if the House grants this request, it at least establishes a major part of the legislative schedule prior to the recess the House is scheduled to take next week. However, it does so without any assurances that, for instance, the tax cut bill will come up or that the ERA extension will or will not be considered.

It also occurs to the gentleman that in the absence of any word from the majority leadership as to what the schedule is to be, we should withhold this request.

I do not wish to discommode the gentleman. I know the matter has to be settled, but I also think the House has the right to know, if the budget resolution is going to be considered, what other matters are going to be considered, including the tax bill, which is intimately connected to the budget resolution.

Mr. GIAIMO. Mr. Speaker, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from Connecticut.

Mr. GIAIMO. Mr. Speaker, I cannot, of course, give any assurances to the gentleman as to what the schedule would be. The gentleman would have to check that with the leadership.

It is my hope certainly that the tax bill would come up before the budget resolution. I believe the gentleman understands the purpose of this unanimous-consent request is to do away with the requirement of having a layover before we can bring up the budget resolution.

Speaking just as a Member, it seems to me that there is a great deal of legislation scheduled on the calendar. I am sure it is the intent of the leadership to be as busy as possible between now and the recess, and this is one of the items of importance that will have to be taken up.

Mr. Speaker, I would hope the gentleman will not press his objection.

Mr. BAUMAN. Mr. Speaker, I certainly would in no way want to interfere with the gentleman or his committee's deliberations, but I think the House has a right to know whether the tax bill would be considered before the budget resolution.

Mr. Speaker, if the gentleman would withhold his request, I would not object, but if he wishes to make it now, with no offense to the gentleman, I would object.

Mr. GIAIMO. Mr. Speaker, I withdraw my request.

The SPEAKER pro tempore. The gentleman from Connecticut (Mr. GIAIMO) withdraws his request.

CONFERENCE REPORT ON H.R. 2777, NATIONAL CONSUMER COOPERATIVE BANK ACT

Mr. ST GERMAIN. Mr. Speaker, I call up the conference report on the bill (H.R. 2777) to provide for consumers a further means of minimizing the impact of inflation and economic depression by narrowing the price spread between costs to the producer and the consumer of needed goods, services, facilities, and commodities through the development and funding of specialized credit sources for, and technical assistance to, self-help, not-for-profit cooperatives, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Rhode Island?

Mr. BAUMAN. Mr. Speaker, with that announcement of the program, I withdraw by reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of July 28, 1978.)

Mr. ST GERMAIN (during the reading). Mr. Speaker, I ask unanimous consent that the further reading of the statement be dispensed with. I shall endeavor to explain the contents of the conference report.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Rhode Island?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, did my colleague, the gentleman from Texas (Mr. WRIGHT), wish to speak?

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. Reserving the right to object, Mr. Speaker, I yield to the gentleman from Texas.

Mr. WRIGHT. Mr. Speaker, I would like to suggest, for the benefit of those who have raised the question with respect to the tax bill, that it is the purpose and the plan of the leadership to bring the tax bill tomorrow, assuming that a rule has been granted today. I hope that satisfies the gentleman's curiosity—and I can understand his curiosity—and that he will remove his objection to the request of the gentleman from Connecticut.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, I yield to my colleague, the gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. Mr. Speaker, the concern of the gentleman from Maryland is that the tax bill be considered first so that the appropriate changes can be made in the second budget resolution, if that is required. In the absence of a rule on the tax bill having been granted, I think it would be prudent to delay the request of the gentleman from Connecticut until later in the day.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield further?

Mr. ROUSSELOT. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Texas.

Mr. WRIGHT. Mr. Speaker, the recommendation of the gentleman from Maryland is exactly on track with the plans of the leadership to consider and complete action on the tax bill tomorrow and/or Friday, in order that we will know those figures when we come—and indeed we must come—on next Tuesday, and no later, with the budget resolution, if we are to comply with the law.

Mr. BAUMAN. I thank the gentleman.

Mr. Speaker, I would only say that we should wait and see what the Committee on Rules does. Occasionally, once or twice in the session, it is allowed to become an unpredictable body.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, I do not believe the gentleman on the other side of the aisle heard the gentleman's last statement.

Mr. BAUMAN. If the gentleman will yield. I see no problem with waiting until the Committee on Rules acts, and then the gentleman from Connecticut can obtain his request.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, is it the intention of my colleague, the gentleman from Rhode Island, to split the time equally on this conference bill?

Mr. ST GERMAIN. Oh, absolutely.

Mr. ROUSSELOT. Mr. Speaker, I appreciate the gentleman's statement, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

The SPEAKER pro tempore. The gentleman from Rhode Island (Mr. ST GERMAIN) will be recognized for 30 minutes and the gentleman from Ohio (Mr. STANTON) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Rhode Island (Mr. ST GERMAIN).

Mr. ST GERMAIN. Mr. Speaker, I yield myself as much time as I may consume.

Mr. Speaker, this conference report is the culmination of 3 years of legislative efforts to provide a credit facility for consumers willing to roll up their sleeves, go to work and form their own cooperative organizations.

The National Consumer Cooperative Bank is Federal seed money—combined with local action and local decisionmaking by local people. It is the American principle of self-help.

We have attempted to shape a final legislative product which can command the support of a broad consensus of the House—a consensus drawn from both sides of the aisle.

Your conferees have agreed to pare down the size of the entities created under this legislation—to sharply reduce the funding levels.

Briefly—we have cut the capital for the bank from $500 million over 5 years as contained in the House bill to the $300 million provided in the Senate bill. We have also accepted the Senate's lower figures for the self-help development fund from the 5-year $250 million program envisioned in the House bill to a 3-year $75 million authorization in the Senate bill.

To put it in clear terms—the conferees have accepted the Senate amendments cutting $375 million from the House-passed bill. We have economized to the maximum.

The National Consumer Cooperative Bank Act has the full endorsement of President Carter and his administration. At this point I will include a letter from the Secretary of the Treasury, W. Michael Blumenthal, dated August 9, 1978:

THE SECRETARY OF THE TREASURY,
Washington, D.C., August 9, 1978.

Hon. FERNAND J. ST GERMAIN,
Chairman, Subcommittee on Financial Institutions Supervision, Regulation and Insurance, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: I am writing to reaffirm our support for the National Consumer Cooperative Bank Act (H.R. 2777) as set forth in the Conference report. As Assistant Secretary Altman indicated in his testimony before the Subcommittee on Financial Institutions of the Senate Committee on Banking, Housing and Urban Affairs, "we have concluded that a program of loans and technical assistance [to Consumer Cooperatives] is desirable and that such a program would be most effectively administered by an independent Bank."

The Treasury supported an authorization for the Federal government to invest $300

million in the Bank's preferred stock and $75 million in the Self-Help Development Fund. These amounts are now incorporated in the conference report. The Treasury strongly supports these revised appropriation figures for the Bank.

The Department has been advised by the Office of Management and Budget that this letter is in accord with the program of the President.

Sincerely,

W. MICHAEL BLUMENTHAL.

The National Consumer Cooperative Bank has the full endorsement of President Carter and his administration. Witnesses for the Treasury Department have supported the funding levels contained in the conference report and, as my colleagues are aware, the congressional budget resolution adopted May 17 includes initial funding for the program.

Mr. Speaker, the capital being provided this bank is in the form of a temporary loan—money which will be repaid in full with interest by the cooperatives which use the Consumer Cooperative Bank. This is the same approach which worked so successfully in the farm credit system—all the entities of this system have repaid their capital including the funds advanced for the formation of the bank for "farm" cooperatives.

Like the farm credit system, this bank will be able to borrow funds from the private markets and the Senate accepted the House's provisions empowering the bank to borrow up to 10 times its capital in the market. We believe the 10-to-1 ratio will facilitate the bank's entry into the market, speed the repayment of the Government's capital and hasten the day when the institution becomes totally private, controlled and operated by its cooperative members.

This conference report has broad support—religious leaders, virtually every consumer organization in the Nation, a variety of rural and urban groups, senior citizens, cooperatives—and innumerable individual citizens who want an opportunity to do things for themselves through self-help organizations at the local level.

This bill has enjoyed wonderful bipartisan support—my friends CHALMERS WYLIE and STEW MCKINNEY have done an outstanding job promoting the idea among their colleagues. Our original bill had 100 cosponsors from every region of the Nation. And as the 60-to-33 vote in the Senate indicated, the legislation enjoyed wide support on both sides of the asile in the other body.

Mr. Speaker, I am convinced that this will be landmark legislation—one of those instances when the Congress addressed a specific economic need and demonstrated its faith in the self-help concept which has made this Nation great.

This legislation is different. It is a change—a welcome change—from the hat-in-hand demands that the Congress faces all too often from all too many special interests.

It is a request for a helping hand, not a handout. This legislation asks for a partnership—albeit a temporary partnership—between the Federal Government and its people—people willing to provide the hard work necessary to form a cooperative serving a variety of consumer needs—health, housing, food, repair, and others. All the consumers ask is seed money for a lending institution—seed money that will be repaid in full with interest.

The need for a lending institution for consumer cooperatives is overwhelming. We received much testimony on this in the last Congress and our hearing record in the House for both 1976 and 1977 is filled with examples of credit-worthy consumer cooperatives denied credit by private lending institutions. Commercial banks for a variety of reasons—including their general unfamiliarity with the cooperative structure and their natural bias toward profitmaking enterprises—have redlined the consumer cooperatives all over this Nation.

We are not here to criticize the private lending institutions for this failure—but to recognize that a tremendous gap does exist—one which can be filled at this juncture only with an infusion of Federal seed money on a fully repayable basis.

The cooperatives will take over responsibility for operating the Consumer Cooperative Bank as the Government's seed money capital is repaid. And long before this occurs, it will be in the private markets, raising its own funds on the basis of its established record and credit worthiness.

Unlike a straight Federal loan program, the Consumer Cooperative Bank provides a double check against waste, misuse, and mismanagement: First, through its Board of Directors and second, in the private markets in which it must raise funds. If the Board of Directors makes poor decisions, wastes money or becomes corrupt, the private marketplace will serve as a check, as a disciplinarian and the bank will not be able to raise funds.

We must recognize that some cooperatives, serving the poor in both urban and rural areas, will not be able to meet the market interest rate requirements of the Consumer Cooperative Bank. For these specialized cooperatives—serving a specific mission in low-income areas—we provide a separate mechanism—a self-help development fund.

But, again, this fund—while empowered to adjust terms—must be administered on a loan basis—fully repayable. This fund is established on a revolving basis with the repayments available for future lending to low-income cooperatives.

We are convinced that cooperatives nurtured under this self-help fund can have large meaning for the revitalization of communities, neighborhoods and rural areas. We believe that people forming these cooperatives can help bring neighborhoods together and to provide services not now present in many inner-city and depressed rural communities. I am firmly convinced that this type of self-help program, built on the cooperatives' members own organization and hard work is far superior to much of the aimless aid that is pushed on these areas from on high. These cooperatives would be local initiative, based on local need, and run by local people.

Many of these low-income cooperatives will, after gaining their start from the self-help fund, be able to gain sufficient strength to become eligible for future loans from the Consumer Cooperative Bank.

Technical assistance, I am convinced, is essential to make certain that those programs work—both the Consumer Cooperative Bank loans and those emanating from the self-help fund. Technical assistance has been one of the ingredients that has made farm credit, rural electrification and rural telephone programs work and has contributed greatly to these programs' fantastically good credit records.

President Ford's former press secretary and long-time news columnist Gerald ter Horst wrote in the Washington Post last September:

> Cooperative action is as American as the Boston Tea Party, the winning of the West and rural electrification. . . . As one who grew up around co-ops, I can attest to their ability to aid the development of communities ignored by commercial banks, to keep prices competitive and to give consumer-members more bargaining power in the marketplace.

Mr. Speaker, I urge adoption of the conference report.

Mr. STANTON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, Members of the House, I rise in strong opposition to the conference report that is before the House at the present time. I think that it would be appropriate for the few of us who are here at the moment, and perhaps hopefully more of those who are watching on television, to recheck this vote which was originally taken in the House here in July of 1977, in which over 200 Members of the House voted against this legislation at that time. Mr. Speaker, of course there are many reasons why 200 Members of this very distinguished body would vote against something.

Mr. WYLIE. Mr. Speaker, will the gentleman yield?

Mr. STANTON. I yield to my colleague from Ohio.

Mr. WYLIE. I think there were 198 votes against it. I do not want the gentleman to mislead his colleagues in the House.

Mr. STANTON. I appreciate being corrected. I guess I was looking to the future.

Mr. LAFALCE. Mr. Speaker, will the gentleman yield?

Mr. STANTON. I yield to the gentleman from New York.

Mr. LAFALCE. Was the gentleman referring to prior to changes, or after changes?

Mr. STANTON. I am sure, prior. One reason that 198 Members, I would presume, would vote against this legislation probably could best be reiterated with the points that the Deputy Secretary of the Treasury, George Dixon, made before our committee. Ladies and gentle-

ment, this is something to think about when we vote on the conference report.

Secretary Dixon said the following:

This legislation is unique in our experience because it ties Federal subsidies and assistance not to the attainment of specific objectives—for example, more housing units, development of new energy resources—but rather to the form of the organization involved, irrespective of the functions it performs.

That is something to think about.

He says further:

As such it must represent a judgment that the cooperative form of organization is inherently superior to other business forms: corporations, partnerships and individual proprietorships . . . we are not prepared to accept the judgment that profit-oriented enterprises are less likely to meet the public demand for better goods and services at lower prices.

So I give the Members that. The Secretary of the Treasury, at that time Mr. Dixon, rightfully expressed the fears of the Secretary of the Treasury and the White House, and I hope the Congress would act to express their strong opposition to this particular legislation.

Second, I would point out to the Members that this legislation met strong opposition from the National Federation of Independent Businesses. I would point out that probably the best I could ever quote as to why one should not vote for this legislation would be the remarks of our good colleague, the gentleman from Texas (Mr. GONZALEZ), who in words before the committee said, and I quote from our good friend, the gentleman from Texas (Mr. GONZALEZ):

The small businesses of this country—the independent grocers, the neighborhood garages, and the radio and TV repair shops would bear the brunt of the competition financed by this bank . . . There is some irony in this: with one hand, through the Small Business Administration, the Office of Minority Business Enterprise, and through other devices, Congress encourages the creation of small business. Now we propose to create a bank with a billion dollars worth of tax resources to set up operations to take over or compete directly with those very same businesses.

A further point I would make to the Members is that for the first time in history we are taking a tax exempt—tax exempt—enterprise in our country, the small business enterprises and the black-oriented businesses in this country and all the other people we have tried to help and who do not have that tax advantage, but we take this and not only give a tax advantage on the one hand but also take federally subsidized tax dollars from these very small businessmen on the one hand—and what for? To give to some form of enterprise, some kind of cooperative, instead of cooperating and worrying and looking at where we can help the people of this particular country, in the height of all the weight of the foreign government involvement that they have at the present time.

Last but not least, I will make this point, because there are several of us on our side who want to speak on this. If there were 198 people who voted against this legislation over a year ago, then obviously there are going to be more than 200 who will vote against it today under the simple premise that in the last few months it has been brought home to this House, and in a little over 2 months and a few days it will be brought home on election day, that the last thing, the last mandate that this Congress has been asked by the American people, this 95th Congress, is that in the last 2 months of its existence we should not go home to the American people and brag: "I have started a new Federal program that is only going to cost, some say, $300 million." It has been reduced to this, but what is the leverage? It is 10 to 1, so we are speaking about $3 billion in the next 5 years. I want people to go to their congressional districts in Rhode Island or in Wisconsin or wherever it may be and brag: "I voted for this bill. I got a new Federal program for you."

Especially do this before the small businesses and the chambers of commerce. Stand up and look them in the face and say: "Once again the Federal Government has come to your help."

So once again I hope Members will consider a "no" vote. I know those who voted against it before will vote against it now, but those who may reconsider their position will be most welcome to this side.

Mr. ST GERMAIN. Mr. Speaker, I yield such time as he may consume to the distinguished chairman of the full Committee on Banking, Finance and Urban Affairs, the gentleman from Wisconsin (Mr. REUSS).

Mr. REUSS. Mr. Speaker, I thank the gentleman from Rhode Island (Mr. ST GERMAIN) whose name is so indelibly linked with this excellent piece of legislation, for yielding to me.

Mr. Speaker, by acting favorably on this conference report, the 95th Congress will be long remembered for its foresight in providing consumers with an effective voice in the marketplace through their own self-help cooperatives.

Not only does this legislation provide the American consumer new tools with which to combat inflation it holds out great hope for our inner city neighborhoods. The cooperatives formed through this bill's self-help development fund will pull people together in urban neighborhoods, opening the way for new economic activity and new hope. This is something which will help not only consumer cooperatives, but small businesses and others dependent on a rebirth of our urban communities.

The conference has adopted a reasonable approach to the establishment of a National Consumer Cooperative Bank and its self-help and technical assistance divisions. We have cut the funding by almost 50 percent over the House version, and the final product meets the desires of those who seek to aid the consumer in the battle against inflation and those who seek to keep expenditures to a minimum.

This will be the 95th Congress major effort for the consumer. I urge my colleagues to adopt the conference report.

Mr. Speaker, I have listened to the always charming and always interesting ranking minority member of our committee, the gentleman from Ohio (Mr. STANTON) who has pointed out that on Bastille Day—an unfortunate choice of days—last year, some 198 Members—a minority—did vote against the bill. But I hope that that number—and I am confident that that number—will greatly diminish this afternoon because of two important facts.

On July 14, 1977, when, admittedly, there were quite a few negative votes, the great administration of this country was not only against the bill, but performed a miracle of lobbying that it has seldom since achieved. It really put the heat on, and it succeeded quite magnificently. Since then, like Saul on the road to Damascus, the light has been seen, and the administration is now four-square and 100 percent behind the conference report today, and that should make some difference.

Second, and perhaps most importantly, the conferees, led by the gentleman from Rhode Island (Mr. ST GERMAIN) were, if I may say so, if anything, too willing to cut the dollar amount that had been voted in the House. I think the conference report before us today gives us an adequate amount, but every ounce of adipose tissue has been removed from the bill. Its dollar amount has been practically halved.

So, in answer to my friend the gentleman from Ohio (Mr. STANTON) while I do not propose to go back to Wisconsin and brag about the bill that I hope we will send to the White House today, and shortly see signed into law, I propose to be very, very proud of it indeed, as perhaps the finest expression in this Congress of interest in the consumer and his never-ending battle against inflation, and as an affirmation by this Congress of the principle, at least as old as Thomas Jefferson, that this country is made great by cooperation.

So I hope the Members on both sides of the aisle will join in giving a resounding vote for the conference report.

Mr. STANTON. Mr. Speaker, I yield 5 minutes to our distinguished colleague, the gentleman from Ohio, Mr. CHALMERS WYLIE, a very important member of this committee.

Mr. WYLIE. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I rise in enthusiastic support of the conference report. When the idea of a consumer cooperative bank was first broached to me, I had serious reservations which coincide with some of the arguments of the opponents today. I agreed to cosponsor H.R. 14512 with Congressman ST GERMAIN, Chairman REUSS, and others as a vehicle for discussion and debate, on the theory that we need to look for new ways to get people off welfare, assist the elderly and those on fixed income, as well as low- and moderate-income people to provide the necessities for daily living at affordable costs to fight inflation which is caus-

ing so much trouble for so many people in all our districts.

After studying the concept of the National Consumer Cooperative Bank bill for 3 years now, I am more convinced than ever that this bill could provide the means, whereby millions of Americans faced with financial problems because of inflation and their inability to get money from conventional sources, could help themselves through a cooperative arrangement with others similarly situated. H.R. 2777 establishes a loan program—not another giveaway program. Congress has established subsidy programs for sugar growers, cotton growers, farmers, fishermen, cattlemen, small businesses, shipowners, and a multitude of others. The funds provided by H.R. 2777 are to be repaid with interest through the sale of debentures in the money markets. A National Consumer Cooperative Bank is in the finest traditions of the free enterprise system. It will allow people with only moderate and even low incomes to invest in organizations to help themselves because their relatively small individual investments in equities in the co-op can be supplemented by sound loans.

More and more people investing in their own co-op by buying shares can provide themselves living quarters, goods and services, and, at the same time, increase their stake in the free enterprise system. They can have a piece of the free enterprise self-help type action, and, in the process, become stronger promoters of the free enterprise system rather than hostile victims of inflation looking to the Federal Government for help. I honestly feel this bill will provide an opportunity for grassroots enterpreneurship among a group of people who could not otherwise experience that feeling of participating in our free enterprise system in any other way.

Senator HAYAKAWA during floor debate in the Senate in support of this bill mentioned the Hyde Park Cooperative store in Chicago. He said:

> It has been the principal magnet drawing trade to other stores in the shopping center it occupies.

During testimony an example was cited of where a housing cooperative was formed which built a high rise apartment building. Many small businesses sprung up around the housing unit such as grocery stores, drycleaning establishments, clothing shops, and others to provide the necessities for the occupants of the housing unit. In other words, the housing unit built by the co-op was the catalyst for the establishment of Mom and Pop type stores.

The Puget Sound Group Health Cooperative in Seattle, Wash., which now has 200,000 members has frequently been cited as an example of what can happen when resourceful elderly people form a co-op to counter health care inflation. This health care co-op provides high-quality health care to senior citizens at about one-half the cost to others in the area.

In Detroit, co-ops offer eye examinations for $9—down from $25 elsewhere in Detroit.

Years ago, I saved money on textbooks and supplies as a member of the Harvard Cooperative. My own son just bought a calculator at an Ohio State University co-op at less than I could buy it at our own House of Representatives co-op—the Longworth stationery store.

There are numerous other examples I could cite. Farm cooperatives numbering in the thousands, that have long had their own banks for cooperatives and technical assistance that this legislation would provide for consumers, have been a highly important factor in helping our farmers become the world's most efficient producers.

The need for consumer co-ops is most obvious in fields where costs are rising so rapidly because of inflation such as in health care, housing, auto repair and food. But the possibilities for consumers to help themselves rather than always turning to government for costly regulated programs are almost limitless. I am serious when I say I feel cooperatives could bridge the gap between traditional sources of private funds and removing people from public fund programs. In one instance persons receiving food stamps were encouraged to form a food co-op. I think it was Father Baroni, Assistant Secretary of HUD, who mentioned this example. Within a short period of time the cost of food stamps in that area was cut in half.

When I started on this I discussed the bill with some banker friends in Columbus. They were not too pleased with what they supposed at first to be another banking system. They came around to a position of no opposition when I explained that this bank will not compete with them. It will not take deposits and it will lend money only in an area not within bankers' expertise. It does not provide the kind of motivation in a business that they are used to. The area of Columbus which could benefit from one or more cooperatives needs revitalization, better housing, better health care, food at affordable prices. It could relieve some of the redlining pressures bankers feel.

There are no Mom and Pop stores in the area and the chainstores have moved to the suburbs. I pointed out to the representatives of the banks that these loans will not be subsidized loans. If all goes well, and I have no reason to suspect that it will not, the Government will get its investment back, just as it did with the Cooperative Farm Credit System and the Export-Import Bank. I think it is fair to say that the officials of the commercial banks and thrift institutions in Columbus have no serious objections to this bill now.

One of the frequent complaints is that cooperatives will compete with small neighborhood businesses. It is more likely that a cooperative would compete with big business. European countries have had cooperatives for years. In Europe, they have no antitrust laws, and co-ops have been a hedge against cartels.

In its effort to start and help other types of small businesses, the Government currently has $7 billion of SBA loans outstanding—much of it subsidized by the Government. The loss rate on Government loans to small business in a Government loan program is 6.5 percent. But the 45-year losses of the farmers' Banks for Cooperatives are only one-tenth of 1 percent. And those small losses have been paid out of the banks' income—not by the Government.

In Switzerland, which has one of the most stable economies in the world, cooperatives operate under a system similar to that envisioned in this bill.

Cooperatives keep money circulating in the community rather than draining it off to investment centers. Co-ops are community builders.

Mr. ROUSSELOT and Mr. STANTON put out a letter saying "Remember Proposition 13." This is in the spirit of Proposition 13. In the first place, Proposition 13 concerned a property tax. We did what Proposition 13 does for California in Ohio more than 50 years ago—limited the amount of tax which can be levied on real estate. But the ripple effect says that people want less taxes and less bureaucracy. H.R. 2777 is a move in that direction because it provides an investment in private enterprise, it is not a giveaway program, and it will result in lower public housing costs, lower food stamp costs, and lower welfare costs to the taxpayers.

I urge adoption of the conference report.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. PRITCHARD. Mr. Speaker, I yield 1 additional minute to the gentleman from Ohio.

Mr. Speaker, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Washington.

Mr. PRITCHARD. I thank the gentleman for yielding.

I want to associate myself with the remarks of the gentleman from Ohio. I want to congratulate him on the leadership he has given this bill. It is a sound approach. It is necessary, particularly in the major cities of America, and I strongly support this bill.

Mr. WYLIE. I thank the gentleman very much for his comments.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. STANTON. Mr. Speaker, I yield 3 additional minutes to the gentleman from Ohio.

Mr. Speaker, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Ohio.

Mr. STANTON. I thank the gentleman for yielding.

We are not opposed to cooperatives. I do not think anybody has spoken on this yet—and I am sure we are going to hear more from the gentleman from California—but the thing that gets us about this particular bill is the looseness of its provisions, including eligibility. Now, the gentleman represents Ohio State University?

Mr. WYLIE. That is right, all 54,000 students.

Mr. STANTON. There is nothing in this bill to stop a group of students in Ohio State University, five or six of them, from getting together to go out to buy some Cadillacs or Lincoln Continental automobiles, high-luxury automobiles, at

a big discount or, to go out and buy a group of color television sets at a discount, and get the money from the Federal Government through a consumer cooperative bank loan. According to the Senate report which nobody refuted, it says they are eligible. So part of our objection to it is there is no credit-elsewhere test. There is nothing here that the gentleman refers to that says a man has to get turned down by a bank before he can get this loan.

Mr. WYLIE. The gentleman has not read the bill.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. ST GERMAIN. Mr. Speaker, I yield 2 additional minutes to the gentleman from Ohio, Mr. WYLIE, to reply to the remarks of the gentleman from Ohio, Mr. STANTON. I will ask the gentleman to yield to me.

Mr. WYLIE. I will be glad to yield to the distinguished gentleman from Rhode Island.

Mr. ST GERMAIN. I thank the gentleman for yielding.

I have deep respect for my distinguished colleague, the gentleman from Ohio, Mr. STANTON, but the statement he just made about students borrowing money to purchase Cadillacs is a little far-fetched. This bank will loan funds to and offer technical assistance to a variety of consumer co-ops. Its program will be directed by a board initially controlled by the Government. It will have rules, regulations, and guidelines to determine the need for and purposes of its loans. I know that SBA operates similarly. SBA loans are not granted to purchase Cadillacs or Lincoln Continentals. So I am afraid that I have to disagree.

I would like to bring up another point for the gentleman from Ohio, my distinguished colleague, Mr. WYLIE, who has been a right and a left hand in assisting the guidance of this legislation through the Congress. My daughter goes to Oberlin College in Ohio. She was lucky enough to draw the right number and got into a co-op dormitory this past year, her sophomore year at college. Frankly, the savings she realized is not the important thing, but what that young lady and the other members of the co-op learned from being members of the co-op I feel is as important as that which was learned in the classroom, to wit: to work with each other for each other.

She learned how to cook for 80 people at one sitting, something she would have never learned at home, unfortunately; she learned to feel for other people and to want to do for other people.

I think the gentleman would agree with me that there is an important concept involved here, people working with each other to help each other.

Mr. WYLIE. That is a concept that was envisioned by the original bill when you, Chairman REUSS, and I introduced it. And, of course, we would not be here without your motivation and the role Mr. REUSS, our chairman, undertook.

Mr. Speaker, the gentleman from Ohio (Mr. STANTON) made another statement that is misleading, and I do not think the gentleman wants to mislead the House, when the gentleman said that cooperatives do not pay taxes. All consumer co-ops pay taxes on the same basis as any other business. They pay no taxes on the refunds to their membership.

The SPEAKER pro tempore. The time of the gentleman from Ohio has expired.

Mr. ST GERMAIN. Mr. Speaker, I yield 30 additional seconds to the gentleman from Ohio.

Mr. WYLIE. Mr. Speaker, I thank the gentleman; but any earnings which are not refunded by the co-op to their members are taxable. Any business, including co-ops, can accumulate capital by making refunds of stock or debt instruments if they want to. A car dealer can make a refund or a rebate on an automobile and does not have to pay taxes on that. That is the same principle; but co-ops are taxed on the same basis as any other business, I submit to my friend, the gentleman from Ohio.

Mr. STANTON. Mr. Speaker, I yield myself 1 minute.

We certainly want to keep this record straight. I do not want to misquote anybody, but I would like to say something. We have here a statement by Mr. Arthur Roth. Mr. Roth happens to be the National Tax Equalization Association president. I would like to read a little bit of what Mr. Roth had to say in regard to the same recommendation:

> In our opinion, the government should never make funds available to create tax-exempt businesses. We need to create businesses which will pay their full share of taxes. We are driving tax-paying businesses out of business with tax-exempt business and thereby increasing the government deficit.

Mr. Speaker, I yield 4 minutes to the gentleman from Connecticut (Mr. MCKINNEY).

Mr. ST GERMAIN. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from Rhode Island.

Mr. ST GERMAIN. Mr. Speaker, I would point out that the gentleman just quoted by the gentleman from Ohio (Mr. STANTON), Mr. Roth, was a former president of the Franklin National Bank in New York. We all know what happened to Franklin National; so I would not put too much faith and confidence in any statements Mr. Roth makes about business.

Mr. McKINNEY. Mr. Speaker, I spent most of my adult life working within the cities in my area, particularly Bridgeport. I have heard a great many arguments that this bank is not going to help the cooperatives that exist which is simply not true. It will greatly facilitate their borrowing.

I have heard the argument made that this bank is going to put small business out of business. I would suggest that in the cities I represent in areas where we want to start these co-ops, there is no small business. There are neighborhoods with as many as 3,000 people in them in public housing without a laundry, without a grocery store, without a cleaners, without transportation. The only way we have been able to satisfy and serve any of these needs is to set up cooperatives.

I have personally taken these cooperatives to banks. I sat before I came into politics on a board of a bank. Many bankers do not understand the risk equity situation in cooperatives.

Mr. ANNUNZIO. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from Illinois.

Mr. ANNUNZIO. Mr. Speaker, I appreciate the gentleman yielding.

As chairman of the Subcommittee on Consumer Affairs of the Committee on Banking and Currency, I rise in strong support of the conference report and I congratulate the chairman of the committee for the gentleman's leadership in bringing this legislation to the floor.

Mr. Speaker, I want to remind the Members that this bill has already passed the House and the Senate, and we will now be voting on the conference report. This is a good consumer bill, and I for one will be happy to brag that I voted for the legislation and for the conference report.

Mr. Speaker, the National Consumers League, the oldest consumer organization in the United States, supports the adoption of the conference report on the National Consumer Cooperative Bank.

In a letter sent to all Members of the House last week, Sandra L. Willett, executive vice president of the league said:

> The Co-Op Bank Bill is badly needed to revitalize the marketplace in urban areas and stimulate essential services in remote rural regions. Citizens in low-income and hard-to-reach areas do not have access to reasonably priced basic necessities such as food, transportation, health care and housing.
>
> This legislation will stimulate private enterprise and public participation in the marketplace. The Co-Op Bank does not increase government spending. Borrowing initially from the Treasury, it establishes a realistic repayment schedule so that citizens buy shares in the cooperatives, thereby turning to private ownership.

Mr. Speaker, I would like to insert this letter of support from the National Consumers League in the RECORD:

NATIONAL CONSUMERS LEAGUE,
Washington, D.C., August 1, 1978.

DEAR MEMBER OF CONGRESS: This week you will be voting on the Conference Report on the National Consumer Cooperative Bank Bill. National Consumers League, the oldest consumer organization, joins over 190 groups in supporting the Conference Report which was accepted by the Senate last week.

The Co-Op Bank Bill is badly needed to revitalize the marketplace in urban areas and stimulate essential services in remote rural regions. Citizens in low-income and hard-to-reach areas do not have access to reasonably priced basic necessities such as food, transportation, health care and housing.

A bank providing currently unavailable seed money and technical expertise is crucial so that together consumers can organize retail and service outlets in order to defend themselves against the pernicious increases in inflation. A projected 10% inflation rate makes the self-help effort even more important.

This legislation will stimulate private enterprise and public participation in the marketplace. The Co-Op Bank does not increase government spending. Borrowing initially from the treasury, it establishes a realistic repayment schedule so that citizens buy shares in the cooperatives, thereby turning to private ownership.

Cooperatives providing reasonably priced, accessible goods and services are needed now.

Our current system is not meeting this need. In Washington, D.C., for example, where only two chains accounted for 62 percent of sales in 1974, families spending $3,000 per year on food paid $207 more than comparable families shopping in more competitive markets. (The Profit and Price Performance of Leading Food Chains—1970–1974, Bruce Marion, Willard Mueller, University of Wisconsin. The Co-op Bank Bill could provide the needed funds for viable food cooperatives.

As agreed upon in conference, this bill will be less costly than the measure previously approved by the House. The amount of money for loans has been reduced 40 percent, and the amount for self-help funds reduced 75 percent. Nevertheless, we feel this legislation will still be very beneficial to many consumers throughout the country.

As we face the threat of double digit inflation, the National Consumers League urges your support of the conference report. Thank you for your consideration.

Sincerely yours,

SANDRA L. WILLETT,
Executive Vice-President.

Mr. McKINNEY. Mr. Speaker, I thank the gentleman very much for his contribution.

The question has often been brought up in these days of proposition 13 as to whether we want to set up a new Federal agency or whether we want to load the taxpayer down with new obligations.

This bill specifically calls for final return of equity to the Federal Government. This bill is one that is going to make money in the long run for the Federal Government. When this bank becomes an interest-paying asset.

I am quite surprised to see my good friend, the gentleman from Ohio (Mr. STANTON), the ranking minority member of the committee, is opposed to this conference report, since we are all strong supporters of all the other governmental financial institutions which return a profit or return money either into the system or back to the Government.

Basically, let us talk about this bill as an urban tool. This Bank provides a way in which we can get leverage capital into the cities. It is a way in which we can get leverage capital into areas where private business does not want to go and where the banking industry does not understand the problem. I will give the Members a perfect example of that.

P. T. Barnum Village in Bridgeport, Conn., is totally isolated; it is an area typical of where we put most public housing down by the town dump. There are 3,000 people there, and there is not a single available service except for a cooperative grocery store. The only way that cooperative grocery store could be built was to have private individuals and corporations, quite frankly, give money to it to have it built.

The SPEAKER pro tempore (Mr. EVANS of Colorado). The time of the gentleman from Connecticut (Mr. McKINNEY) has expired.

Mr. ST GERMAIN. Mr. Speaker, I yield 1 additional minute to the gentleman from Connecticut (Mr. McKINNEY).

Mr. McKINNEY. Mr. Speaker, in this situation of which I was speaking, there was no way in the world that the banking system as it exists or that a bank president under his fiduciary responsibilities in commercial banking or in the savings and loan business could go in and lend money to that operation. It was only because they begged and borrowed from well-meaning private individuals that they got started.

I think this is demeaning, unnecessary, and wrong. This bill provides a very inexpensive way and in fact a profitable way for us to help our inner cities in providing housing, services, and business needs.

Mr. ST GERMAIN. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. LAFALCE).

Mr. LAFALCE. Mr. Speaker, I vigorously opposed this bill when it was before the House a year or so ago. I do not think any of the substantive arguments for or against it have changed.

The conference report before us is not different in kind; it is different only in degree and in size. The only significant factor that has changed is the position of the administration, but their rationale is not enough to persuade me. I do not know what effect it will have upon our other Members.

Mr. Speaker, I, therefore, continue to oppose this bill.

Mr. ST GERMAIN. Mr. Speaker, I yield such time as he may consume to the gentleman from Rhode Island (Mr. BEARD).

Mr. BEARD of Rhode Island. Mr. Speaker, I rise in support of the conference report, and I also wish to state that as a Representative from Rhode Island I am very proud of the achievement of the gentleman from Rhode Island (Mr. ST GERMAIN) on behalf of the consumer over the years.

As one Member, I certainly have given full support to this effort, and also as a member of a credit union and as a consumer, I wish to say that I think the gentleman has done a tremendous job on our behalf.

Mr. ST GERMAIN. Mr. Speaker, I yield such time as he may consume to the gentleman from Minnesota (Mr. VENTO).

Mr. VENTO. Mr. Speaker, I thank the subcommittee chairman for yielding this time to me.

I commend the gentleman from Rhode Island (Mr. ST GERMAIN) for his success in bringing us this conference report and winning the support of the administration for the bill.

I strongly, as a member of the committee and a cosponsor of the bill, support the bill. Our success with cooperatives in our society is uniquely American, and these cooperatives have served the best interests of the people in our region and in many regions of this country. This will make credit available in markets where it is not available, and it will provide the self-help type of programs that we recognize are necessary today.

This measure, has a unique impact in urban programs and in poor rural districts, and it will be of benefit in many other ways. This bill does strike down the regional bank provision the cooperative bank bill had originally contained.

The $300 million credit extended in this measure will be insured by the Federal Government and paid back fully with interest by the co-ops. The modest amounts for technical assistance will insure that the necessary expertise is available to the co-ops adding a solid basis of information and council. This measure is a good start toward implementing new credit facilities for people who need them the most. It will encourage the co-op facilities so successful in our free enterprize and extend to new entrepeneurs credit capacity. The House should vote positively on this conference report here today and provide alternative credit to consumer cooperatives that will serve the people we represent.

Mr. STANTON. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. McCLOSKEY).

Mr. McCLOSKEY. Mr. Speaker, I rise in support of this conference report for one reason, and one reason alone. Ordinarily, I would oppose the creation of any new Government agency that was not accompanied by the abolition of one of the many agencies of Government that have proven ineffective. I hope, in gaining our support for this bill, that the Committee on Banking, Finance and Urban Affairs, in particular, will pay attention to those programs in HUD that can be abolished and those agencies within HUD that can be abolished next year. But there is a reason for a governmental agency when the free enterprise system and market system does not provide a badly needed service. In the case of the housing cooperatives today, the owner of a federally financed older housing cooperative unit is badly prejudiced.

Let me give the Members an example from my district. A person who 10 years ago bought a cooperative unit for $30,000, with a $5,000 downpayment, has now had his mortgage reduced to say, $20,000, but the value of that cooperative unit has increased to $100,000. There is an $80,000 equity. Anywhere but in a housing co-op that unit could be sold for $100,000. But because there is no bank financing for a co-op similar to what a bank would give to a non-co-op, privately owned unit, instead of being able to borrow $80,000 against the co-op unit, a purchaser may be able to get only a $50,000 loan. For that reason, the value of that co-op unit drops to perhaps $75,000. It is absolutely unfair to have a unit worth $100,000 owned privately next to a co-op unit of the same value and yet the co-op owner must sell for $25,000 less because of the unavailability of financing.

Since this bill provides that financing, I think we ought to enact it.

The SPEAKER pro tempore (Mr. EVANS of Colorado). The time of the gentleman from California (Mr. McCLOSKEY) has expired.

Mr. STANTON. Mr. Speaker, I yield 1 additional minute to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. McCLOSKEY. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank the gentleman for yielding.

Mr. Speaker, the gentleman is aware that the FHA has the capability of refinancing cooperative projects?

Mr. McCLOSKEY. I am.

Mr. ROUSSELOT. And the gentleman is also aware, because we have discussed it before, that there are basically 17 different ways under present HUD activities where cooperatives can be financed. If they qualify for additional financing, FHA can accommodate that, and I would be glad to work with the gentleman on the project in his district if they are not being fairly treated by FHA. That does not have anything to do with this bill.

Mr. McCLOSKEY. Yes, it does, because the 140 co-op units in my district cannot get the financing through FHA. They tried to get financing through FHA and not one of them was successful.

Mr. ROUSSELOT. Why can they not qualify? Maybe they are just bad credit risks. Was that a possibility?

The SPEAKER pro tempore. The time of the gentleman from California (Mr. McCLOSKEY) has expired.

Mr. STANTON. Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Speaker, I rise in opposition to this conference report, which is no surprise, I am sure, to anyone. It has not been improved over the product that left this House on a very narrow vote of 1 vote.

A famous statesman once said, "Watch what we do, not what we say." These words have never applied with greater force than to the Carter administration and to its position on H.R. 2777, the National Consumer Cooperative Bank Act. From the time the bill was introduced until the first day of the Senate hearings, the administration opposed this legislation on the ground that it was not needed. When the bill was considered on the House floor, the administration called for a 2-year study and a $20 million pilot program to determine whether there is a need for additional assistance programs which exist throughout the Federal establishment. After the House bill passed by one vote, the administration conducted a mysterious and inconclusive series of interviews and announced on the first day of the Senate hearings that, for reasons which have never been satisfactorily explained, this legislation was "needed" and the administration would support it.

This legislation belies a number of assertions regarding domestic policy which the administration has been making since "the campaign" and which, in this year of proposition 13 it would very much like people to believe:

First. Those who have been reading about the Carter administration's determination to cut the fiscal 1980 budget to the bare minimum should bear in mind that this bill would authorize hundreds of millions of dollars of appropriations and new Federal borrowing during the 4 years following enactment of this bill, including fiscal year 1980. The administration's support for this legislation is particularly alarming in view of the lack of any convincing showing of need. The 95th Congress has seen a proliferation of proposals to create new Federal banks such as a "Domestic Development Bank" and a "Solar Energy Development Bank," in order to allocate credit for various purposes. If Congress is willing to create a new Federal bank on as little evidence of need as there is for this one, then every pressure group in the country can be expected to demand a Federally-funded bank of its own.

Second. Those who believe that the Carter administration is committed to the principle of streamlining the Federal bureaucracy should know that this bill creates an entirely new Federal banking system, complete with branches, to assist cooperatives. This new system would be added to the myriad of programs which already exist to assist cooperatives. Despite the fact that the failure of many of these existing programs, particularly in the area of housing, is given as one of the main arguments in favor of this legislation, not one of those programs is abolished. Instead, we are piling a new Federal program on top of the ones which have failed.

Third. Those who believe that the Carter administration is committed to reducing the burden of Government on the middle-class taxpayer by concentrating Federal assistance on those who truly need it and avoiding the provision of benefits to the well-to-do should look at the housing provisions of this bill. Up to 30 percent of the funds in this bill may be used to finance cooperative housing, and only 35 percent of that must go to meet the needs of low-income people. Supporters of the bill successfully opposed an amendment offered by Senator LUGAR which would have raised this percentage to 50. That means that the majority of recipients of assistance are likely to be middle-class residents of a few major urban areas, such as New York's "Co-op City," where cooperative housing is prevalent, who will be subsidized by their fellow middle-class citizens who are having trouble meeting their mortgage payments because of the tremendous tax burden which results from having to pay for needless, expensive Government programs such as this one. This bill is supported by the same administration which opposed the Kemp-Roth bill, which would reduce Federal taxes by 30 percent across the board over 3 years and give all middle-class taxpayers a fighting chance to make ends meet. We are told that Kemp-Roth would cut too deeply into Federal revenues needed to finance Government programs.

Fourth. Those who believe that the Carter administration is committed to the principle of fairness in Federal taxation should know that the hundreds of millions of dollars of Federal assistance provided under this bill would be made available to entities whose eligibility is based on an essentially "nonprofit," cooperative character which enables cooperatives to virtually avoid paying Federal income taxes—in other words, to avoid contributing to the very system which makes this assistance possible. How ironic.

Although I am opposed to this bill, I am almost glad to see it enacted with administration support because it will serve as a dramatic illustration of the true nature of the Carter administration as just another in a long line of big-spending administrations, much to the chagrin of millions of people who thought they were voting for balanced budgets and smaller Government.

An article by Tom Bethell, entitled "The Liberal Carter—Wooing the Recipient Class," provides a thoughtful analysis of the record of the Carter administration on the issue of spending and big government. Let me quote from that article, which appears in the current (August) issue of Harper's:

President Carter a liberal? Some will question that, and Carter himself astutely managed to shun the label throughout his campaign. Poor Morris Udall found himself saddled with it instead. The general consensus seems to be that Mr. Carter is a man with no ideology, a judgment that may have some truth to it. Still, it is always possible to judge a man by what he does rather than by what he says or fails to say, and his record is turning out to be indistinguishable from that of an old-fashioned FDR-inspired liberal, complete with seal of approval from Americans for Democratic Action.

Let us not forget, incidentally, that the New Deal years were formative ones for Mr. Carter. It was a period, he writes in "Why Not the Best?" when "we learned to appreciate the stability of the agricultural programs brought about by federal government action." A few pages later he adds: "During the Depression years, political decisions in Washington had an immediate and direct effect on our lives. Farm programs, rural electrification, Work Progress Administration, Civilian Conservation Corps, and others were of immense personal importance." In short, the virtue of government intervention was absorbed along with other childhood lessons. Later on he went into the peanut business, where he put this lesson to good use. As William E. Simon, former Secretary of the Treasury, points out in his remarkably outspoken book "A Time for Truth," Mr. Carter "made his money in a regulated, subsidized industry."

Thus instructed, Mr. Carter quite plainly came to the Presidency with the firm (although private) conviction that, whatever else might be uncertain in this world, government at least was good for people.

Mr. Carter's ideological inclinations are indicated better than anything by the identity of those who have supported his programs on Capitol Hill. David S. Broder, associate editor of the Washington Post, commented earlier this year that these turn out to have been "card-carrying (and in some cases even knee-jerk) liberals. There has been a kind of conspiracy of silence to keep this fact unpublicized. Members of the White House's Congressional liaison staff checked the voting records a few months ago and discovered, as one of them said, that "the Northeast and Midwest liberals are the backbone of Carter's support.' "

More recently, Martin Schram has reported in Newsday that "the Senator who voted with Carter more than any other was Sen. Edward M. Kennedy."

In an attempt to confirm these findings, I called someone I knew at the White House and asked if I could see the Congressional liaison report. He said he thought that there would be no problem. He would call me back. He did—apologetically. "Sorry," he said, "it's not a public document." I felt that I had not come close to winning my Woodstein spurs, but it was interesting to discover, nevertheless, that the Administration is apparently anxious to conceal the identity of its own

supporters. Secrecy in government has taken a new twist! In Nixon's time, it was the Enemies List. Now it's Friends.

My uncommunicative friend at the White House pointed out that Congressional Quarterly had done a similar study. Mr. Carter's most consistent supporters, as reported by CQ, turn out in almost every instance to be liberals with high ADA ratings. His biggest opponent on Capitol Hill, on the other hand, has been fellow Georgian Larry McDonald (1976 ADA rating: 0).

It seems to me that Mr. Carter has so far avoided categorization as an FDR understudy on the basis of talk alone. His aides have occasionally let drop the remark (as it were, ruefully), "Basically, Jimmy is a fiscal conservative." Or something like: "I know it sounds old-fashioned, but Jimmy is in favor of balanced budgets. There's nothing we can do about it—he's as tight as a tick." Thereupon people such as Joseph L. Rauh (a founder and vice-president of ADA) could say that the Democrats had elected a Republican in disguise, and somehow everyone seemed to forget about the $60 billion budget deficit. But word can easily overshadow deed, which I suppose is one of the realities of the media age. (In fact, as Mr. Carter truly remarked last year. Presidential words are indistinguishable from deeds.)

It is becoming clearer every day, nevertheless, that Mr. Carter can say something and not really mean it at all. One afternoon, for example, he set forth from the White House and launched an unexpected attack on doctors and lawyers. No doubt it was good politics. The doctors could be expected to vote Republican anyway, and as for the lawyers, they no doubt forgave him immediately. (Ralph Nader, perhaps the most litigious man in the country, thought "it was a very good speech.") The main growth area for lawyers in recent years has, of course, been government, and since assuming office Mr. Carter has scarcely missed an opportunity to expand the role of government, his campaign obfuscation notwithstanding.

By the way, this bank has become known as the "Nader Bank." Many of us urge the defeat of this bill.

I say to my colleague from California there are all kinds of cooperative housing programs that can be financed under the various HUD programs. On page 42 of our committee report from this committee, we listed those programs. Let me review those housing programs:

PROVISIONS FOR HOUSING COOPERATIVES IN EXISTING HOUSING STATUTES

NATIONAL HOUSING ACT

Section 203(n).—Insurance of mortgages: Authority of HUD Secretary to insure individual units of cooperative housing projects covered by blanket insurance under this act.

Section 213.—Cooperative housing insurance: Authority of HUD Secretary to insure mortgages of cooperatives and, under subsection (j), to insure supplemental cooperative loans for improvements and additions.

Section 213(i).—Cooperative housing insurance: Authority of HUD Secretary to furnish technical advice and assistance in organization, planning, development, construction, and operation of cooperative housing projects.

Section 221(d)(3).—Housing for moderate income and displaced families: Authority for blanket mortgage insurance for qualified housing cooperatives.

Section 235.—Homeownership for lower income families: Authority of HUD Secretary to make periodic assistance payments.

Section 236.—Rental and cooperative housing for lower income families: Authority of HUD Secretary to make periodic interest reduction payments.

Section 241.—Supplemental loans for multifamily projects: Authority of HUD Secretary to insure loans for multifamily projects or group practice facilities, improvements and additions.

Section 243.—Homeownership for middle-income families: Authority of HUD Secretary to make periodic interest payments and to insure mortgages.

Section 246.—Sale of acquired property to cooperatives: Authority of HUD Secretary to sell to cooperatives multifamily housing projects acquired as a result of default.

Section 313.—Interim authority to purchase certain mortgages: Authority of Federal National Mortgage Association to purchase mortgages of housing cooperatives.

HOUSING AMENDMENTS OF 1955

Section 102(h).—Special Assistant Commissioner for Cooperative Housing: To expedite operations under such sections and to eliminate obstacles to the full utilization of such sections under the direction and supervision of the Commissioner.

Section 202.—Loan program: Authority of HUD Secretary to make loans to any corporation, as defined, to any approved limited profit sponsor, to any consumer cooperatives, or to any public body or agency for the provision of rental or cooperative housing related facilities for elderly or handicapped families.

HOUSING AND URBAN DEVELOPMENT ACT OF 1965

Title I.—Special provisions for disadvantaged persons: Authority of HUD Secretary to make annual supplement payments to housing owners on behalf of qualified tenants.

HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1974

Section 8.—Lower income housing assistance: Authority of HUD Secretary to enter into annual contribution contracts.

APPALACHIAN REGIONAL DEVELOPMENT ACT

Section 207.—Assistance for planning and other preliminary expenses of proposed low- and moderate-income housing projects: Authority of HUD Secretary to make grants and loans for the Appalachian housing fund.

FOREIGN ASSISTANCE ACT OF 1961

Section 224.—Housing projects in Latin American countries: Authority of President to assist development of self-liquidating housing projects in the American Republics.

UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970

Section 215.—Planning and other preliminary expenses for additional housing: Authority of Federal agencies to make loans to housing cooperatives for planning and financing of housing for displaced persons.

Source: Basic Laws and Authorities on Housing and Community Development, committee print of House Committee on Banking, Currency and Housing.

If there is some problem the gentleman from California is having, it is because the applicants probably do not qualify on a credit basis.

Mr. Speaker, it is hard for me to believe that this House wants to open up a whole new method of financing. My judgment is that this bill really should be called the Nader bank. Ralph Nader is the principal sponsor of this effort.

I know that my colleague, the gentleman from Rhode Island, has worked very hard on this bill.

I know my colleague from Ohio (Mr. WYLIE) has worked very hard. I am convinced that the bill would not have passed without Congressman WYLIE's support. He provided the extra oomph on our side of the aisle. He clearly, obviously, was the extra force which made it pass in the House, and I know that he lobbied several of his good friends in the House to support this bill. It would not have passed without CHALMERS WYLIE's effort. I think the people in his district who have aggressively worked for this legislation should compliment him on the outstanding job he has done to see that this legislation is passed. He should get an award for that effort.

But, I still say that this basically is the Ralph Nader Bank. This is another instance, I think, where we create, and he is asking us to create, a gigantic bureaucracy—another one. I am surprised that the administration changed its mind. As all the Members know, the administration told us very decisively when this bill was before the House and before the committee that it did not want this legislation, that it was not needed. And by the way, if Members will read the administration's arguments against the bill, which are in the House report, they were excellent then and they apply now.

Mr. WYLIE. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I yield to my colleague from Ohio, briefly.

Mr. WYLIE. Mr. Speaker, I thank the gentleman for yielding, but I fear my friend has lapsed into what we call ad hominem debate—which is the weakest form of debate.

Mr. ROUSSELOT. No, I was lobbied by Ralph Nader's people and all his groups for the Ralph Nader Bank.

Mr. WYLIE. It is my understanding that the idea was conceived by a Mr. Frank Sollars, a farmer, banker and businessman from Washington Court House, Ohio. Mr. Sollars and Mr. George Dunlop camt to my office and brought the idea to my attention.

Mr. ROUSSELOT. I appreciate the gentleman suggesting that——

Mr. WYLIE. I will explain what happened.

Mr. ROUSSELOT. The gentleman had 10 minutes and as he knows, I did not get up and try to churn into his time.

Mr. Sollars and Mr. Nader should get credit.

Mr. WYLIE. But the gentleman is mistaken about where the idea came from.

Mr. ROUSSELOT. Mr. Sollars and Mr. Nader were the creators of this bank, then. That is fine. It is still bureaucracy no matter how you slice it. It is $300 million worth of bureaucracy.

Do not tell me this is just a slight, little new bureaucracy that is going to come down the pike. This is going to grow, because the advocates have told us that they are going to ask for more. Originally they asked for a billion and a quarter but the Senate cut that down. The upper body finally showed some good sense.

But they are going to be back for more. We have not seen the end of this. Let me review with the Members what other credit sources are available for cooperatives today. One of the largest ones in this country is the Southern Cooperative Development Fund, which has 10 billion dollars' worth of assets, loaning to cooperatives in Southern States. This fund has 10 billion dollars' worth of assets.

In my own State of California the bankers I have polled have said, "We

loan to cooperatives, mostly farm cooperatives, but we loan to all of them in the State of California," and they do. I support that attitude because I believe the farm cooperatives have served this country very well. I support them, but do not be beguiled by the arguments that this helps farm cooperatives. That is pure bunk. My colleague from Connecticut told us that this was going to help inner cities, but the record of cooperatives indicates otherwise and nothing in this bill requires the bank to concentrate on inner cities.

The SPEAKER pro tempore. The time of the gentleman from California has expired.

Mr. STANTON. Mr. Speaker, I yield 2 additional minutes to the gentleman from California.

Mr. ROUSSELOT. This has nothing to do with farm cooperatives or helping housing. There are already more than adequate facilities at HUD, and if we need to stimulate that operation, fine.

I would like to read to the Members briefly from the National Federation of Independent Business, who polled their some 535,000 members all over the country. This is basically competition for the small businessman who tries to operate at a profit, or to break even.

Let me share with you the views of the National Federation of Independent Business:

The National Federation of Independent Business (NFIB) has consistently opposed authorization of a National Consumer Cooperative Bank. We remember and appreciate your vote against this legislation when it passed the House by a one vote margin last summer.

The conference report on H.R. 2777 has now been completed and may be brought to the House any day. NFIB and its 535,000 small and independent business members continue to strongly oppose this bill for the following reasons:

Cooperatives already enjoy a tremendous competitive edge over other businesses because coops pay no income taxes,

The bill has no significant mechanism to ensure that the federal monies will go to small coops serving genuinely disadvantaged areas, rather than suburban middle class neighborhoods already being well served by existing businesses; and

The bill authorizes $75 million in grants and $300 million (to be leveraged to $3 billion) in loan funds. This wholly new layer of banking bureaucracy is far too large and expensive for the federal government to start up at a time when the public is sensitive to creation of new costly programs.

It is very important for small businesses and for all taxpayers that this conference report not be allowed to slip quietly through the House. We believe this program is still as unnecessary and unfair to taxpaying small businesses as it was when the House debated it last year. NFIB urges you to maintain your opposition to this program and vote against the conference report on H.R. 2777.

This is a whole new banking system. Make no mistake about it, it is a brand-new bureaucratic banking system. It is against the spirit of Proposition 13, I say to my colleague from Ohio, and I know very much what that issue is all about. It was the people of California saying in an overwhelming vote, "We do not want to create a lot of new bureaucracies, especially where they are not needed."

I say to the Members, and I have listened to all the debate on this issue through the subcommittee and the committee: It just is not needed. All the arguments the administration originally gave before our committee are still valid. We do not need this institution. It is excessive bureaucracy, excessive money out of the Treasury.

Mr. STANTON. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Ohio (Mr. STANTON).

Mr. STANTON. Mr. Speaker, I appreciate the gentleman yielding.

In closing the debate on our side I would like to conclude my three observations that I would leave with the Members as they cast their votes.

First of all, the gentleman in the well mentioned Mr. Nader and his bank. I have part of his testimony before our subcommittee, and this sort of surprised me.

Mr. ROUSSELOT. This is on Nader?

Mr. STANTON. Nader.

Since the development of consumer cooperatives has been limited in this country * * * we must look to Europe to see the significant impact that cooperatives can have in the marketplace. Cooperatives are central to the Swedish economy for example.

Sweden basically is a socialist country.

Mr. ROUSSELOT. It is.

Mr. STANTON: Continuing the quotation:

Over half of all Swedish households belong to co-ops. The consumer cooperatives control about 18 percent of the retail trade of the country. The federation of cooperatives is the largest business in the country accounting for 3.3 billion in sales in 1974 and employing over 67,000 employees. Cooperatives span the breadth of industry including petroleum, insurance, housing, fishing, travel and consumer goods.

Although this kind of cooperative development cannot be expected overnight, these figures illustrate that we are considering a bill with a potential impact that is tremendous.

Think about that.

Second, let me point out that we are talking about it the next 5 years over $3 billion. We are talking about $300 million with a leverage of 10, which is $3 billion. What we have given to the small businessmen in all the years, I have forgotten the figures, but in 1976 we gave 2,644 loans to small businessmen in this country and only helped them to the extent of $109 million.

And later on today we will vote on a bill that just 2 years ago was a $1 billion authorization and appropriation, and rightfully so, to help the unemployed. Today the gentleman in the well will confirm that we are back 2 years later and the bill is for $10 billion. We are back with that today. If we had stopped and thought out how best to work that program, it may have been a little different. Now it is here to stay. Nobody, including me, wants to vote to cut that out.

On the consumer cooperative we could have had a chance to vote this down and cut it back and have probably a pilot test program, but let us not go out with $10 billion, or $3 billion overall without knowing how we are going to help and whom we are going to help.

Mr. ROUSSELOT. I yield now to my colleague, the gentleman from California (Mr. MCCLOSKEY), who is so insistent that I yield.

Mr. MCCLOSKEY. I know the gentleman would not want to beat a dead horse.

I respectfully ask the gentleman, would not the gentleman agree that Nader is a dead horse?

Mr. ROUSSELOT. A dead horse? Of course that is a good definition.

Mr. ST GERMAIN. Mr. Speaker, I yield 2 minutes to the gentleman from Connecticut (Mr. MOFFETT).

Mr. MOFFETT. Mr. Speaker, I thank the gentleman from Rhode Island for yielding.

One thing we never seem to hear from some people on the other side is an important point about inflation—I am speaking not of all the people on the other side but some of the people on the other side. We have inflation that is very serious, as we all know, but we do not seem to hear too much about the inflation really hurting people most: in energy and health and food and housing—the Big Four, so to speak.

We do not seem to hear the extent to which that terrible inflation is caused by economic concentration of power. That brings out the inconsistency of those who talk about the free enterprise system and then come out against a proposal that would allow people to use that free enterprise system in a self-help program to combat inflation in those areas.

Some people think that, right now, in this House, we cannot pass any measure that represents any shift, even the smallest shift, in economic and political power. And, after all, there are those on the other side of the aisle who do not want to pass anything that represents any shift in economic or political power. And I can understand that.

Some of them are clearly representing people in this country who have amassed a great amount of economic power who do not want anyone cutting in on their economic power and they are against this bill, and naturally so. They do not want anybody to have a piece of the action, even if it means employing the free enterprise and self-help principle that made this country great.

I think we have to try to be consistent. Let us not treat this like it is a big grant program, a big giveaway. The gentleman from California (Mr. ROUSSELOT) is always talking about the principles of free enterprise and is usually consistent on that point.

Mr. MCKINNEY. Mr. Speaker, will the gentleman yield?

Mr. MOFFETT. I yield to the gentleman from Connecticut.

Mr. MCKINNEY. Mr. Speaker, I would like to remind my colleague from California that it was that great American conservative, Bob Taft, who said that the cooperative is as American as apple pie.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. ST GERMAIN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to clear up a few points before the vote and I shall be very brief.

From the annual report of the SBA, let us take a look at what the real numbers are. Since 1970 they have approved $11 billion in business loans. In 1976 they passed the $20 billion mark. In 1976 they had 233,165 loans outstanding totaling $7.4 billion. In 1976 they made 26,078 loans for $2.1 billion. In 1976 they sent out over 5 million copies of 250 different business-management publications.

As to who supports this bank, frankly it is the gentleman from Wisconsin (Mr. REUSS), the gentleman from Ohio (Mr. WYLIE), and the gentleman from Rhode Island now speaking, who are the initial sponsors of this bill. But, in addition to that, the gentleman from Ohio (Mr. WYLIE) put into the RECORD this past week a list of the 200 national, State, and local organizations that actively endorsed and support this bill. So that to state that it does not have broad support is erroneous.

As to the protection of small businesses, that is included in the legislation. The bank contains numerous safeguards such as:

One, the loans from the bank will be at market interest rates.

No. 2, section 108 of the conference report requires the bank to assess the impact of any loan on existing small businesses in the market area for which the loan is being made.

No. 3, the last presidentially appointed Director to the bank board must be a proprietor of a small business concern, in order to watch over the interests of small businesses.

As to creating a permanent new Federal program, that is not true. We are providing a mechanism to lend money that will be repaid with interest to the Treasury; it will be completely repaid by the cooperatives and the bank will become a private institution. The figure of $3 billion used by the opposition is misleading. It is $300 million that will be the capital of the bank—capital that will be repaid. The 10-to-1 ratio is the borrowing authority in the private market. We are talking about private money from the private marketplace that will be invested in this bank. The $3 billion figure is the maximum potential borrowing authority and has nothing to do with Federal outlays.

Mr. Speaker, I urge the adoption of the conference report. The conferees have accepted reduced funding. We have accepted the funding in the Senate bill. We have reduced the authorization for the bank itself and for the self-help fund to a degree where everyone should be able to support it.

We now have the total support of the administration as evidenced by the letter from Secretary of the Treasury Blumenthal that was put in the RECORD earlier by myself and the letter from Esther Peterson on behalf of the administration.

● Mr. PEPPER. Mr. Speaker, very shortly we are going to be asked to take action on H.R. 2777, the consumer cooperative bank bill. This bill provides the distinguished Members of this body with the unique opportunity of paving the way for many extremely important members of our Nation to directly help themselves.

For many years countless self-help, cooperative groups throughout the Nation, both in rural and urban areas, have been engaged in diligent attempts at getting the most out of their hard-earned dollars by combining their rather limited resources. These attempts are marked by very limited success. The people engaged in these ventures are generally from working and middle-class backgrounds, and, consequently, their expertise and resources in the areas of technical and financial capabilities are astonishingly deficient. In a word, their attempts at self-help cooperation have been painful, slow, and guided basically by trial and error.

This bill would cut through these major deficiencies and provide funding on a grassroots level so that professional consultations can be obtained in order to develop adequate markets for the self-help groups. The bill will bolster the scarce monetary resources they have available. The areas this bill proposes to serve are those where conventional business practices restrict the purchasing power of the people of the community. This bill provides alternative sources of shopper preference.

The people in these cooperative groups are in dire need of relief of their present situation, and it is important for us to note that they are not requesting relief in the form of welfare payments, but rather they are requesting from their elected representatives the opportunity to borrow money to administer their own programs, and, in effect, help themselves.

The spirit is there; these people desire to make a better life for themselves; the potential exists for more people to become interested in this form of alternative shopper preference. The decision is now in our hands.

I ask you to join me in voting for H.R. 2777.●

● Mr. FRENZEL. Mr. Speaker, I oppose the passage of the conference report on H.R. 2777, the Consumer Co-op Bank. I do so because I question both the cost and the need for the Bank.

The Consumer Co-op Bank is an expensive proposal. It will require the Treasury to outlay up to $300 million to capitalize the Bank, and it will cost the taxpayers over $75 million to operate it over the first 3 years of its existence. At a time when one of our most important priorities is to reduce the Federal budget, I do not think we should begin funding expensive new programs like the Consumer Co-op Bank.

What makes these expenditures worse, though, is that the need for a $300 million bank is still unproven. Although cases have been cited that indicate that some co-ops have had problems in obtaining financing, no one knows how large the financing problem is. We are, therefore, playing a guessing game with the taxpayers' money in capitalizing the bank.

Cooperatives are a legitimate form of business. They have great tax advantages over corporations or individual enterprises. If we give cooperatives this additional benefit, the people who will suffer competitively are the small businesses, grocery stores, gas stations, and so forth, which are now providing goods and services to customers all over our country.

The Consumer Cooperative Bank is another new bureaucracy for which insufficient need has been demonstrated. I doubt that our constituents want us to create another agency of Government, especially one which will be managed by people who have had no credit experience.●

The SPEAKER pro tempore. Without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ROUSSELOT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 236, nays 164, answered "present" 3, not voting 29, as follows:

ANSWERED "PRESENT"—3

O'Brien	Walsh	Winn

NOT VOTING—29

Abdnor	Fish	Kasten
Davis	Flowers	Kemp
Dent	Frey	Krueger
Diggs	Hansen	Le Fante
Evans, Del.	Jenkins	Lloyd, Tenn.
McDonald	Miller, Calif.	Teague
Marks	Rhodes	Tsongas
Mathis	Rodino	Wiggins
Mattox	Ruppe	Young, Alaska
Milford	Sisk	

The Clerk announced the following pairs:

On this vote:

Mr. Le Fante for, with Mr. McDonald against.

Mr. Miller of California for, with Mrs. Lloyd of Tennessee against.

Mr. Diggs for, with Mr. Teague against.

Until further notice:

Mr. Dent with Mr. Kasten.
Mr. Davis with Mr. Ruppe.
Mr. Flowers with Mr. Wiggins.
Mr. Jenkins with Mr. Young of Alaska.
Mr. Krueger with Mr. Kemp.
Mr. Mathis with Mr. Evans of Delaware.
Mr. Mattox with Mr. Fish.
Mr. Sisk with Mr. Hansen.
Mr. Tsongas with Mr. Abdnor.
Mr. Rodino with Mr. Frey.
Mr. Milford with Mr. Marks.

Mr. STEED changed his vote from "yea" to "nay."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ST GERMAIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report just adopted.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 12927, MILITARY CONSTRUCTION APPROPRIATION ACT, 1979

Mr. McKAY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 12927) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1979, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Utah? The Chair hears none, and, without objection, appoints the following conferees: Messrs. McKAY, SIKES, MURTHA, STEED, FLYNT, LONG of Maryland, MAHON, MCEWEN, REGULA, and CEDERBERG.

There was no objection.

HOUSE RESOLUTION 1201—TO DISAPPROVE REORGANIZATION PLAN NUMBERED 2

Mr. BROOKS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the resolution (H. Res. 1201) to disapprove Reorganization Plan Numbered 2 transmitted by the President on May 23, 1978; and pending that motion, Mr. Speaker, I ask unanimous consent that debate on the resolution be limited to not to exceed 1 hour, the time to be equally divided and controlled by the gentleman from New York (Mr. HORTON) and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. BROOKS).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the resolution (H. Res. 1201) with Mr. AMMERMAN in the chair.

The Clerk read the title of the resolution.

By unanimous consent, the first reading of the resolution was dispensed with.

The CHAIRMAN. Pursuant to section 912 of Public Law 95–17 and the unanimous-consent request, the gentleman from Texas (Mr. BROOKS) will be recognized for one-half hour, and the gentleman from New York (Mr. HORTON) will be recognized for one-half hour.

The Chair recognizes the gentleman from Texas (Mr. BROOKS).

Mr. BROOKS. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, Reorganization Plan No. 2 of 1978 is the structural framework of President Carter's proposed civil service reform. It deals entirely with organization, not with the policy reforms that the President is seeking, and which are addressed in separate legislation that will be coming before the House shortly.

I emphasize this distinction because while the policy reforms have stirred up a lot of controversy and will be the subject of much debate when they come to the floor, the reorganization plan has met with little or no opposition. Our committee has recommended unanimously that the pending resolution disapproving the plan be defeated, which is the upside-down procedure we have to follow to approve a plan under the reorganization authority we have given to the President.

We did have requests from the Post Office and Civil Service Committee that we hold up the reorganization plan until the reform legislation had been enacted. We did get the administration to delay submitting the plan for as long as it could, but once the plan was submitted, the 60-day clock started running and the plan will now take effect automatically at the end of this week unless the House or Senate reject it.

Although the plan is designed to provide the organizational structure to carry out the proposed civil service reforms, not only can it stand alone, it will produce necessary and desirable changes by itself in the existing Federal personnel system.

The primary purpose of the reorganization plan is to change the Civil Service Commission. That agency has

had so many duties and functions added to it over the 110 years of its existence that its original purpose has become obscured and it is now called on to play many conflicting roles.

The Commission would be replaced by a Merit Systems Protection Board, which would give Federal employees an independent, impartial board to protect them against abuses of the merit system. The board would be bipartisan, with it three members appointed by the President and confirmed by the Senate.

The managerial functions of the Civil Service Commission would be taken over by a new executive branch agency, the Office of Personnel Management, headed by a director appointed by the President and confirmed by the Senate. The President, as Chief Executive, would thus have an administrative arm, directly responsible to him, to develop and administer Federal personnel policy.

A third new agency created by the plan is the Federal Labor Relations Authority, which would be responsible for administering Federal labor-management policy. It would be a bipartisan board with three members appointed by the President and confirmed by the Senate, and it would take over functions now handled by Executive order on a part-time basis. The authority would have a general counsel to investigate and prosecute complaints of unfair labor practices.

Those are the essential features of the plan, Mr. Chairman. Its purpose is to correct long standing organizational deficiencies that have greatly reduced the effectiveness and credibility of the Civil Service Commission and helped undermine the morale of Federal workers. It will also strengthen merit protection for Federal employees, improve personnel management, and provide an effective framework for labor-management relations. These are all worthwhile objectives, separate and apart from the policy reforms we will be debating later, and I urge support for the plan.

Mr. HORTON. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, I rise in opposition to House Resolution 1201 and in support of Reorganization Plan No. 2 of 1978.

And again I want to emphasize that if the Members are for the plan, they should vote no, because the resolution is worded, "Resolved, That the House of Representatives does not favor the Reorganization Plan Numbered 2 transmitted to the Congress by the President on May 23, 1978."

So if the Members favor the plan, they should vote no because of the way in which the resolution is worded.

Reorganization Plan No. 2 of 1978 is but one part of a comprehensive and complex package of recommended reforms stemming from the Federal personnel management project. This project was headed up by Dwight Ink, who served as executive director. Dwight Ink is a career public servant whom I have known for many years, and many other Members of the House know of his dedicated and loyal service. He has done a tremendous job in heading up this project.

The project was established in June 1977 as part of President Carter's reorganization efforts and made its final staff report in December of 1977. In general, I support the proposed reforms and applaud the President's recognition of the need for making the civil service system more effective.

Implementation of the 125 recommendations of the report called for, in addition to the reorganization plan, "appropriate legislation, policies, rules, regulations, processes, and organizational solutions." The entire package was substantially included in President Carter's proposal which was unveiled on March 2, 1978 as the "most sweeping reform of the civil service system" since 1883.

Except for the reorganization plan which was sent to Congress on May 23, 1978, all of the proposals are within the jurisdiction of forums other than the House Committee on Government Operations, and the portions requiring legislation were referred to the Committee on Post Office and Civil Service on March 3 as H.R. 11280, the "Civil Service Reform Act of 1978" which was reported as amended by that committee on July 31, 1978.

It is not my function today to come to grips with the whole complex and interrelated mass of provisions which are incorporated in that act. Rather I want to focus your attention on the structural aspects of the President's reorganization efforts that are dealt with in this plan and are within the jurisdiction of the Committee on Government Operations.

Much of the recommended legislation is based on the assumption that the division of the U.S. Civil Service Commission into an "Office of Personnel Management" and a "Merit Protection Board" will be effected.

Therefore, this reorganization proposal is regarded by the President as vital to the improvement of Federal personnel management.

However, the reorganization plan need not stand or fall with H.R. 11280 and can be approved or disapproved independently of it. I agree with the President that the provisions of the plan are necessary and desirable in and of themselves.

The plan in outline is simple. The Civil Service Commission would be abolished and would be replaced by two separate agencies—first, an Office of Personnel Management, to advise the President, develop personnel programs, and administer central personnel programs, and second, a Merit Protection Board headed by a bipartisan panel of three members to investigate and review claims of merit abuses and grievances and to adjudicate appeals. Investigation and prosecution of political abuses and merit system violations will be conducted by a presidentially appointed special counsel within the Board.

The plan would also establish an independent Federal Labor Relations Authority in the executive branch for central administration of the labor relations program now vested in a number of entities. The Federal service impasses panel will be continued as a distinct organizational entity within the authority to resolve negotiating impasses between Federal employee unions and agencies.

The proposed reorganization plan is designed to resolve, among other problems, conflicting roles of the existing Civil Service Commission, inadequate protections against political and other forms of abuse, and inadequate authority of program managers to hire and discipline employees.

At the time of our hearings on this plan I expressed the concern that separating the conflicting roles of the existing Civil Service Commission into two separate agencies—one responsible for the management of human resources and the other responsible for enforcement of merit practices and the resolution of disputes—while it might solve the problem of conflicting roles, would be a solution at the cost of certain public access to the public's business.

The effect of the removal of the personnel management functions from an agency headed by a collegial body to an office headed by a single director is to exempt personnel management from the requirements of Public Law 94–409, the "Government in the Sunshine Act" which was reported from this committee in the last Congress. The public's faith in the integrity of Government rests on public understanding of the reasons for Government decisions, and the purpose of that law is to provide that meetings of multimember Federal agencies shall be open to the public, with the exception of discussions of several narrowly defined areas.

Responding to my expression of concern, the President on July 11 submitted an amendment to section 104 of the plan. That section articulates the director's responsibility for executing, administering and enforcing the civil service rules and regulations and the amendment required him to provide the public, where appropriate, a reasonable opportunity to comment and submit written views on the implementation and interpretation of such rules and regulations.

With the added emphasis on appropriate administrative procedures, the plan now has my approval and I urge the rejection of House Resolution 1201.

There is widespread public dissatisfaction with the performance of Government and a concomitant public demand for improvement. Reorganization Plan No. 2 of 1978 gives the President the means to make more effective use of personnel throughout the Government and presents solutions to long-identified problems in the Federal personnel management structure.

The aim of the administration is not essentially different from that of every administration. Every President since Theodore Roosevelt has created a commission, committee panel, or task force to recommend changes to improve the administrative structure.

The proposal to separate the Civil Service Commission into two agencies, one to advise the President and develop and administer personnel programs, and the other to investigate and review merit abuses and grievances is not a new idea. In the 40 years beginning with the Presi-

dent's Committee on Administrative Management—Brownlow Committee—in 1937 and culminating in the Federal personnel management project of the President's reorganization project in 1977, a score or more of studies, both private and public including the first and second Hoover Commissions, have focused on the conflicting responsibilities of the Civil Service Commission and several have recommended the assignment of these functions to seperate entities and the abolition of the Civil Service Commission in its present form.

Moreover while the proposal is in partial fulfillment of a campaign pledge of President Carter to reorganize the Government and streamline functions and operations, it is not a partisan issue. Presidents of both parties, in the interest of productivity, efficiency, and economy have sought to increase management flexibility—a goal supported by almost all management studies through the years most of which have recommended, as does Reorganization Plan No. 2, an agency headed by a single director reporting to the President.

Approval of this plan requires a vote against the resolution of disapproval and will signify the willingness of Congress to contribute to the restoration of public confidence in Government.

Mr. HILLIS. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from Indiana (Mr. HILLIS).

Mr. HILLIS. Mr. Chairman, I thank the gentleman for his remarks on this very important issue, and it is a very complex issue.

Might I ask the gentleman, in his opinion is the administration getting the cart before the horse in the sense that the statement has been made that the plan could stand, whether or not the Reform Act is passed, but is it not designed to complement that act and is it not premature perhaps to act at this time on the plan, rather than wait until we see what Congress does on the other proposals for reform?

Mr. HORTON. As I said, this plan can stand or fall on its own merits and it should not be tied into the substantive changes. The substantive changes are another matter. As I have indicated, based on the study I have made and the staff has made on this, and based on the hearings, it is my judgment that the separation into these two bodies, rather than the Civil Service Commission, is a step forward.

The idea of having the abuses and grievances handled by the Civil Service Commission, by one body, in my judgment is not a good thing.

So I personally feel that this reorganization plan is a good plan now that the amendment has been sent up, which is a qualifying statement that I made during the course of my prepared statement. But I do feel that this is not dependent upon the substantive changes which can take place at a later time and which I presume will be brought up.

Mr. HILLIS. I thank the gentleman.

Mr. HORTON. Mr. Chairman, I yield 10 minutes to the gentleman from Maryland (Mr. STEERS).

Mr. STEERS. Mr. Chairman, I want to first thank the chairman of the full Committee on Government Operations, the gentleman from Texas (Mr. BROOKS) for calling my office Friday and alerting me to the fact that this resolution would be coming up shortly. I regret that I am in total opposition to the view taken by the gentleman from Texas (Mr. BROOKS) and to the position taken by my esteemed colleague, the gentleman from New York (Mr. HORTON).

Second, I want to tell the House that the delegates to the American Federation of Government Employees Convention in Chicago voted overwhelmingly to withdraw any and all prior support that their national organization had given to the Carter administration's proposals to "reform the civil service system."

In addition, apparently expressing strong dissatisfaction with the President's proposals in this and other areas, the convention voted to censure Mr. Carter, as stated in a motion that read in part as follows:

Whereas, his actions since his inauguration have clearly demonstrated that he has lied not only to Federal workers but to the American people as a whole, therefore be it resolved that this body censures Jimmy Carter, President of the United States, for his blatant lies to Federal workers and the American people. * * *

My distinguished colleagues, I want to share with you my thoughts on why the House disapproval resolution on the President's reorganization plan should be passed and approved. It is needed to preserve the integrity of the independent Federal civil service. Whatever the intent, the result of the administration's program would be to politicize the machinery of government. There are two key reasons for my opposition to this plan, two reasons why I support the disapproval resolution.

First, it is my opinion that the very substantive structural reorganization and accompanying authority should be considered legislatively in the traditional manner. And I submit to you that abolition of the Civil Service Commission, splitting it in two, is not merely structural, certainly, not procedural, it is substantive in the strongest sense of that word.

Mr. HORTON. Mr. Chairman, if the gentleman will yield, the gentleman knows that the Committee on Government Operations has jurisdiction with regard to reorganization plans whether they come by this reorganization authority or whether they come in as new reorganization plan.

For example, the Department of Energy was handled by the Committee on Government Operations.

Mr. STEERS. Yes, I do know that.

Mr. HORTON. The substantive law comes from the Committee on Interstate and Foreign Commerce. In this particular instance the gentleman is suggesting that the reorganization plan be hooked on to or attached to the substantive legislation.

Mr. STEERS. Yes, that is correct.

Mr. HORTON. That goes through another committee. This committee, the Committee on Government Operations, which has jurisdiction, did hold hearings on this reorganization plan, held full hearings on it and gave the opportunity for everyone to come in and testify. As a matter of fact, the gentleman from Maryland (Mr. STEERS) came in and testified.

If this matter were hooked on to legislation that was introduced at one time, it would be sequentially referred to the Post Office and Civil Service Committee and then also to the Committee on Government Operations. So we are acting now within the jurisdiction of the Committee on Government Operations which is the appropriate way to handle it as far as the House is concerned.

Mr. STEERS. I have not in any way impugned the right of your committee to consider this matter. I am definitely saying, however, that it should have been considered legislatively and not through this back-door method of a one-House vote.

Mr. HORTON. Mr. Chairman, will the gentleman yield further?

Mr. STEERS. I will yield further to the gentleman.

Mr. HORTON. Also the gentleman has referred to the resolution, which the gentleman has read, from the AFGE convention. It is my understanding that it was introduced against the bill, not against the reorganization plan.

Mr. STEERS. The fact is that the AFGE had previously indicated its support for both the bill and the plan, but now it has withdrawn its support of both.

Let me go on, if I may, Mr. Chairman.

There is, of course, the constitutional question implicit in delegating legislative authority.

This point was raised by the gentleman from Texas (Mr. BROOKS) during the Nixon years. Further, the Carter administration anticipated difficulty in having all of its proposals to reform the civil service system legislated by this Congress, and for good reason. Virtually the same proposals were sought only a few years ago by another President and his administration and were rejected out of hand by an astute Congress which pierced the veil of the reform rhetoric to see the recommendations for what they were, an attempt to politicize the Federal Civil Service. The rejection was sound then and it is now.

The administration, anticipating problems in gaining approval of its legislative requests contained in H.R. 11280, proposed Reorganization Plan No. 2 of 1978. With the authority granted in the plan, the administration would have the ability to effectuate most, though not all, of what it seeks in the legislation.

One of the dangers in the plan is that it would vest such great power in the Director of the Office of Personnel Management. The Director of OPM would have full authority, by our lack of positive action, to promulgate all rules and regulations governing the Federal work force, with no legislative guidelines whatsoever.

This Director—perhaps Dr. Alan Campbell—would report only to the President of the United States. Such a

proposal was also made by Mr. Alan May in the Nixon administration as part of the Malek manual, a manifesto for the political takeover of the Federal bureaucracy.

The Members will also recall that Mr. May is the only individual ever to be found guilty of violating civil service statutes.

Mr. Chairman, this bears on why the plan should not be allowed to go forward with no legislative guidelines.

The Congress may, if in its wisdom it decides to do so, pass the legislative portion of the President's so-called reform package, and include in such legislation the contents of Reorganization Plan No. 2 as amendments to this bill. This would be a relatively simple process, as just outlined by my colleague, the gentleman from New York (Mr. HORTON).

Mr. Chairman, I urge on that basis that this House approve the disapproval resolution before it now, and to amend H.R. 11280 to encompass the elements of the Reorganization Plan, if it is the will of the House to enact such legislation in this Congress. I urge the Members to preserve the integrity of the independent Federal civil service.

Simply put, Mr. Chairman, there is no reason not to support this disapproval resolution. Even if the Members favor the so-called reform, the elements of the plan should be approved as a legislative measure, lest the plan be put into effect without guidelines and despite the failure of H.R. 11280.

Mr. Chairman, the second point that I wish to raise today is one about which I have written to each Member over the last several weeks. On June 22, 1978, a contract for the independent investigation of civil service abuses, as alleged in the Lyle report, was amended by the parties to that contract, the Civil Service Commission and the law firm of Rogovin, Stern, and Huge. The amendments would allow the contractor, the Rogovin law firm, to destroy products of its investigation which it deemed to be irrelevant.

Mr. Chairman, I have questioned such a practice as probably violating the Federal Records Act, which prohibits destruction of Federal Government documents which could potentially be used in a subsequent criminal action. In any case, I believe it imperative that we insist on knowing to what extent past abuses have existed in the merit system before we proceed to expand the political influence that any administration has over the civil service.

In summary, then, we should disapprove this reorganization plan. If we do not, much of what is contained in the legislation fails. Further, the illegalities alleged in the Lyle report should be exposed, verified, or shown to be untrue, before we authorize and legalize what is, fortunately for the civil service, now illegal.

● Mr. HARRIS. Mr. Chairman, I am opposed and will vote against the bill before us today that will abolish the Civil Service Commission and create in its place the new Office of Personnel Management, the Merit System Protection Board, and the Federal Labor Relations Authority.

The administration's plan to "reorganize" the responsibility for civil service in the Federal Government is ill timed since the Congress has not yet enacted the companion legislation, H.R. 11280, the "civil service reform" bill. It makes no sense to me for Congress to be creating three new offices when we have not made the changes in civil service laws proposed by the administration. Thus, I believe Congress should act on the "civil service reform" legislation—the vehicle for making the changes in the law—before setting up three new agencies.

I believe there is merit in separating the dual but conflicting roles the Commission now has, that is the role of manager of employees and employee defender. No agency can effectively handle such conflicting responsibilities, and clearly there is a need for an independent body to adjudicate employee complaints, a nonpartisan, impartial body that the employee can look to for fair treatment and justice.

However, H.R. 11280 is the vehicle which delineates the new agencies' functions and responsibilities. What we seem to be doing today is setting up three new but empty boxes.

Since the administration's "civil service reform" proposal came to Congress on March 3, I have spent hours listening, studying, and working on its provisions. In an effort to develop a sound bill, I participated in 15 hearings—12 in Congress and 3 in agencies here in Washington. I participated in 10 days of committee markup and personally held three "town meetings" in my district, in which administration officials participated, at my invitation. This means I have had a total of 28 meetings on this issue, plus numerous meetings in my office with organizations, individuals, and administration officials. In these sessions, we heard from people in and out of government, Washington area residents very familiar with the operations of our Government. The persistent thread from these citizens' comments was that the "civil service reform" proposals could weaken the morale and structure of a nonpartisan, professional civil service system.

Unfortunately, the bill as reported from the Post Office and Civil Service Committee, H.R. 11280, does not address sufficiently these very serious concerns. In the committee, I offered a number of amendments to strengthen and preserve the merit system. Many were not adopted. I will offer these amendments in the House to prevent political manipulation in the career civil service. And until a strong prohibition against improper political influences in our impartial merit system is in place, I cannot support this bill or the "reform" bill.

In short, under the popular slogan of "civil service reform," this Congress is close to producing civil service chaos.

The Federal employee should be assured fair treatment and personnel decisions should be made on the basis of merit.

The taxpayer deserves a government in which decisions are made based on justice, not politics.

This has been my goal and will continue to be my goal as we strive to make Government work better for our citizens.●

Mr. BROOKS. Mr. Chairman, I yield myself 1 minute. I just want to remind the Members that since the resolution is worded to disapprove the plan, those who support the reorganization would vote "no." I would urge a "no" vote on the resolution.

Mr. Chairman, I have no further requests for time.

Mr. HORTON. I have no further requests for time.

The CHAIRMAN. The Clerk will report the resolution.

The Clerk read the resolution, as follows:

H. RES. 1201

Resolved, That the House of Representatives does not favor the Reorganization Plan Numbered 2 transmitted to the Congress by the President on May 23, 1978.

Mr. BROOKS. Mr. Chairman, I move that the Committee do now rise and report the resolution back to the House with the recommendation that the resolution be not agreed to.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. BROWN of California) having assumed the chair, Mr. AMMERMAN, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the resolution (H. Res. 1201) to disapprove Reorganization Plan No. 2 transmitted by the President on May 23, 1978, had directed him to report the resolution back to the House with the recommendation that the resolution be not agreed to.

The Clerk reported the resolution.

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. HORTON. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 19, nays 381, not voting 32, as follows:

[Roll No. 667]

Ford, Mich.	Mann	Waxman
Frey	Mathis	Wilson, C. H.
Hansen	Milford	Young, Alaska
Harrington	Miller, Calif.	

The Clerk announced the following pairs:

On this vote:

Mr. McDonald for, with Mr. Rodino against.

Until further notice:

Mr. Diggs with Mr. Ruppe.
Mr. Harrington with Mr. Young of Alaska.
Mr. Le Fante with Mr. Abdnor.
Mr. Teague with Mr. Cohen.
Mr. Sisk with Mr. Kasten.
Mr. de la Garza with Mr. Fish.
Mr. Flowers with Mr. Evans of Delaware.
Mr. Ford of Michigan with Mr. Frey.
Mr. Jenkins with Mr. Hansen.
Mr. LaFalce with Mr. Krueger.
Mrs. Lloyd of Tennessee with Mr. Milford.
Mr. Mathis with Mr. Roncalio.
Mr. Waxman with Mr. Charles H. Wilson of California.
Mr. Miller of California with Mr. Mann.
Mr. Tsongas with Mr. Rhodes.

Messrs. DENT, MEEDS, BOLAND, and MARTIN changed their vote from "yea" to "nay."

Mr. CAPUTO changed his vote from "nay" to "yea."

So the resolution was rejected.

The result of the vote was announced as above recorded.

GENERAL LEAVE

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks, and to include extraneous matter, on the resolution just considered, House Resolution 1201.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION FOR SUBCOMMITTEE ON GOVERNMENT ACTIVITIES AND TRANSPORTATION OF COMMITTEE ON GOVERNMENT OPERATIONS TO MEET AUGUST 10, 1978, WHILE HOUSE IS IN SESSION

Mr. JOHN L. BURTON. Mr. Speaker, I ask unanimous consent that the Subcommittee on Government Activities and Transportation of the Committee on Government Operations may meet tomorrow, Thursday, August 10, 1978, while the House is in session.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

COMPREHENSIVE EMPLOYMENT AND TRAINING AMENDMENTS OF 1978

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1294 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1294

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 12452) to extend and amend the Comprehensive Employment and Training Act of 1973, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Education and Labor now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and all points of order against said substitute for failure to comply with the provisions of clause 7, rule XVI, clause 5, rule XXI, and section 401(a) of the Congressional Budget Act of 1974 (Public Law 93-344) are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. MOAKLEY) is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes to the gentleman from California (Mr. DEL CLAWSON), pending which I yield myself such time as I may consume.

Mr. Speaker, the resolution (H. Res. 1294) makes in order the consideration of the bill (H.R. 12452) to extend and amend the Comprehensive Employment and Training Act of 1973, and for other purposes.

It is a 2-hour open rule which provides certain waivers of points of order which lie against the committee amendment in the nature of a substitute.

Section 401(a) of the Congressional Budget Act of 1974 prohibits consideration of any legislation providing contract authority unless such authority is limited to the extent provided in appropriation acts. Several provisions of the bill violate that requirement. In all instances, the Committee on Education and Labor will offer floor amendments to cure the violations. Under that agreement, the Committee on the Budget has recommended that the waivers be granted to permit the consideration of the bill.

Clause 5 of rule XXI prohibits legislative committees from reporting appropriations. Certain provisions of the committee substitute effectively violate this requirement. In all cases the violations are of a technical nature and take the form of contract and program requirements which have the effect of appropriations. In this regard it must be noted that the Committee on Appropriations intends to report a supplemental appropriation providing the funds here authorized. If any difference between the the committees occur, it will be possible for that committee to address the matter in the appropriation measure.

The rule also contains several procedural matters which are common in the case of a committee substitute. The rule waives points of order against the committee substitute for failure to comply with clause 7 of rule XXI, the germaneness rule. Since this point-of-order would not apply if the committee had reported an identical text as a clean bill, the waiver is regarded as technical. In addition the rule provides that the committee substitute will be considered as an original bill to protect amendments to amendments (which would otherwise be ruled out of order as tertiary). It enables any Member to demand separate votes on amendments to the substitute. And it provides that the motion to recommit may contain instructions. These provisions insure that the House, and particularly the minority, will have all the rights which would be available in the case of a clean bill.

Mr. Speaker, the Committee on Education and Labor has worked tirelessly on this legislation and has produced a fair and equitable bill. While extending this useful and vital program to meet the national problem of unemployment, the committee has provided many structural reforms which should enjoy broad bipartisan support.

This is crucial legislation and I believe there is wide agreement that the rule provides a fair and orderly way for the House to work its will.

Mr. Speaker, I urge the adoption of the bill and the rule.

Mr. DEL CLAWSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1294 provides 2 hours of general debate for the consideration of H.R. 12452, the Comprehensive Employment and Training Amendments of 1978. This is a rule that is heavy with waivers. It provides for consideration of a CETA program which is straining under the weight of infinite abuses.

Mr. Speaker, before explaining the waivers contained in House Resolution 1294 several quotes from the August 1978 issue of Reader's Digest might be of interest. The article by Ralph Kinney Bennett, entitled, "CETA: $11 Billion Boondoggle," first states:

> This federal plan to help the hard-core unemployed has become a grotesque Lazy Susan of programs that are rife with waste and mismanagement as funds are dispensed in everything-for-everybody style.

Mr. Bennett goes on to cite several instances of this waste and mismanagement. Quoting further,

> In Miami, Florida, CETA dollars paid for a "nude sculpting workshop" in which naked men and women ran hands over one another's bodies. "This was to help them discover that they had both male and female qualities."

Mr. Bennett continues with another incident in Atlanta, Ga. Again I quote:

> CETA funds paid the former leader of the Black Panther Party, an avowed Marxist-Leninist, $475 a month to, as he says, "keep an eye on city, county and state governments and their jiving of the masses."

Mr. Speaker, there are serious doubts that any new CETA bill could sufficiently correct the pitfalls inherent in the program, to prohibit further abuses such as these.

House Resolution 1294 first waives clause 5 of rule XXI. This rule prohibits legislative committees from reporting a bill containing appropriations. H.R. 12452 violates this rule at least five times, by reallocating and transferring funds to new purposes.

The rule also waives section 401(a) of the Congressional Budget Act of 1974. Section 401(a) states that it shall not be in order to consider any bill which provides new contract authority unless that bill also provides that such new authority is to be effective for any fiscal year only to such extent or in such amounts as are provided in advance in appropriation acts.

Sections 126(b), 305(a), and various other sections of the bill authorize the Secretary of Labor to enter into contracts as deemed necessary to carry out the provisions of the new legislation. Since these sections fail to limit the availability of such contract authority, the bill would be subject to points of order under section 401(a) of the Budget Act.

This is an example of back door spending by use of contract authority. The rule was created to provide for orderly, responsible management of funds. A letter, however, from the chairman of the Committee on the Budget to the chairman of the Rules Committee, dated July 31, states that this problem will be alleviated by amendment.

The final waiver is a waiver of clause 7, rule XVI. This is the rule dealing with germaneness. This waiver is necessary because the original bill was a mere 10 lines. Therefore the current bill is simply a massive nongermane amendment to those few original lines. Hence the need for the waiver.

Mr. Speaker, the CETA program has grown from a relatively modest $1.5 billion in outlays in 1974 to almost $10 billion in outlays in 1978, just 4 years later. Neither the Department of Labor nor CETA prime sponsors have been able to keep up with this overly generous influx of money. Such massive doses of new money invite abuse, misuse, and profligate spending.

Another major problem is the overwhelming emphasis this bill continues to place on public service employment. Seventy-five percent of the money allotted to prime sponsors, nearly $6 billion, could go to PSE type activities. The history of this program is replete with evidence that PSE is the least effective, most costly and most abused program of CETA.

Public Service employment has three outstanding difficulties. First, Federal funds have often been used to replace local funds. This is indicated by the phenomenon known as "substitution." Second, PSE has not helped those most in need. A fiscal 1977 report of the Department of Labor on CETA PSE client characteristics shows that almost 80 percent had either a high school education or better, almost two-thirds were male, and only 20 percent were nonwhite. Third, public service employment has almost completely failed as a means of moving, individuals into unsubsidized private employment. The transition rate is less than 3 percent by some estimates. By the end of 1978, we will have spent nearly $12½ billion in 4 years on public service employment with no evidence that it has contributed significantly to resolving the nation's unemployment problems.

One final observation. In 1974, when CETA was enacted, the unemployment rate was 4.5 percent. Today the unemployment rate is approximately 6 percent. The members of this body have the responsibility to question the continued expenditure of funds to achieve such dubious results.

Disregarding the waivers, House Resolution 1294 is an open rule that allows this body to work its will on the bill.

Mr. Speaker, to my knowledge there is no organized opposition to the rule, but I will vote against it.

Mr. SIMON. Mr. Speaker, will the gentleman yield?

Mr. DEL CLAWSON. I am happy to yield to my friend, the gentleman from Illinois.

Mr. SIMON. Mr. Speaker, this is not the time to debate the merits of the legislation. However, since the gentleman quoted the Reader's Digest, I think one of the points which our colleague should know—and I have not read that particular article, and frequently that publication has some excellent articles in it—is that the Reader's Digest is one of the few publications in the entire free world which never corrects an error that it makes and never publishes a letter to the editor.

For that reason, I think what they have to say should be taken with a considerable grain of salt.

I thank the gentleman for yielding.

Mr. DEL CLAWSON. I appreciate the gentleman's comment. He is certainly not challenging either one of the quotes that I gave.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. DEL CLAWSON. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Speaker, I do not know precisely what point was made in the reference to the Reader's Digest and its letters-to-the-editor policy.

If anyone in the House has information to refute these specific citations of corruption and scandals in the CETA program, which appeared in Mr. Bennett's article, should come forward and

tell us. I happen to know Mr. Bennett; he is a professional journalist who has written many articles for this respected publication, and it is a well-thought-of publication. Anyone with such information ought to come forward and say in what respects the Reader's Digest article was wrong. I doubt that they can do so.

However, to try to disparage the Reader's Digest in any way seems to me to miss the point. We ought to be cleaning up the program itself and this article shows how CETA has failed.

Mr. DEL CLAWSON. Mr. Speaker, I thank the gentleman from Maryland for his contribution.

I have no further requests for time, and I reserve the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. SYMMS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair desires to announce that we will be going into general debate on the CETA bill, and it is anticipated that we will finish the bill. Consequently, we could very well be here very late, until 11 o'clock or midnight.

Of course, under the rules, a Member has the right at any time to object to a vote on the ground that a quorum is not present, if the Member so chooses. The Chair hopes, however, that we will be able to expedite this matter as we go forward with it during the course of the day.

Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device and there were—yeas 376, nays 20, not voting 36, as follows:

The Clerk announced the following pairs:

Mr. Rodino with Mr. Young of Alaska.
Mr. Le Fante with Mr. Abdnor.
Mr. Teague with Mr. Kasten.
Mr. Sisk with Mr. Fish.
Mr. Flowers with Mr. Don H. Clausen.
Mr. Jenkins with Mr. Frey.
Mrs. Lloyd of Tennessee with Mr. Hansen.
Mr. Mathis with Mr. Milford.
Mr. Miller of California with Mr. Evans of Delaware.
Mr. Tsongas with Mr. McCloskey.
Mr. Giaimo with Mr. Stockman.
Mr. Foley with Mr. Goldwater.
Mr. Ireland with Mr. Krueger.
Mr. LaFalce with Mr. Leggett.
Mr. McDonald with Mr. Mattox.
Mr. Roberts with Mr. Rhodes.
Mr. Mollohan with Mr. White.
Mr. Satterfield with Mr. Brown of California.

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. HAWKINS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 12452) to extend and amend the Comprehensive Employment and Training Act of 1973, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from California (Mr. HAWKINS).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 12452, with Mr. NATCHER in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Under the rule, the gentleman from California (Mr. HAWKINS) will be recognized for 1 hour, and the gentleman from Connecticut (Mr. SARASIN) will be recognized for 1 hour.

The Chair recognizes the gentleman from California (Mr. HAWKINS).

Mr. HAWKINS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of the bill, H.R. 12452, the Comprehensive Employment and Training Amendments of 1978.

This bill does not merely reauthorize the Nation's employment and training programs. It is a totally reshaped and restructured measure, the product of extensive oversight and bipartisan effort in

the Education and Labor Committee stretching back through the last Congress. I am particularly grateful for the leadership which Chairman PERKINS has shown in moving this measure to the floor. I also want to applaud the strong support and innovative contributions which the minority, particularly Congressman SARASIN, ranking minority member of the Subcommittee on Employment Opportunities, has contributed to this reform bill.

The Comprehensive Employment and Training Act is an essential tool to reaching full employment. Through its programs to target employment and training services to the structurally unemployed and to provide a triggered response to countercyclical unemployment, CETA is the Federal Government's single most effective, and least inflationary, employment program. Other factors including monetary and fiscal policies, must, of course, be employed in the Government's overall attack on high unemployment. But CETA has been credited as an important factor in the decline in unemployment over the past year. The amendments in the bill before the House today will strengthen CETA's ability to respond effectively both to structural and countercyclical unemployment for the long-term unemployed or those without skills. By emphasizing training, CETA programs can increase productivity, thereby reducing the inflationary pressures of current low productivity. This increased productivity can also be expected to substantially assist in balancing our unfavorable trade deficit.

The number of persons who are in need of and can benefit from CETA programs remain substantial. Overall, it is estimated that this needs population numbers at least 10 million men and women who comprise the long-term unemployed, the working poor, involuntary part-time workers and discouraged workers who believe there are no jobs for them.

Those who have been arguing that we no longer need public service jobs because unemployment was declining had a sobering jolt last Friday when it was announced that the jobless rate jumped from 5.7 percent in June to 6.2 percent in July, the largest monthly jump in unemployment since January 1975. Moreover, this national rate masks substantially higher rates of unemployment in certain areas of the country, including my own district in Los Angeles, and among some groups in the population: unemployment among adult women rose from 6.1 to 6.5 percent; among minorities from 11.9 to 12.5 percent; and for minority teenagers unemplovment maintained the depressing level of 37 percent.

Leading economic indicators suggest the possibility of an economic downturn in 1979–80. Should this occur, countercyclical PSE efforts as provided in this bill must be available to respond quickly to need. If this effort is reduced now, Congress would be faced with a certain delay in enacting legislation to deal with a possible recession. The committee bill provides a measured and responsible method of addressing countercyclical unemployment in a timely fashion.

Major criticisms have been raised against the CETA program in recent months: that the jobs and services do not go to those most in need; that there have been numerous instances of fraud and abuse in CETA programs; that CETA funds and workers have been used to substitute for local revenues and employees in the provision of basic municipal services; that inadequate attention has been placed on training and preparation for permanent unsubsidized employment; and that insufficient attention has been given to providing training and employment opportunities in the private sector.

The Education and Labor Committee has directly addressed these concerns.

First, tight restrictions have been placed on public service employment, including limits on the types of jobs which can be funded, limits on job duration to 18 months, sharp restrictions on supplementation of Federal wages by local governments, requirements that regular PSE jobs include training and support services and lead to unsubsidized employment, and the mandate that half the countercyclical PSE jobs be in projects of limited duration which are in addition to and apart from existing services.

Second, the committee bill restricts eligibility to those most in need. The bill establishes a permanent training and employment title for the structurally unemployed, those with limited education and skills and little or no incomes do not exceed 70 percent of the BLS lower living standard budget, or approximately $7,000 annual income. While the bill allows up to 50 percent of the funds for this title to be used for public service employment, sharp restrictions are placed on the type of employment and wages, and these jobs must include training and support services, and lead to unsubsidized jobs. Eligibility under the countercyclical public service employment, title VI, is limited to those who have been unemployed at least 8 weeks and whose family incomes do not exceed 100 percent of the BLS lower living standard budget. Half of these jobs must be in projects of a limited duration.

Third, the committee bill provides a flexible response to countercyclical unemployment by authorizing in title VI a public service employment program which will fluctuate in size with the rate of national unemployment. The intent of this title is to provide the means to quickly create new jobs when the regular market does not produce enough for those seeking work and to phase down when unemployment declines.

Fourth, the committee, in close cooperation with the administration, has taken a number of steps to address the charges of fraud and abuse in the CETA program. The bill authorizes the establishment of an independent Inspector General-type Office of Audits, Investigations and Compliance in the Department of Labor to investigate and prevent abuses; it establishes new criminal penalties for fraud and abuse, makes bonding of certain employees compulsory, and expands the Secretary of Labor's authority to withhold funds and take action against grantees.

Many of the press stories recently printed about fraud and abuse in the CETA program reflect this administration's determination to crack down on such abuses. The Department of Labor has already recovered $23 million in misused CETA funds and an additional $52 million are under investigation. While any such misuse of CETA funds detracts from the ability to provide jobs and training to those most in need, it should be remembered that there are tens of thousands of CETA grantees nationally, and that the questioned funds amount to only a fraction of 1 percent of total CETA funds.

Fifth, the committee has taken steps to assure greater participation by private sector employers in CETA programs and to provide increased employment opportunities in the private sector for CETA participants. A new title VII authorizes the private sector initiative program to place disadvantaged persons in private sector employment. The program will make additional funds available to CETA prime sponsors to enable them to expand and improve private sector employment and training services. In describing title VII, the U.S. Chamber of Commerce points out that,

> The proposed private sector initiative program has two very important functions. The first, a somewhat advisory role, is to assure increased private sector involvement in all employment and training programs. The second, an operational role, is to provide an effective delivery mechanism for placing CETA clients in private sector jobs.

These two functions are to be accomplished through the establishment of Private Industry Councils (PIC's) by local prime sponsors. The PIC's will be composed primarily of local business leaders, including small businesses and minority businesses. In addition to title VII, the committee bill includes a number of provisions to increase private sector participation in planning for all employment and training activities and for reduction of the paperwork burden which has restricted private employer participation in the past. The committee has received the strongest possible commitment from the private sector through organizations such as the National Alliance of Businessmen and private concerns including Chrysler Corp. and Control Data Corp.

Finally, while much of the criticism of CETA has been leveled at public service jobs, over a million persons are served by other CETA programs including 470,000 in classroom, on-the-job training, and work experience; 23,000 in Job Corps; and 230,000 in youth employment programs. An additional 1,165,000 are enrolled in summer youth programs. The committee bill continues the Job Corps, Young Adult Conservation Corps, skill training, on-the-job training, and other programs, and it emphasizes that public service employment must be designed to improve the employability of the participant and to lead to unsubsidized employment.

The CETA program is the Federal Government's single most effective means of addressing structural unemployment and providing a prompt and effective means of counteracting cyclical unemployment. I urge the House to support the reforms adopted in the committee bill and the new direction which this bill takes.

Mrs. SCHROEDER. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I yield to the gentlewoman from Colorado.

Mrs. SCHROEDER. Mr. Chairman, I would like to compliment the gentleman on his statement. I certainly think the committee is to be commended for the excellent job it has done. I have a couple of questions I would like to ask the gentleman which do not pertain particularly to the House bill, but rather to the corresponding Senate bill and the concerns that could arise pursuant to a current provision in that Senate bill.

In that Senate bill there is a section which would provide for a new Assistant Secretary of Legislation in Intergovernmental Relations in the Department of Labor. The person now holding that position would not have to be presidentially appointed to that job with the advice and consent of the Senate. I am wondering if there is anything like this in the House bill.

Mr. HAWKINS. There certainly is such a provision in section 8 of S. 2570. There is no such provision in the bill before us, H.R. 12452.

Mrs. SCHROEDER. I am delighted to hear the gentleman's response because, as the gentleman knows, I am chairman of the Subcommittee on Post Office and Civil Service. We have been struggling desperately to get these groups under a special policy so that we have some control and so that the Office of Management and Budget has some control over the number of supergrades.

Is the gentleman aware of the administration's position on this, or has the Office of Management and Budget made any request to the gentleman to put this provision in the House bill?

Mr. HAWKINS. No, OMB has made no such request. My understanding is that the Office of Management and Budget has raised some objections.

Mrs. SCHROEDER. The final question I have is, I believe that because the House is acting on the CETA bill first, if the Senate retains language dealing with changing this position, there might be no opportunity for the House Post Office and Civil Service Committee to offer its expertise on this matter unless some of its members have an opportunity to be conferees on this bill. Alternatively, the House rules would permit us to seek a separate vote on the provision if it appeared in the conference report, since it would be nongermane to the CETA bill as passed by the House of Representatives. I have discussed this issue with the chairman and the ranking minority member of the Committee on Post Office and Civil Service and they think, as I do, that some of our members should be conferees if any form of section 8 remains in the Senate bill. Would you object to such a request?

Mr. HAWKINS. It is always the practice, and certainly it is of this subcommittee, and I will speak to the chairman of the full committee, and I am certain he will agree, that it is always the position and we attempt in every instance to protect the jurisdiction of the House committees.

Mrs. SCHROEDER. I thank the gentleman very much for his responses.

Mr. RICHMOND. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from New York.

Mr. RICHMOND. Mr. Chairman, I rise in support of H.R. 12452, the Comprehensive Employment and Training Amendments of 1978.

Today we have the opportunity to approve legislation that will truly help hundreds of thousands of Americans and I urge my colleagues to support this measure and to oppose all crippling amendments.

I wish to commend my good friends, the distinguished chairman of the Education and Labor Committee (Mr. PERKINS), the chairman of the subcommittee on Employment Opportunities (Mr. HAWKINS), and my colleagues on the committee, for the meticulous consideration they have given this complex and important legislation over many, many months.

As the representative of the third poorest district in the State of New York, a district experiencing an appalling level of unemployment, I cannot stress too strongly the need for a national commitment to the training and employment of the disadvantaged, the minorities, the poor, the underemployed, and the long term unemployed.

In my district the unemployment rate is now 16 percent, and joblessness among minority youth is a staggering 30 percent. Unemployment on this scale is a national crisis.

When we deny to the youth of our Nation and to the poor the chance to be productive citizens who can participate fully in the economic mainstream, we turn our backs on an entire generation.

The CETA program, as initially intended by Congress and as it appears in the legislation before us, is a major step toward providing that generation and the disadvantaged men and women, especially in inner-city communities across our Nation, the training and employment opportunities necessary to help them become productive, proud, and self-supporting members of society.

I believe that the CETA program is the most effective mechanism we have for improving the lot of both the "structurally unemployed"—men, women, and young people whose lack of education, training or job experience foreclose them from participating in the labor market—and those unemployed individuals who are victims of fluctuations in the local or national economy.

The legislation before us builds on the experience of the first 4 years of the CETA program. It strengthens the areas in which past abuses have occurred. It is true that there have been some highly publicized incidents of abuse in the program. However, the strict eligibility requirements, the wage ceiling, the limitations on wage supplementation, and the time limits on participation in the legislation before us all address the problems of past abuse.

Most importantly, this legislation clearly refocuses the program on reducing the unemployment rate by providing training and employment opportunities for the disadvantaged and requiring that after a time-limited period, the CETA placement must lead to unsubsidized employment.

We need a strong, flexible, carefully targeted CETA program, which will help the disadvantaged of our Nation overcome the effects of unemployment, poverty, and discrimination. We need a CETA program which corrects and controls the abuses of the past. We need the CETA program desperately—without crippling amendments—before the national crisis of unemployment becomes a national disaster.

Mr. SARASIN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of the Comprehensive Employment and Training Act. It has come under a great deal of attack of late. However, I sincerely believe that the abuses so widely reported in the press have given us a false impression. Admittedly, CETA is not a perfect program, but it is still a good one, and it deserves our support.

Beyond this, the people who should have benefitted from CETA deserve our support. They deserve our full attention to the most important national manpower program in 4 decades. and they deserve our every effort to improve the program before us today.

It has been over a year since I concluded, as a member of the then Subcommittee on Manpower, Compensation, Health and Safety, an exhaustive, across-the-country survey of the CETA program under the leadership of former chairman Dominick Daniels.

This survey produced nearly 4,000 pages of printed testimony, the primary thrust of which was to show that CETA was then suffering from severe management problems and program overkill. Under the leadership of our new chairman, Congressman HAWKINS, we have made susbtantial efforts in this bill to rectify the problems besetting the program.

Understanding the source of CETA's difficulties is essential to our overall understanding of the bill. First, a tremendous overload was placed on this young program by the passage of three-fourths of a million public service jobs and the intense pressure placed on local governments to reach this goal as soon as possible.

Second, this massive buildup almost necessitated a total lack of attention to any of the management problems that had developed. Third, there has really been a lack of defined purpose for CETA, largely caused by Congress' willingness to rapidly add new programs in an effort to solve new problems.

While problems of nepotism, patronage, and downright fraud—those most frequently cited by the newspapers—were solely the fault of the prime sponsors and program administrators, the

real culprit in this situation is the Congress. It was all too willing to fund the buildup of the 750,000 jobs recommended by the administration without giving the local governments the necessary support services to make the program work. In part, too, the severe problems can also be attributed to the administration's myopia in terms of building such a massive program—and expecting it to work—in a fortnight. This emphasis on rapid job creation severely undermined local management capabilities and has distracted local administrators.

No system of management could have survived this rapid increase without some fraud, some abuse, and some terrible cases of mismanagement. Indeed, it is something of a minor miracle that there were not more problems than we have already witnessed.

Fortunately, the committee did not overreact to these charges. We could have decimated this program; we could have centralized it under the Department of Labor; we could have severely restricted local authority and flexibility; we could have mandated unrealistic goals for prime sponsors. We did not, however, for several reasons.

The challenge of unemployment and underemployment can be met successfully only at the local level. It is there that an intimate understanding of employment opportunities exists. It is at the local level that an understanding of educational and training resources exists. It is at the local level that an understanding of the types of jobs needed by government and the private sector exists. The Federal Government simply cannot respond effectively to such localized problems.

While preserving State and local control over the program, we have made some significant changes in the rules governing CETA. Of particular importance are the changes included in the bill to address the problems of abuse, fraud, waste, and mismanagement. As we explained in our bipartisan Dear Colleague letter, these improvements include strict new criminal and civil sanctions against prime sponsors and subcontractors for misuse of program funds. We have established an Office of Audit, Investigation and Compliance that is patterned after the Inspector General. An Office of Management Assistance was developed to assist prime sponsors in improving their programs' effectiveness and in overcoming the lack of technical assistance that has given rise to so many of the difficulties. Finally, and of great note, we have added stringent restrictions to prevent substitution and abuse of public service employment funds.

The new legislation also responds to the special needs of citizens in this country. Displaced homemakers, Native Americans, the handicapped, migrant workers, veterans, and ex-offenders all have unique problems that must be addressed on a special basis. Title III adequately deals with these needs, and does so on a national level.

Title IV should command the support of the entire House. It is identical to the Youth Employment and Demonstration Projects Act which passed by such a wide margin several months ago. I can assure you that from all reports, it is undoubtedly the most successful and well run of all manpower efforts. Job Corps, too, has been included in this section, and it, too, has been operated relatively efficient and with good results.

Ttle VII, Private Sector Opportunities for the Economically Disadvantaged, is, for many of us, a long-awaited initiative. It recognizes that we must have private sector involvement in any manpower program if we want it to be a success. This is particularly important since 5 out of every 6 jobs in this country are found in the private sector and since the private sector now seems ready to work in partnership with the Governmnt to solve the problems of unemployment and underemployment.

The greatest cause for concern lies in the emphasis on public service employment and on wages affecting workers under titles II and VI. Despite the many improvements made, there are some who feel we have not gone far enough. Members of both the House and Senate Appropriation Committees have voiced serious concerns, and it is my hope that we will answer their reservations with reasonable changes.

Even under the much improved measure, 75 percent of the money allotted to prime sponsors—or nearly $6 billion—could go to PSE type activities. While public service employment should play an important role in any national manpower program, the question is one of degree. The history of this program is replete with evidence that PSE is the least effective and most costly program of all. Substitution has been a major problem estimated to run as high as 90 percent during the program's first years of operation. Even with the restrictions adopted in the last Congress, a recent Brookings report shows that over 50 percent of PSE slots continue to go toward sustaining existing services.

The most severe effect of PSE is the lack of assistance it provides participants. It has decidedly not gone to those most in need of services. The fiscal 1977 report of the Department of Labor on CETA client characteristics shows that of those employed under title VI PSE almost 80 percent had either a high school education or better, almost two-thirds were male, and only 20 percent were nonwhite. In comparison, of participants under title I, the current structural program which places heavy emphasis on training, nearly 50 percent had not completed high school, 50 percent were female, and over 40 percent were nonwhite. Then, too, while it has been difficult to secure accurate statistics, it appears that title VI placement in unsubsidized employment has been less than 3 percent, while those under title I have entered such employment at a far greater rate.

We must consider amendments to reduce title VI public service employment. We most certainly cannot eliminate it, quite simply because the local manpower programs would be thrown into complete disarray and our goal of fighting unemployment would suffer a serious setback.

We might want to consider restricting PSE under title II, thereby insuring greater emphasis on training for the structurally un- or underemployed.

We should focus our attention on both indexing and the supplementation of wages.

Whatever we decide to do today, however, I urge my colleagues to do so remembering that our first obligation is to meet what is still a very real problem for the unemployed and the underemployed. We must also do so with complete awareness of the problems facing local deliverers and those facing the economy as a whole.

I sincerely believe that CETA can be improved with a view toward maximizing its effectiveness for those in need as well as maximizing the return on the dollar of the American taxpayer.

Mr. STEIGER. Mr. Chairman, will the gentleman yield?

Mr. SARASIN. I am happy to yield to the gentleman from Wisconsin.

Mr. STEIGER. Mr. Chairman, I appreciate the distinguished gentleman from Connecticut's yielding, and I congratulate the gentleman from Connecticut (Mr. SARASIN) for a thoughtful statement on behalf of the bill.

Mr. Chairman, may I ask the gentleman from California (Mr. HAWKINS) to comment on one part of the committee report on H.R. 12452?

On page 8 of the report the relationship between the Employment Service and CETA prime sponsors is discussed. It points out that the Department of Labor is presently conducting demonstration projects on methods to coordinate the activities of these two systems, and that the Secretary will be required to report to the Congress on these activities. Is it not true that the bill also contains in section 308 authority for the Secretary to continue to fund programs to promote the development of partnership agreements between the Employment Service and CETA prime sponsors and authorizes the Secretary to reimburse prime sponsors for costs associated with the implementation of a partnership and to provide incentives to insure that employment security agencies may participate on an equitable basis?

Mr. HAWKINS. If the gentleman will yield, Mr. Chairman, the answer is "Yes," and a very definite "Yes."

Mr. Chairman, I do take this opportunity to commend the gentleman from Wisconsin (Mr. STEIGER) for seeking the answer to this question. The contribution that he has made to this section of the bill, I think, is one of the far-reaching ones to bring the Employment Service into greater involvement and to encourage greater cooperation between local prime sponsors and the Employment Service.

Mr. Chairman, with that contribution I think the gentleman has made a very distinct addition to the bill.

Mr. STEIGER. If my colleague will yield further, I thank the chairman very, very much.

Mr. Chairman, given the fact that Congress will not be able to address changes in the Wagner-Peyser Act and

the relationship between the Employment Service and CETA until next year, I urge the Secretary to fully utilize his authority under section 308 and to continue to provide technical and financial assistance to CETA prime sponsors and local and State employment security offices which want to voluntarily pursue closer cooperation and coordination through partnership agreements. I would like permission to include at this point in the RECORD a statement as to why I further believe section 308 is important.

Mr. Chairman, the Federal Government supports two separate systems to assist individuals in finding employment. The U.S. Employment Service, established in 1933 by the Wagner-Peyser Act, is operated by the States and serves primarily as a labor exchange to help individuals seeking jobs and employers seeking workers. CETA, established in 1973, is operated by both States and local units of government primarily to plan, coordinate and operate concentrated employment and training programs for the economically disadvantaged and hard to employ. Prior to the establishment of CETA the Employment Service often operated similar programs under the old Manpower Development and Training Act. For a number of reasons Congress decided to create a separate system for delivering employment and training services to the hard to employ.

CETA and the Employment Service do not have exactly the same functions, but they do have related functions. At the time CETA was enacted there was much discussion as to how the Employment Service should be coordinated with it. Should CETA be required to utilize the Employment Service for job placement? Did the Employment Service lack credibility with the disadvantaged? How effective was the Employment Service? Finally, it was decided that CETA would not be required to use the Employment Service, but should strongly consider using it.

Needless to say this produced varying results throughout the country. In some areas there has been steady improvement between the two. In others there have been continued problems. There is no getting around the fact that the Federal Government is still sponsoring two organizations to deliver employment and training services and that neither Congres or successive administrations have really dealt effectively with the responsibilities and relationship between the two.

Frankly, I think there is merit to combining the two agencies, and on September 28, 1977, I introduced legislation, H.R. 9358, to abolish CETA and the Employment Service and create a new Comprehensive Employment Services Administration.

However, I realize such a step should involve much discussion, thought and planning on the part of a great many people. Thus, I was encouraged when the Labor Department decided to utilize some of its research money to fund eight demonstration projects to explore ways to improve the working relationship between CETA and the Employment Service.

A full report on the results of the demonstration projects is due this month I am told. Preliminary briefings indicate that they met with varying results. One in Suffolk County, N.Y. apparently fell completely apart. In other areas it was the first time CETA and Employment Service personnel in the community were able to sit down in the same room and discuss common problems and objectives—the relationships were that bad. In other areas while both systems had been trying to coordinate their operations the different organizational structures, funding mechanisms, planning cycles, definitions and reporting requirements made coordination difficult. The demonstration projects helped them make a concentrated effort to overcome these obstacles. There seemed to be one common denominator in all the projects. Not only did success require commitment and goodwill on the part of the personnel involved, it also required an investment of time and money. Those familiar with CETA and the Employment Service know that their budgets and personnel are generally targeted to specific projects and activities. This is why I believe it is necessary to make technical assistance and extra funds available to assist those prime sponsors and employment security agencies who want to put together more closely coordinated systems.

Legislative work still needs to be done on the relationship between the two systems, but until Congress makes the necessary legislative adjustments, I feel the Labor Department should continue to assist prime sponsors and employment security agencies who voluntarily want to work on improving their relationships and integrating their operations. This is what section 308 is designed to do, and I urge the Secretary to fully utilize the authority available to him under this section.

Mr. HAWKINS. Mr. Chairman, I yield such time as he may consume to the gentleman from Kentucky (Mr. PERKINS), the chairman of the full Committee on Education and Labor.

Mr. PERKINS. Mr. Chairman, today we begin consideration of H.R. 12452, the CETA reform and reauthorization bill. This bill reforms, streamlines, and reauthorizes a variety of employment and training programs which have served our Nation well over the past several years.

This is a bipartisan bill developed under the leadership of my good friend and distinguished colleague, GUS HAWKINS, chairman of the Subcommittee on Employment Opportunities. He and his colleagues on both sides of the aisle deserve congratulations for the months of hard work they have put into this truly comprehensive legislation.

The CETA reauthorization bill is designed to build on the accomplishments of the CETA program and to correct the weaknesses that have become apparent in the last few years. Since 1973 the CETA program has grown enormously, and that growth has led to some problems—which are directly dealt with in the reform bill reported by the committee.

One problem has been a confusion between the need for serving the hard core unemployed and for providing jobs for others who lost their jobs during the recent recession.

The committee bill deals with this problem by setting up two distinct programs: A program for the structurally unemployed in title II and a countercyclical program in title VI.

Each program is adjusted to meet its objectives in eligibility requirements, program content and funding arrangements. Eligibility for title II is limited to the economically disadvantaged; all components of the program, including public service employment, must have a training component and be designed to lead to unsubsidized employment, and the funding level is not related to the level of national unemployment.

Title VI has a less restrictive eligibility requirement in recognition of the fact that jobs in a recession are needed by a broader range of persons; the jobs are not required to have a training component because many enrollees will be able to return to their former jobs when conditions improve, and funding is contingent on the extent of unemployment. When full employment is reached, the need for this program will disappear.

This restructuring into two programs with distinct objectives and clientele will solve the confusion of roles that now pervades the different CETA programs.

Another problem encountered by the CETA program has been the widespread suspicion of fraud and abuse. I am concerned that insufficient manpower has been devoted to supervision, audit, and monitoring of prime sponsor programs during this rapid growth period and I am pleased that the committee establishes a special office of audits, investigation, and compliance in the Secretary of Labor's Office to monitor the CETA program, and the committee expects substantial resources to be devoted to it. Though this office will be incorporated in the Inspector General's Office when that Office is created under legislation that has already passed the House, the mandate in the bill to closely monitor this program will remain.

The bill as reported by the committee has eight substantive titles under which all existing programs are reauthorized and reformed.

Title I contains the general provisions and definitions applicable to the act. It provides an authorization for the programs through fiscal year 1982, except for the youth programs authorized by part A of title IV and the private sector initiatives authorized by title VII, which are only authorized through fiscal year 1980. The title also establishes the Office of Audits, Investigations, and Compliance and the Office of Management Assistance within the Office of the Secretary.

This title also contains new provisions governing the submission of comprehensive plans for all programs under the act and the general conditions governing wages and other conditions of employment and participation in the programs.

The bill makes very clear that the process of plan submission and plan approval is the key to an effective program—and the essence of the process is that the Secretary evaluate the program in the light of performance standards appropriate to the local labor market conditions.

This title also contains the basic reforms of the Public Service Employment program: A limit on duration of enrollment to 18 months; a wage maximum of $10,000 that may be adjusted up to $12,000 in high wage areas; an effective mechanism for limiting average wages in each prime sponsor area and a general prohibition on supplementing wages from local funds (this restriction is not applicable to all title VI slots).

Title II of the bill authorizes the comprehensive employment and training services which provide the permanent core of the CETA program. These services are targeted upon the structurally unemployed or underemployed and are to be provided regardless of national unemployment rates. The purpose of all activities—institutional or on-the-job-training, work experience, support services or public service employment—is to improve the employability and the earning potential of individuals who through the lack of skills, experience, or proper work habits, are unable to secure and retain employment or to earn enough to achieve economic selfsufficiency.

All title II activities must lead to unsubsidized employment. Expenditures for public service employment wages under this title are limited to not more than 50 percent of the total title II Allotment. Public service employment must be at entry level, be combined with training and supportive services and lead to unsubsidized employment. The bill prohibits supplementation of wages received under this program.

Eligibility for participation in these programs is limited to individuals whose family income is at or below 70 percent of the BLS lower living income budget. In addition, for entry into a public service employment program under this title, participants must not have been employed for more than 200 hours in the previous 10 weeks. Such criteria will target the program to those most in need without excluding individuals who are underemployed.

The bill includes a distribution formula that is designed to provide a minimum disruption in the continued funding of CETA programs and to reflect as closely as possible the funding provided under existing law. Since the committee has combined two existing titles into one, the revised formula established a ratio that is closely alined to the existing distribution of funds.

Simply put, two-thirds of the funds appropriated for the new title II (outside of 10 percent that is reserved for the Secretary's discretion) will be distributed under the "old" title I formula. This includes 50 percent based on a prime sponsor's prior year "manpower allotment," 37½ percent on general unemployment, and 12½ percent on low income. One-third of the funds will be distributed under the old title II formula on the basis of the number of unemployed in areas of substantial unemployment, defined as those areas where average unemployment over the highest 3 consecutive months of the year exceeds 6.5 percent.

The title also includes an upgrading and retraining program, designed to assist persons operating at less than their full skill potential.

Title III contains special programs for persons who have a particular disadvantage in the labor market, including Indians, migrants and seasonal farmworkers, the handicapped, and displaced homemakers. The title also authorizes welfare demonstration projects, a veterans information and outreach program, and partnership demonstration programs between prime sponsors and State employment security agencies. Funds available for this title are limited to an amount equal to 20 percent of the funds appropriated for title II.

Title IV authorizes all the youth programs except the Young Adult Conservation Corps, which is authorized under title VIII. Programs under title IV include the youth employment and demonstration projects. Job Corps, and the summer youth programs, the youth employment and demonstration programs were originally authorized for only 1 year because Congress wanted to test the efficacy of each approach. Since most of these programs have only recently begun to operate. the committee has recommended that their authorization be extended for 2 more years. This will enable Congress to properly evaluate the results of these programs. The programs authorized in this part are exactly those which were included in Public Law 95–93, except for the addition of integrated pest management as an eligible activity under the youth employment and training programs.

Title V authorizes a National Commission for Employment and Training Policy.

Title VI authorizes a countercyclical public service employment program. The key concept embodied in title VI is that the level of countercyclical public service employment should vary with the rate of national unemployment. It should increase as unemployment goes up and, just as important, it should be phased out as we reach full employment. The committee found no practical way to vary the appropriation or authorization level directly with variations in the unemployment rate. Instead of such an automatic trigger, the bill contains a declaration of purpose that the level of public service employment under this title should be sufficient to fund jobs equivalent to 25 percent of the number of unemployed in excess of percent of the labor force.

The Secretary of Labor is required to report quarterly to the Congress on his estimate of unemployment for the following fiscal year and to translate the congressional intent into a budget estimate. The committee hopes and intends that the Congress will through the appropriations process, provide sufficient funds to fulfill the goal stated. As this goal will vary, the bill contains no specific authorization level for title VI. This title retains the allocation formula in current law.

Title VII provides a 2-year demonstration program to test the effectiveness of a variety of approaches to increase the involvement of the business community in employment and training activities supported under this act, and to increase the private sector employment opportunities for economically disadvantaged persons.

This new title has received an enthusiastic response by almost every sector of private industry. Let me quote from a letter sent to me last week by Mr. Ruben F. Mettler, chairman of the National Alliance of Busines:

> Title VII is the product of many parties in the manpower community working together to pool our knowledge and experience for reducing structural unemployment. These parties include the National Alliance of Business, representatives of the AFL–CIO, various small business organizations, the business roundtable, the committee for economic development, the U.S. Chamber of Commerce, the National Association of Manufacturers, the Business, Council, the Departments of Labor, Commerce and Housing and Urban Development, and the domestic policy staff at the White House.
>
> The title VII concept, as embodied in the marked-up version of H.R. 12452, is already a proven concept in a few communities. We now ask your support to preserve Title VII intact so we can expand a workable concept across the entire CETA prime sponsor network.

Title VIII as mentioned before reauthorizes the Young Adult Conservation Corps in the Department of Labor.

With the changes made in this bill, the CETA program can provide help to the unskilled, the unemployed and to the Nation. I hope all Members will support this constructive reform.

Mr. WEISS. Mr. Chairman, will the gentleman yield?

Mr. PERKINS. I yield to the gentleman from New York.

Mr. WEISS. Mr. Chairman, I rise in support of H.R. 12452. I would like to address my remarks to two major issues which the Members will consider today: Reducing CETA wages and limiting the number of positions in title VI.

REDUCING WAGES WILL ALLOW ONLY THE MOST MENIAL OF JOBS IN THE PROGRAM

The committee's bill contains the following wage provisions: a $10,000 maximum federally subsidized wage which may be adjusted up, to 20 percent for high wage areas; a national average wage of $7.800, adjusted for high wage areas and increased annually by changes in the consumer price index; and supplementation of the Federal wage of up to 25 percent of the maximum contribution.

Under the amendment which will be offered by the gentleman from Wisconsin (Mr. OBEY) the following would be implemented as I understand it:

A $10,000 maximum Federal contribution; supplementation only for high wage areas and only up to 20 percent of the maximum; the average wage would be set at $7,000, adjustment is not provided for except at the discretion of the Secretary of Labor.

On the surface this may appear to be an attractive proposal. I ask each Member to look beyond the surface to see what effect it will have in your district.

Remember that CETA is a 4-year bill, ending in 1982. At the end of 4 years, the maximum wage would be $10,000 or $12,000—if supplemented by the locality. That is in 1982, the highest CETA wage will be the same as in 1979.

Consider the effect that this amendment will have on the position of grade I file clerk, currently one of the lowest paid CETA jobs.

According to figures released by the Labor Department last month, the average annual salary, nationwide, of a grade I file clerk is $6,621, as of March 1978. This salary increased 7.6 percent since March of 1977 and has increased annually by an average of 7.8 percent since March of 1973. The latest yearly consumer price index—March 1977–78—has increased by 6.5 percent.

If we take the current annual salary for grade I file clerk and apply the same rate of salary increase, we have the following situation:

In the first year of the program, the clerk will earn $7,124; this is $124 above the nationwide average of $7,000. Even if the national average is adjusted for the next 3 years of the program—and the amendment does not require this—the national CETA would reach only $8,456 by 1982, assuming the current CPI rate. By that time, the salary of the file clerk will be $8,873, or over $400 above the national average wage for CETA.

The question we must ask ourselves is: If the current lowest paid CETA position will be above the national average by 1982, what kind of position can be created in our districts below the national average to provide the balance?

If we take a more advanced clerical position such as secretary, level I, the situation worsens. According to DOL figures, a secretary earns $9,801 annually; that is a private sector level 1 position. Adjusted by the 7.6 percent average increase in clerical salaries, by the third year of the program, a starting secretarial position will be over the allowable wage even when supplemented by the locality; it will be $12,209.

In the 4th year of the program, a level I secretary—using today's projection—will be making $1,137 more than the allowable CETA maximum wage when supplemented; that is $13,137 annually.

These are the kinds of positions that the committee has in mind to create employment opportunities. They will not take CETA into the newspapers and the newsmagazines. We are not talking about jobs for policemen, firemen, teachers, chemists, engineers, or scientists; they are gone as a result of the committee bill.

If this amendment prevails, the CETA system will not be able to provide employment opportunities but for the most menial positions; only a few clerk positions and no secretarial positions by the third year of the program. This is not reform. It will render the program useless.

REDUCING TITLE VI WILL HURT MORE THAN HALF OF THE PRIME SPONSORS IN THE NATION

Amendments are expected to be proposed to reduce title VI of CETA. The committee bill provides for funding for positions for 25 percent of the unemployed in excess of a 4-percent unemployment rate in title VI. An amendment may be offered to alter this trigger. The net effect of proposed amendments to the trigger would be to reduce by up to haif of the number of jobs available under title VI.

I know that a great many Members have expressed interest in cutting title VI positions. Again, I ask the Members to look at the situation in each prime sponsor area in your district to see what effect such an amendment would have.

This title is intended to assist those areas still suffering from high unemployment; in these areas the recession has not abated nor has the need for title VI. If your district has suffered from factory closings or mill closings, it will need title VI.

Of the 450 prime sponsors, 226—half plus one—still have unemployment rates, for the first 3 months of this year, in excess of 6.5 percent; 269 of the 450 have unemployment rates in excess of 6 percent. In bringing this to your attention, I am not just speaking about New York City—which has an unemployment rate of 9.7 percent, but also of prime sponsors in every region in the Nation.

The State of Alabama, for instance, this year still has a statewide unemployment rate of 6.5 percent; within the State of Alabama, the Huntsville and balance of State prime sponsors have unemployment rates reaching 8.4 percent. Under the amendments to change title VI, the State of Alabama with its substantial unemployment could lose more than half of its title VI funds. The same will happen in New York and New Jersey, Delaware, Pennsylvania, California, Illinois, Indiana, Georgia, Louisiana, North Carolina, to name just a few.

The Members who are proposing the cut in title VI say that the current program is not reaching those who are most in need and—citing current experience—that this title is ripe for abuse.

It may be that current law is too flexible. The committee's bill, however, is a strict document. There are new eligibility requirements in title VI which will allow only persons from families with incomes at 100 percent of the lower living standard who have been unemployed for at least 8 weeks to have these jobs. There is not only a limit on the wages to be paid, but there is a limit on the number and percentage of jobs which may be supplemented.

The proponents of these amendments say that they would like to see more transitioning of CETA employees into the private sector. The members of the committee would like to see the same which is why this legislation contains a $400 million private sector component.

But for those areas which have a shortage of private sector jobs—half of the prime sponsors—what is the alternative to title VI?

The CETA system in the 1978 amendments provides some relief for our national unemployment situation. Further cutbacks will cripple CETA's ability to help people to obtain unsubsidized employment. They will, in fact, increase their dependence on other public services.

Mr. CLAY. Mr. Chairman, will the gentleman yield?

Mr. PERKINS. I yield to the gentleman from Missouri.

Mr. CLAY. I thank the gentleman for yielding.

● Mr. Chairman, the Comprehensive Employment and Training Amendments of 1978 would affect offenders through improvements in the general workings of CETA, and through its provisions relating to the reduction of artificial barriers to employment.

Since 1973, DOL's national office strategy for offenders has consisted of model development and technical assistance to prime sponsors. No direct funds for continuing programs, such as existed under MDTA, have been available for offender programs. What little assistance that has been available has rarely gone to prime sponsors. Previous efforts to assist the States in gaining a planning capability have not been followed up, nor were these well developed efforts at the time of implementation.

A review of the CETA experience shows that the existing legislation is not enough. For this reason, I introduced several amendments in full committee that would require prime sponsors to provide for the needs of offenders. The prime sponsor structure is geared to localities where most criminal justice service is provided. Prime sponsors at the balance of State can deal directly with State CJA's. The Governors coordination and special activities unit can deal directly with State CJA's. Prime sponsors in cities and counties can deal with both State and local CJA's, including nonprofit and community-based organizations.

In addition, prime sponsors have the resources to provide a broader set of service options to an ex offender than other existing agencies, including vocational rehabilitation. Outreach efforts are particularly needed to assist offenders who are in prisons, jails, or under community supervision by criminal justice agencies.

Where offender programs do exist, they are often fragmentary in scope and effect. Coordination between correctional institutions and community supervision is still lacking in most jurisdictions and even less common between criminal justice and CETA. This is an additional reason for encouraging primes and CJA's to work together. A means to increase such cooperation is to provide special funds under title III of CETA for comprehensive coordinated progarms. Developing coordinated actions among the Federal Government, the States, and the prime sponsors should be a title III responsibility of the Secretary. I would also encourage the use of such activities as mutual agreement parole (coordinating corrections, parole and service providers) and multiservice centers in urban areas (one location for employment and training assistance, drug and alcohol treatment, legal aid, et cetera).

DOL should not fund criminal justice agencies directly, except in cases where

the local prime sponsor refuses to provide services; then DOL could fund other agencies (CJA or nonprofit) for that locality.

Existing provisions relating to artificial barriers are not adequate. Both the Secretary and primes should be given more specific responsibilities to reduce barriers to employment. Criminal records should be explicitly recognized in the amendments as being a barrier. Each party to CETA (DOL, primes, contractors, et cetera) should be required to review all activities that result in artificial barriers to employment, to develop programs, and to report on the results of the activities designed to reduce such barriers.

Mr. Chairman, the amendment to the eligibility criteria in section 125, subsection 25 is expressly designed to insure that offenders incarcerated in prisons, jails, and other correctional facilities will be eligible for all services without having to pass any durational test and without having to demonstrate availability for work.

Owing to disparities in eligibility criteria among the different titles under current statute, there was an ambiguity about incarcerated offenders' eligibility for title VI services because they were technically not available for work. That ambiguity evidently resulted in some prime sponsors refusing to certify offenders as eligible for public service employment until 15 weeks after their release.

The proposed amendment was fashioned precisely to clarify the ambiguity by precluding an interpretation which would bar offenders' access to CETA services during incarceration or immediately on release.

Some argue that we are granting more liberal eligibility criteria for offenders and ex offenders, than for others who have employment and training needs.

Mr. Chairman, that is perhaps best addressed if we think for a moment of the relationship between recidivism and unemployment. We are all painfully aware of the alarmingly high rate of recidivism and that unemployment contributes very heavily to it. The costs associated with the provision of training, skill development and job placement are no where near the cost to the public of maintaining an individual in a penal institution or facility. Moreover, there is no question that the benefits to the offender and to society are greater if resources are applied to increasing the individual's ability and aspirations in becoming a productive member of society, rather than a continuing liability. Former inmates need help in locating or preparing for employment the very day they are released—not several weeks or months later when it may well be too late. Delaying employment and training assistance is a disservice to offenders and to society, and I believe it would be a continuing inconsistency with the notion of serving those who are most in need of assistance first.

Mr. Chairman, it appears that the current performance indexes very often serve as disincentives to prime sponsors in the provision of services to certain segments of our population who are viewed or believed to be "difficult to place." My concern with current performance standards or indexes is that they do not allow prime sponsors to be credited for expenditures of time and resources directed toward individuals who have severe skill limitations, poor work history, or who suffer unduly from real and artificial barriers to employment. Although prime sponsors are encouraged to work with such segments of the population, they are in effect penalized when the yearend tally is made. Clearly, it takes more time and often more money to train and impart necessary skills to some groups than others. Current performance indexes fail to take this factor into account.

Therefore, it would seem appropriate and desirable to develop a measuring instrument to gage prime sponsor's performance with respect to successfully serving population segments as offenders, ex offenders, handicapped, and others.

Perhaps this could be one of the tasks of the National Commission for Employment and Training Policy, as provided for in title V of the act.

Mr. Chairman, the proposed legislation deletes previous wording from section 454 that pertains to the special screening of prospective recruitees having histories of serious and violent behavior against people or property. Some have asked if it is necessary to the protection and interest of Job Corps and those communities surrounding Job Corps centers that the programs maintain a waiver procedure for these serious law violators?

It is my understanding that the Job Corps experience strongly suggests that subsequent to enrollment, there is very little behavioral difference between persons who have serious records of antisocial behavior and those who do not. Until and unless strong evidence is presented to support the contention that the two groups need to be addressed differently, there is no justification to raise needless barriers to participation in Job Corps. Moreover the extra time, effort, and money required to undertake background searches and to seek waivers seems to me a poor use of resources that could otherwise be applied to expand programing.

Mr. Chairman, for the record, I offer the following clarification of those amendments adopted in full committee which pertain to offenders:

LEGISLATIVE INTENT OF OFFENDER AMENDMENTS ADOPTED BY THE FULL COMMITTEE ON EDUCATION AND LABOR

Section 103(b)(2)(B) would require sponsors to describe plans that address the needs of persons who face particular disadvantages as identified in Title III, particularly offenders who constitute a potentially large client population of the prime sponsors. Given the decentralization which is inherrent in CETA, this can best be accomplished by integrating the provisions of the Act [i.e., Sections 103(b)(2)(B) with Section 301(c)]. Maximum flexibility would still remain with the prime sponsors who can bring the most resources and experience to bear on the problems.

Section 103(b)(2)(C) would require prime sponsors to eliminate all artificial barriers under their control since PSE job holders can be expected to seek permanent jobs with the prime sponsor's managing agency, the political units making up the prime or with the agencies contracting with the prime for PSE job placement positions. This logic would also lead the prime to require that any contractor with the political units making up the prime, review and eliminate any artificial barrier to employment that it might have. This is not an onerous burden on employers, since it merely asks the prime to enforce existing law under EEOC or state and local human rights laws. Similar provisions relating to artificial barriers can be found in Sections 109(e), 121(a)(4), and 311(h).

The phrase "artificial barriers to employment" [Section 125(3)] includes obstacles to employment (faced by persons such as offenders) which prohibit or restrict employment for reasons unrelated to an individual's fitness or ability to perform a patricular task, generally because of reactions to his or her status or past misconduct. An artificial barrier would refer to job requirements, policies, or practices which do not bear a direct relationship to requirements of the position or license sought.

The definition of "offender" [Section 125(17)] would spell out that employment and training assistance includes help in overcoming an artificial barrier to employment. This means that traditional manpower services are not complete in themselves with respect to offenders, and program placement rates may suffer if employment barriers are not dealt with. Yet, few prime sponsors are aware that many of their clients are offenders. Thus prime sponsors must deal with the consequences in the labor market of past criminal contact, including mere arrests. One rationale for using arrest as the basis of the offender definition is that arrest information, even absent conviction, can result in a substantial barrier to employment. The definition would also include those "court eligible," meaning those subject to any stage of the judicial process, pre or post conviction.

Subsection 125(25) adds to the definition of "unemployed" those persons institutionalized in prisons and who are seeking work. The omission of this language would have overruled the existing practice of using PSE jobs as a mechanism for temporary transition to labor market reentry on behalf of offenders.

Section 301(c) is designed to clarify the intent of Congress by insuring that emphasis will be placed on offenders, particularly those who are currently under the jurisdiction of the criminal justice system or who were recently released from custody or supervision. The language emphasizes programs that provide comprehensive services, and opts for program models that build linkages with other social and employment agencies. Offender clearinghouses and multi-service centers are two such examples.

Discretionary grants under Title III may also be used to underwrite the start-up and planning/evaluation costs associated with state or local prime sponsor offender initiatives. This grant-making ability would also apply to community groups and other private organizations, but nevertheless, the primary focus would be on the state (Governor's office) and the prime sponsors.

Finally, in order to monitor the implementation of this provision, the national offender office shall conduct an annual survey of prime sponsors and states receiving CETA funds for the purpose of assessing the scope and implementation of offender programs. This provision would complement Subsections 103(b)(2)(B) and (C) by allowing the national office to monitor the implementation of prime sponsor plans for Title III recipients.

The intent of prohibiting the use of criminal histories in Section 454(b) as the sole criteria for a position with Job Corps is twofold: (a) it is an artificial barrier and (b) it

has been used to screen out individuals with relatively minor offenses whose continued experiences in the community may lead to greater criminal involvement.

An individual should be considered acceptable to Job Corps until that individual's conduct proves itself inimical to the Job Corps, assuming the Job Corps will help to overcome the individual's problem.●

Mr. SARASIN. Mr. Chairman, I yield such time as he may consume to the gentleman from Vermont (Mr. JEFFORDS).

Mr. JEFFORDS. Mr. Chairman, I first want to commend the chairman of the subcommittee for his most excellent work on this bill. I would also state that the bill we have come out with so far exceeds the present law that I would hope that in the final analysis Members would support the bill regardless of what happens.

Mr. Chairman, the CETA program has had a lot of problems over the last few years. I feel that many constructive and important changes were made during subcommittee and full committee markup by the Education and Labor Committee. The committee bill consolidated all of the administrative provisions into title I, greatly simplified the reporting procedures and the amount of paperwork required of prime sponsors, placed time limits on the length of enrollment in CETA, and separated out programs which deal with countercyclical unemployment from those which deal with structural unemployment. An effort was made to reduce the widespread fraud and abuse in this program by strengthening the management and auditing procedures, and by creating an Office of Audits, Investigations, and Compliance in the Department of Labor. The bill contains sanctions and remedies against prime sponsors and contractors who misuse funds. Technical assistance from DOL, almost totally lacking at present, will be provided by the new Office of Management Assistance.

I commend my colleagues on the Education and Labor Committee, especially the gentleman from California (Mr. HAWKINS) and the staff members from both the minority and majority sides for their cooperation and constructive approach to this bill.

However, this legislation is far from perfect. One of the major problems is that the funding under this act does not target the population most in need of employment and training assistance, youth. The most recent Bureau of Labor Statistics report shows that overall teenage unemployment rose from 14.2 percent in June to 16.3 percent in July. This represents 1.5 million youths, aged 16–19, who are actively looking for work and cannot find any. The unemployment rate in the age 20–24 bracket is slightly better, at 9.9 percent, but the numbers are the same: an additional 1.5 million young people are looking for work. A look at black teenage unemployment is even more dismal: BLS reports that the unemployment rate for this group is 37 percent.

With these kinds of statistics, it would seem that this bill would target its funds in the area of youth unemployment. But a look at funding for the past 2 years shows us that in 1977, we spent almost four times as much on public service employment as on all the youth programs in the bill. In 1978, we spent almost three times as much on PSE as on youth—even though youth unemployment rate is nearly three times as great as overall national unemployment.

PSE has grown from a $440 million program in 1974 to an anticipated $6.2 billion program for fiscal year 1979. It is too big. It is wasteful. It is inflationary. It directs money away from those who are most in need of employment assistance—our Nation's youth, minorities, and disabled.

Transition into private sector employment from PSE has been abysmally low. A March 1978, GAO report points out that during fiscal year 1977—during which we spent almost $3 billion on PSE—only 22 percent of the VI PSE enrollees nationwide were terminated from the program. Of this 22 percent, only 43 percent found unsubsidized employment upon leaving CETA. Of the 22 percent, only 38 percent found unsubsidized employment in the private sector.

I plan to offer an amendment which I feel will help us emphasize our true employment priorities by restoring balance to the funding under this bill. Simply stated, the amendment will reduce funding for PSE to about the same amount spent on the youth programs in titles IV and VIII, and the private sector initiatives for the economically disadvantaged in title VII. This will result in an overall reduction in spending of over $1 billion on PSE, half of which will be channeled into the youth and private sector programs. This takes over $1 billion out of the inflationary part of this bill, and reduces total expenditures by over $500 million in fiscal year 1979, and probably more in subsequent years. The amendment would cap title VI except as set forth below.

This amendment provides, however, that in the event that the Secretary of Labor projects unemployment in excess of 6.5 percent for the next fiscal year—pursuant to the provision in section 602—then the wording of the current bill would apply, and the ceiling would be lifted. Such sums as are necessary would be authorized consistent with that section.

On the other hand, should unemployment be reduced as projected by the committee report, such that sections 601 and 602 would indicate a lower authorization, such lower authorization shall apply.

This amendment gets at many of the key problems in CETA—the need for increased targeting of the youth population, the need for more private sector involvement, and the need to reduce PSE, a program which not only has not proven to be successful in training people for unemployment in the private sector, but also has contained most of the fraud and abuse in the bill.

Another population which faces many barriers to employment and training is the handicapped.

The committee felt that the handicapped had not been adequately served under CETA in the past, and therefore adopted several of my amendments which strengthened the commitment of the CETA program to serving the handicapped. Enrollment rates for handicapped persons represent only 4 percent of all persons enrolled in title I programs and 2.8 percent of PSE slots under titles II and VI during the 15-month period ending September 30, 1976. More recent DOL statistics indicate that for the first three-quarters of fiscal year 1977, the participation of handicapped individuals was 4.7 percent for title I and 3.2 percent for titles II and VI.

Census information indicates that there are several million employable but unemployed handicapped. Most of these individuals are in the "discouraged worker" group. They create a high social cost. It is obvious that the present CETA program has not reached out successfully to this group. My three technical amendments clarified the definition of "handicapped individual," included "rehabilitation facilities" in the listing of "community-based organizations," and clarified the status of handicapped individuals working in sheltered workshops. My two major amendments which the committee adopted were an affirmative action program and a title III program for training aides to assist the handicapped.

These provisions represent a large step ahead in the participation of the handicapped in the CETA program, but there is another side to the issue. In the last few years, Congress has passed several mandates to end discrimination against the handicapped: The Education for All Handicapped Children Act (PL 94–142), The Education Amendments of 1976 (PL 94–482), and the Vocational Rehabilitation Act of 1973, sections 503 and 504 (PL 94–112). These Federal mandates will create jobs in the handicapped-services field, and by training people to perform such tasks as interpreting for the deaf, reading for the blind, working as teacher's aides, we are helping the handicapped overcome many of the barriers to their employment, as well as providing employment for a number of other people.

There is a demonstrated need across the country for services of this kind. The last census estimated that there are nearly 12 million handicapped individuals in this country between the ages of 16 and 64 of which about are employable but unemployed. The two greatest barriers to the employment of the handicapped are the lack of qualified persons to provide special services, and the still-prevalent and widespread occurrence of architectural barriers. These two problems represent the communication and physical barriers which restrict the employment of the handicapped, and in turn create attitudinal barriers in the minds of employers, who shy away from what they feel will be large costs with minimal returns.

The aim, then, of my title III demonstration program is to train people to meet one of our national priorities, services for the handicapped, as well as to train people for existing jobs in the pri-

vate sector. I plan to offer an amendment which would guarantee funding for this program.

Another such area, where we know jobs will be available is the development, use, and repair of alternative energy and conservation technologies. There has already been some training of this type within the CETA program, such as weatherization projects for low-income elderly. Technologies of this sort have a greater jobs-impact than large-scale technologies, and I was able to add three amendments to the CETA bill which would add programs in this field to the demonstration titles.

Another area in which this bill should expand is in training people for self-employment. I plan to offer amendments which would set up programs to train people in management techniques, business communication skills, motivational training, special problems in business operation, preparation of financial statements and loan applications, record-keeping, and other skills necessary in setting up a small business. These programs would be closely connected with the private sector, and will ultimately prepare a person not only to be employed, but to employ others.

There are still a few areas of this bill which need some attention. I have developed amendments to further deal with duration, funding, and eligibility for PSE programs.

One amendment established a priority in the bill that those most in need of employment and training shall be served first. Another limits the length of "special projects" in title VI. Currently, they may be "of limited duration," and I can see no reason to have a project exist longer than 2 years. A project has a beginning and end by definition, and is supposed to complete a task, such as neighborhood cleanup, which is not being performed by existing government programs. To have an open-ended time requirement, again, can easily lead to the abuses which we are trying to weed out of this bill.

I will offer an amendment to limit participation in any public service employment program to 18 months in any 5-year period, rather than the 18 months in and 3-year period now in the bill. This is an equal opportunity amendment which gives more people a chance to participate in the CETA program. It will also increase transition from the program into unsubsidized employment by preventing the movement of participants from one title to another in the bill.

Another amendment will reduce the amount of funds that can be made available for PSE under title II, the structural unemployment title. PSE will be phased down on a gradual basis from 50 percent to 25 percent over a 4-year period. The total possible allocation for PSE under titles II and VI exceeds $6.2 billion. I would rather see this title II money—$2 billion—spent on structural employment and training programs than on PSE.

I feel that with the inclusion of these amendments, the CETA bill will be an effective mechanism for combating the Nation's unemployment. These amendments not only improve the content of the bill by adding necessary programs and priorities, but they greatly reduce the inflationary impact of this bill.

Mr. HAWKINS. Mr. Chairman, I yield such time as he may consume to the gentleman from Michigan (Mr. FORD).

Mr. FORD of Michigan. Mr. Chairman, I rise in support of this legislation.

Mr. Chairman, I wish to identify myself with the remarks of the other members of our committee who have spoken about the tremendous effort put into this legislation by the gentleman from California (Mr. HAWKINS) as the chairman of the subcommittee and by the gentleman from Kentucky (Mr. PERKINS) as the chairman of the full committee.

Mr. Chairman, as a member of the Education and Labor Committee and Task Force to insure CETA reauthorization, I urge swift passage with no weakening amendments of the Comprehensive Employment and Training Act Amendments of 1978. This bill, which would correct many of the deficiencies in the program, will extend authorization for another 4 years.

The bill, as reported by the committee, is supported by the U.S. Conference of Mayors, the National League of Cities, the National Governors Association, the National Association of Counties, the AFL–CIO, AFSCME, CWA and the Council of Great City Schools.

With the unacceptably high unemployment rate this month of 7.3 percent in Michigan and the recent upturn in the national unemployment rate, reenactment of this program should be one of our highest priorities. CETA has been especially important for my own State of Michigan, whose economy is often particularly sensitive to cyclical economic downturns.

CETA was enacted in 1973 and reorganized the delivery system for the employment and training programs that had developed under the Manpower Development and Training Act, the Economic Opportunity Act and the Emergency Employment Act. These programs were decategorized and a system of 450 prime sponsors at the local level was created as the backbone for local delivery of services. This partnership between the Federal Government and local governments has proven to be the single most important effort this country has mounted to ameliorate the problems of unemployment for both the structurally and temporarily unemployed.

CETA had hardly been put into place when it was faced with the new and difficult challenges created by an almost doubling of unemployment rates from 1973 to 1975. In response to this rising unemployment, Congress called on the relatively young and inexperienced program to carry the brunt of the Government's response to reducing unemployment. Changes in law, unpredictable appropriations, and lack of clarity in the intent of the law significantly contributed to management problems for both the Federal and local governments. While the much publicized, but isolated abuses of the CETA program were almost inevitable considering the rapid growth and modifications of the program made necessary by the recession, CETA has proven to be an effective and indispensable tool in providing training and employment for many Americans, while at the same time supplementing important community services. For every news editorial criticizing CETA, often with half truths, I have received hundreds of letters from CETA and former CETA employees praising the program for the opportunities it has opened up for them.

It has not been an easy task to attempt to modify CETA in order to minimize future abuses of the program without seriously undermining the flexibility necessary for the system of local planning and delivery. But the subcommittee under the leadership of Mr. HAWKINS with the support of Chairman PERKINS and the committee have worked long and hard in a sincere effort to reach that balance, while providing for an effective, efficient, and workable CETA program.

The bill as reported makes significant changes and reforms in the program. It establishes two distinct employment programs: A program for the structurally unemployed in title II and a countercyclical program in title VI. The tension between these goals, which often led to countercyclical objectives overwhelming the structural unemployment component, should be ended. It places eligibility requirements on participation in both the title II and title VI public service employment (PSE) programs, limits the length of time an individual can be enrolled in a CETA program, prohibits all wage supplementation title II PSE programs and sharply restricts it in title VI programs, and restricts funding for title II PSE jobs to 50 percent of the title II allotment. It requires 50 percent of all title VI PSE to be in projects and all nonproject PSE jobs to be entry level positions. In addition, it requires that all title II PSE jobs lead to regular unsubsidized employment and be combined with training.

While some have claimed that these changes have gone too far, many others are mounting a strong effort today to pass amendments that restrict the program even further. These amendments, if passed, would seriously threaten the ability of prime sponsors to effectively carry out the program.

Amendments that would either decrease the maximum wage further, eliminate the area indexing of wage levels, eliminate future cost-of-living adjustments in the average wages, establish additional prohibitions to wage supplementation, eliminate the provision of fringe benefits to PSE workers, or provide subminimum wages to youths should be rejected. Such amendments would guarantee a double-track public employment system: a higher track for regular public service employees and a lower one for CETA workers.

Two very unfortunate results would occur. First, hard-pressed municipalities

would face intolerable pressures to displace current civil servants and substitute CETA workers in their place, in an effort to preserve local funds. Second, CETA employees would be looked at as low-ranking and stigmatized employees, thereby robbing them of the dignity that experience in CETA work is supposed to engender. Consequently, the bill should retain the fundamentally fair principle of equal pay for persons doing equal work—a principle that is best achieved by retaining the wage structure in the committee's bill.

Other amendments that are anticipated today seek: to further limit public service employment salaries from $15,000 to $12,000 in high wage areas and $12,500 to $10,000 in low wage areas; to cut the average CETA salary from $7,800 to $7,000; to cut the number of PSE job slots; and to phase out entirely title VI countercyclical job slots.

Unless these amendments are defeated, existing local government operations will be seriously disrupted and the CETA program itself could be endangered. The greatest tragedy, however, would be for the thousands of unemployed and underemployed Americans that seek to live productive lives, should this vital program be undermined. CETA offers these Americans the chance—sometimes the last chance—of significantly reducing the human misery that often results from lack of skills, experience and meaningful work opportunities.

I ask my colleagues to join me in opposing these amendments and in strongly supporting this legislation.

Mr. HAWKINS. Mr. Chairman, I yield 5 minutes to the gentleman from Rhode Island (Mr. BEARD).

Mr. BEARD of Rhode Island. Mr. Chairman, I join my colleagues in supporting H.R. 12452. I think Chairman HAWKINS of our distinguished committee has done an outstanding job and worked very, very hard to bring this bill to this point.

Certainly support has to also go to Chairman PERKINS of our full committee.

Mr. Chairman, I think the issue here today is the destiny of the 750,000 individuals that are working under this program.

I think this is the main consideration. There will be a good many amendments offered later on in the proceedings after general debate. Some of the amendments will be accepted, but some of them will be just "demagoguing" the bill, offered by Members trying to get publicity back home. Those amendments should be rejected.

I think what we must consider is what would happen if this bill were scuttled. What would happen to unemployment in various States? In my own State it would be catastrophic.

We know there have been some abuses in some areas, but the chairman and the members of the committee did something about that. There is allowance in the bill that strengthens the law to cut down on possible abuses. I think this was needed, and this is one of the strong points of the bill.

But, Mr. Chairman, the main thing is that we must consider the people who are presently working and those people who will work under this program.

As I say, the bill is not perfect, but it will help to bring the bread home. It will help the young people, the old people, and the handicapped who fall under this bill by providing them with meaningful jobs.

I think certainly this legislation is one of the most important bills we have considered in the past 4 years. Certainly providing the funding for this bill is the most important thing we could do for the unemployed people of this Nation.

So I join with many other Members, as I stated in the beginning, in supporting the chairman of the subcommittee, the gentleman from California (Mr. HAWKINS), in his fine efforts, and I commend him for his tremendously hard work in trying to bring this bill together. As I said, it is not a perfect bill, but I have not seen a bill passed through this House yet that could be considered perfect.

So, Mr. Chairman, let us get behind this legislation. Let us make sure that the people who need help will receive it. If there is an amendment offered that is worthwhile, I am sure the support will be there, and I know the subcommittee chairman will accept some of the amendments that are offered. Some will, of course, be rejected, and those will be the ones that are put forth just to get publicity. We want to pass a bill that will be beneficial to the people who need the help, the 750,000 people who are depending on it and who are watching this Congress today for our decision.

Mr. Chairman, that is all I have to say on this matter. I will certainly be one of the first Members to get my card in, when final passage comes, to vote for this legislation.

Mr. SARASIN. Mr. Chairman, I yield 7 minutes to the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Chairman, when the Comprehensive Employment and Training Act was first enacted, it was as a substitute for the old manpower training programs. The emphasis, in other words, was on training—training the economically disadvantaged for productive long-lasting jobs.

In the past couple of years, however, we have seen a significant shift in emphasis, away from job training and in the direction of public service employment. There has been so much concentration on public service jobs, in fact, that at times it seems like the training component of CETA has been forgotten. Whenever the Secretary of Labor talks about CETA, he talks about public service jobs. In a recent speech to an AFL–CIO convention, the Secretary spent the whole time extolling the virtues of public service employment, and uttered not one word about the importance of job training.

This bill, with one notable exception, continues the same general trend. The new private sector initiative program is a positive development in that it is designed to more intensively involve private employers in the job training arena. Beyond this, however, the training component gets the short end of the stick vis-a-vis public service jobs.

The old title I job training section would under this bill be merged with public service jobs to form a new title II. According to the committee's financial estimates, there would be no additional funding for job training over what we have now. More significant, however, is the fact that while not more than 50 percent of the title II allotment can be used for public service employment wages, this does not cover employment benefits, which may amount to as much as 15 percent of wages. This additional 15 percent could be taken out of job training funds, and the result will be even fewer dollars for job training than the current level.

Public service jobs do not represent the answer to our unemployment problem. The fact of the matter is that despite the claims of Secretary Marshall, public service jobs have not played a significant role in the reduced unemployment rate during the past year and a half. A little over 6 million additional jobs have been created during that period of time, and of that, only about 500,000 represent public service jobs. That is only about 8 percent, and impacts on the unemployment rate by less than one-tenth of 1 percent. And even this does not take into consideration those public service jobs that are substitutions and not new creations.

Public service jobs are dead-end jobs. They are temporary in nature, and in most cases do not provide any built-in incentives for participants to seek jobs in the private sector. Most public service job holders stay in those jobs for their entire duration because such jobs are both better and higher paying than many private sector jobs. One of the dear colleague letters circulating around expresses concern that a lower wage ceiling "would necessitate the creation of only the most menial types of jobs." That "concern" states the problem in a nutshell. Because we are not seeking to provide simply menial-type jobs, we are removing the incentive for people to seek and take lower paying jobs in the private sector.

It has never made sense to me why we set a minimum wage that we apparently deem good enough for the private sector, but yet set higher wage levels for these Government jobs. This bill sets an average wage of $7,800 for PSE jobs, and allows as much as $15,000 to be paid for such jobs. This compares with an annual salary at the minimum wage of $5,500.

You know, there are some 14 million Americans currently working full-time and earning less than $8,000 a year. What kind of message are we sending to these people when we pay thousands of CETA employees at higher wage rates? Are we not telling them that their jobs are menial when even the Government make-

work jobs are at a higher level and with better pay? Why should they not quit their private sector jobs and apply for PSE jobs? After all, the waiting period under this bill is only 2 months.

If public service jobs are to be truly transitionary in nature, they should not pay more than the lowest paying private sector jobs. This so-called equal pay for equal work standard is nonsense. As long as that standard applies, we are never going to move people from the Government rolls into the private sector.

If we are to have public service jobs, they should be supplementary to the goal of preparing people for private sector employment, not end-alls in and of themselves. Title II in the bill contains some sensible limitations on PSE jobs, particularly with respect to eligibility, State supplementation, and training requirements. It directs such jobs more toward the economically disadvantaged, and that is the way it should be. The wage levels, however, are still out of line, and we also ought to reduce the percentage of title II funds which can be spent for PSE thereby insuring the availability of more funds for training.

The new title VI, which provides public service jobs for countercyclical purposes, is entirely another story, however. This is the area where most of the abuses have occurred and where the greatest substitution takes place. A recent Brookings study indicates that as many as 50 percent of the PSE jobs may be substitutions of one form or another.

Yet the bill extends the countercyclical program at a high dollar level with little more than lipservice in the direction of tightening it up. It would be triggered by an unemployment rate of 4 percent, which is too low; it allows families of over $10,000 in other income to be eligible which is too high; it allows wages of up to $15,000, which is way too much; it allows eligibility after only 8 weeks of unemployment, which is too low; it allows people to remain in these jobs for 18 months, which is excessive; and it requires only 50 percent of the jobs to be project in nature, which is too small.

Frankly, there is currently very little justification for keeping title VI at all, but if it is retained, it certainly should not be more loosely structured than the title II PSE component.

There will be several amendments offered which will limit and tighten up PSE in a number of respects, and I urge their adoption. We need to get back to a CETA program that gives highest priority to job training and preparation for meaningful, long lasting, unsubsidized employment, rather than high-priced, dead end government jobs. To the extent that we have public service employment, it should be strictly limited and should be so structured so that every incentive exists to seek private sector employment, not vice versa.

A successful CETA program will be one geared to private sector employment, because that is where the vast bulk of permanent jobs are located. Failure to recognize this basic fact of economic life will result in a substantial waste of tax dollars at a time when we can least afford it.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from New York.

Mr. CONABLE. I thank the gentleman for yielding, and I want to associate myself with the thrust of the gentleman's remarks.

Mr. Chairman, I am distressed with the divergence between reality and rhetoric in this program.

A year ago I did a special order in which I warned the Congress that we are getting into a major revenue-sharing type of program which did not in fact live up to rhetoric of helping the hardcore unemployed. I said this program is absorbing a very substantial part of the cost of growth in local government.

As I see this bill, it provides some improvement, but still we are likely to have, to a very substantial extent, essentially a revenue-sharing bill when we get through. The longer we leave the program without phaseout, the more difficult it will be to control, because it has such a mixed constituency—none of them the underprivileged constituency to which we originally addressed the program. I am distressed about this, and I would like to ask the gentleman if he does not think it is time to phase down this program if we do not want it to be a permanent part of the political landscape?

Mr. MICHEL. I could not agree more with the gentleman.

When we had our hearings on the supplemental appropriation bill, I asked a witness, "How many former public service jobs employees are currently on unemployment compensation?" And the answer was, "Over 100,000."

In other words, they were getting public service employment for a temporary period of time, then after fulfilling that requirement, coming back on unemployment compensation and then, after that period has expired, going back to public service jobs employment again. And that is not the answer. This Member is going to be supporting several of the amendments that will be offered to the bill later to correct these abuses.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. SARASIN. Mr. Chairman, I yield 3 additional minutes to the gentleman from Illinois.

Mr. CONABLE. Mr. Chairman, if the gentleman will yield further, I do support revenue sharing as a general principle, but I do not support it if it is being arrived at deviously on the theory that we are somehow helping the hardcore unemployed. We help neither local government, by creating a new dependenecy, nor the hardcore unemployed, by rhetoric good only for creating an unfulfilled expectancy.

Mr. MICHEL. The gentleman is so right. Frankly, there are some very good examples we can point to and some very bad ones. I happen to think the program in my home community, where two-thirds of those who have gone into a training program under this program have gone into the private sector, is well run. That is far above the average nationally, so I have to commend those locally who have run the program in my home community. It does ire the general taxpaying public, however, when they read stories, for example, of what has taken place in the District of Columbia with respect to the CETA program and those numbers of City Council employees being employed and subsidized by the Federal Government. That means, of course, the taxpayers throughout the country pay for it.

Mr. HAWKINS. Mr. Chairman, I yield 2 minutes to the gentleman from Puerto Rico (Mr. CORRADA).

Mr. CORRADA. Mr. Chairman, I rise in support of H.R. 12452, the Comprehensive Employment and Training Act Amendments of 1978. First of all, I would like to congratulate the chairman of the committee, Mr. PERKINS; the chairman of the subcommittee, Mr. HAWKINS; and the ranking minority members, Mr. SARASIN and Mr. JEFFORDS for their excellent work in managing this bill during the committee's deliberations.

I believe, Mr. Chairman, that on the whole, we are being presented with a very balanced bill which has built-in adequate safeguards, which in my opinion will preclude any abuses that may have been committed in the past under this legislation.

In this regard Mr. Chairman, I would like to point out to my colleagues that while it may be true that there have been abuses in the past, particularly in the form of substituting permanent jobs with PSE jobs, these have been the exception rather than the rule. As some of my colleagues may know, the PSE (Public Service Employment) component of the CETA program is at the present time approximately one-third of the program. This percentage will be reduced under the bill now under consideration.

I do not think it would be appropriate to restrict the program any more than is contemplated under H.R. 12452, particularly in view of the fact that contrary to expectations we have seen that unemployment last month suffered a substantial increase, an increase which was felt in all categories.

Again, Mr. Chairman, I think that this is a very balanced bill, that it provides for safeguards against substitutions, adequate trigger mechanisms and takes into account differences not only in the employment and unemployment rates but also differences in cost of living and entry levels which we know vary considerably throughout the country.

I believe, Mr. Chairman, that attempts to further restrict the programs under this bill would be harmful and in many ways render the programs authorized by it basically ineffective in some areas of the country. I urge my colleagues to support H.R. 12452 as reported by the Committee on Education and Labor.

Mr. SARASIN. Mr. Chairman, I yield 5 minutes to the gentleman from Minnesota (Mr. QUIE).

Mr. QUIE. Mr. Chairman, today we begin consideration of legislation amend-

ing one of the biggest single Federal programs in existence, the Comprehensive Employment and Training Act. In its few short years of existence, CETA has become a fact of life for local governments, but in many ways which were never intended. The fact that it has come to be depended on—for many of the wrong reasons—should not prevent us from making sincere efforts to amend the law in ways which will redirect the program back to the intended purpose.

The committee bill takes great strides toward this end, bipartisan cooperation produced a bill which attempts to streamline administration and prevent misuse of CETA funds.

Despite these efforts, additional changes are necessary if CETA is to be an effective tool in addressing the employment needs of those who remain unemployed. We must be cautious, however, that the changes we make will actually affect a difference—cutting funds from effective programs such as the title I training program in reaction to a nationwide cry for less spending will not affect the changes we desire. Title I has proven effective in preparing those most in need for entry into private employment; public service employment, on the other hand, has become self-perpetuating, and the transition rate from PSE to private employment has been estimated by prime sponsors as low as 3 percent.

Amendments will be offered which will cut funding for areas which add unnecessarily to the cost of CETA without providing any direct assistance for participants, such as retirement benefits. Other amendments will be offered which redirect the emphasis of CETA from PSE to training, a more cost effective and beneficial aspect of the program. Had these amendments been accepted years ago, we would not be in need of such total overhaul today; I hope it is not too late to turn CETA into an effective, respectable program, responsive to the Nation's continuing employment needs and clearly distinguishable from revenue sharing and other Federal assistance programs.

Mr. HAWKINS. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Chairman, I appreciate first of all the leadership of the chairman of the committee, my distinguished neighbor and colleague, the gentleman from Kentucky (Mr. PERKINS); and the chairman of the subcommittee, the gentleman from California (Mr. HAWKINS), who has labored not only on this bill but also on other bills affecting employment; and the leadership on the Republican side, the gentleman from Connecticut (Mr. SARASIN), whose remarks made earlier I thought were excellent; and the distinguished leadership of the minority and the full committee, the gentleman from Minnesota (Mr. QUIE); and the senior member of the Vermont delegation, whose remarks I appreciated also with their stress on the need for moving on structural unemployment.

My distinguished colleague, the gentleman from Illinois (Mr. MICHEL), whom I do not see on the floor right now, mentioned that in Peoria the program was excellent but nationally it was not good. It is a little bit like Congress: one's own Congressman is excellent but nationally Congress is not so good. Unfortunately there are abuses and this bill addresses those abuses. I was just told by one of the staff members that within the last quarter 243,000 people have been placed in private sector jobs through the CETA program, and that is all to the good.

My distinguished colleague, the gentleman from Maryland (Mr. BAUMAN), and I both had a few remarks about the Reader's Digest article, and I have asked the staff about that. I have pointed out, incidentally, that the Reader's Digest is one of the few magazines in the free world that never prints a correction and never has a letter to the editor. It is one of those things that suggests maybe we ought to take with a little bit of caution what they have to say.

This particular article was extremely critical of CETA. The article fails to mention that some of these programs that they criticize have been investigated by the Department of Labor, and the Department has acted. We should commend Secretary Marshall and his staff for moving aggressively. Some of the allegations have proven to be unfounded and in other cases the funds have been recovered. For example, a recent Labor Department investigation of the program in Baltimore, mentioned in the Digest article, gave that program a clean bill of health. The Atlanta program, also criticized, was also investigated by the Department and that resulted in the indictment of 11 people. There are a number of other instances.

Mr. BAUMAN. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. Mr. Chairman, I thank the gentleman from Illinois for yielding. Let me quote to the gentleman exactly what the article in the Readers' Digest had to say about the CETA situation in Baltimore:

> In Baltimore, loose eligibility guidelines resulted in CETA jobs going to the wife of a state-supreme-court judge, the daughter of a U.S. Court of Appeals judge, the son of the vice president of a large brewing company, the son of a city public-works superintendent, and the son of a member of the Maryland House of Delegates.

Now Mr. Chairman, the gentleman still is failing to respond to the statement I made earlier when I first mentioned the situation in Baltimore. It is true the Labor Department investigated, but none of the statements made in the article about the Baltimore program are untrue. The jobs went to politicians' relatives and friends who certainly do not qualify as unemployed needing job training. That is not what the program is for, yet it was all legal under this program.

If I may continue for a moment, will the gentleman yield?

Mr. SIMON. The gentleman may continue for a moment on my time.

Mr. BAUMAN. I appreciate the gentleman yielding.

In one of the large counties in Maryland it was shown that funds were misused to the point where, after hearing from me and others with complaints, the Labor Department took the program out of the county's hands and put it in the hands of a consortium in Baltimore, the same one to which the Reader's Digest refers. If these incidents are any example of how the program is working nationally, I believe this indicates the need for drastic action now.

Mr. SIMON. What we have under this bill is a much, much tighter law, if it is enacted, than we have at the present time, so that the occasions for abuses will be much fewer. But again, even under the present law, the very abuses that the gentleman cited have been corrected, to the credit of the Labor Department.

I would add one other thing and that is that we are dealing with a relatively new program that has emerged and in the process of new programs where we are dealing with people, there will be abuses, while if you are building a highway you know precisely how to do it and you know precisely how the concrete will act but when you are dealing with human beings, some of whom have had problems of one kind of another, you are going to have problems. So we have had some problems but the bill that is proposed has sections in it to tighten it up. It calls for new auditing procedures, new investigative procedures. These are all extremely important.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SIMON. Would the gentleman yield me additional time?

Mr. HAWKINS. Mr. Chairman, I yield 3 additional minutes to the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Chairman, I thank my colleague, the gentleman from California (Mr. HAWKINS) for yielding me this additional time.

One other point is important and should be mentioned. My colleague from Illinois (Mr. MICHEL) talked about public service jobs as though these were bad things. We have to recognize that in our society we have moved beyond the point where we are going to just let people starve. So, when people are out of work, we are going to pay them for being productive and for doing something to enrich our society, either that, or we are going to have to pay them for doing nothing. It makes infinitely more good sense to pay them for doing something so that they can use their abilities to enrich our society and so that we can make assets out of liabilities. That is what this bill does. That is what the Humphrey-Hawkins bill does. I think it is extremely important.

We have just seen the latest unemployment figures rise from 5.7 to 6.2 percent of unemployment, and the unemployment rate among the structurally unemployed, particularly among youths, as my good colleague, the gentleman from Vermont (Mr. JEFFORDS) has pointed out, remains extremely high. We cannot expect to be a good, healthy Nation with millions of people unemployed.

I am a fiscal conservative in many ways. I am willing to cut on many, many

programs, but when it comes to putting people to work and to let them be a productive part of this Nation, then I think we ought to move ahead.

I hope we can do that with this bill. I hope we do not adopt amendments to the legislation that are unduly restrictive.

Mr. SARASIN. Mr. Chairman, I yield 5 minutes to the gentleman from Virginia (Mr. BUTLER).

Mr. BUTLER. Mr. Chairman, due to recent experiences with the Roanoke Manpower Consortium in my district, I have become more familiar with the operation of the CETA program and quite disillusioned.

In my judgment, many of the problems are the direct result of the rapid and ill-conceived buildup of the public service employment program in the past year, accompanied by inadequate administrative support and almost nonexistent financial monitoring by the U.S. Department of Labor.

There are several glaring weaknesses: An overemphasis at the Department of Labor on numbers, while ignoring training needs; inadequate technical assistance, nationally and regionally, with almost nonexistent financial monitoring by the regional office and dubious reporting practices or guidelines for the prime sponsors; frequent substitution of CETA employees for regular employees contrary to the intent of the law; frequent use of CETA employees in jobs for which there are no comparable positions in the private sector; and finally, a very limited involvement by the private sector which provides the overwhelming number of jobs in this country.

CETA has proven quite valuable, however, as an aid to the unemployed and underemployed who required training to sharpen job skills.

Unfortunately, the opportunity for training has been quite limited under this program.

The program has also been useful in providing temporary workers to accomplish creative and useful special projects.

I am hopeful that the new legislation will tighten up the accounting and management provisions of the law; emphasize that public service employment is an interim step to unsubsidized employment and that job development is to be given the highest priority; that those who substitute CETA employees for regular employees contrary to the intent of the law will be required to restore the funds extended for that purpose; that high priority will be given to the needs of older workers; and that time limits for participation in CETA will be established.

In my district we were abruptly informed that the Roanoke Manpower Consortium faced a $1.6 million deficit; 379 people who were assured of employment by the Federal Government were thus threatened with sudden layoff through no fault of their own.

A major cause of the deficit was the bookkeeping system used by the consortium which failed to reflect accurately its financial status.

I will offer two amendments designed to increase the management responsibilities of the local prime sponsors as well as the Secretary of Labor.

I will offer an amendment to require prime sponsors to keep their books in a manner sufficient to insure that adequate supervision and monitoring by the Secretary of Labor can be accomplished.

I will offer an amendment to require the Secretary of Labor, prior to approval of a prime sponsor's plans, to determine if the prime sponsor has adopted an accounting system which allows for adequate supervision and monitoring.

In order to require that prime sponsors give the appropriate attention in the planning process to moving public service employees into private sector employment, I will offer an amendment to require prime sponsors and their subgrantees to establish local goals for moving public service employees into unsubsidized employment.

The amendment would require prime sponsors to give preference to subgrantees who have provided the highest percentage of placement of public service employees in unsubsidized employment.

No subgrantee shall be refunded if he has substantially failed to meet the goal outlined in his plan of moving public service employees into unsubsidized employment.

I strongly support an amendment, which I understand will be offered, to provide the same incentive for prime sponsors to provide training.

Existing law lacks sufficient penalties for those who have used public service employees as substitutes for regular employees in clear violation of the intent of the law.

I will offer an amendment to require prime sponsors to refund to the Department of the Treasury any funds found to have been expended for employees used as substitutes for regular employees.

I am hopeful that these amendments, along with others which will be offered, will restore CETA to its original purpose of providing training and temporary jobs for the unemployed.

Mr. HAWKINS. Mr. Chairman, I yield 4 minutes to the gentleman from Maryland (Mr. MITCHELL).

Mr. Chairman, I rise in very strong support of this legislation.

There is something which is very much alive in this country yet, and that is the work ethic. Anyone who doubts it should check out the newspapers. When we see announcements about 50 jobs being offered some place and 2,000 people lining up to get those jobs or 500, in some instances, applying for just 10 jobs.

So, Mr. Chairman, the work ethic which is so important in this democratic process is very much alive.

Mr. Chairman, I think it is incumbent upon us to keep this program going because it does offer hope to those who want to work, and most people do want to work.

I said in the Committee on the Budget the other day—and I committed a kind of heresy—that ultimately I would like to see all of these jobs ended. I do think that the private sector will offer better opportunities; but until such time as the private sector is prepared to absorb those who are unemployed, we have to keep these programs going.

Mr. Chairman, there has been a lot of criticism about abuses in the program. I submit to my colleagues that whenever we get a large group of people together, there are going to be some abuses.

Over the past 2 or 3 years, I have read about the heads of our great corporations being indicted and being fined or jailed for wrongdoing.

But we do not suggest that we destroy the corporate structure in America, do we?

I read over the last couple years about those in organized labor, some of the leaders, being indicted and imprisoned for wrongdoing, but no one would suggest that we destroy the trade union movement in this country. I would suspect that most people would not suggest that we destroy the trade union movement in this country. I would guess that in the 79th Congress—I do not think that many of us served in the 79th Congress—there were some rascals who probably did some wrong things and probably were punished for it, but no one suggested that we destroy the Congress because of some abuses that took place in the 79th Congress.

I think it would be absolutely stupid to try to pass a lot of amendments in a vengeful kind of mood against this important piece of legislation.

I have criticized my own CETA program in Baltimore. I conducted my own hearings about the CETA program in Baltimore. Those hearings revealed that the allegations made against the CETA program were not at all valid simply because the law permitted certain things to be done. Under this new legislation we will now correct those defects in the law. Let me quote from an editorial in this morning's local press in Baltimore.

The Baltimore area offers an excellent example of how local governments have used CETA to do what they otherwise could not have done. CETA employees have repaired the homes of indigent, handicapped and elderly people, built curb ramps for the handicapped, and weatherized the homes of the poor, among other things. Some 30,000 people move through the local program annually. Of the 14,000 who are not students holding summer jobs, more than half move into private sector jobs.

The program can be made to work, and it is certainly working in the city of Baltimore.

I hope that we will vigorously oppose all destructive amendments. All destructive amendments have got to be voted down. On the other hand, I take this opportunity to reiterate my position with regard to the importance of this piece of legislation. It is important because, as the Members well know, if we destroy the concept of the ethic of work for some people, we will have destroyed a very large and important part of our democratic process.

The CHAIRMAN. The time of the gentleman from Maryland (Mr. MITCHELL) has expired.

Mr. SARASIN. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan (Mr. PURSELL).

Mr. PURSELL. I thank the gentleman for yielding.

Mr. Chairman, I, too, want to support the CETA program. I am hopeful that today we can have constructive amendments that are not destructive in philosophy, but maybe in the direction of tightening up the bill in some sections that need additional work.

Generally, as a member of the subcommittee, I wish to note the committee has spent endless long hours—both the majority and the minority—and I want to congratulate the gentleman from Kentucky (Mr. PERKINS), the gentleman from California (Mr. HAWKINS), the members of the subcommittee, the gentleman from Connecticut (Mr. SARASIN), the gentleman from Vermont (Mr. JEFFORDS), and others who have spent a lot of time in tightening up the fraud and abuse section, strengthening it, and making it enforceable.

I travel back home probably as much as many of the Members of Congress—every week. I do not live here. On the weekends I travel, and I have had hundreds and hundreds of meetings. When I talk to CETA young boys and girls, mostly dropouts, and people who are in CETA programs, I ask them if they are happy with their jobs and are learning something. If I could say something about the whole CETA program, it is my concern that when a mayor or a prime sponsor puts an employee on a job, that from a supervisory standpoint it would be my hope that one day we could develop this legislation so that the young person would work maybe 6 hours a day and spend 2 hours in the afternoon going to a class, whether it be auto mechanics or a young lady taking clerical work, so that at the end of the day they could walk away and say, I have learned something today besides having a kind of job where I just have a broom and I am cleaning up or I am putting books on a shelf.

It would be my hope someday that the educational aspects of the training program be strengthened in this bill. We have tried to do that to some extent in the CETA Subcommittee. I would be hopeful we would continue in that direction so that the young person in America who is on this program should be getting off sometime in their lifetime after the 18 months and can go out and say, "Yes, I have a skill. I have the kind of thing that can be productive to myself and to society."

I would also like to say to my fellow Republicans that in 1973 this bill was on the floor. I went back and checked the vote. Only 19 Republicans voted against this bill. I think on the majority side it was only 12; so I would like to say, after the full debate today, looking at each amendment constructively and welfare. I am hopeful the majority would hope we would be supportive of these amendments; that until we find a better alternative to unemployment and welfare. I am hopeful the majority and the minority will make a constructive effort today.

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. PURSELL. I yield to the gentleman from Minnesota.

Mr. VENTO. Mr. Chairman, I commend the gentleman for his statement. It provides some insights we all need to see.

In terms of the program, there are aspects of the program today dealing with job training and others that deal with the world of work and training young people. I do want to commend the members of the subcommittee and the minority and the majority for working on this so hard. I think it is a good proposal.

Mr. Chairman, I rise in support of H.R. 12452 as reported by the Committee on Education and Labor. Before I proceed with my specific remarks on this legislation, I would like to commend the chairmen, Mr. PERKINS and Mr. HAWKINS, and the members of the Education and Labor Committee, for their good work on this legislation. The CETA reauthorization has won the support of almost every major group that has an interest in its passage. This includes such diverse groups as the Council of Great City Schools and the National League of Cities, AFL–CIO, and the Chamber of Commerce. This is an admirable task in and of itself.

When the Comprehensive Employment and Training Act was first enacted in 1973, the unemployment rate was 4.5 percent and the primary purpose of CETA was to provide coordination of existing manpower and training programs. Shortly after it was established, our economy went into a recession and the unemployment rate jumped above 8.5 percent. A stronger leadership role by the Federal Government was needed to address the problem of unemployment.

In response to an increased demand for a Government role in job creation, CETA funding increased from $1.8 billion to $9.5 billion in 4 years. CETA provided public service employment to 200,000 unemployed individuals in 1974 and in 1978 more than 725,000 people are employed through public service jobs. On a national level CETA has played an indispensable role in our efforts to provide employment for those individuals who are willing to work, but cannot find, or do not possess the skills to find a job.

The CETA program has been instrumental on the local level as well. In the first half of this year the CETA program for the city of St. Paul has served a total of 4,255 individuals. An examination of the clients served will demonstrate that CETA has been targeted to those individuals who require its services most. Eighty percent of the clients were economically disadvantaged, with income less than $3,000 per individual or less than $6,000 per year for a family of four. Forty-two percent of the clients were women and 32 percent were minorities. The CETA program in Ramsey County and the city of St. Paul has played a major role in the increase of employment opportunities and the reduction of unemployment in my district.

Mr. Chairman, I think that Congress can be proud of programs such as these. The legislation reported by the committee will allow the continuation and also provide for the needed fine tuning of these programs. I urge my colleagues to support the committee bill and oppose the crippling amendments we will see today.

I feel that much of the impetus for these amendments is a direct result of the excessive publicity generated by cases of abuse of CETA funds. While CETA is far from free of problems which must be corrected, a major portion of these problems can be attributed to the dramatic increase in purpose, scope, and funding level of CETA since 1974. Funding has increased 500 percent and clients served by public service jobs has increased by 360 percent in the last 4 years. Any program undergoing this magnitude of expansion is expected to experience some problems.

Another factor contributing to the perception of widespread abuse in CETA is its decentralized structure. If there was one nationwide central office to administer and develop projects; and one type of public service job or training program available, the supplanting/substitution problems might be reduced. However, there are 450 prime sponsors throughout the Nation and a major strength of the CETA programs results from that diversity. Local governments, businesses, and community organizations have an input into the development of projects designed to meet local needs.

The committee bill has addressed these problems in a responsible and direct manner.

This legislation places limits on the duration of employment. Public Service Employment cannot exceed 18 months in any 3-year period. Additionally, the bill limits participation in any CETA program to 30 months in any 5-year period. This is an attempt to prevent the shuffling of clients from one CETA project to another.

Wages for public service jobs cannot exceed $10,000 per year—$12,000 in high wage areas—and the average wage in any prime sponsor area cannot exceed $7,800 per year.

To control the problem of using CETA employees to provide services that normally would have been provided in the absence of CETA funds, the committee has:

Limited employment to entry level jobs.

Required that 50 percent of the jobs in the countercyclical program—title VI—are to be in short-term projects.

Eliminated wage supplementation in structural programs—title II—and sharply limited wage supplementation in countercyclical programs.

And the committee has required that jobs in the structural unemployment programs must be combined with train-

ing and lead to regular unsubsidized employment.

The committee bill also contains provisions to strengthen the Department of Labor's ability to combat fraud and abuse.

First. H.R. 12452 establishes an independent Office of Audits, Investigations and Compliance to conduct investigations of CETA programs.

Second. The committee has created a program to provide management and technical assistance to CETA prime sponsors.

Third. This legislation expands the authority of the Department of Labor to investigate CETA programs and withhold funds, establishes new penalties for misuse of funds and requires bonding of certain CETA employees.

No program will be totally free from abuse, but the committee has made the necessary revisions to insure more effective programs.

The committee has completed an exhaustive review of the Comprehensive Employment and Training Act. The funding mechanism for the countercyclical program has been tied to the increase in unemployment. The structural program has been strengthened by providing increased training for those individuals without marketable skills. Because of these changes, the CETA legislation will more accurately address the needs of our citizens.

The committee has also recognized where the potential for abuse exists and has made substantial changes which will insure the more efficient operation of CETA. I strongly urge my colleagues to vote in support of the committee version of H.R. 12452.

Mr. PURSELL. Mr. Chairman, I have one last quick comment. I went back and looked at the National Alliance of Businessmen. It says two things fundamentally. It was all white, which disturbed me, and I have to congratulate our current President; there were no women, no blacks in the NAB program.

Secondly, it was all big business. I think the future of this country is not so much with big business, but with small business and taking these young people and helping them to learn a trade.

Mr. Chairman, I have offered some amendments in the committee that were adopted to include the small businessman.

We need to put the "T" back in CE"T"A for training. Let this be a partnership between our business and labor community with our young people who need help.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. PURSELL) has expired.

Mr. SARASIN. Mr. Chairman, I yield 1 additional minute to the gentleman from Michigan (Mr. PURSELL).

Mr. BUTLER. Mr. Chairman, will the gentleman yield?

Mr. PURSELL. I yield to the gentleman from Virginia.

Mr. BUTLER. Mr. Chairman, along the lines of the existing law, the Virginia Council for the Business Community already has a representative. The private sector council that appears in this bill would appear to duplicate the efforts of the already-established planning council.

My question is, While I certainly share a concern that the private sector should be more heavily involved in CETA, would it not be more appropriate either to insure them as a planning council with adequate representation from the businesss community, instead of creating another council; or can the gentleman assure me there is no objection to their duplicating one another in membership?

Mr. PURSELL. These organization, these private sector councils, should be properly balanced with both small and large business because I think there is a relationship that they need each other. Frankly, I would not like to see duplicated efforts with other councils.

I agree the gentleman's position, and I refer him to page 21 of the committee report which provides for funding existing councils commend the gentleman from Virginia for his work and effort in this area and clarifying this matter.

Mr. HAWKINS. Mr. Chairman, I yield 5 minutes to the gentleman from Florida (Mr. LEHMAN).

Mr. LEHMAN. Mr. Chairman, I will support H.R. 12452, the Comprehensive Employment and Training Act Amendments of 1978, but with some serious reservations. I have been increasingly dismayed by the reports of abuses and fraud which have occurred throughout the country. Especially disappointing to me have been the highly publicized accounts of abuses in Florida's Dade and Monroe Counties.

Favoritism in hiring and payments to employees who fail to show up for work are examples of the mismanagement which has been allowed to develop during the life of the CETA program. Beyond such flagrant abuses, however, there has been the simple failure of the program to meet the needs of the poor and poorly educated jobless. A recent report prepared for the Dade County grand jury cited three specific faults in the local CETA program. The program has not given jobs to those most in need. More than half of the employees hired for a special CETA program designed to hire the hardcore jobless had attended college, and few CETA jobs are transitional to private sector or non-CETA government jobs.

I am encouraged that the committee has included several necessary reforms in this CETA reauthorization bill. Based on our past experience, however, I cannot be fully convinced that these reforms will eradicate the many problems which have beset CETA.

In order to insure the development of a better employment and training program, we should attempt to wean State and local governments from CETA money for the provision of Government services. CETA ought to be, first and foremost, a training program.

It must be a means for the unemployed to eventually find suitable employment in the private sector. It is not the equivalent of revenue sharing or an LEAA grant. Only this past week, a Dade County school official gave assurance that a proposal to employ persons to combat violence in the schools "would not cost a penny of School Board money" because CETA would pick up the tab. Controlling violence in schools is a worthy objective which I completely support, but I do not think CETA is the proper funding source for a safety program requiring a minimum of training.

The committee's emphasis on the hiring of the economically disadvantaged is to be commended and I applaud the measures to deter substitution and limit wage supplementation. The key, however, to a well-run program is accountability, both to the Federal Government and to the community being served.

The improvement of the Department of Labor enforcement capabilities will help to insure accountability to the Federal Government and the American taxpayer. Greater accountability to the community can be accomplished by strengthening the role of the Prime Sponsor's Planning Council.

If we are to reach out into the community to provide jobs and training to the hard-core unemployed, we have to better utilize community organizations. These groups must have a larger voice in the operations of the prime sponsor and I believe that the appropriate forum is the planning council.

The membership of the planning council is composed of representatives from labor, business, veterans' organizations, and other groups in addition to community-based organizations. By representing a cross-section of the community, the planning council can provide meaningful direction to the prime sponsor in its decisionmaking role. The operation of a smooth planning process should eliminate some of the mismanagement which has plagued certain prime sponsors. Certainly accountability to the community will encourage stricter program standards and cut down on the abuses.

While the committee is more specific in the current legislation in defining the function of the planning council, I do not believe that it goes far enough. Having set forth what the planning council ought to accomplish, there is little assurance that the prime sponsor will seriously consider the recommendations of the council.

The members of the planning council must be well informed and continually advised of new developments within the local CETA program. This legislation requires the planning council to meet no less than four times a year. It should be emphasized that this is an absolute minimum. In south Florida with a consortium the size of the Dade-Monroe consortium, meetings should be held every month with working committees of the council meeting additionally in order to do some of the more detailed work. The local master plan should be based upon the planning council's recommendations which assist the prime sponsor in understanding what the

community feels is the proper direction for the distribution of local CETA funds.

The planning council should be the guiding force behind the local CETA program, and it should represent the interests of the community by voting on its recommendations prior to presenting them to the prime sponsor. Small cliques must not dominate the decisions of the council, and the requirement that meetings be publicly announced, and open and accessible to the general public must be carried out faithfully.

It is my hope that the committee will find the time during the next Congress to more carefully review the workings of the planning councils and seek ways in which they could become more effective. I would like to ask the gentleman from California if it is his intention to hold hearings in the next Congress on the role of the prime sponsor's planning councils.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. LEHMAN. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, the gentleman in the well may be definitely assured that it is the intent of the subcommittee to conduct very thorough investigations and hearings on this and other matters, and certainly this subject of the planning councils will definitely be included in hearings and the oversight responsibilities of the subcommittee.

Mr. LEHMAN. Mr. Chairman, I thank the gentleman from California (Mr. HAWKINS.)

I would like also to say that I have discussed with the gentleman the problems laid before us with regard to low-income industry.

Mr. Chairman, I would like to mention two additional concerns I have regarding CETA. The first is a provision in the law, which this bill leaves intact, which prohibits CETA funding for any employment and training programs in the lower wage industries in jobs where prior skill or training is typically not a prerequisite to hiring and where labor turnover is high. This provision effectively rules out the training of sewing machine operators in the garment industry. I believe that it is unfortunate that CETA has neglected the training needs within this industry which offers ongoing employment opportunities. I understand, however, that some provision has been made within the Department of Labor to remedy this shortcoming outside of CETA.

My second concern involves the ability of community-based organizations to apply for CETA funds. More assistance is needed to help these groups become aware of application dates and to learn how to apply to CETA. Even more important is the need for ongoing technical assistance in order to carry out an effective program. The establishment of an Office of Management Assistance is an important step toward the improvement of the management of local CETA programs.

In the future, I will be watching carefully to see the much hoped for effects of this reform legislation. I want to see CETA employees who come from disadvantaged backgrounds and who are not the sons and daughters of the middle-class and the affluent. I want to see these CETA employees being trained sufficiently to obtain meaningful work in the private sector and not find them back on unemployment rolls and trying to get still another CETA job. I want to see an end to the use of CETA employees as substitutes for city and county employees. I want to see CETA carry out its primary purpose to "provide job training and employment opportunities for economically disadvantaged persons, unemployed or underemployed persons * * * and to assure that training and other services lead to maximum employment opportunities * * *."

If these goals are not met, my future support for CETA cannot be taken for granted. If the abuses go on and local governments continue to view CETA as simply a form of revenue-sharing, I will vote against the future funding and authorizing of the program.

Mr. MICHAEL O. MYERS. Mr. Chairman, will the gentleman yield?

Mr. LEHMAN. I yield to the gentleman from Pennsylvania.

Mr. MICHAEL O. MYERS. Mr. Chairman, I rise in support of H.R. 12452, the Comprehensive Employment and Training Act (CETA) Amendments of 1978. There is not a Member of this House who is not familiar with the CETA program to some extent. Unfortunately, however, many of you may only be familiar with the problems that have been encountered with CETA. I hope you will not allow yourselves to be unjustly influenced by the bad press that CETA has received recently. These instances of abuse are the exception rather than the rule of an otherwise excellent and most needed jobs program.

For every incident of abuse and fraud in the CETA program, there are dozens of success stories that usually go unmentioned. For those of you who have the time, I suggest you read my CONGRESSIONAL RECORD remarks of Thursday, May 11, 1978. These remarks tell the story of a CETA program in my city of Philadelphia that has been most successful in benefiting the community and the senior citizens of my area. I bring this article to your attention solely to remind you that there is another side to the coin.

Nevertheless, because of the concern that has been expressed over occurrences of abuse, the Committee on Education and Labor directly addressed these concerns in the reauthorization bill before us today.

H.R. 12452 is the end product of extensive hearings held in Washington and in the field. As a result of these proceedings the committee has completely restructured the CETA program to insure that the needs of the unemployed and underemployed are met in a responsible and effective manner. Strict eligibility requirements for employment have been imposed. Several provisions have been included to prevent further cases of substitution. And criminal and civil penalties have been increased to insure that prime sponsors and subcontractors who misuse the program will be punished in a timely and effective manner. The reauthorization bill also provides legal authority for the establishment and full staffing of an Office of Audits, Investigation, and Compliance to enforce the CETA program regulations. Finally, to improve the management and efficiency of this most important jobs program, an Office of Management Assistance has been created.

The concept behind CETA is sound. It is a good program and it is a most necessary program for our citizens. There are many areas and segments of our Nation that are still suffering from severe unemployment. My city of Philadelphia continues to suffer from an unemployment rate of 8.5 percent, and among young people that rate is several times worse.

The people of Philadelphia and of other areas of substantial unemployment desparately need the continuation of the job programs offered in CETA. I urge my colleagues not to turn their backs on the needs of our unemployed and underemployed.

H.R. 12452 is a strong reform measure that closes the loopholes which have allowed abuses in the past. I urge all of my colleagues to fully support the committee bill and to oppose all amendments which will weaken a sound employment program.

Mr. BEARD of Rhode Island. Mr. Chairman, will the gentleman yield?

Mr. LEHMAN. I yield to the gentleman from Rhode Island.

Mr. BEARD of Rhode Island. Mr. Chairman, I join the gentleman from Florida (Mr. LEHMAN) in his remarks and with the chairman of the subcommittee, and I will certainly look forward to the hearings that will be held on these issues.

Mr. SARASIN. Mr. Chairman, I yield 4 minutes to the gentlewoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. Mr. Chairman, we are dealing with one of the most difficult bills we have scheduled, and the committee has done a magnificent job.

But we all know what we are up to, do we not? We are again doing something that we really should not do in this House, but it is something that we do repeatedly. We put into a bill that is popular and has become useful other things which do not belong in the legislation at all.

This bill has become the lifeblood of many of our central citizens, and we know it. It is being used that way. It is being used to augment the salaries of policemen who would otherwise perhaps have to be laid off. It is being used to perform services that the cities cannot provide and that their budgets cannot cover. We keep on doing it because countercyclical funds are not popular and revenue sharing does not seem to be very popular either.

So we put the whole thing into a basket that has a good name. That is very demoralizing. It contributes to the lack of confidence that the public has in Congress. If we are doing something, we ought to admit we are doing it.

Mr. Chairman, I listened this morning to the mayors of three of the largest cities in my State. This is what they are telling us. They are good men, who are trying to keep down property taxes in their cities—which are already too high—and I thank CETA for that. Well, if that is necessary, we ought to face it. We ought to do it in countercyclical funding, targeted to places that need that kind of help. We should not do it in what is supposed to be a training act for skills that are useful in the real world, not the public sector world.

I differ from some of my colleagues—and I am sorry the gentleman from Maryland is not here. Because when you are handling other people's money, you should be careful. Maybe it is not our concern if an elected union official makes off with the pension funds. That is not our business. That is the union's money. The same thing applies to a company where there is corporate corruption. It happens there, just as it does in labor. But we are dealing here with other people's money, and that puts a public responsibility on us that we have to acknowledge.

Mr. Chairman, I am sure amendments will be offered. Every amendment is not destructive. I do not understand this defensive attitude. It is our hope to handle other people's money more responsibly. That is our purpose in proposing amendment.

I have some amendments myself which I will refer to later. But I do wish, above all, that we would get away from the habit we have fallen into of not calling things by their proper names. If we need to help the cities, we ought to say so. If we want to train young people for employment, we ought to say that and make it our only objective.

I think nothing would do more to restore the confidence of the people in the Congress than for us to be honest about what we are up to. People are not fooled. They are not fooled. They know what goes on in their towns. They write me, and I read their letters. They know what is going on. They know perfectly well that this is not an employment training act. They know perfectly well what it is. And this contributes to the erosion of confidence in Government. We must reverse that trend.

Mr. HAWKINS. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. LUNDINE).

Mr. LUNDINE. Mr. Chairman, I rise in support of H.R. 12452, the CETA reauthorization bill, and would like to commend the distinguished chairman of the subcommittee (Mr. HAWKINS) and other members of the committee for putting together a thorough and thoughtful set of revisions to this program. I hope the House will see the value of these proposals, and approve the reauthorization without crippling amendments.

Major changes in CETA recommended by the committee are aimed at preventing abuse and eliminating tendencies to use CETA funds for jobs State and local governments would have provided anyway. In addition, the committee, responding to current economic needs, more clearly separates the "structural" from the "countercyclical" functions of CETA, to assure better targeting of program resources to the poor and the disadvantaged. I am hopeful that the revisions will not provide cumbersome and that prime sponsors will retain sufficient flexibility to adapt the programs to local conditions. I can certainly understand, however, why the steps taken by the committee are necessary.

While supportive of these improvements in CETA, I see a continuing need to evaluate the programs, to learn from their successes and mistakes. It is clearly crucial that CETA programs equip participants with the kind of training and experience that enables them to move to permanent jobs.

For this reason, I am particularly encouraged by title VII of the bill, dealing with private sector initiatives. Its purpose, in encouraging the formation of local private industry councils, is to carve out a much larger role for private employers in the provision of CETA services.

Title VII would make available $400 million to CETA prime sponsors who establish these councils and develop suitable plans for private sector involvement. We could usefully supplement these activities, I believe, with some measure of Federal support to the local councils themselves. At the very least, these councils must have a degree of integrity which allows them to accomplish their purpose without interference from the prime sponsor.

In the Senate, my distinguished colleague from New York (Mr. JAVITS) has added a very constructive amendment to title VII, which authorizes Federal assistance for a variety of voluntary labor-management activities. As there might be some question about its relevency under House rules, I do not intend to offer the amendment here. But I would like to note that the House—recognizing the contributions of cooperative labor-management efforts in stimulating employment and revitalizing local economic conditions—endorsed the basic concept in an amendment to the Humphrey-Hawkins bill last March.

I realize that there has been some disillusionment with the idea of labor-management collaboration at the national level, and that we have recently witnessed serious clashes between the two sides over national policy. But at the local level, in individual industries and communities, I have seen how well labor and management can work together to improve employment opportunities and explore solutions to mutual economic concerns.

From Haverhill, Mass., to San Bernardino, Calif., promising labor-management efforts are just getting underway. For modest expenditures of Federal funds, financial and technical assistance could be offered to such projects in the early stages. By encouraging cooperative efforts to improve working conditions and organizational effectiveness, we would be enabling private industry to expand job opportunities in a noninflationary way.

Labor-management committees have, above all, proved a valuable source of new ideas, of suggestions straight from the workplace about how to utilize workers effectively and do a better job. Such innovation and experimentation are major objectives of title VII, and I would hope that ultimately additional support for cooperative labor-management activities can be a part of this important legislation.

Mr. SARASIN. Mr. Chairman, I yield 2 minutes to the gentleman from Alabama (Mr. BUCHANAN).

Mr. BUCHANAN. Mr. Chairman, during consideration of H.R. 12452, the Comprehensive Employment and Training Act Amendments of 1978, there will be much debate on whether the CETA program has been successful. The press recently has reported incidents of fraud and abuse in many CETA programs throughout the country.

Notwithstanding the failures of the program, there are State and local CETA programs that are working well. The Birmingham area programs are fine examples of the how CETA can and does operate successfully. I would like to highlight those programs in the Birmingham area.

In the Birmingham area, CETA is a consortium located within the county. The total budget for the current year is $26,150,000. Under title I, it is a $6 million budget for the current year. To date, with a thousand training slots, we have reached 2,700 citizens, 2,200 of whom were disadvantaged of which 500 were AFDC mothers. During the year 1977, 3,700 persons were trained of which 3,100 came from disadvantaged families, and 700 were AFDC mothers. The figures for 1978 are lower because they are figures to date and do not represent the full year; and too, the amount of money allocated to title I was reduced and thus, there are fewer training slots available.

Under title II, which is a $3 mililon program of PSE jobs, we have approximately 386 slots with which we have reached 600 persons of whom 150 were disadvantaged families. Last year we reached 860 persons, 315 of which came from disadvantaged families, and 25 of which were AFDC mothers.

This year under title III our budget is $2 million and is reaching 2,500 Birmingham area youth—all 2,500 of which come from disadvantaged families, in cluding 900 children from AFDC families. In addition, this year we have a program which is designed to work with industry in providing special training for specific industry spots. Our budget for that program is $550,000 at approximately 60 slots. We also have $350,000 in our hire program for Vietnam veterans of whom we have reached 25 as of this date. We have a youth employment training program operating with a budget of about $1 million, part of which is classroom and part of which is on-the-job training. It is now reaching approximately 250 young people.

Under title VI public employment jobs and public employment projects, thus far this year, we have reached 1,800 persons of whom 1,100 were from disadvantaged families and 375 were AFDC mothers. Last year the program was somewhat smaller. We reached 1,650 people, 1,400 from disadvantaged families, 180 of whom were AFDC mothers.

We also have two new programs, the youth community conservation initiative program which is contracted to the Urban League and is working on problems such as insulation of houses. There are 45 young people in this program. We also have a planning grant under the private sector in the initiative program where Birmingham is 1 of 34 cities.

Many of the problems with CETA have been corrected by the committee bill. With enlightened and conscientious local action, as is evidenced by the Birmingham area prime sponsors, I believe that CETA can be an effective tool for reducing unemployment and providing training for the unskilled.

Mr. HAWKINS. Mr. Chairman, I yield 2 minutes to the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. Mr. Chairman, as has been made clear by others who have already made their views known on these amendments to the CETA program, the committee has made a considerable number of reforms which, I hope, will lead to a more effective program and one which will not be subjected to the abuses which have been so widely reported. As debate progresses, both on the bill itself and on the numerous amendments which have been proposed, I am sure that those issues will be fully aired.

Time after time the point has been made that we need to do everything we possibly can to make this program one that leads to long-term, unsubsidized work. One way we can go with considerable promise of success is to facilitate the process of bringing workers and jobs together. Two sections of the bill reported by the Committee on Education and Labor address this issue, and I will be offering amendments to reemphasize and clarify these provisions. I am pleased that Chairman HAWKINS and his staff have taken the time to review my amendments and have found no objection to them.

By way of background, I think you will be interested to know that the Department of Labor has been conducting a pilot project in its southeastern region which has successfully helped relocate over 850 jobless people from that part of the country to jobs in 33 States across the country that had remained vacant for considerable lengths of time. The jobs those people went to were unsubsidized positions. The average cost to the Federal Government in assisting with relocation was approximately $1,210. That figure is about what it costs to fund one public service job through CETA for just 2 months. As a trade off, the investment to move those people off the public rolls certainly means lowered Federal costs.

Section 305 of the bill before us provides the Secretary of Labor authority to assist unemployed individuals relocate to areas where they have bona fide offers of employment of more than temporary or seasonal nature. Section 312 (f) of the bill directs the Secretary to establish and administer a nationwide computerized job bank and matching program. As I see it, those programs should be tied together. The information from the job bank should be made available to those administering the relocation program so they can maximize their efforts to bring the unemployed they are trying to serve to jobs for which they might qualify. In short, coordination of the two programs should enhance the value and implementation of both. That kind of coordination is provided for in my amendment to title III.

Beyond that, the amendment I will be offering to that title will clarify that relocation efforts should focus on moving unemployed people to places where there are relatively consistent job surpluses. Some might say that this states the obvious, but I think it makes sense for the Congress in authorizing this program—which I think you can tell from my earlier remarks I feel is a particularly good one—to make it clear that the Federal Government should not be in the business of moving people into areas where they would be competing with qualified people already there.

Finally, my title III amendment provides for consultation—in advance—with appropriate local, State and Federal agencies to determine what impact a relocation involving a considerable number of people could be expected to have on the ability of a locality to provide necessary services and what steps might be taken to ameliorate any adverse impacts. That consultation should minimize the chances of the Government helping to relocate people to areas where housing, medical and other services might be in tight supply, thereby creating other problems for those areas.

I will also address this issue of relocation in an amendment I have prepared to offer to title VII of the bill. That title in establishing private industry councils will go a long way toward assuring meaningful cooperation with the private sector where, after all, most of the unsubsidized jobs exist. My amendment at that point merely adds encouragement of relocation by unemployed individuals to areas where there are generally job surpluses to the list of purposes to be addressed by prime sponsors and their private industry councils.

As I said earlier, I do appreciate the fact that floor manger HAWKINS has agreed to accept these amendments and the others I plan to offer today. I am convinced that they add clarity and emphasis to these two programs.

● Mr. SEIBERLING. Mr. Chairman, today we are considering legislation which makes significant headway in lessening the problem of unemployment for Americans who are either unskilled and economically disadvantaged or who have job skills but are temporarily out of work due to cyclical downturns in the national economy. Putting Americans back to work remains a priority of this Congress and I believe that the CETA amendments of 1978 demonstrates just how strong our commitment to that goal is.

However, the CETA program has become somewhat controversial, primarily due to isolated but highly publicized incidents of waste and misuse of funds. True, problems of abuse and mismanagement have occurred in some areas, but the committee has duly examined such problems and has drawn up a bill containing tight protection and strict sanctions against further program abuse.

So, while these charges may have placed an undeserved blot on CETA's reputation, the program can surely stand on its own successful record as one of the critical factors in not only reducing nationwide unemployment in the past year, but also in providing important community services and manpower training.

Numerous testimonies to the merit and necessity of the CETA program have come to me from my constituents who have seen CETA at work and know firsthand of the progress the Akron area has made because of it.

In Akron, as part of the Metropolitan Housing Authority and senior workers action program, public service employees go into the homes of low income or handicapped elderly and do heavy housework. Because of this program, the elderly can remain in their own homes or apartments rather than being institutionalized.

Easter Seals runs another program using CETA workers in the Akron area to help the handicapped. Staff goes into public buildings and reviews the facilities to determine if they are accessible; to see if drinking fountains should be lowered, curbs cut down and the like.

The city government is using public service employees to renovate sidewalks by putting in reclaimed brick in place of unsightly dirt and weeds.

The CETA training programs in the Akron area have been extremely successful. For example, at Akron's Skills Center and at the National Tool & Die Center, CETA is making possible expanded training in machine trades. Small machine shops are very important to the Akron area and the existence of these training programs which provide skilled machinists help insure that an adequate supply of machine tool operators are available to this small business in the Akron area.

The youth work experience program in Akron has also been an important success. This program, which aids low-income youth who might otherwise be out on the streets, has a drop out rate which is only one-third that of the Akron schools.

In Springfield Township, for example, CETA title VI workers have cleared hazardous drainage areas that had not been touched since the depression era, 40 or 50 years ago. Social services are provided to senior citizens, and young people benefit from a summer recreation program, all with the help of CETA workers. In several smaller communities, CETA workers helped the town survive the winter of 1977–78 by helping road

crews keep pace with the extraordinary amounts of snow. In Portage County, the number of children receiving aid to dependent children (ADC) has been substantially reduced because the county CETA program has been so successful in removing the parents of these children from the welfare rolls and placing them in productive jobs. In 2 years, the number of ADC children dropped from 658 to 494—almost 25 percent.

The Summit County Department of Diversion Services, which is active in reducing jail overcrowding and incarceration costs is staffed by CETA employees. The department, with an annual budget of $90,000, estimates that it has brought about savings of between $800,000 and $1.2 million in incarceration expenses that the county would otherwise have had to pay for. The mayors of the villages of Reminderville, Twinsburg, and Lakemore have all praised CETA for enabling them to provide much-needed services such as street repairs, tree clearing, emergency snow removal, and emergency fire and police dispatch services. In many cases, the CETA employees who have provided these services have acquired enough skills to enable them to obtain full-time nonsubsidized employment.

The point is clear. CETA has worked and I am confident that with the reforms contained in this legislation it is going to work even better.

While my support for the bill is wholehearted, I am concerned about one particular problem which I do not think has been thoroughly dealt with in the committee bill. That problem concerns retirement benefits.

Current law requires that CETA employees receive the same benefits as non-CETA employees. Originally, employer contributions to retirement plans on behalf of CETA participants were generally considered to be one of those benefits covered by that law. Such contributions were therefore paid out of CETA funds. However, Department of Labor regulations promulgated in 1977 announced that since the program involves temporary training and employment, membership in a retirement system was not generally encouraged and therefore, CETA funds could no longer be used to pay retirement benefits except for those participants who would ultimately vest. However, many States had already established retirement as a condition of employment because their State laws did not permit the exclusion of employees from membership in a retirement plan. In these States, the DOL regulation meant that, unless State law could be amended, the State and local governments and private, nonprofit agencies would be forced to pay retirement contributions for CETA enrollees. Fortunately, the effect of that regulation was delayed until this October, and would be extended by the bill until next January, in order to enable the affected States to change their laws. But the problem cannot be solved that easily.

In Ohio, for instance, the State law has not been amended, although there has been significant State activity attempting to reconcile the State retirement system with the Federal law. But at this point, it appears unlikely that the State law can be changed before the deadline passes. This means that the State and its political subdivisions would have to use their own funds to make employer contributions to the appropriate retirement system. Last May, the employment and training consortium in my district sent out an inquiry to PSE employers asking whether they would be able to absorb the cost of the employer contribution. The response was troubling—as many as 1,477 CETA employees would have to be laid off because the employers do not have the funds to make the necessary contribution of 14 percent of the PSE payroll costs.

This situation with regard to retirement benefits threatens the full-fledged continuation of the CETA programs in my district, in other parts of Ohio, and in approximately 30 other States. I understand why the Department of Labor and the committee have taken the position they have against the use of CETA funds for retirement coverage. Due to the temporary nature of the public jobs program, and the 18-month limit provided in this bill, the chances of a CETA employee ever becoming vested in a retirement program is quite remote. CETA funds should be used to provide jobs and not subsidize State and local retirement systems. But neither should the States and local governments be saddled with these payments which many of them simply cannot afford and which would not accrue to the employees in any event.

Congressman KREBS has proposed an amendment which provides a fair solution to the problem. The Krebs amendment would allow PSE participants to be distinguished from other employees for retirement purposes only. This, in no way, is an attempt to allow an open ended reclassification of CETA employees, for CETA participants would still be entitled to the same benefits as regular employees similarly employed. But in circumstances where the PSE employee has no opportunity to accrue vested retirement benefits, contributions to a retirement system would not be required and the State and local governments will not then be forced to pay for such coverage.

I urge passage of the Krebs amendment.●

● Mr. EDGAR. Mr. Chairman, the CETA program has been praised for its achievements and blasted for its limitations. It has succeeded in putting over 700,000 persons to work and has achieved some noteworthy successes in supporting local governments and worthwhile public projects. But in the rush to achieve numerical targets and the pressing needs of local public bodies, the program has been short on ingenuity and linkages to private industry, and long on improvisation and local manipulation. With the decline of national unemployment rates and the maturation of the program, it is time that we looked to a higher standard of aspiration and achievement for the CETA program.

An example of the sort of innovative program that I hope will increasingly typify CETA programing in the future is the proposal being prepared by the Federal Manpower Office in Delaware County, Pa., to establish a National Railroad Training Center in the county. Congress has, through the northeast corridor improvement program, established a statutory commitment to the massive improvement of the railroads of the Northeast. This $2 billion commitment is threatened by a shortage of trained manpower. The national railroad labor force has declined from 1,351,961 in 1947 to 482,882 in 1976. This smaller labor force is also an increasingly older labor force. In 1974, 32 percent of the railroad employees were 55 years of age or older. With full railroad retirement now possible at age 60, one out of every three current railroad workers can retire by 1979, if they so choose. So if we are to achieve the goals of the northeast corridor improvement program, we will need to develop a trained work force.

Simultaneous with this need for manpower, we have the Delaware Valley area, which has suffered the loss of thousands of manufacturing jobs in the past few years and confronts an unemployment rate significantly higher than the national average. Many of these unemployed workers have the basic mechanical and industrial skills which would make them excellent material for railroad jobs.

Noting these facts, the Federal Manpower Office in Delaware County has pulled together a program using a presently unused industrial plant with extensive railroad siding, the skills of retired and semiretired railroad people, and the cooperation of Amtrak and the Federal Railroad Administration to establish a national training center. This proposal has been put together with the participation and support of the Delaware County Economic Development Committee, which brings together labor and management, and public and private sectors. This proposed center anticipates training and placing more than 2,000 persons each year in jobs ranging from trackman to structural welder. In its capacity to match opportunity to need, and its ability to combine the resources of various Government agencies to execute a program, this proposal appears to me to be precisely the sort of innovative approach to the problems of unemployment that CETA should be encouraged to focus on in its future programing.●

● Mr. RODINO. Mr. Chairman, I strongly support H.R. 12452, the CETA amendments bill of 1978, as reported to the House.

Our Nation suffers from a chronic unemployment problem, and the job training and employment opportunities provided under CETA programs have proven their value in the years since the legislation was enacted in 1973. In fiscal year 1977, prime sponsors provided job training to 1,415,000 persons under title I. These included classroom training, on-the-job experience, and some public service employment. Public service employment under titles II and VI reached 753,000 by the first week of March this year.

The economy of New Jersey is still experiencing one of the Nation's highest unemployment rates, and unfortunately my own congressional district, comprising parts of Essex and Hudson Counties, has an unemployment rate considerably higher than the national average. During calendar year 1977 the unemployment rate for Hudson County was 13.1 percent, while in Essex County it averaged 11.1 percent. The latest available data for May of this year reveal that more than 64,000 persons in these two counties are suffering from the effects of unemployment.

The situation would be even more severe without the assistance of CETA programs. In the last fiscal year, prime sponsors in Essex and Hudson Counties provided employability development services to almost 19,000 individuals as part of their title I activities. An additional 7,600 individuals participated in public service employment programs under title II and title VI activities of these prime sponsors.

This year, the city of Newark alone estimates that it will enroll 7,000 participants in title I programs. Currently 2,000 persons are participating. Under titles II and VI, Newark will employ about 2,400 individuals, and 7,600 under title III.

It is clear to me that CETA has worked well in the State of New Jersey, and it is vital to the economy of my congressional district, particularly in the help it provides to minorities and the disadvantaged.

We all recognize that there have been defects resulting in fraud and abuse in operations of CETA programs. However, this should not deter us from trying to correct the deficiencies and moving ahead to continue these programs. I am pleased that the bill before us contains a number of provisions designed to eliminate fraud and abuse and to assure that CETA programs will be properly and efficiently run.

Mr. Chairman, it is only wise and compassionate to assist the economically disadvantaged, the unemployed and the underemployed, and I believe the CETA programs authorized under H.R. 12452 are crucial in our effort to try to assure employment for all our citizens who seek the security and dignity of work.●

● Mr. BEDELL. Mr. Chairman, I rise in support of H.R. 12452, the CETA Reauthorization Act, and ask permission to revise and extend my remarks.

Mr. Chairman, the Comprehensive Employment and Training Act (Public Law 93–203) is an extremely important statute. Enacted in 1973, its purpose is to take untrained, disadvantaged individuals and provide them with vocational education, on-the-job training and entry level employment in the public service sector in order to give them the experience necessary to obtain reasonable private sector jobs. In addition to combating unemployment, the CETA program also holds great potential for community development since its intent is to put people to work on useful public projects.

I believe that, on balance, the CETA program has proven its worth during its 5-year history. At the same time, however, there can be little question that it is appropriate at this juncture to correct the problems which have arisen during the early years of the program and to amend the CETA statute to meet changing economic conditions.

In 1973, when CETA was enacted, the unemployment rate was 4.5 percent. Soon after the program was implemented, the economy experienced a recession, and, as the national unemployment rate rose, CETA was expanded and modified. In particular, the program placed increased emphasis on public service employment. Also, new programs and increased enrollment have led to a degree of administrative and jurisdictional confusion which, in turn, has led to inefficiency, mismanagement and eventually to charges of fraud and abuse in certain instances.

Many Members of Congress, including myself, are concerned about such developments and about the need to revise and reform the CETA program. I believe that the bill we are considering today, H.R. 12452, focuses in squarely on the major problems that have arisen within the old program and constitutes a welcome and necessary improvement over existing law.

Since one of the primary objectives of the public service programs is to create new jobs, there has been much concern generated over the problem of "substitution." This is where Federal funds are not used to create new jobs, but rather to subsidize ones that would have otherwise been supported by State and local governments. Many of the charges of abuse have centered around local authorities using CETA funds to pay their full-time employees, thus cutting their costs. Often, though, substitution is unintentional, caused by oversight or poor administration. It is clear, however, that substitution is stunting the growth of new forms of employment, and it is hurting Americans in need of work.

Few things can hurt a program as badly as dishonesty or simply incompetent management. Though some charges are not widespread, they are audible and should be given attention. Problems such as substitution, in many cases, could easily be avoided given proper and more extensive supervision. The bill contains a number of provisions that strengthen the Labor Department's ability to combat fraud and abuse. It establishes an Independent Office of Audits, Investigation, and Compliance within the Labor Department to conduct audits and investigations relating to CETA programs and recommend policies to promote economy and efficiency. It also establishes an Office of Management Assistance to enable the Department to offer complete management and technical advice to prime sponsors where needed, and it imposes new criminal and civil penalties for prime sponsors and subcontractors who misuse program funds. Though no program is flawless, I feel confident that the new bill will successfully silence misconduct on the part of prime sponsors, contractors or any CETA administrator.

H.R. 12452 also seeks to resolve the confusion that has grown between structural and countercyclical employment programs. There has been a tendency for countercyclical efforts, which are programs for the temporarily unemployed, to overshadow structural programs—that is, those designed exclusively for the economically disadvantaged. To deal with this, the CETA Reauthorization Act organizes structural and countercyclical plans under separate titles. This separation distinguishes the purpose of these two concepts, and relieves the confusing overlap between them.

In an effort to reduce needless and wasteful paperwork, the bill decreases the number of applications and reports that must be completed. I believe that this is an important feature of the bill, coming at a time when Government costs are swelling so high.

Mr. Chairman, I support the CETA concept. It offers a sensible means of putting people back into the private competitive job market, and it is valuable to the cities and local communities. We have learned through experience the faults and weaknesses of the old program, and we have addressed them in the new legislation. CETA has been successful and popular in America, and I urge that we continue our support for the disadvantaged and unemployed.●

● Mr. HOLLENBECK. Mr. Chairman, I rise in support of H.R. 12452, the bill to improve and extend the Comprehensive Employment and Training Act. I feel congratulations are in order for the distinguished chairman of the committee, the esteemed chairman of the Subcommittee on Employment Opportunities, and the members of the full committee. They have done yeoman's work in producing a bill that should effectively solve the problems that have plagued CETA, while at the same time maintaining the integrity of the principal Federal employment and training initiative.

We all have heard the stories of fraud and abuse in CETA. Many have come to accept it as a matter of course that these funds will be used improperly. But for every tale of mismanagement, there are thousands of untold stories of Americans who have gotten a fresh start because of the employment and training they received in the CETA program.

The bill gives us a chance to aid those most in need in our society. The victims of inadequate education and training, those affected by spiraling unemployment, the young, the old, and veterans. Due to the diligent efforts of the gentleman from Vermont (Mr. JEFFORDS), the handicapped will greatly benefit from this bill. In addition, a new title has been added, which will return the expertise and experience of the private sector to the decisionmaking process. While public service employment has been the most abused area in CETA, it has provided thousands of Americans with work experience and job history, while at the same time providing valuable services to many communities.

In my district, CETA has been important both as a training program, and as a weapon in the battle against high unemployment. I am proud to state that the Bergen County CETA program has been hailed by the Assistant Commis-

sioner of Human Resources as being the finest CETA program in the Garden State, with the Hudson County program not far behind. In the last fiscal year, these two programs have provided employment and training services to almost 8,800 people, while another 5,500 individuals participated in public service employment programs.

Mr. Chairman, the "proposition 13 mentality" has affected this House since June. Many are zeroing in on CETA, ready to start "hacking" away. While I have long been in favor of easing the burden on the taxpayers, reductions merely for their own sake are not examples of responsible legislating. CETA has accomplished a great deal since its creation, but one look at our continuing high unemployment rate shows that there is still much to be accomplished. The bill before us now is basically a reform bill. Let us give these reforms a chance before we adopt amendments that could radically change the nature of CETA programs. I urge my colleagues to support the committee bill, so that our assault on unemployment will not be interrupted.●

● Mr. EDGAR. Mr. Chairman, based on my familiarity with the CETA prime sponsor in my congressional district, the seventh of Pennsylvania which includes most of Delaware County, I have been concerned with possible CETA abuses for quite some time. In the summer of 1975, the U.S. Department of Labor investigated the Delaware County CETA program and found that recruitment and selection procedures for CETA-funded jobs were seriously flawed and thus could not assure fair treatment of applicants. The Department ordered the county's program to develop a uniform recruitment policy and methods for making objective choices from among applicants.

In July 1977, a Delaware County council member and I filed a formal complaint with the U.S. Department of Labor alleging political discrimination in the hiring process of the Delaware County CETA program. The Department of Labor undertook a 5-month investigation of the program and submitted a report on February 10, 1978. The report stated that—

> Individual CETA applicants are not being serviced based upon date of application, length of unemployment, CETA priority group, veterans status, etc.

The report also said the hiring system "is subject to charges of abuse, favoritism, and political discrimination." However, despite confirming that over 80 percent of the CETA enrollees were from one political party, the Labor Department was unable to find any individual case of outright discrimination based on political affiliation.

The council member and I were not satisfied with this report when it came out, partly due to the manner in which the investigation was conducted. The investigators interviewed only people who administered the CETA program and those who had successfully landed CETA jobs. The investigators talked to no one whose application had been turned down, and the report and its conclusion that no one had clearly been discriminated against was based only on information from people involved in the program and ignored information from those who were not selected to work in the program.

I mention this bit of history to highlight some of my major concerns about the CETA program. The charges of abuse of the program which have recently been getting close public attention around the country are not new; the same problems have existed since the inception of the program. Certainly in any large nationwide program, some projects will be well run, some will be sloppily run, and some will slip from sloppiness into outright abuse. I am terribly disappointed in the failure of the Department of Labor to act as a careful steward of the public's funds as it administers the CETA program.

The trite way to put it is "an ounce of prevention is worth a pound of cure." This CETA reauthorization bill before us is the pound of cure; among other provisions, an investigative staff of 200 people to look into and resolve the sorts of abuses which we have read about lately. Because of the condition the Labor Department has permitted CETA to get into, I support this new investigative staff. But would not it have made far greater sense to have prevented the need for this pound of cure by carefully administering the program in the first place: reviewing prime sponsors' proposals to assure that they comply with program standards; routinely monitoring prime sponsors' programs to assure that plans and procedures are being adhered to and expectations achieved; providing regular technical assistance to sponsors who need help on particular phases of their operations?

Those steps seem to be common sense, but if my personal experience with the Delaware County CETA program is any test, common sense and prudent management have not reigned. In 1978 the Labor Department found precisely the same sort of deficiencies in the Delaware County program that they had found 2½ years earlier. They had done nothing in the interim to work with the prime sponsor to assure that procedures were brought up to par, despite their statements after the earlier investigation that—

> Regular monitoring by the administration will continue. Our people will keep in close contact and if any further corrective action should become necessary, they will notify them right away.

If it is impractical to provide close attention to every local CETA program, there is no excuse for not providing close attention at least to those programs which you know need it. So I am dismayed by the Labor Department's record of management of the CETA program, and I could not hope more fervently that Secretary Marshall will tighten his regional offices' monitoring of prime sponsors' projects to prevent problems rather than merely react to them with his new enormous investigative staff.

Another issue crucial to the success and public support of the CETA program is whether the CETA participants are able to secure nonsubsidized employment after leaving the program. The CETA experience, whether in the form of training or a public service job, should give the individual significant skills to enter the regular private sector job market. I applaud the provisions in the bill before us today to test the effectiveness of a variety of approaches to increase the involvement of the business community in employment and training activities supported under this bill, and to increase private sector employment opportunities for economically disadvantaged persons. The bill authorizes $400 million to prime sponsors for the establishment of private industry councils, and I have been informed that top labor and business executives in the Philadelphia area have already started meeting to discuss the establishment of such a council. I fully support legislation which includes private business in efforts to include more people in the job market.

It seems we have forgotten about the "T" in CETA. Currently, $8 billion of CETA's $11.5 billion budget is spent to fund 725,000 public service jobs. The crucial question in this area is what is the best way of providing people with additional skills, experience, and references so that their chances of entering the private sector will be maximized. I believe the emphasis of the CETA program should be redirected from public service jobs toward training and development programs.

A question related to whether CETA enrollees are learning marketable job skills is whether the billions we have pumped into CETA are in fact creating new jobs. I would like to commend my coleague from the eighth district of Wisconsin, the Honorable ROBERT J. CORNELL, for offering an amendment which addresses the problem of substitution of Federal funds for local and State funds. Under his amendment, when it is discovered that CETA jobs are created that otherwise would have been financed by State and local governments, the Secretary of Labor would be required to take punitive actions. His amendment is based on the notion that when Congress authorizes and appropriates funds for the creation of jobs, the administering agency has the right and the duty to suspend those funds when it is learned that jobs are not being created. This amendment would encourage local governments to comply with the intent of the CETA program.

A final issue I am very concerned with is the targeting of CETA jobs to the most needy. Can this be done with the Federal Government providing the money and giving local governments complete discretion in hiring? It depends. It is necessary, and has been wisely decided by the Education and Labor Committee, to make the eligibility rules reflect the intent of Congress that the CETA jobs should go to the neediest. But the local governments have great discretion in hiring, and the fact remains that some local governments are not committed to the needs of the disadvantaged and long-term unemployed.

The central question for me in deciding how to vote on the CETA reauthori-

zation bill is whether directives from Washington in the form of tighter eligibility requirements and better oversight and management by the Labor Department's regional offices can change the orientation of a local government toward the needs of the disadvantaged and long-term unemployed. If we cannot meet that test, we will have to find a better way of combating cyclical and structural unemployment.

The importance of getting people jobs pushes me to vote for this program despite the reservations I have voiced, until a better solution is found to the unacceptably high rate of unemployment.●

● Mr. SYMMS. Mr. Chairman, the CETA reauthorization bill will be taken up very soon, and I thought this column by James J. Kilpatrick was quite enlightening in its descriptive account of how some of the CETA funds have been used.

Mr. Kilpatrick states that the original intent of the CETA program was "to train the hardcore unemployed for productive jobs in the private sector." Unfortunately, the hardcore unemployed have not been helped by this program, and instead more jobs have been created in the public sector on temporary bases. Some of the funds have been allocated for some real boondoggles, such as a "nude sculpting workshop" in Miami.

The Kilpatrick column reads as follows:

THE CETA BOONDOGGLE SHOULD BE STOPPED

(By James J. Kilpatrick)

Sometime this week, if everything goes on schedule, the House will take up the CETA Reauthorization Bill. The bill ought to be shouted down and stomped on. Instead, the bill is likely to be wafted toward the Senate on waves of hot air and good intentions. Barring a fullscale revolt, another $10 billion to $12 billion of your money is about to gurgle down the drain.

CETA is the Comprehensive Employment and Training Act of 1973. It is now set to expire Sept. 30. The pending bill would rewrite portions of the original act in an effort to prevent multiple abuses, and would extend the program for four more years.

The authors of this grotesque imposition on the taxpayers could not prevent abuses if they kept at the rewriting job till Christmas. Nothing in my experience—not food stamps, nor foreign aid, nor the old Job Corps, nor the follies of the arts and humanities people—nothing has approached the sheer mind-boggling, boondoggling waste and corruption of the CETA billions.

That is not even the worst that can be said of the program. The original idea was to train the hardcore unemployed for productive jobs in the private sector. The original idea was to rely upon public service jobs in local government only as temporary expedients.

Those original ideas have been reduced to imbecility. The act has done virtually nothing toward solving the problems of the hardcore unemployed—their plight is as pathetic as ever—but the act has provided some glorious new revenue-sharing for the municipalities.

What CETA has accomplished—about all it has accomplished—is to transfer a few hundred thousand jobs from the private sector of our economy to the public sector. This is marvelous, is it not?

In Massachusetts, newsman Warren T. Brookes has reported, between July 1974 and January 1978 government employment rose by 23,500 jobs (mostly CETA), while the state's private sector actually lost 26,700 jobs. The effect of the program is to damage the very private employers who in the past have supplied the most employment to marginal workers.

Brookes has some figures on CETA employment in public service. In May 1977, for example, Boston had 1,221 CETA jobs under the city government. By March 1978, the number had grown to 3,207. In New Bedford-Fall River, city jobs under CETA swelled from 402 to 2,106 in the same period. The jobs pay an average salary of $10,000, far above what an untrained 18-year-old could get in private employment, but the jobs have no performance and few of them provide serious training.

Doubtless, the CETA outlays have helped some jobless men and women. It would be incredible, considering the billions that have been spent, if some persons had not been constructively assisted. But the program is riddled with abuse.

Here in Washington, a spendthrift District government used $480,000 in CETA funds (translation: your tax funds) to set up a massive bureaucracy staffed in large part by relatives and cronies of City Council members. The 56 CETA recipients on the council's payroll averaged $18,000 a year for jobs that paid only $8,571 in other government agencies.

Writing in Reader's Digest, Ralph Kinney Bennett chronicles other outlays of your money. There was the payment in Atlanta of $475 a month to a former leader of the Black Panthers just "to keep an eye on city, county and state governments and their jiving off the masses." There was the $640,000 turned over to the Gay Community Service of Los Angeles, "to provide education about gay people's problems." Another $34,000 went to the Gay Alliance of Rochester, N.Y., to provide speakers at local campuses so that students could learn about homosexual lifestyles. And then there was the grant in Miami for a "nude sculpting workshop" in which naked men and women "ran hands over one another's bodies . . . to help them discover that they had 'both male and female qualities.' "

There is no way—no way on earth—that this miserable boondoggle can be retrieved for socially useful purposes. The House amendments make some feeble gestures toward reform, but a close reading of the changes suggests that local sponsors will evade the tighter requirements with ease. The CETA program, launched with good intentions five years ago, has come to a woefully bad end. If the House has any regard for the people's taxes, the House will let CETA die right there.

● Mr. BIAGGI. Mr. Chairman, as a member of the Education and Labor Committee I rise in general support of H.R. 12452 providing for the reauthorization of the Comprehensive Employment and Training Act. I would be less than candid if I were not to mention that this program has grown far beyond our wildest expectations—for reasons within and outside of our control. We come upon this legislation at a critical time. Unless we streamline, and strengthen its accountability features, we will have simply established another permanent fat-ridden Federal program.

I feel title I of the bill does provide the foundation for a more carefully administered CETA program. For the first time there are time limits placed on jobs—no longer is CETA going to be the source of permanent employment for persons. We have established better measures to prevent fraud and abuse—a problem which is rampant in many CETA projects. Travesties ranging from no work jobs to nepotism to outright fraud and misuse of funds are too often reported.

I was proud to have sponsored amendments to sections 109 and 110 of this legislation. My amendment corrects a longstanding inequity inherent to this program—namely the failure of the elderly of this Nation to fully participate in the employment and training programs in the act. My amendment adds participation by organizations of the elderly in both the prime sponsor's planning councils and the State employment and training councils. This means the elderly will be represented when the decisions on how to spend CETA funds on the State and local level are made. I should point out to my colleagues that the CETA program was named as one Federal program which discriminates against the elderly. This must be stopped.

I support other features of this legislation. I believe the emphasis placed on expanding employment opportunities for the youth of this Nation under title IV is absolutely essential if we are to rid our Nation of one of its most chronic unemployment problems—namely that affecting youth.

Title IV, the countercyclical employment program section is absolutely essential to assist those areas in the Nation which are enduring unemployment rates above that of the national average. New York State's unemployment rate is some 1.5 percent higher than the national average and New York City's continues in excess as well. This program triggers public service jobs into these depressed areas to help lower the unemployment rate. What is important to note in this legislation is the intent of the committee to insure that once the unemployment rate drops so too will be the CETA commitment. This will prevent the kind of situation which has happened in a number of localities whose unemployment rates have been in a sense artificially lowered exclusively by CETA and to keep it low CETA workers have been kept on almost permanently.

Finally, a brief word about title VII—it is long overdue. We must come to grips with the economic fact of life that the public service job is the least cost effective of all possible ways to provide employment. Title VII establishes a new program for closer partnership between the public and private sector so that at the termination of the CETA contract a more permanent job will follow. It is a vital new feature of this bill which merits support.

CETA was conceived with the best of intentions. In fact it responded when our unemployment rate reached dangerous levels. Yet now, it must be monitored more closely. Economic times are improving, jobs are more plentiful. Let us keep CETA was conceived with the best of also lessen our dependency before we go too far.●

● Mrs. BURKE of California. Mr. Chairman, I rise in support of H.R. 12452, the CETA Amendments of 1978, which contains provisions which will enable displaced homemakers to receive essential training, counseling, and support services during the transitional period from

homemaking to employment in the paid labor market.

The typical displaced homemaker is a woman in her middle years or older who has spent most of her adult life as a homemaker. She may never have worked outside the home. As a young woman, she followed the tradition of the times and put aside any thought of a career outside the home for herself. Instead, she raised a family or made a home for herself and her husband, in return for which she was taken care of financially. Today, after years of being dependent upon the income of the family breadwinner, she finds that because of a divorce or widowhood or the loss of the breadwinner's income because of unemployment or disability, she must find employment.

One of the first questions I am asked is how many displaced homemakers there are. The number is difficult to pinpoint. One of the major obstacles we faced in preparing H.R. 10270, the predecessor to the amendments in the current CETA bill, is the lack of data from the Federal Government or any other source. Displaced homemakers as a group are so overlooked that the statistical data is almost nonexistent. It is therefore difficult to document the precise numbers of women who fall into this category although there is ample data to substantiate the existence of this group and information which indicates that the size of the group is extensive.

According to the U.S. Bureau of the Census, in March 1976, there were 3,162,000 widows between the ages of 35 and 64. There were also 2,435,000 divorced women, one-fourth of whom were divorced after 15 years of marriage. There is also a sizable number of potential displaced homemakers: 15 million women are not in the labor force who now have minor children and who will be without income security benefits when their children reach age 18.

To a great extent, the problems of displaced homemakers reflect the dramatic changes in our society. Today, nearly 1 out of 3 marriages ends in divorce. With the continuing trend to no-fault divorce, many women are suddenly finding themselves possessed of an independent status for which they are completely unprepared. Alimony is becoming a relic of the past. The National Commission on the Observance of International Women's Year discovered that only 14 percent of divorced women receive alimony and within this group, only 46 percent receive alimony payments on a regular basis. The trend in many no-fault States is toward limited alimony—alimony which is granted for a specific period of time, for example, 3 years, at the conclusion of which the women are expected to be self-supporting.

Widowhood presents other difficult problems. Survivors benefits vary enormously. Often the very carefully developed plans for retirement are found painfully inadequate in the face of galloping inflation. Insurance money ordinarily covers only a few years' living expenses. Presently, there are four times as many widows as widowers. The life expectancy for women is 75 years compared to 67 years for men. The painful reality is that the older women become, the more likely it is that they will be on their own.

This tragic situation is compounded by a marked departure in the customs of previous generations when widows would be taken in by relatives or friends. Today, because of the mobility of families, differences in life styles, smaller homes and with incomes often stretched to the limits, this solution is impractical.

The displaced homemaker cannot turn to the usual sources for temporary financial assistance. Even though she is unemployed, she does not qualify for unemployment compensation benefits. If she is divorced, she may not qualify for social security benefits through her former husband's earnings. If she has no children under age 18 or if she is not physically disabled, she is ineligible for Federal welfare assistance. She may also have lost her rights as a beneficiary under her husband's pension and health plans. Private health insurance is out of her price range. For example, here in Washington, Blue Cross would charge a displaced homemaker between $41 and $56 per month for coverage. Many displaced homemakers must do without.

Having fallen through the cracks of every income security program devised, displaced homemakers are left to fend for themselves in the marketplace. I need not tell you that the middle-aged woman who has spent her adult life in the traditional role of homemaker finds it extremely difficult to make the transition from dependence on a family breadwinner to being self-supporting. Aside from the psychological adjustments, she may not be able to overcome the obstacles of the job market. Her lack of recent paid work experience combined with her age, sex, and race may make her chances of immediate employment dim in a youth-dominated culture. She may never have had to look for a job in her life and is confronted with such problems as conducting a job search, writing a résumé, competing with younger workers and mastering a changing technology.

The scope of the problem is obscured by unemployment statistics compiled by the Bureau of Labor Statistics. The data for June 1977 indicates an unemployment rate for women over age 55 of only 4.6 percent. That figure, however, includes only those who are actively seeking work. Many displaced homemakers are so traumatized by their first ventures into the job market that they retreat into lives of quiet desperation. Some turn to alcohol, others to prescription drugs to ease the burden that has been placed so unexpectedly on them.

Displaced homemakers have, for some time, been isolated individuals in need of assistance. However, many have recently found an organizational vehicle in the Alliance for Displaced Homemakers, whose coordinators, Tish Sommers and Laurie Shields, are themselves displaced homemakers.

Tish and Laurie have forged a network of displaced homemakers that stretches across this country and into every State in the Union. It is small wonder that displaced homemaker legislation has been introduced in 30 States and that 21 States have adopted legislation.

I am pleased that my distinguished colleague, AUGUSTUS HAWKINS, chairman of the Employment Opportunities Subcommittee, has included displaced homemakers as a special target group under title III of H.R. 12452. Under the committee bill, which closely parallels the legislation which I introduced, H.R. 10270, job training, counseling, and placement services will be offered. The programs and services are to be tailored to the specific needs and available services of the particular community and duplication of existing services is to be avoided.

I realize that our financial resources are limited and that they must be deployed as efficiently as possible. However, the assistance afforded to displaced homemakers is a constructive solution to the problems these women face. It is not a welfare program, but a self-help program. It is small recompense for women who have raised families and given freely of their time and talents to civic and volunteer projects in their communities. It is a positive alternative to welfare or to long-term care for women who have destroyed themselves through alcohol or prescription drugs because their problems have overwhelmed them.

The legislation we are considering today is not a panacea. What it will do is eradicate some of the immediate problems which displaced homemakers encounter: specifically, the need for reentry services and assistance in developing job skills so that they can take their place in the paid labor force.

I commend Mr. HAWKINS and the other members of the committee, particularly Mr. WEISS, Mr. BLOUIN, and Mr. CORNELL, who have taken a special interest in the needs of displaced homemakers.●

● Mr. BINGHAM. Mr. Chairman, I rise to express my support for H.R. 12452, the Comprehensive Employment and Training Act (CETA) Amendments of 1978, as reported by the House Education and Labor Committee. H.R. 12452 restructures and reforms existing CETA programs and, with the exception of the recently enacted youth programs under title IV and the newly proposed private sector initiative program under title VII, extends them for 4 years—fiscal year 1979 through fiscal year 1982.

The House Education and Labor Committee has done a remarkable job of reforming the CETA law to deal with the various abuses which have come to light since its enactment in 1973, while at the same time remaining true to the original CETA mandate:

> To provide job training and employment opportunities for economically disadvantaged, unemployed and underemployed persons . . . and to establish a flexible and decentralized system of federal, state and local programs.

The committee's bill also reflects a new understanding of the complexity of the unemployment problem and our economy as a whole gleaned from its extensive hearings in connection with welfare reform, the Humphrey-Hawkins full em-

ployment bill, and the CETA extension. In looking over the records of these hearings, one is once again reminded of the diversity of our people and our country. The reasons for unemployment differ greatly from individual to individual as do the solutions which reverse that condition.

To further complicate matters, economic forces and circumstances also very from place to place, and time to time. I urge my colleagues to remember this as they consider various amendments which will be offered to take away some of the flexibility which the committee has carefully crafted into this complex employment training and placement system. I also caution Members who may be tempted to vote for such amendments that placement of the unemployed in unsubsidized permanent jobs—the central goal of CETA—cannot be accomplished without considering the chain reaction nature of job markets. Workers in entry level and higher level jobs must be upgraded to make room for new employees at the entry level. Underemployment of the educated and advantaged can be a central cause of unemployment of the unskilled and economically disadvantaged. Flexibility in eligibility requirements in regard to existing skills, income and the amount of wages to be paid is essential to any permanent solution to unemployment. To unnecessarily target and restrict the CETA system is self-defeating in the long run and a "penny-wise, pound-foolish" approach. So I urge opposition to the Obey amendment or any similar effort to place further restrictions on the scope of the CETA system.

Many persons inside and outside Congress have criticized the present CETA program for trying to serve two, sometimes conflicting, purposes, of providing training and job experience for the unemployed, while helping local governments and nonprofit groups provide essential public services during a recession. This dual purpose of CETA first began in 1974 when public service employment was added to the CETA law which was originally designed to deal with structural unemployment of the economically disadvantaged. The change reflected congressional concern over the rise in national unemployment from 4.9 percent in 1973 to 8.5 percent in 1975, and the recognition that local governments hit hard by the recession could ill afford to maintain and expand public services to meet the rising demand for such services. CETA plus counter-cyclical aid enacted since 1974 saved many economically depressed cities and rural areas from cutbacks in essential public services and happily resulted in the creation of new and innovative public services such as home health care.

During the 1974 to 1975 recession about 200,000 public service jobs were created and since then these programs under title II and VI have been expanded to 725,000 jobs. Corresponding with this expansion and the ripple-effect on local private sector jobs, the unemployment rate has gone from the 8.5 percent high in 1975 to the low June 1978 rate of 5.7 percent. As economic recovery has occurred, Congress rightfully has sought to readjust the emphasis of the CETA system back to the structurally unemployed and economically disadvantaged while not forgetting the lingering need for a countercyclical public service employment program to help localities still in stress.

In 1976 new restrictions on the expanded emergency job program, title VI, were imposed and Congress required the Federal Government to study and attack the problem of "substitution"—the replacement of locally paid workers for CETA paid workers. Press reports to the contrary, these studies show that the substitution problem only involves about 20 percent of the public service jobs and that by and large these jobs are new and are being filled by the low-income, long-term unemployed. A study by the Brookings Institute further showed that when CETA sponsors do substitute with CETA dollars, they relieve pressure on local tax bases and help the local governments stem the outflow of residents as well as stimulate new development.

H.R. 12452 represents the second, but major, stage of this readjustment process drawing on the lessons learned from the past CETA experience. For the first time it establishes two distinct employment programs: a program for the structurally unemployed in title II and for the countercyclically unemployed in title VI. The training emphasis of the old CETA title I program is combined in the new title II and the public service job experiences provided under this title are limited to 50 percent of its allotment funding. The new title II is targeted to the low-income long-term unemployed who have a family income at or below 70 percent of the BLS lower living standard, and wages are restricted on an individual and average basis with local supplementation of salaries forbidden. This is quite a departure from the present title II program which allows unrestricted public service employment of the higher income and skilled short-term unemployed with unlimited local supplementation of salaries. Also the new title II includes a restricted authorization for local prime sponsors to conduct upgrading and retraining programs to allow for the opening up of entry level positions for the lesser skilled.

The new title VI countercyclical program under H.R. 12452 is keyed to national and local unemployment rates. It is aimed at enabling individuals to enroll temporarily in public service employment during periods of local high unemployment. To prevent substitution, public service jobs created under this title must be entry level positions, as in the PSE portion of the new title II, wage supplementation is restricted and 50 percent of the public service jobs must be in projects of limited duration. Eligibility for participation in title VI is limited to persons with family incomes below 100 percent of the BLS lower living standard who have been unemployed at least 8 weeks.

As I mentioned before, H.R. 12452 as reported by the committee wisely allows for differing local conditions in imposing these restrictions on public service employment. Under title II, the present maximum federally subsidized public service job wage of $10,000 is allowed to be adjusted for high wage areas up to 20 percent or $12,000 and the enforceable average wage per prime sponsor of $7,800 is allowed to be adjusted by the ratio of local wages to national wages, and then further adjusted annually by increases in the CPI over the 4-year life of the bill. Under title VI an individual's salary can be supplemented by the local prime sponsor up to 25 percent over the Federal base—$10,000 to $12,000—which means a maximum wage of $15,000 for the highest wage areas. To limit this practice, a prime sponsor may use no more than 10 percent of its title VI grant for this purpose. I know $15,000 seems too high a wage to many of my colleagues, but remember, since the $10,000 limit was set in 1973, there has been almost 50 percent inflation. Also, that new $15,000 maximum will remain in force through the end of fiscal year 1982. Even now entry level jobs in certain types of employment in the high cost-of-living areas such as New York are close to that $15,000 maximum. I urge my colleagues to resist the temptation to lower this figure and maintain the principle which Congress has wisely followed of providing equal pay for equal work.

Added to these restrictions for public service employment, the committee's bill further strengthens the antifraud and abuse provisions under the CETA law. It establishes an Independent Office of Audits, Investigation and Compliance within the Labor Department with clear authority to review, investigate, and prosecute fraud where ever it may occur. It requires the bonding of certain employees under the program, provides for new criminal and civil penalities for prime sponsors and subcontractors who misuse program funds and expands Labor Department authority to withhold funds for noncompliance with Federal regulations. Finally, it includes a specific complaint procedure for processing allegations by local groups and individuals of violations of the CETA law. These provisions developed by the committee, coupled with new short-term and long-term planning requirements, I believe are sufficient to prevent future abuse of the programs.

I have concentrated my remarks on the public service employment aspects of the new CETA legislation because that is where proposed amendments and criticism in Congress have seemed to focus. I believe the committee's bill adequately deals with these criticisms and provides an absolutely essential flexibility in the CETA system. I hope my colleagues will agree and will support the bill as reported by the House Education and Labor Committee.●

● Mr. RUDD. Mr. Chairman, the news media have made us all aware of the many problems—and in some instances shocking abuses and scandal—that are widespread in the CETA program throughout the Nation.

In my own State of Arizona, there has been unconscionable waste, misuse of public funds, and outright fraud by federally funded CETA officials.

CETA people have been discovered and exposed as smugglers in the trafficking of illegal aliens from Mexico into the United States via the Arizona border.

Mr. Chairman, I cannot support, and do not believe that the Congress should support, a continuation of this program for this reason alone. It is a boondoggle.

There are many other problems with the CETA program—including the tremendous unnecessary growth of State and local government it has brought into being through program requirements—that make it necessary to terminate this waste of taxpayer dollars.

Investigative reporters for the Arizona Republic, Arizona's largest statewide daily newspaper, have done an excellent job uncovering and publicizing the abuses and illegal activity associated with the CETA program in my State.

These problems, I know, are duplicated in probably every State of the Union.

I would like to include an editorial and two articles from the Arizona Republic at this point in the RECORD, and urge my colleagues to vote "no" on continuation of the CETA program:

[From the Arizona Republic, May 26, 1978]

CETA's WOES

Republic reporter Jerry Seper has discovered a confidential report that casts some serious reflections on the CETA programs conducted by Maricopa County.

CETA stands for the federal Comprehensive Education and Training Act, one of the carryovers from President Johnson's Great Society. Congress voted the money to provide training programs for the hard-core unemployed. It was hoped that the unemployed would be taught how to get and hold jobs.

The good intentions of CETA are unquestioned. But obviously, in at least some of the programs, the results have not measured up to the early hopes.

There are about 2,300 persons engaged in the programs, which receive $22 million in federal funds. Some 185 programs have been investigated, and such abuses have been found as:

A grant to help divorced people survive the trauma of separation was used to help publish a newspaper aimed at single persons.

A program designed to help alcoholics had an employee who was paid for 32 hours of work a week in Phoenix while she was attending the University of Arizona in Tucson.

A home beautification program was used to beautify the home of a well-paid public official.

There is no point in extending the list. And it would be a mistake to conclude that all CETA programs were failures. However, there is enough evidence to persuade the county supervisors to make a thorough investigation of CETA programs in Maricopa County.

One difficulty with the Great Society, of course, was that it often mixed welfare with civic development. Training people for nonexistent jobs is expensive and frustrating. A government that devotes itself to creating conditions under which the economy can flourish will be of more value to its citizens than a government that throws money into makework proposals.

CETA failures are not limited to the programs launched by the Maricopa County government. Similar irregularities have developed across the nation. They should be weeded out and if CETA is unworkable, it should be discarded.

[From the Arizona Republic, May 26, 1978]

PATRONAGE, FRAUD FOUND IN JOBS PLAN

(By Jerry Seper)

Confidential monitoring reports on Maricopa County's $22 million federal jobs program show that taxpayers may be getting gouged by a project laced with misuse, political patronage, inefficiency, duplication and outright fraud.

The reports, copies of which have been obtained by The Arizona Republic, are required by federal law. They are designed to monitor the progress of individual Comprehen-ive Education and Training Act programs administered by the county.

Although 185 CETA contract programs have been monitored in the past six months, reports outlining the various findings have been closely guarded by county manpower director Bill James. Some members of the Board of Supervisors also have been unable to obtain them.

County personnel staff members compiled the monitoring reports. They were then submitted to James.

Funded by federal tax monies and administered by James, the county's CETA program is aimed at putting unemployed persons to work in meaningful jobs that eventually will lead to permanent positions. There are about 2,300 persons involved in the program.

Some officials, however, suspect there may be abuses of the overall program.

Supervisors' Chairman George Campbell, has demanded an outside investigation of the program, as has Supervisor-designate Tom Freestone, whose inquiry last week into the county project brought to light the existence of the reports.

And, according to a review of the reports, their concern may be justified. There have been abuses and a considerable amount of money has been spent on projects that do not appear to be in line with state CETA goals.

For example:

Divorce Recovery: The purpose of this program is to help people get through the "trauma of divorce." It is directed by Harlan Jacobson, owner of the newspaper "Singles Scene" and operator of the Singles Dance program.

Jacobson was given four CETA positions to develop the program, but the monitoring report said none were being used in that capacity. Their main activities have been to work in Jacobson's newspaper and dance activities, the report said. No divorce counseling had been accomplished.

The four employees are being paid from $126 to $192 a week.

According to the report, Jacobson also used CETA funds ($165) to buy a camera, which was being used to make slides for his singles dances.

Chandler Receiving Center: This program is aimed at helping alcoholics and drug users through counseling and transportation to "live-in" treatment centers.

The report showed that personnel records were not maintained, but a person known only as Miss Milodragovich had been carried on the payroll and had been credited with 32 hours work—while also attending classes at the University of Arizona in Tucson. Other CETA employees told investigators they never saw the woman on the job.

An agreement between Miss Milodragovich and project director Karen Warder is outlined in the report, in which CETA checks to Miss Milodragovich were to be endorsed and turned back to Ms. Warder. The director later was fired.

The program was allocated 11 CETA positions, each earning between $120 and $192 a week.

Fountain Hills School District: This program is to conduct a beautification work project of the undeveloped park and playground areas around Fountain Hills School.

The report said one CETA worker, Richard P. Capozzi, was the brother of the school's principal, Philip A. Capozzi Jr. Also, it noted that another CETA worker, Barbara McCracken, was the sister of Fountain Hills School Board member Carole O'Day.

According to the report, some of the CETA workers observed during an on-site inspection of the program had nothing to do and told investigators they had not received any training or been assigned any duties.

The school district has 30 CETA workers, earning between $89 and $175 a week each.

Buckeye Home Beautification Project: This program is designed to repair and paint homes in the Buckeye area belonging to senior citizens and disabled Social Security recipients.

The report said a CETA crew was used to repair the roof of a house owned by Constable Joe Johnson, who does not meet eligibility criteria for the work.

The Buckeye project has 30 CETA slots, each earning $140 to $192 a week.

San Lucy: The purpose of the project is to construct a community building on the Papago Indian Reservation in Sells.

The report said that during an inspection of the CETA program, project supervisor J. J. Bandy was found drunk and CETA workers were found standing around with nothing to do. (Bandy later was fired by the Tribal Council.)

According to the report, a second trip to the project site showed "only half of the laborers were doing nothing." By this time, Bandy had been fired.

The program has 34 CETA positions. They earn between $120 and $160 a week each.

Arizona Ballet: The purpose of this program is to establish a professional ballet company based in Phoenix.

The report noted that four CETA workers assigned to the project admitted they lied on their applications to get the job because they believed it would be advantageous to use a Mesa address.

All four "professional dance trainees" earn $192 a week.

The calendar of scheduled appearances for the ballet group, outlined in the report, listed the Scottsdale Center for the Arts, Phoenix Art Museum, Saks Fifth Avenue, Circle K gas pumps and Bennie's Topless Go Go Pub.

City of El Mirage: The purpose of this city-sponsored project was to work on a federally funded home-insulation program and to remodel a donated building into a recreation center.

The report said the five allocated CETA workers for this project have not been allowed to work on insulating or remodeling because (1) the building is under contract through the Economic Development Administration and CETA workers are forbidden to enter it for work purposes, and (2) the insulation program is being accomplished through another federally funded program

They have been assigned to beautification programs in the city, which the report said is contrary to the intent of the CETA proposal submitted by El Mirage.

The five workers are each paid between $127 and $134 a week.

Central Arizona Regional Epilepsy Society: The purpose of this project is to conduct an "employer awareness program" designed to educate the business community about epilepsy.

The report said the lone CETA participant in the program never filled out an application blank, but still was given a job

The job pays $192 a week.

Valley Big Brothers: The project is aimed at organizing and conducting group recreational programs for boys awaiting Big Brother assignments. Two CETA workers have been assigned.

The report noted, however, that the CETA project has headquarters in Scottsdale, the caseworker is in an office in Glendale and the recreation aide works the program from an office in Phoenix.

The caseworker earns $192 a week, and the recreation aide is paid $144 a week.

In addition to project reviews, the county has undertaken a series of financial audits of the programs. The audits, however, are conducted for informational purposes only and no prosecutions are sought if irregularities are found.

Some of the irregularities noted in the financial reports included:

(1) unreconciled bank statements for three of Avondale's CETA programs, which cost taxpayers $426,000 annually; (2) unauthorized medical expenditures for the Buckeye Beautification program, which has an annual price tag of $253,459; (3) unauthorized expenditures for travel, telephone bills and supplies for the Tempe Community Council's three CETA programs, all of which cost $115,900.

Also, (4) unauthorized expenditures for refreshments and a Christmas party for the Community Leadership for Youth Development program, which costs $49,000 annually; (5) unauthorized expenditures for the Tempe Girl's Club, which has a $34,000 CETA program; (6) questionable expenditures for dinners and membership cards for the Boys Clubs of Tempe, which has a $22,000 CETA program, and (7) unauthorized expenditures for supplies and telephone services for the Human Action for Chandler program, which has an annual price tag of $19,000.

The monitoring reports are expected to be a matter of discussion for the supervisors during the coming week. However, there is no formal board session scheduled until June 5.

[From the Arizona Republic, May 26, 1978]

BORDER FLIGHT: PERIL, FEAR, UNCERTAINTY TRAVEL WITH ALIENS

(By Tom Kuhn)

SCHUCHULI.—Three hours after dark, the smugglers returned. They flashed the headlights twice and sounded the horn. That was our signal. We left our hiding places in the palo verde bushes and ran through the darkness to the waiting car.

After approaching cautiously, we got in. A tense mixture of excitement and apprehension made my insides tingle. I wondered what would happen if the smugglers discovered I wasn't a Mexican.

Disguised as a field hand, I had traveled with five Mexican laborers 350 miles through northern Mexico to the sparsely patrolled border fence, where they entered the United States illegally.

We had crossed near the Mexican town of Sonoyta, then had walked 40 miles through the desert, where temperatures soared during the day and plummeted to near freezing at night, until we had reached Schuchuli, a Papago Indian settlement 100 miles west of Tucson. The Mexicans said they knew of a smuggler there who would drive us to Phoenix.

Schuchuli lies in the notch of Gunsight Pass, an area stretching from the border to U.S. Highway 86, where bandits and smugglers prey on the daily migrations of Mexicans trying to get through to jobs in the north. I was warned we might be robbed. As a precaution, we had hidden our money in our boots.

My companions were Eugenio, Humberto, Guillermo, Antonio and Marco. Marco is only 16.

Guillermo and Antonio had been caught by the Border Patrol during the second day of our walk across the wilderness of Organ Pipe Cactus National Monument after becoming separated from us.

All five had worked in the United States before, been caught by "Las Migras"—the Border Patrol—and had "voluntarily departed" back to Mexico. Guillermo, the informal leader of the group, had been caught and returned five times previously.

We had walked across the desert with animal caution. Now, as Eugenio, Humberto, Marco and I stepped onto Highway 86, I felt strangely conspicuous. Suddenly, the smugglers appeared. They had spotted us. Two Indian women sat in the front and an Indian man in the back of the 1973 Chevrolet sedan.

"You looking for a ride?" the woman driver asked in English.

"Drive us to Phoenix?" Humberto asked, struggling with the English he had learned as a jackhammer operator in Nebraska. "We can pay. How much you want?"

"A hundred dollars," the woman said.

Humberto said that was too much.

In Spanish, Marco said, "Tell them we can pay $80."

"Ochenta dolares," I seconded, drawing my Anglo face closer to the recesses of my coat collar.

Being so visible on the busy highway as we dickered over price made the smugglers and Mexicans anxious. The Border Patrol, they knew, came by frequently.

The Mexicans agreed to pay the $100, even though it was $20 more than the usual fare.

"We'll be back in a little while," the driver said. She seemed to be in charge. "Don't go away," she ordered, driving off.

Had they gone for help to rob us? The thought made us fearful during the two hours we waited before the smugglers returned.

The Mexicans told me that immigrants like themselves are ideal victims of robbers. The robbers know the Mexicans are carrying money and that they cannot go to the police because they will be deported.

When the smugglers returned they parked 150 yards from the main highway on a side road with the parking lights on. At the signal, we dashed blindly over the desert cobble and across a dry wash toward the dim beacon lights.

How many were inside? I couldn't see.

"Ten cuidado (Be careful)" I whispered to Humberto as a window was rolled down.

"You got the money?" It was a woman's voice. Humberto nodded. "Get in," she commanded.

The voice belonged to Barbara Ramon, 21, of Kerwo, she acknowledged later. Miss Ramon said the other woman in the car that night was her 19-year-old sister, Jane.

The sisters are job-training counselors at the Papago tribal offices in Sells. Their salary is paid by a federal Comprehensive Education and Training Act grant.

The Chevrolet sedan was licensed to Mary D. Juan, 23, of Sells, who worked in the same program with the Ramon sisters, but who now works in a CETA-funded child-care program. Mrs. Juan said she loaned her car to Miss Ramon.

Miss Ramon said "It was the first time that I did it. I was just going by." She said she got the idea of driving Mexicans for money from a relative.

"One of my brothers-in-law did it, but he got caught," she added. "He doesn't do it any more."

That night, miles from the nearest telephone and help, the Ramon sisters seemed threatening.

Humberto was invited up front. Eugenio, Marco and I climbed into the back seat. The Indian man was there, only now he was drunk and unconscious.

"You got it?" Miss Ramon repeated more stressfully.

"Wait for money at Phoenix," Humberto said.

Smugglers, known disdainfully on both sides of the border as "coyotes," sometimes collect fares at the other end. That way, if stopped by immigration authorities, they can claim to be driving hitchhikers.

"No, we want it all now," Miss Ramon demanded. Her insistence on being paid immediately alarmed me.

We took the $20 bills out of hiding. Walking on the notes in our boots had rubbed their green ink off one side.

Humberto handed over his stash. Miss Ramon's sister counted the money in the faint glow of the dashboard lights.

"A hundred," the smuggler said. The bills disappeared into Barbara Ramon's sweater pocket.

My five 20s were counted next, then Eugenio's and Marco's. Four hundred dollars altogether.

"It's all here," the counter said. The Chevy rolled along the dirt road that proved to be a back way into Senuchuli. I perked up from a sudden flow of adrenalin. Were we being setup for a robbery?

Village dogs hounded us as we drove along the deserted settlement street to Highway 86. We turned west. Humberto frantically pointed east. "Phoenix," he repeated twice. "That way."

"This is another way," Miss Ramon said.

Both women were half drunk. The speeding car straddled the center line and yielded to oncoming traffic reluctantly. At Ajo, Miss Ramon bought two more six-packs of beer for the drive through Gila Bend, Buckeye and Phoenixs west side.

The Mexicans directed the smugglers to drive to Arrowhead Ranch Inc. at 59th Avenue and Union Hills. The Border Patrol considers the ranch a major employer of illegally immigrated farm workers. Arrowhead Ranch and neighboring citrus groves are raided frequently by the patrol.

It was on such a raid April 4 that the five Mexicans who had crossed the border with me had been caught last, along with 17 others. They said many more had fled into the citrus groves. Those caught had been taken on a Border Patrol bus to Nogales, 185 miles south of Phoenix, and released into Mexico.

Two days later, they were planning to cross the border illegally again.

That's when I had met the Mexicans in the Orizaba Hotel, a cheap, clean flop in Nogales, Sonora. It was Thursday, April 6. A member of the Maricopa County Organizing Project, a labor organization that represents Mexican and other farm workers, had introduced me to them.

They said some of the others who had been caught with them at the Arrowhead Ranch already had returned to the United States, and "some have gone home."

The Mexicans had agreed to take me along when they slipped back into the United States.

Guillermo, 39; Eugenio, 20; Antonio, 35, and young Marco are from Abucatlan, in Guerrero state. Humberto, 24, said he is from Chichihualco. They asked that their surnames not be disclosed because of the number of times they had been caught working in the United States.

During our first meeting, Eugenio had suggested we get acquainted over a beer. We

were climbing over some Ferrocaril de Pacifico rail cars on a Nogales siding on our way to a bar when two "locales"—city policemen—halted us.

"What are you doing with the norteamericano?" the older of them demanded in Spanish. Was I a "coyote"?

Of course I wasn't.

Were they planning to rob me, then?

No, of course not.

The second cop, with boyish features and hard eyes, watched our reactions. He did not believe the answers.

I tried then, "These are my friends. We are going for a beer."

"Friends?" the older cop said with sarcastic disbelief.

The Mexicans were ordered to empty their pockets. Guillermo's yielded a four-inch blade-folding knife.

"We're going to jail," I thought to myself. The young cop opened and closed the knife, intermittently stroking it against a concrete litter barrel. To my relief, we were released. We had our beer. But when we returned to the Orizaba, we discovered the police had searched our belongings.

On Friday morning, a church bell on Nogales' Juarez Street sounded reveille for the "mojados" ("wetbacks") lodged in the hotel. Someone played a dolorous campesino ballad on a steel-string guitar. Two men stirred in their bedrolls on the hall floor outside my door.

We boarded a second-class bus at the depot next door and rode to Santa Ana, then to Caborca and Sonoyta, on the border.

The sprung beds of the Hotel Desert Sun in Sonoyta received us, but the plumbing didn't work. We slept, two to a bed, in our traveling clothes.

On Saturday, we bought supplies. Sonoyta is a provisioning town for Mexicans going north. We saw others carrying plastic gallon milk bottles for water and plastic-mesh shopping bags tied with twine for packing food.

We took a taxi to a spot 500 yards from the border. The driver charged us $4 each, five times the usual fare.

A Border Patrol cruiser went by as we approached the border fence. We retreated into some mesquite for cover. After a two-hour wait, we crawled under the barbed-wire boundary fence and disappeared into El Tajana Arroyo on the U.S. side.

At the head of the arroyo, the arid Ajo Range slopes to form the broad valley of Gunsight Pass. It seemed unattainably far in the shimmering afternoon heat.

We walked all Saturday and into Sunday morning. It rained and stopped twice. The sky cleared, but there was no moon. It turned bitter cold. As we felt our way through the darkness, I fell painfully into a deep wash. The three water jugs I was packing crashed down on me.

The big dipper had nearly traveled full axis around the North Star when we stopped, bone-tired, in a wash near Montezuma's Head, a distinctive Buddha-like landmark in the Organ Pipe reserve.

I lay on a creosote bush, letting its bows form a bed under me until the cold reached me through clothing damp from sweat and rain.

A fire was built, and we crowded around on pallets of brush to snatch fits of sleep. Our kneebones were bruised from the rough walk. When the sun peered over the Ajos, we arose clumsily, like sleepwalkers.

Guillermo had sprained his back a month before. It was giving him difficulty now. He fell behind. Antonio, his friend, fell back with him.

The water I carried weighed about 30 pounds. The tie cords cut my shoulders. Everyone else was carrying as much, or more weight in food.

Somewhere between Montezuma's Head and Schuchuli we became separated from Guillermo and Antonio. We never saw them again. I learned later they had been caught and returned to Mexico.

With Guillermo gone, no one knew where in Schuchuli the smuggler lived. Eugenio and Humberto knocked on doors in random inquiry. The residents threatened to go for the police.

Frightened off, the Mexicans decided to hitchhike on Highway 86 where it passes near Schuchuli. It was a gamble. We had seen Border Patrol movements earlier in Gunsight Pass.

We had been on the highway for about five minutes when the two women smugglers showed up. I was grateful for them at that moment. I anticipated sleeping in a warm bed.

"This is good luck," Marco said. He had a different reason. "Tomorrow, we will work," he said.

But after the long drive to Glendale, the Mexicans slept that night on the ground in the Arrowhead Ranch citrus groves. They said it would take weeks of work to recoup the $130 to $160 they had paid to get back to the ranch.

"And maybe tomorrow, the immigration will pick us up," Eugenio said. He shrugged and smiled. That would be fate.

The threat of bandits, the high cost of the "coyotes," the agonies and danger of the desert crossings where an accident could be fatal . . . "is not that bad," Eugenio said. "And the money is better than in Mexico."

Mr. SARASIN. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. HAWKINS. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. Pursuant to the rule, the Clerk will now read the committee amendment in the nature of a substitute recommended by the Committee on Education and Labor now printed in the reported bill as an original bill for the purpose of amendment.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Comprehensive Employment and Training Amendments of 1978".

COMPREHENSIVE EMPLOYMENT AND TRAINING ACT REAUTHORIZATION

SEC. 2. The Comprehensive Employment and Training Act of 1973 is amended to read as follows:

"SHORT TITLE

"SECTION 1. This Act, with the following table of contents, may be cited as the 'Comprehensive Employment and Training Act'.

"TABLE OF CONTENTS

"Sec. 1. Short title.
"Sec. 2. Statement of purpose.
"TITLE I—ADMINISTRATIVE PROVISIONS
"PART A—ORGANIZATIONAL PROVISIONS
"Sec. 101. Prime sponsors.
"Sec. 102. Authority of Secretary to provide services.
"Sec. 103. Comprehensive employment and training plan.
"Sec. 104. Review of plans and performance standards and goals.
"Sec. 105. Governor's coordination and special services plan.
"Sec. 106. Complaints and sanctions.
"Sec. 107. Judicial review.
"Sec. 108. Reallocation.
"Sec. 109. Prime sponsor's planning council.
"Sec. 110. State employment and training council.
"Sec. 111. Consultation.
"Sec. 112. Authorization of appropriations.
"PART B—GENERAL PROVISIONS
"Sec. 121. Conditions applicable to all programs.
"Sec. 122. Special provisions.
"Sec. 123. Wages and allowances.
"Sec. 124. Labor standards.
"Sec. 125. Definitions.
"Sec. 126. Secretary's authority.
"Sec. 127. Reports.
"Sec. 128. Services and property.
"Sec. 129. Utilization of services and facilities.
"Sec. 130. Interstate agreements.
"Sec. 131. Prohibition against political activities.
"Sec. 132. Nondiscrimination.
"Sec. 133. Records, audits, and investigations.
"Sec. 134. Criminal provisions.

"Sec. 808. Antidiscrimination.
"Sec. 809. Transfer of funds.

"STATEMENT OF PURPOSE

"SEC. 2. It is the purpose of this Act to provide job training and employment opportunities for economically disadvantaged persons, unemployed or underemployed persons which will result in an increase in their earned income, and to assure that training and other services lead to maximum employment opportunities and enhance self-sufficiency by establishing a flexible, coordinated and decentralized system of Federal, State, and local programs. It is further the purpose of this Act to provide for the maximum feasible coordination of plans, programs, and activities under this Act with economic development, community development and related activities such as vocational education, vocational rehabilitation, and social service programs.

"TITLE I—ADMINISTRATIVE PROVISIONS

"PART A—ORGANIZATIONAL PROVISIONS

"PRIME SPONSORS

"SEC. 101. (a) The Secretary may make financial assistance available to a prime sponsor to enable it to carry out all or a substantial part of a comprehensive employment and training plan. A prime sponsor shall be—

"(1) a State;

"(2) a unit of general local government which has a population of one hundred thousand or more persons on the basis of the most satisfactory current data available to the Secretary;

"(3) any consortium of units of general local government which includes any unit of general local government qualifying under paragraph (2) of this subsection;

"(4) any unit of general local government or any consortium of such units, without regard to population, which, in exceptional circumstances, and after consultation with appropriate State and local officials, is determined by the Secretary—

"(A) (i) to serve a substantial portion of a functioning labor market area, or (ii) to be a rural area having a high level of unemployment; and

"(B) to have demonstrated (i) that it has the capability for adequately carrying out programs under this Act, (ii) that there is a special need for services within the area to be served, and (iii) that it will carry out such programs and services in such area as effectively as any larger unit of general local government in which it is located or as the State;

"(5) a limited number of existing concentrated employment program grantees serving rural areas having a high level of unemployment which the Secretary determines have special capabilities for carrying out programs in such areas and are designated by the Secretary for that purpose; or

"(6) any unit of general local government previously designated as a prime sponsor under the provisions of this Act (as in effect prior to the effective date of the Comprehensive Employment and Training Amendments of 1978) which has demonstrated its effectiveness to serve the purposes of this Act, regardless of any subsequent population decline below one hundred thousand persons.

"(b)(1) A State shall not qualify as a prime sponsor for any geographical area within the jurisdiction of any prime sponsor described in paragraph (2), (3), (4), (5), or (6) of subsection (a) unless such prime sponsor has not submitted an approvable comprehensive employment and training plan for such area.

"(2) A larger unit of general local government shall not qualify as a prime sponsor with respect to the jurisdiction within its area of any smaller eligible unit of general local government unless such smaller unit has not submitted an approvable comprehensive employment and training plan for such area.

"(c) An applicant must submit to the Secretary a notice of intent to be a prime sponsor for a fiscal year by such date as the Secretary shall prescribe. The Secretary shall designate as prime sponsors any applicant submitting such a notice unless the Secretary determines that such applicant does not qualify under this section.

"(d) State prime sponsors shall make appropriate arrangements for appropriate area planning bodies to serve subareas within the State prime sponsor's area for the purpose of assisting in the effective planning and delivery of comprehensive employment and training programs in such subareas, in accordance with such regulations as the Secretary may prescribe.

"AUTHORITY OF SECRETARY TO PROVIDE SERVICES

"SEC. 102. In any area for which no prime sponsor has been designated under section 101(c), or where the Secretary has taken an action under section 104 or section 106 which results in employment and training services not being provided in such area, the Secretary shall use funds allocated to such prime sponsor to make payments directly to public agencies or private nonprofit organizations as if the Secretary were the prime sponsor for that area.

"COMPREHENSIVE EMPLOYMENT AND TRAINING PLAN

"SEC. 103. (a) In order to receive financial assistance under this Act, a prime sponsor designated under section 101(c) shall submit to the Secretary a comprehensive employment and training plan. Such plan shall consist of a master plan and an annual plan. The master plan shall serve as the long-term charter under which the programs of such prime sponsor shall be operated. Such plan shall be sufficiently detailed to provide the Secretary and the prime sponsor with a thorough understanding of the economic conditions of the area and of the prime sponsor's long-term programmatic and administrative arrangements to ensure that each annual program is designed and implemented in a manner best suited to such conditions and in a manner consistent with the requirements of this Act. The formulation of such plan by the prime sponsor shall involve the active participation of the prime sponsor planning council, and such plan shall—

"(1) include (A) a detailed analysis of the area to be served, including geographic and demographic characteristics of significant segments of the population to be served (with data indicating the number of potential eligible participants and their income and employment status), and (B) a comprehensive labor market analysis and assessment of the economic conditions in the area, identifying the availability of employment and training in various public and private labor market sectors in such area and the potential for job growth in such sectors;

"(2) include a statement of the long-term goals of the prime sponsor for the improvement of such labor market and economic conditions;

"(3) include a description of the methods and institutional arrangements which will be used to involve community-based organizations in the development and implementa-

tion of the programs assisted under this Act;

"(4) include a description of the methods and arrangements which will be used to ensure the fullest possible utilization, consistent with the education and training needs identified in the plan, of public vocational education facilities and programs, and of other facilities of local education agencies in the provision of instruction in basic cognitive skills and in the development and implementation of programs assisted under this Act;

"(5) provide evidence that in the development of such plan there has been a continuing process of consultation with interested groups in the area not directly represented on the prime sponsor's advisory council, including local advisory councils established under section 105(a) of the Vocational Education Act of 1963 and the private industry council established under section 703 of this Act, representatives of local education agencies, and representatives of postsecondary education agencies;

"(6) include a detailed description of—

"(A) the prime sponsor's administrative arrangements and the procedures and criteria to be used (i) to select and supervise deliverers of service (including criteria for determining that a program has 'demonstrated effectiveness'), (ii) to evaluate and audit the operation of such programs, and (iii) to process complaints and grievances with respect to such programs;

"(B) the methods to be used to identify and place participants in such programs and the arrangements made with respect to providing such participants with job search assistance, counseling, and other services; and

"(C) the procedures for the selection of and the arrangements made with respect to consultation with the prime sponsor planning council;

"(7) include a description of arrangements to ensure that employment and training services, including the development of job opportunities, will be provided to those most in need of them, including low-income persons, handicapped persons, and persons of limited English-speaking ability, and that the need for continued funding of programs of demonstrated effectiveness is taken into account in serving such groups and persons;

(8)(A) provide a description of appropriate arrangements with community-based organizations serving the poverty community which are not represented on the prime sponsor planning council, and other special target groups, for their participation in the planning of programs included in the plan; (B) provide a description of the extent to which those services and facilities which are available, with or without reimbursement of the reasonable cost, from Federal, State, and local agencies are utilized by the prime sponsor, based upon a written evaluation of the local effectiveness of such existing services and facilities, including, but not limited to, the State employment service, State vocational education and vocational rehabilitation agencies, area skills centers, local educational agencies, postsecondary training and education institutions, and community action agencies, but nothing contained herein shall be construed to limit the utilization of services and facilities of private agencies, institutions, and organizations (such as private businesses, labor organizations, private employment agencies, and private educational and vocational institutions) which can, at comparable cost, provide substantially equivalent training or services or otherwise aid in reducing more quickly unemployment or current prospective labor shortages; (C) provide a description of arrangements for (i) the use of skills centers established under the authority of section 231 of the Manpower Development and Training Act of 1962, and (ii) the use of other public vocational education facilities in such area; (D) provide a description of arrangements to coordinate services for which financial assistance is provided under programs administered by the Secretary relating to employment and training and related services; and (E) provide a description of arrangements to promote maximum feasible use of apprenticeship or other on-the-job training opportunities available under section 1787 of title 38, United States Code;

"(9) provide for and include a description of arrangements made to insure the participation of and consultation with local educational agencies, vocational education agencies, community based organizations, Federal and State agencies, organized labor, business, and other institutions and organizations in the conduct of programs under this Act;

"(10) include a description of the methods for coordination between the prime sponsor and the local State employment security agencies and delineate the specific responsibilities of each in the delivery of employment and training services for participants funded under this Act and under the Wagner-Peyser Act, with the goal of maximizing the level of coordination between the prime sponsor and the local employment security agency and minimizing duplication;

"(11) include a description of the procedures concerning academic credit developed in conjunction with the appropriate local education agency or institution of higher education and approved by the appropriate State educational agency (including State agencies responsible for postsecondary education), or, where a prime sponsor's area includes more than one local education agency, developed in conjunction with, and approved by, the appropriate State educational agency;

"(12) include a description of procedures for the consideration of any changes in the plan required by this subsection or in the plan required under subsection (b), including review of such changes by the prime sponsor planning council;

"(13) include a description of recommendations of members of the prime sponsor's planning council which were not included in the plan, together with the reasons for rejecting them;

"(14) include a description of actions to ensure compliance with personnel procedures and collective bargaining agreements;

"(15) include a description of efforts to remove artificial barriers to employment;

"(16) include a description of procedures which will lead to skill development and job opportunities for participants in occupations traditionally limited to individuals of the opposite sex;

"(17) include a description of plans and activities to coordinate, strengthen, and expand employment and training activities under this Act with economic development activities in the private sector; and

"(18) include adequate assurances of compliance with this Act, regulations issued thereunder, and the comprehensive employment and training plan.

"(b) To receive funds for any fiscal year a prime sponsor shall submit an annual plan which shall include—

"(1) any significant changes from the information provided in the master plan;

"(2)(A) a description of the eligible population, including geographic and demographic characteristics of significant segments of such population;

"(B) a description of plans made to provide for the needs of persons who face particular disadvantages as identified in title III of this Act; and

"(C) a description of the procedures which will be used to promote the objectives of section 121(a)(4), including the hiring, licensing, and contracting activities of the political units, subgrantees, and contractors of such prime sponsor;

"(3) the prime sponsor's program and performance standards and goals for the program year, any changes in such program and performance standards and goals from those established for the preceding year and a summary of the results achieved with respect to such program standards and goals for prior years, and a description of any problems encountered in meeting the program and performance standards and goals for such preceding years;

"(4) the method for determining priorities for service under title II based on objective locally established criteria to assist the prime sponsor in assuring service to those most in need; such priorities shall be based on locally determined factors such as employment status, household status, level of employability development, handicap, veteran status, age, race, sex, or other criteria deemed viable by the prime sponsor;

"(5) the proposed budget for the program year, including a detailed summary of the expenditures made during the preceding year, results achieved, and changes made in the annual plan for the program year;

"(6) a summary of any evaluation conducted of the prime sponsor's programs during preceding program years and a description of any use made of such evaluation in the modification or alteration of the prime sponsor's program;

"(7) a description of an affirmative action program for outreach to and training, placement, and advancement of handicapped individuals in employment and training programs under this Act, including—

"(A) a description of the extent to which and the methods whereby the special needs of the handicapped are to be met; and

"(B) a description of the number of handicapped individuals who were served each of the preceding two years, the types of training or employment in which they were placed, and the number of such individuals who were moved into unsubsidized employment;

"(8) a description of the prime sponsor's intention to apply for and utilize funds provided under this Act which are not allocated by formula;

"(9) the wages or salaries to be paid persons employed in public service jobs under this Act and a comparison with the wages paid for similar public occupations by the same employer; and

"(10) a copy of all agreements made pursuant to sections 203(c) and 605(c) of this Act.

"(c) The Secretary shall establish procedures for submittal, approval, and implementation of changes in the comprehensive employment and training plan, together with any reports required under this Act, not more than once each fiscal quarter.

"REVIEW OF PLANS AND PERFORMANCE STANDARDS AND GOALS

"SEC. 104. (a) The Secretary shall approve any comprehensive or annual employment and training plan only if it (1) meets the requirements of section 103; (2) has been submitted for comment (at least 45 days before it was submitted to the Secretary) to the Governor, the State employment and training council, the prime sponsor planning council, appropriate local units of general local government, and labor organizations in the area representing employees engaged in work similar to that proposed to be funded; and (3) has been made available to the chairperson of the appropriate committee in each House of the State legislature with primary responsibility for vocational training and job development programs and to the public (including appropriate community based organizations). The Secretary shall not approve or disapprove any such plan solely on the basis of the proposed allocation of funds to be devoted to a particular program or activity, unless such allocation is required by this Act. In reviewing such plans,

the Secretary shall insure that the plans adequately describe, and the prime sponsor demonstrates a thorough understanding of, labor market and economic conditions in the area served, that the plan is reasonably designed to respond to such conditions, that the administrative arrangements and procedures are adequate for the performance of the program and will insure that professional standards of management will be attained, and that the plans provide for adequate relationships with existing community efforts and maximize the use of existing resources.

"(b) The Secretary shall assess the adequacy of each prime sponsor's proposed performance standards and goals in accordance with criteria recognizing that performance will vary with local conditions. Review standards shall provide appropriate recognition of differences associated with the degree of disadvantage or handicap of the eligible population, as well as such factors as—

"(1) the local labor market conditions, including, but not limited to, the levels of employment and unemployment, and the current and projected labor market needs;

"(2) the economic base of the community, including, but not limited to, the growth or decline of industry within the community;

"(3) the distribution of available employment opportunities, by industry division, for persons residing within the prime sponsor's area; and

"(4) the differing needs of the eligible population which will vary the costs for services and which will require setting different performance standards depending on the disadvantage of the eligible population.

"(c)(1) The Secretary shall, not later than March 31 of the fiscal year preceding the fiscal year for which an annual plan is to take effect, establish a date for the submission of such annual plan. The Secretary shall make available to each prime sponsor a complete and final set of all applicable regulations and necessary application materials no later than May 15 of the fiscal year preceding the fiscal year for which such plan is to take effect. With respect to funds allocated under this Act on the basis of a formula, the Secretary shall also provide prime sponsors with a preliminary planning estimate based on the amounts available in the budget of the President or in the most recent concurrent budget resolution under the Congressional Budget Act applicable to such year. If for any reason the Secretary cannot provide a complete and final set of all applicable regulations and necessary application materials by such May 15 prior to the date established under the first sentence of this subsection, the Secretary shall extend the date for submittal of such plan to allow the prime sponsor to review such regulations and to complete such materials prior to submittal.

"(2) During the period of time after May 15 and the date for submittal of the plan, the Secretary shall not issue any regulations or guidelines or interpretations thereof that require any change in the prime sponsor's plan, which is a condition for the Secretary's approval or disapproval of the plan. If the Secretary deems that a plan change is required during this period, the Secretary shall allow at least one fiscal quarter for the prime sponsor to submit such change, except that the sponsor may at its own discretion submit the required change as part of its plan submittal under paragraph (1).

"(d) Any prime sponsor aggrieved by any determination made under subsection (a) shall submit notice to the Secretary on the grounds for its objection, and the Secretary shall, within 30 days after receipt of such notice, reverse, amend, or affirm such determination and provide notice thereof and an opportunity for a hearing to such prime sponsor.

"(e) To the extent necessary to provide for the orderly transition to the provisions of section 103 and this section the Secretary may waive any provisions of such sections which are inconsistent with the comparable provisions of this Act prior to the enactment of the Comprehensive Employment and Training Amendments of 1978 and allow prime sponsors to submit plans and applications for assistance consistent with such comparable provisions during the period beginning on the effective date of such Amendments and ending December 31, 1978.

"GOVERNOR'S COORDINATION AND SPECIAL SERVICES PLAN

"SEC. 105. (a) Any State seeking financial assistance under this Act shall submit a Governor's coordination and special services plan to the Secretary.

"(b) Governor's coordination and special services activities shall consist of, but need not be limited to, the following:

"(1) coordinating all employment and training and related services provided by the State, by prime sponsors, and by other providers of such services within the State;

"(2) coordinating programs financed under the Wagner-Peyser Act and this Act, including assisting in the negotiation of any agreements (including partnership arrangements described in section 308) between prime sponsors and State employment security agencies;

"(3) assuring that comprehensive employment and training plans do not unnecessarily result in the duplication of services;

"(4) assisting the Secretary in enforcing the requirements for Federal contractors and subcontractors to list all suitable employment openings with local officers of the State employment service agencies and to take affirmative action, as required in section 2012(a) of title 38, United States Code;

"(5) assuring the promotion of price sponsor planning that takes into account conditions prevailing in labor market areas covering more than one prime sponsor area, as well as related activities such as community development, economic development, vocational education, vocational rehabilitation, and social services;

"(6) exchanging information between States and prime sponsors with respect to State, interstate, and regional planning for economic development, human resource development, education, and other subjects relevant to employment and training planning;

"(7) developing and providing to prime sponsors information, on a State and local area basis, regarding economic, industrial, and labor market conditions;

"(8) making available to prime sponsors, with or without reimbursement and upon request, appropriate information and technical assistance to assist them in developing and implementing their programs;

"(9) carrying out special model training and employment programs and related services, which may include programs for offenders similar to programs described in section 301(c); and

"(10) providing financial assistance for special programs and services designed to meet the needs of rural areas outside major labor market areas.

"(c) A Governor's coordination and special services plan shall be approved by the Secretary only if the Secretary determines that the plan satisfactorily implements subsection (b) of this section, and has been reviewed by the State employment and training council.

"COMPLAINT AND SANCTIONS

"SEC. 106. (a) Each recipient of financial assistance under the Act shall establish and maintain a grievance procedure, including provisions for hearings within 30 days after filing of a grievance, for handling complaints about the program arising from its participants, subgrantees, and contractors, and other interested persons. Hearings shall be conducted expeditiously and decisions shall be promptly made. With the exception of grievances alleging fraud or any criminal activity, filing of a grievance must be made within one year of the alleged occurrence.

"(b) Whenever the Secretary receives a complaint from any interested person or organization (which has exhausted the prime sponsor's grievance system established pursuant to subsection (a)) which alleges, or whenever the Secretary has reason to believe (because of an audit, report, on-site review, or otherwise) that a recipient of financial assistance under this Act is failing to comply with the requirements of this Act, the regulations under this Act, or the terms of the comprehensive employment and training plan, the Secretary shall investigate the matter. If, after such investigation, the Secretary determines that there is substantial evidence to support such allegation or belief that such a recipient is failing to comply with such requirements, the Secretary shall, after due notice and opportunity for a hearing to such recipient, determine whether such allegation or belief is true.

"(c) The Secretary may revoke all or any part of a prime sponsor's comprehensive employment and training plan and terminate in whole or in part financial assistance thereunder, provided that prior notice and opportunity for a hearing is given, if the Secretary concludes that the prime sponsor is—

"(1) maintaining a pattern or practice of discrimination in violation of section 121(a)(1) or 132, or otherwise failing to make opportunities available equitably among the significant segments of the population in the area it serves;

"(2) incurring unreasonable administrative costs in the conduct of activities and programs, as determined pursuant to the Secretary's regulations;

"(3) failing to give due consideration to continued funding of programs of demonstrated effectiveness; or

"(4) otherwise materially failing to carry out the purposes and provisions of this Act or the regulations promulgated under it, or materially failing to expend funds provided under this Act in accordance with this Act.

"(d) In emergency situations, as determined by the Secretary, when it is necessary to protect the integrity of the funds or ensure the proper operation of the program, the Secretary may immediately terminate or suspend financial assistance in whole or in part, provided that prompt notice and opportunity for a subsequent hearing are given to the recipient. The Secretary shall not delegate any of the functions or authority specified in this subsection other than to an officer whose appointment was required to be made by and with the advice and consent of the Senate.

"(e) If the Secretary concludes that any recipient of funds under this Act is failing to comply with any provision of this Act or any regulations under this Act, the Secretary may terminate or suspend financial assistance in whole or in part or order such sanctions or corrective actions as are appropriate including, but not limited to, the repayment of misspent funds from funds other than funds under this Act, and the withholding of future funding, provided prior notice and an opportunity for a hearing are given to the recipient. Whenever the Secretary orders termination or suspension of a subgrantee or subcontractor, the Secretary may take whatever action is necessary, including direct legal action against the subgrantee or subcontractor (including operators under a nonfinancial agreement) or an order to the primary recipient that it take legal action to reclaim misspent funds or to otherwise protect the integrity of the funds or ensure the proper operation of the program.

"(f) If the Secretary concludes that any recipient under this Act (1) has discharged

or in any other manner discriminated against a participant, or against any person in connection with the administration of the program, or against any person because such person has filed any complaint or instituted or caused to be instituted any proceeding under or related to this Act, or has testified or is about to testify in any such proceeding or investigation, or (2) has otherwise unlawfully denied to any person a benefit to which that person is entitled under the provisions of this Act or the Secretary's regulations, the Secretary may take such appropriate corrective action under this section as is necessary with respect to both the recipient and the person aggrieved.

"(g) The Secretary may withhold funds otherwise payable under this Act in order to recover any amounts expended in any fiscal year in violation of any provision of this Act, any regulation, or any term or condition of assistance under this Act.

"(h) Nothing in this section shall be deemed to reduce the responsibility and full liability of the prime sponsors and other recipients which receive funds directly from the Secretary.

"(i)(1) Except as otherwise provided in subsection (d), the Secretary shall not revoke a prime sponsor's plan, in whole or in part, nor institute corrective action or sanctions against a prime sponsor under this section or any other section under this Act, without first providing the prime sponsor with notice by the Secretary of his intended actions and the reasons upon which those intended actions are based, and also providing the prime sponsor—

"(A) with an opportunity to informally resolve those matters contained in the Secretary's notice; and

"(B) in the event that the prime sponsor and the Secretary cannot informally resolve any matter pursuant to class (A), with a notice that (i) efforts to informally resolve matters contained in the Secretary's original notice have been unsuccessful; (ii) lists those matters upon which the parties continue to disagree; and (iii) informs the prime sponsor of any sanctions, corrective action, or any other alteration or modification of the prime sponsor's plan or program intended by the Secretary.

"(2) Within ten days of receipt of the Secretary's notice under paragraph (1)(B), the prime sponsor may request a hearing, but in no event shall the Secretary proceed under this Act without first fulfilling all the requirements under this subsection.

"JUDICIAL REVIEW

"SEC. 107. (a) If any prime sponsor is dissatisfied with the Secretary's final action with respect to the disapproval of its comprehensive employment and training plan under section 104 or if any recipient is dissatisfied with the Secretary's final action with respect to a sanction under section 106, such prime sponsor or recipient may, within sixty days after notice of such action, file with the United States court of appeals for the circuit in which the prime sponsor is located a petition for review of that action.

"(b) The findings of fact by the Secretary, if supported by substantial evidence, shall be conclusive; but the court, for good cause shown, may, in whole or in part, set aside the findings of the Secretary or remand the case to the Secretary in whole or in part to take further evidence, and the Secretary may thereupon make new or modified findings of fact and may modify the previous action, and shall certify to the court the record of the further proceedings.

"REALLOCATION

"SEC. 108. (a) The Secretary is authorized to reallocate any amount of any allocation under this Act to the extent that the Secretary determines that the recipient will not be able to use such amount within a reasonable period of time.

"(b)(1) Any allocations to a prime sponsor designated under section 101(c) may be reallocated only if the Secretary has provided thirty days advance notice to the prime sponsor, to the Governor, and to the general public. During such period comments may be submitted to the Secretary.

"(2) After considering any comments submitted during such period, the Secretary shall notify the Governor and the affected prime sponsor of any decision to reallocate funds, and shall publish such decision in the Federal Register.

"(3) In reallocating any such funds, the Secretary shall give priority first to other prime sponsor areas within the same State and then to prime sponsor areas within other States.

"PRIME SPONSOR'S PLANNING COUNCIL

"SEC. 109. (a) Each prime sponsor designated under section 101(c) shall establish a planning council.

"(b) Such council shall consist of members who are representative of the eligible population (including significant segments thereof), organized labor, employees who are not represented by organized labor, community-based organization, the State employment service, veterans organizations, organizations of the elderly, vocational education agencies, other education and training agencies and institutions, business, and, where appropriate, agricultural employers and workers.

"(c) The prime sponsor shall appoint the members of the council and designate a nongovernmental member as chairperson.

"(d) The planning council shall meet no less than four times per year. The meetings shall be publicly announced, and, to the extent appropriate, open to and accessible to the general public.

"(e) The council shall participate in the development of, and submit recommendations regarding, the prime sponsor's comprehensive employment and training plan and the basic goals, policies, and procedures of the prime sponsor's programs and other employment and training programs in the prime sponsor's area; monitor, and provide for objective evaluations of, employment and training programs conducted in such area; and provide for continuing analyses of the need for employment, training, and related services in such area, including efforts to reduce and eliminate artificial barriers to employment. Any final decision with respect to such recommendations shall be made by the prime sponsor.

"STATE EMPLOYMENT AND TRAINING COUNCIL

SEC. 110. (a)(1) Any State which desires to receive financial assistance under this Act shall establish a State employment and training council. Funding for the council shall be provided pursuant to section 202(c).

"(2) The council shall be appointed by the Governor, who may be chairperson of the council or may designate one nongovernmental member thereof to be chairperson.

"(3) The council shall be composed as follows:

"(A) one-third of the voting members of such council shall consist of—

"(i) representatives of units of general local government in the State, including such units or consortia thereof who are designated as prime sponsors, which representatives shall be nominated by the chief executive officers of units of general local government within the State;

"(ii) one representative of the State board of vocational education;

"(iii) one representative of the State advisory council on vocational education established pursuant to section 105 of the Vocational Education Act of 1963;

"(iv) one representative of the State employment security agency;

"(B) one-third of the voting members of such council shall consist of representatives of organized labor, business, agricultural employers and workers, community-based organizations, veterans organizations, and organizations of the elderly;

"(C) one-third of the voting members of such council shall consist of representatives of the eligible population (including significant segments thereof) and of the general public; and

"(D) such additional nonvoting ex officio members of such council as the Governor may designate to represent State agencies having a direct interest in overall employment and training and human resource utilization within the State.

"(4) The council shall meet at such times (but at least four times each year) and in such places as it deems necessary. The meetings shall be publicly announced, and, to the extent appropriate, open and accessible to the general public.

"(b) The council shall—

"(1) review continuously the operation of programs conducted by each prime sponsor, and the availability, responsiveness, and adequacy of State services, and make recommendations to the prime sponsors, to agencies providing employment and training services, to the Governor, and to the general public with respect to ways to improve the effectiveness of such programs or services;

"(2) make an annual report to the Governor which shall be a public document, and issue such other studies, reports, or documents as it deems advisable to assist prime sponsors or to otherwise help carry out the purposes of this Act;

"(3)(A) identify, in coordination with the State advisory council on vocational education, the employment and training and vocational education needs of the State and assess the extent to which employment, training, vocational education, vocational rehabilitation, and other programs assisted under this and related Acts represent a consistent, integrated, and coordinated approach to meeting such needs; and (B) comment at least once annually on the reports of the State advisory council on vocational education, which comments shall be included in the annual report submitted by the council pursuant to section 105 of the Vocational Education Act of 1963;

"(4) review the comprehensive employment and training plans for prime sponsors pursuant to section 104, especially with respect to nonutilization or duplication of existing services; and

"(5) review plans of all State agencies providing employment, training, and related services, and provide comments and recommendations to the Governor, the State agency, and the appropriate Federal agency on the relevancy and effectiveness of employment and training and related service delivery systems in the State.

"CONSULTATION

"SEC. 111. (a) The Secretary of Labor shall consult with the Secretary of Health, Education, and Welfare with respect to arrangements for services of a health, education, or welfare character under this Act, and the Secretary of Health, Education, and Welfare shall solicit the advice and comments of appropriate State agencies with respect to such health, education, and welfare services. Such services include, but are not limited to, basic or general education; educational programs conducted for offenders; institutional training; health care, child care, and other supportive; services; and new careers and job restructuring in the health, education, and welfare professions.

"(b) The Secretary of Labor, in carrying out or supporting programs under this Act,

shall consult, as appropriate, with the Secretary of Commerce, the Secretary of Housing and Urban Development, the Secretary of Agriculture, the Director of the ACTION Agency, the Director of the Community Services Administration, the Administrator of Veterans Affairs, and such other agencies as appropriate.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 112. (a)(1) Except as provided in paragraph (3), there are authorized to be appropriated such sums as may be necessary for the fiscal year ending September 30, 1979, and for each of the three succeeding fiscal years for carrying out the provisions of this Act, other than part A of title IV and title VII.

"(2) Except as provided in paragraph (3), there are authorized to be appropriated such sums as may be necessary for the fiscal year ending September 30, 1979, and for the succeeding fiscal year for carrying out the provisions of part A of title IV and title VII.

"(3) For the fiscal year ending September 30, 1979, there are authorized to be appropriated not to exceed—

"(A) $4,000,000,000 for carrying out the provisions of title II;

"(B) $1,900,000,000 for carrying out the provisions of title IV; and

"(C) $400,000,000 for carrying out the provisions of title VII.

"(b) Notwithstanding any other provision of law, unless enacted in specific limitation of the provisions of this subsection, any funds appropriated to carry out this Act, which are not obligated prior to the end of the fiscal year for which such funds were appropriated, shall remain available for obligation during the succeeding fiscal year, and any funds obligated in any fiscal year may be expended during a period of two years from the date of obligation.

"(c)(1) For the purpose of affording adequate notice of funding available under this Act, appropriations under this Act are authorized to be included in an appropriation Act for the fiscal year preceding the fiscal year for which they are first available for obligation.

"(2) In order to effect a transition to the advance funding method of timing appropriation action, the provisions of this subsection shall apply notwithstanding that its initial application will result in the enactment in the same year (whether in the same appropriation Act or otherwise) of two separate appropriations, one for the then current fiscal year and one for the succeeding fiscal year.

"(d) Of the amount appropriated to carry out this Act for any fiscal year, the amount available for carrying out title III shall not exceed 20 per centum of the amount available for carrying out title II. From any amount made available for title III activities, the Secretary shall transfer an amount equal to not less than $3,000,000 nor more than $5,000,000 for any fiscal year to the National Occupational Information Coordinating Committee established pursuant to section 161(b) of the Vocational Education Act of 1963, for purposes described in section 438(c) of this Act.

"PART B—GENERAL PROVISIONS

"CONDITIONS APPLICABLE TO ALL PROGRAMS

"SEC. 121. Except as otherwise provided, the following conditions are applicable to all programs under this Act:

"(a)(1) No person shall be excluded from participation in, denied the benefits of, subjected to discrimination under, or denied employment in the administration of or in connection with any such program because of race, color, religion, sex, national origin, age, handicap, or political affiliation or belief.

"(2) Participants shall not be employed on the construction, operation, or maintenance of so much of any facility as is used or to be used for sectarian instruction or as a place for religious worship.

"(3) Every participant, prior to entering upon employment or training, shall be informed of that individual's rights and benefits in connection with such employment or training; acceptance of family planning services shall be voluntary on the part of the individual, and shall not be a prerequiste to eligibility for, or receipt of, any benefit under the program.

"(4)(A) Programs shall contribute, to the maximum extent feasible, to the elimination of artificial barriers to employment and occupational advancement.

"(B) Prime sponsors and their subgrantees and contractors shall analyze and reevaluate job descriptions to remove artificial barriers to the public service employment of participants, and, where necessary, revise, or assist in the revision of, qualification requirements, including civil service and licensing requirements and practices relating thereto.

"(5) Prime sponsors shall make efforts to remove architectural barriers to employment of the handicapped.

"(b)(1)(A) Only persons residing within the area qualifying for assistance shall be employed, and the public services provided by such jobs, to the extent feasible, shall be designed to benefit the residents of such area.

"(B) Employment and training opportunities for participants shall be made available by prime sponsors on an equitable basis in accordance with the purposes of this Act among significant segments of the eligible population giving consideration to the relative numbers of eligible persons in each such segment.

"(C) In the administration of programs under this Act, members of the eligible population to be served shall be provided maximum employment opportunities, including opportunities for further occupational training and career advancement. Prime sponsors shall make special efforts to recruit and hire qualified persons reflecting the significant demographic segments of the population residing in the area.

"(D) Special consideration in filling public service jobs shall be given to eligible persons who are the most severely disadvantaged in terms of their length of unemployment and their prospects for finding employment.

"(2)(A) Special consideration shall be given to unemployed persons who served in the Armed Forces in Indochina or Korea on or after August 5, 1964, in accordance with procedures established by the Secretary, and special emphasis shall be given to the development of jobs which will utilize, to the maximum extent feasible, the skills which such veterans acquired in connection with their military training and service.

"(B) Special efforts shall be made to acquaint such veterans with the employment and training available under this Act, and to coordinate efforts in behalf of such veterans with those activities authorized by chapter 41 of title 38, United States Code (relating to job counseling and employment services for veterans), and other similar activites carried out by other public agencies or organizations.

"(C) Prime sponsors shall provide such arrangements as may be appropriate to promote maximum feasible use of apprenticeship or other on-the-job training opportunities available under section 1787 of title 38, United States Code.

"(c)(1)(A)(i) No wages shall be paid from funds under this Act to any participant for any week of public service employment under this Act in excess of seventy-eight weeks in any three-year period. For purposes of this division, no more than twenty-six weeks of public service employment financed in whole or in part under this Act prior to October 1, 1978, shall be considered as part of the seventy-eight weeks.

"(ii) The Secretary may waive the provisions of division (i) or of paragraph (2)(B) to provide a temporary extension of time for a limited number of persons who were originally hired in a public service employment program prior to April 1, 1978, and who continue to be so employed on September 30, 1979, in the case of a prime sponsor which the Secretary determines has faced unusually severe hardships in its efforts to transition public service employees into regular public or private employment not supported under this Act.

"(B) Funds under this Act shall not be used to pay wages to any person employed in a public service job in any fiscal year under this Act at a rate in excess of $10,000 per year, but such maximum shall be adjusted upward by the ratio that the annual average wages within the area served by the prime sponsor exceed the average of the total of such wages nationally in accordance with a wage adjustment index to be published annually by the Secretary. In no event shall such maximum be increased by more than 20 per centum.

"(C) In order to provide the number of public service job opportunities for which funds are made available under this Act, the Secretary shall issue appropriate standards to be maintained with respect to average federally supported wage rates for public service jobs on an area basis, on the basis of an index to be published annually by the Secretary, taking into account average wages in regular employment not supported under this Act in various areas, for the purpose of maintaining nationwide annual average federally supported wage rates in the fiscal year ending September 30, 1979, equivalent to $7,800 per public service jobholder (consistent with the maximum annual federally supported wage rate under section 121(c)(1)(B)). Such national average shall thereafter be annually adjusted in accordance with changes in the Consumer Price Index, determined at the beginning of each fiscal year.

"(D) Notwithstanding any eligibility limitation on public service employment in this Act, a person who on September 30, 1978, held a public service employment position under this Act may continue in such position subject to subparagraph (A) of this paragraph.

"(E)(i) Except as otherwise provided in section 608, no public service employment participant may be provided wages for any public service employment job from sources other than this Act.

"(ii) Notwithstanding division (i), any person in public service employment on September 30, 1978, receiving wages from sources other than this Act may continue to receive such wages.

"(2)(A) All persons participating in work experience under this Act shall receive wages, and all persons participating in training shall receive allowances, pursuant to section 123; except that, subject to section 212(b), no wages or allowances shall be paid from funds under this Act to any participant for any week of institutional or classroom training, or for any week of work experience, in excess of one hundred and four weeks in any three-year period.

"(B) Subject to section 212(b), no individual shall participate in programs receiving financial assistance under this Act for longer than a total of thirty months in any five-year period. For purposes of this subparagraph, no period of participation prior to October 1,

1978, shall be included in the computation of such thirty months.

"(3)(A) Appropriate workers' compensation or equivalent protection shall be provided to all participants.

"(B) All persons employed in public service jobs shall be provided workers' compensation, health insurance, unemployment benefits, and other benefits and working conditions at the same level and to the same extent as other employees working a similar length of time, doing the same type of work, and similarly classified. Any such classifications under any applicable civil service or merit law or regulation must be reasonable and must include nonfederally financed employees.

"(4) Funds available for employment benefits under this Act may be used for contributions on behalf of participants enrolled in retirement systems or plans prior to January 1, 1979. With respect to participants enrolled in retirement systems or plans on or after such date, or such later date as the Secretary may specifically provide, no funds under this Act may be used for contributions to retirement systems or plans unless such contributions bear a reasonable relationship to the cost of providing benefits to participants.

"(d)(1) Conditions of employment and training shall be appropriate and reasonable in the light of such factors as the type of work, geographical region, and proficiency of the participant.

"(2) Appropriate health, safety and other standards for work and training shall be established and maintained.

"(3) Household support obligations shall be taken into account, and special consideration shall be given alternative working arrangements such as flexible hours of work, work-sharing arrangements, and part-time jobs, particularly for parents of young children and for older persons.

"(e)(1) The program shall result in an increase in employment and training opportunities over those opportunities which would otherwise be available.

(2) No currently employed worker shall be displaced by any participant (including partial displacement such as a reduction in the hours of nonovertime work, wages, or employment benefits).

"(3) No person shall be employed or job opening filled (A) when any other person not supported under this Act is on layoff from the same or any substantially equivalent job, or (B) when the employer has terminated the employment of any regular employee not supported under this Act or otherwise reduced its workforce with the intention of filling the vacancy so created by employing a public service employee.

"(4) No jobs shall be created in a promotional line that will infringe in any way upon the promotional opportunities of persons currently employed in jobs not subsidized under this Act.

"(5) No public service jobs shall be substituted for existing federally assisted jobs.

"(6) No program shall impair existing contracts for services.

"(7) No funds shall be used to assist in relocating establishments, or parts thereof, from one area to another or locating new branches, subsidiaries, or affiliates unless the Secretary determines that such relocation or location will not result in an increase in unemployment in the area of original location or in any other area.

"(f)(1) All programs, to the maximum extent feasible, shall contribute to occupational development, upward mobility, development of new careers, and overcoming sexstereotyping (including procedures which will lead to skill development and job opportunities for participants in occupations traditionally limited to the opposite sex).

"(2) No person shall be trained for an occupation which requires less than two weeks of preemployment training unless there are immediate employment opportunities available in that occupation.

"(3) All programs shall be designed, to the maximum extent practicable, consistent with every individual's fullest capabilities, to lead to employment opportunities enabling participants to increase their earned income and to become economically self-sufficient.

"(4) No person shall be referred for training unless there is a reasonable expectation of employment in the occupation for which such person is being trained. To the extent feasible, public service jobs shall be provided in occupational fields which are most likely to expand within the public or private sector.

"(5) Programs of institutional training shall be designed for occupations in which skill shortages exist.

"(6) The Secretary, through State employment security agencies, shall inform unemployment compensation recipients, and other applicants for assistance from the employment security agency, of any available public service jobs for which they may be eligible.

"(g)(1)(A) No program shall substitute funds under this Act for other funds in connection with work that would otherwise be performed.

"(B) No funds for public service employment programs under this Act may be used to provide public services, through a private organization or institution, which are customarily provided by a State, a political subdivision, or a local educational agency in the area served by the program.

"(C) Jobs shall be created that are in addition to those that would be funded in the absence of assistance under this Act.

"(D) Funds shall be used to supplement, and not to supplant, the level of funds that would otherwise be made available from non-Federal sources for the planning and administration of programs.

"(2) Programs shall use services and facilities available (with or without reimbursement) from Federal, State, and local agencies to the extent they are deemed effective by the prime sponsor.

"(3) Financial records relating to public service employment programs, and records of the names, addresses, positions, and salaries of all persons employed in public service jobs, shall be maintained and made available to the public.

"(h)(1) No nongovernmental individual, institution, or organization shall be paid funds provided under this Act to evaluate any program under this Act if such individual, institution, or organization is associated with that program as a consultant or technical advisor, or in any similar capacity.

"(2) No member of any council under this Act shall cast a vote on any matter which has a direct bearing on services to be provided by that member (or any organization which that member directly represents).

"(i) Small and minority-owned businesses shall be provided maximum reasonable opportunity to compete for contracts for supplies and services including, where appropriate, the use of set-asides.

"(j) Payments to employers organized for profit shall not exceed the difference between (1) the costs of recruiting, training, and supportive services, and the costs of low productivity (as defined by regulations of the Secretary) for participants and (2) the comparable costs incurred for those regularly employed.

"(k) Prime sponsors shall provide, where employment opportunities already exist or where there is a reasonable expectation of near-term expansion of such employment potential, employment and training opportunities in the development and use of solar, geothermal, hydroelectric, and other alternative energy technologies, and conservation, especially those clean, safe, renewable resources which may assist communities in resolving energy demand problems, thereby reducing their reliance on conventional nonrenewable fuels. For purposes of this section, solar energy sources has the meaning set forth in section 3 of the Solar Energy Research, Development and Demonstration Act of 1974.

"SPECIAL PROVISIONS

"SEC. 122. (a) No authority conferred by this Act shall be used to enter into arrangements for, or otherwise establish, any employment and training programs in the lower wage industries in jobs where prior skill or training is typically not a prerequisite to hiring and where labor turnover is high.

"(b) The Secretary shall provide for the sharing of the comprehensive employment and training plan and other plans and proposals between the prime sponsors and other recipients of financial assistance in the prime sponsors' area under this Act in order to assure maximum feasible coordination of activities and programs within the area and to minimize duplication.

"(c)(1) Notwithstanding any other provisions of law, employment and training furnished under this Act in connection with weatherization projects may include work on projects for the near poor, including families having incomes which do not exceed 125 per centum of the poverty level as determined in accordance with the criteria established by the Director of the Office of Management and Budget, and projects approved by the Community Service Administration pursuant to section 222(a)(12) of the Economic Opportunity Act or the Department of Energy pursuant to title IV of the Energy Conservation and Production Act of 1976.

"(2) Projects permitted under this subsection shall be subject to the direction of an adequate number of supervisory personnel, who shall be adequately trained in skills needed to carry out the project and to instruct participants in skills needed to carry out a project.

"(d) All allocations under this Act shall be based on the latest available data and estimates satisfactory to the Secretary.

"(e) Where the Secretary determines that a Native American entity otherwise qualified under section 302(c)(1) is unable to apply for or use any financial assistance for which it may be eligible under this Act, the Secretary may assist such entity in applying for or using such financial assistance.

"(f) For purposes of eligibility for participation in a program under this Act, no person shall be considered as unemployed unless such person has been unemployed for at least seven consecutive days.

"(g) All funds received under any title of this Act, which are allowed to be used for administrative costs under the provisions of the title under which they were received, may be pooled by the recipient so that they may be used to administer all programs under this Act, and may be used to plan for the administration of title VI programs without regard to present funding for such programs.

"(h) The Secretary, by regulation, shall establish such standards and procedures for recipients of funds under this Act as are necessary to assure against program abuses including, but not limited to, nepotism; conflicts-of-interest; the charging of fees in connection with participation in the program; the improper commingling of funds under the Act with funds received from other sources; the failure to keep and maintain sufficient, auditable, or otherwise adequate records; kickbacks; political patronage; violations of applicable child labor laws; the use of funds for political, religious, anti-religious,

unionization, or antiunionization activities; the use of funds for lobbying local, State, or Federal legislators; and the use of funds for activities which are not directly related to the proper operation of the program.

"(i) Pursuant to regulations of the Secretary, income generated under any program may be retained by the recipient to continue to carry out the program, notwithstanding the expiration of financial assistance for that program.

"(j) Pursuant to regulations which the Secretary shall prescribe, each recipient of financial assistance under this Act shall make satisfactory provisions for determining and verifying whether individuals are eligible for participation in programs supported under this Act.

"(k) Every recipient which receives funds directly from the Secretary shall have responsibility to take action against its subcontractors, subgrantees, and other recipients to eliminate abuse in their programs and to prevent any misuse of funds by such subcontractors, subgrantees, and other recipients.

"WAGES AND ALLOWANCES

"SEC. 123. Except as otherwise provided in this Act, the following allowances and wages shall apply to all activities financed under this Act:

"(a)(1) The Secretary shall establish a basic hourly allowance for an individual receiving training for which no wages are payable at a rate which, when added to the amounts of unemployment compensation, if any, received by the trainee, shall be no less than the hourly minimum wage under section 6(a)(1) of the Fair Labor Standards Act of 1938, or, if higher, under the applicable State or local minimum wage law.

"(2) Pursuant to regulations of the Secretary, the prime sponsor may increase, decrease, prorate, or waive the basic allowance.

"(3) A trainee receiving pubic assistance, or whose needs or income is taken into account in determining such public assistance payments to others, shall receive an incentive allowance for each hour spent in training at the rate of $30 per week. Such allowance shall be disregarded in determining the amount of public assistance programs.

"(4) A trainee shall receive no allowances for hours during which the trainee fails to participate without good cause.

"(b) A person in public service employment or similar employment shall be paid wages which shall not be less than the highest of (1) the minimum wage under section 6(a)(1) of the Fair Labor Standards Act of 1938, (2) the minimum wage under the applicable State or local minimum wage law, or (3) the prevailing rates of pay for persons employed in similar occupations by the same employer.

"(c) Persons in on-the-job training shall be compensated by the employer at such rates, including periodic increases, as may be deemed reasonable under regulations prescribed by the Secretary, considering such factors as industry, geographical region, skill requirements, and individual proficiency, but in no event less than the higher of the rate specified in section 6(a)(1) of the Fair Labor Standards Act of 1938 or the applicable State or local minimum wage law.

"(d) Persons in work experience shall be paid wages not less than the higher of the rate specified in section 6(a)(1) of the Fair Labor Standards Act of 1938 or the applicable State or local minimum wage law.

"LABOR STANDARDS

"SEC. 124. All laborers and mechanics employed by contractors or subcontractors in any construction, alteration, or repair, including painting and decorating of projects, buildings, and works which are federally assisted under this Act, shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary in accordance with the Davis-Bacon Act (40 U.S.C. 276a—276a-5). The Secretary shall have, with respect to such labor standards, the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 64 Stat. 1267) and section 2 of the Act of June 1, 1934 (48 Stat. 948, as amended; 40 U.S.C. 276(c)).

"DEFINITIONS

"SEC. 125. As used in this Act—

"(1) The term 'academic credit' means education, training, or work experience applicable toward a secondary school diploma, a postsecondary degree, or an accredited certificate of completion, consistent with applicable State law, regulation, and policy and the requirements of an accredited educational agency or institution in a State.

"(2) The term 'area of substantial unemployment' means any area of sufficient size and scope to sustain a public service employment program and which has an average rate of unemployment of at least 6.5 per centum (A) for any three consecutive months within the preceding year for purposes of title II, or (B) for the most recent four quarters for purposes of title VI. Determinations of areas of substantial unemployment shall be made once each fiscal year by the Secretary.

"(3) The term 'artificial barriers to employment' refers to limitations in the hiring, firing, promotion, licensing, and other terms and conditions of employment which are not directly related to the individual's fitness or ability to perform the duties required by the employment position.

"(4) The term 'community-based organizations' means private nonprofit organizations which are representative of communities or significant segments of communities and which provide employment and training services (for example, Opportunities Industrialization Centers, the National Urban League, SER-Jobs for Progress, United Way of America, Mainstream, the National Puerto Rican Forum, neighborhood organizations, community action agencies, community development corporations, rehabilitation facilities (as defined in section 7(10) of the Rehabilitation Act of 1973), union-related organizations, and employer-related nonprofit organizations).

"(5) The term 'Consumer Price Index' means the 'All Urban Consumer Index' as determined by the Secretary of Labor.

"(6) The term 'disabled veteran' means those veterans described in section 2011(1) of title 38, United States Code.

"(7) The term 'economically disadvantaged' means a person who (A) receives, or is a member of a family which (i) receives cash welfare payments under a Federal, State, or local welfare program, or (ii) had a family income during the six-month period prior to application for the program which would have qualified such family for such cash welfare payments, subject to regulations of the Secretary; (B) has, or is a member of a family which has, received a total family income for the six-month period prior to application for the program (exclusive of unemployment compensation and welfare payments) which, in relation to family size, was not in excess of the higher of the poverty level determined in accordance with criteria established by the Director of the Office of Management and Budget or 70 per centum of the lower living standard income level; (C) is a foster child on behalf of whom State or local government payments are made; or (D) in cases permitted by regulations of the Secretary, is a handicapped individual living at home or is an individual who is institutionalized or receiving services in, or is a client of, a sheltered workshop, prison, hospital, or similar institution or in community care. Except for persons who would be eligible for assistance under title IX of the Older Americans Act, any person claimed as a dependent on another person's Federal income tax return under section 151(e) of the Internal Revenue Code of 1954 for the previous year shall be considered part of the person's family for the current year.

"(8) The term 'entry level' means the lowest position in any promotional line, as defined locally by collective-bargaining agreements, past practice, or applicable personnel rules.

"(9) The term 'Governor' means the chief executive of any State.

"(10) The term 'handicapped individual' means any individual who (A) has a physical or mental functional limitation or impairment which constitutes or results in an inability to perform any substantial gainful employment, and (B) can be reasonably expected to benefit, in terms of employability, from services provided pursuant to this Act.

"(11) The term 'Hawaiian native' means any individual any of whose ancestors were natives, prior to 1778, of the area which now consists of the Hawaiian Islands.

"(12) The term 'health care' includes, but is not limited to, preventive and clinical medical treatment, family planning services, nutrition services, and appropriate psychiatric, psychological, and prosthetic services, to the extent any such treatment or services are necessary to enable the recipient of employment and training services to obtain or retain employment.

"(13) The term 'institutions of higher education' and 'post-secondary institutions' means those institutions defined as institutions of higher education in section 1201(a) of the Higher Education Act of 1965.

"(14) The term 'local educational agencies' means those agencies so defined in section 195(10) of the Vocational Education Act of 1963.

"(15) The term 'low-income level' means $7,000 with respect to income in 1969, and for any later years means that amount which bears the same relationship to $7,000 as the Consumer Price Index for that year bears to the Consumer Price Index for 1969, rounded to the nearest $1,000.

"(16) The term 'lower living standard income level' means that income level (adjusted for regional and metropolitan and urban and rural differences and family size) determined annually by the Secretary based upon the most recent 'lower living family budget' issued by the Secretary.

"(17) The term 'offender' means any adult or juvenile who is or has been subject to any stage of the criminal justice process for whom employment and training services may be beneficial or who require assistance in overcoming artificial barriers to employment stemming from a record of arrest or conviction.

"(18) The term 'project applicants' includes States and agencies thereof, units of general local government and agencies thereof or combinations or associations of such governmental units when the primary purpose of such combinations or associations is to assist such governmental units to provide public services, special purpose political subdivisions having the power to levy taxes and spend funds or serving such special purpose within an area served by one or more units of general local government, local educational agencies, institutions of higher education, community-based organizations, community development corporations, nonprofit groups and organizations serving Native Americans, and other private nonprofit organizations or institutions engaged in public service.

"(19) The term 'public assistance' means Federal, State, or local government cash payments for which eligibility is determined by a need or income test.

"(20) The term 'public service' includes, but is not limited to, work, including part-time work, in such fields as environmental quality, health care, education, child care, public safety, crime prevention and control, prisoner rehabilitation, transportation, rec-

reation, maintenance of parks, streets, and other public facilities, solid waste removal, pollution control, housing and neighborhood improvements, rural development, conservation, beautification, veterans outreach, and other fields of human betterment and community improvement.

"(21) The term 'recipient' means any person, organization, unit of government, corporation, or other entity receiving financial assistance under this Act whether directly from the Secretary, or through another recipient by subgrant, contract, subcontract, agreement, or otherwise.

"(22) The term 'Secretary' means the Secretary of Labor.

"(23) The term 'State' includes the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, Northern Marianas, American Samoa, and the Trust Territory of the Pacific Islands.

"(24) The term 'underemployed persons' means—

"(A) persons who are working part time but seeking full-time work;

"(B) persons who are working full time but receiving wages below the higher of either (i) the poverty level determined in accordance with criteria as established by the Director of the Office of Management and Budget or (ii) 70 per centum of the lower living standard income level;

"(C) in cases permitted by regulations of the Secretary, persons who are institutionalized or receiving services in a sheltered workshop, prison, hospital, or similar institution, or in community care; or

"(D) adults who, or whose families receive, supplemental security income or money payments pursuant to a State plan approved under title I, IV, X, or XVI of the Social Security Act or would, as defined in regulations to be issued by the Secretary, be eligible for such payments but for the fact that both parents are present in the home (i) who are determined by the Secretary of Labor, in consultation with the Secretary of Health, Education, and Welfare, to be available for work and (ii) who are either persons without jobs, or persons working in jobs providing insufficient income to support their families without welfare assistance.

"(25) The term 'unemployed persons' means persons who are without jobs and who want and are available for work, and shall, for purposes other than allocation formulas, include persons who are institutionalized or receiving services in a sheltered workshop, prison, hospital, or similar institution, or in community care. The determination of whether persons are without jobs shall be made in accordance with the criteria used by the Bureau of Labor Statistics of the Department of Labor in defining persons as unemployed, but such criteria shall not be applied differently on account of a person's previous employment.

"(26) The term 'unit of general local government' means any city, municipality, county, town, township, parish, village, or other general purpose political subdivision which has the power to levy taxes and spend funds, as well as general corporate and police powers.

"(27) The term 'veterans outreach' means that veterans outreach services program carried out under subchapter IV of chapter 3 of title 38, United States Code, with full utilization of veterans receiving educational assistance or vocational rehabilitation under chapter 31 or 34 of such title 38, and the services described in section 305 of this Act.

"SECRETARY'S AUTHORITY

"SEC. 126. (a) The Secretary may, in accordance with chapter 5 of title 5, United States Code, prescribe such rules, regulations, guidelines, and other published interpretations under this Act as he deems necessary. Rules, regulations, guidelines, and other published interpretations or orders may include adjustment authorized by section 204 of the Intergovernmental Cooperation Act of 1968. For purposes of chapter 5 of such title any condition or guideline for receipt of financial assistance shall be deemed a rule to which section 553 applies. All such rules, regulations, guidelines, and other published interpretations or orders under this Act shall be published in the Federal Register at least thirty days prior to their effective date. Copies of all such rules, regulations, guidelines, and other published interpretations or orders shall be transmitted to the appropriate committees of the Congress at the same time and shall contain with respect to each material provision of such rules, regulations, guidelines, and other published interpretations or orders, citations to the particular substantive section of law which is the basis therefor.

"(b) The Secretary may make such grants, contracts, or agreements, establish such procedures and make such payments, in installments and in advance or by way of reimbursement, or otherwise allocate or expend funds made available under this Act, as deemed necessary to carry out the provisions of this Act, including (without regard to the provisions of section 4774(d) of title 10, United States Code) expenditures for construction, repairs, and capital improvements, and including necessary adjustments in payments on account of overpayments or underpayments.

"REPORTS

"SEC. 127. (a) The Secretary shall make such reports and recommendations to the President as the Secretary deems appropriate pertaining to employment and occupational requirements, resources, use, and training, and the President shall transmit to the Congress a report on the same topics not later than April 1 of each year. The first such report submitted after the effective date of the Comprehensive Employment and Training Amendments of 1978 shall include recommendations with respect to necessary legislative or administrative changes required to simplify on-the-job training contracting procedures under title II.

"(b) The Secretary and the Secretary of Health, Education, and Welfare shall report to the Congress on the extent to which social services, community colleges, area vocational and technical schools and other vocational education agencies and institutions, and vocational rehabilitation agencies are being utilized to carry out training programs supported in whole or in part under this and related Acts; the extent to which administrative steps have been taken or are being taken to encourage the use of such facilities and institutions and agencies in the carrying out of the provisions of this Act; and any further legislation that may be required to assure effective coordination and utilization of such facilities and agencies to the end that all federally supported employment and training, vocational education, and vocational rehabilitation programs can more effectively accomplish the objective of providing employment and training opportunities to all persons needing such employment and training.

"(c) The Secretary shall transmit to the Congress, as a part of the report required by subsection (a), a detailed report setting forth the public service employment activities conducted under this Act and information on the extent to which (1) participants in such activities subsequently secure and retain public or private employment or participate in training or employability development programs, and (2) segments of the population of unemployed persons are provided public service opportunities. No later than March 1, 1980, the Secretary shall report to Congress proposals for the integration and consolidation of the programs established by part A of title IV and title VII with the program established by title II.

"(d) The Secretary shall transmit to the Congress, as a part of the report required by subsection (a), a detailed report on the evaluations and pilot and demonstration projects conducted with funds made available under this Act, including employment service/prime sponsor demonstration projects.

"(e) The Secretary shall in consultation with the Director of the Office of Management and Budget, submit a report once each quarter to the Congress on efforts being taken to reduce paperwork and reporting and comply with the requirements of the Federal Reports Act and management directives of the Office of Management and Budget.

"(f) The Secretary may require each prime sponsor to prepare, and make available to the public, periodic reports on its activities under the Act. Such reports shall contain such information as the Secretary may require.

"SERVICES AND PROPERTY

"SEC. 128. The Secretary is authorized, in carrying out functions and responsibilities under this Act, to accept purchase, or lease in the name of the Department, and employ or dispose of in furtherance of the purposes of this Act, or any title thereof, any money or property, real, personal, or mixed, tangible or intangible received by gift, devise, bequest, or otherwise; and to accept voluntary and uncompensated services, notwithstanding the provisions of section 3679(b) of the Revised Statutes of the United States.

"UTILIZATION OF SERVICES AND FACILITIES

"SEC. 129. (a) In addition to such other authority as the Secretary may have, the Secretary is authorized, in the performance of functions under this Act, and to the extent permitted by law, to utilize the services and facilities of departments, agencies, and establishments of the United States. The Secretary is also authorized to accept and utilize the services and facilities of the agencies of any State or political subdivision of a State, with its consent.

"(b) The Secretary shall carry out responsibilities under this Act through the utilization, to the extent appropriate, of all resources for skill development available in industry, labor, public and private educational and training institutions, vocational rehabilitation agencies, and other State, Federal, and local agencies and other appropriate public and private organizations and facilities, with their consent.

"INTERSTATE AGREEMENTS

"SEC. 130. In the event that compliance with provisions of this Act would be enhanced by cooperative agreements between States, the consent of Congress is hereby given to such States to enter into such compacts and agreements to facilitate such compliance, subject to the approval of the Secretary.

"PROHIBITION AGAINST POLITICAL ACTIVITIES

"SEC. 131. (a) The Secretary shall not provide financial assistance for any program under this Act which involves political activities.

"(b) Neither the program, the funds provided therefor, nor personnel employed in the administration thereof, shall be, in any way or to any extent, engaged in the conduct of political activities in contravention of chapter 15 of title 5, United States Code.

"NONDISCRIMINATION

"SEC. 132. (a) No person in the United States shall on the ground of race, color, religion, sex, national origin, age, handicap, or political affiliation or belief be excluded from participation in, be denied the benefits of, be subjected to discrimination under, or be denied employment in the administration of or in connection with any program or activity funded in whole or in part with funds made available under this Act.

"(b) Whenever the Secretary determines that a recipient of financial assistance has failed to comply with subsection (a) or an applicable regulation, the Secretary, in addition to exercising the powers and functions provided in section 106, is authorized (1) to refer the matter to the Attorney General with a recommendation that had an appropriate civil action be instituted; (2) to exercise the powers and functions provided by title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d); or (3) to take such other action as may be provided by law. In any case in which the Secretary receives a complaint from any interested person or organization under section 106 with respect to an alleged violation of subsection (a) of this section, the Secretary shall make the determination referred to in the preceding sentence no later than 120 days after receiving such complaint.

"(c) When a matter is referred to the Attorney General pursuant to subsection (b), or whenever the Attorney General has reason to believe that a recipient is engaged bezzles, willfully misapplies, steals, or obtains by fraud any this section, the Attorney General may bring a civil action in any appropriate United States district court for such relief as may be appropriate, including injunctive relief.

"(d) In addition to other remedies, the Secretary is authorized to enforce the provisions of subsection (a) dealing with discrimination on the basis of race, color, religion, sex, national origin, age, handicap, or political affiliation or belief, in accordance with section 602 of the Civil Rights Act of 1964. Section 603 of such Act shall apply with respect to any action taken by the Secretary to enforce such provisions of such subsection. This section shall not be construed as affecting any other legal remedy that a person may have if that person is excluded from participation in, denied the benefits of, subjected to discrimination under, or denied employment in the administration of or in connection with any program or activity receiving assistance under this Act.

"(e) No participant under this Act shall be discriminated against by reason of citizenship. Participation shall be open to citizens and nationals of the United States, lawfully admitted permanent resident aliens, and lawfully admitted refugees and parolees.

"(f)(1) The Secretary shall provide a focus for the employment and training of handicapped individuals under this Act, and shall review, on a periodic basis, the adequacy of outreach, training, placement, and advancement practices with respect to handicapped individuals by each prime sponsor pursuant to section 103(b)(7) and shall insure that the special needs of such individuals are being met.

"(2) The Secretary shall include in each annual report pursuant to section 127(a) a complete evaluation of the conduct of and achievements in outreach, training, placement, and advancement practices with respect to handicapped individuals by prime sponsors pursuant to section 103(b)(7), including a comparison of such practices and achievements with those of the two preceding years.

"RECORDS, AUDITS, AND INVESTIGATIONS

"SEC. 133. In order to assure that funds provided under this Act are used in accordance with its provisions—

"(a) Every recipient of funds under this Act shall make, keep, and preserve such records as the Secretary shall require with regard to each employee and each participant. Such records, including periodic reports, audits, and examinations, shall be preserved for such time as the Secretary establishes and shall be made available to the Secretary at such time and in such form, including periodic reports, audits, and examinations as the Secretary may require by regulation or order.

"(b) The Secretary may investigate such facts, conditions, practices, or other matters the Secretary deems necessary to determine whether any recipient of funds or any official of such recipient has violated any provision of this Act or of the regulations. Such investigations may include, but need not be limited to, inspecting all records of the recipient (including making certified copies thereof), questioning employees, and entering any premises or onto any site in which any part of the recipient's program is conducted.

"(c) For the purpose of any hearing or investigation authorized under this Act, the provisions of section 9 of the Federal Trade Commission Act, 15 U.S.C. 49, relating to the attendance of witnesses and the production of books, papers, and documents) are made applicable to the Secretary of Labor.

"CRIMINAL PROVISIONS

"SEC. 134. (a) Chapter 31 of title 18, United States Code, is amended by striking out section 665 and inserting in lieu thereof the following:

"'THEFT OR EMBEZZLEMENT FROM EMPLOYMENT AND TRAINING FUNDS: IMPROPER INDUCEMENT

"'SEC. 665. (a) Whoever, being an officer, director, agent, or employee of, or connected in any capacity with any agency receiving financial assistance under the Comprehensive Employment and Training Act of 1973 embezzles, willfully misapplies, steals, or obtains for fraud any of the moneys, funds, assets, or property which are the subject of a grant or contract of assistance pursuant to this Act shall be fined not more than $10,000 or imprisoned for not more than two years, or both: but if the amount so embezzled, misapplied, stolen, or obtained by fraud does not exceed $100, such person shall be fined not more than $1,000, or imprisoned not more than one year, or both.

"'(b) Whoever, by threat of procuring dismissal of any person from employment or of refusal to employ or refusal to renew a contract of employment in connection with a grant or contract of assistance under the Comprehensive Employment and Training Act of 1973, induces any persons to give up any money or thing of any value to any person (including such grantee agency) shall be fined not more than $1,000 or imprisoned not more than one year, or both.

"'FRAUD AND OBSTRUCTION IN EMPLOYMENT AND TRAINING PROGRAMS

"'SEC. 665a. (a) Any person who shall neglect or refuse to attend and testify, or to answer any lawful inquiry or to produce documentary evidence, if in his power to do so, in obedience to the subpena or lawful requirement of the Secretary, shall be guilty of an offense and upon conviction thereof by a court of competent jurisdiction shall be punished by a fine of not less than $1,000 nor more than $5,000, or by imprisonment for not more than one year, or by both such fine and imprisonment.

"'(b) Any person who shall willfully make, or cause to be made, any false entry or statement of fact in any report required to be made under this Act, or who shall willfully make, or cause to be made, any false entry in any account, record, or memorandum kept by any recipient of funds under this Act, or who shall willfully neglect or fail to make, or to cause to be made, full, true, and correct entries in such accounts, records, or memorandums of all facts and transactions appertaining to the business of such recipients, or who shall willfully remove out of the jurisdiction of the United States, or willfully mutilate, alter, or by any other means falsify any documentary evidence of such recipient, or who shall willfully refuse to submit to the Secretary or to any of the Secretary's authorized agents, for the purpose of inspection and making copies, any documentary evidence of such recipient in such person's possession or within such person's control or who shall deny access to the Secretary or any of the Secretary's authorized agents who wish to examine, audit, inspect, or otherwise view the records, shall be deemed guilty of an offense against the United States, and shall be subject, upon conviction in any court of the United States of competent jurisdiction, to a fine of not less than $1,000 nor more than $5,000 or to imprisonment for not more than one year, or by both such fine and imprisonment.'

"(b) The analysis of chapter 31 is amended by adding at the end thereof the following new item:

"'665a. Fraud and obstruction in employment and training programs.'

"BONDING

"SEC. 135. Every officer, director, agent, or employee of a recipient of funds under this Act who handles funds or other property thereof shall be bonded to provide protection against loss by reason of acts of fraud or dishonesty on such person's part directly or through connivance with others. The Secretary shall establish the amount and other bonding requirements by regulation.

PART C—AUDITS, INVESTIGATIONS, AND COMPLIANCE

"PURPOSE; ESTABLISHMENT

"SEC. 151. In order to create an independent and objective unit—

"(1) to conduct and supervise audits and investigations relating to programs and operations under this Act;

"(2) to provide leadership and coordination and recommend policies for activities designed (A) to promote economy and efficiency in the administration of and (B) to prevent and detect fraud and abuse in, such programs and operations; and

"(3) to provide a means for keeping the Secretary and the Congress fully and currenty informed about problems and deficiencies relating to the administration of such programs and operations and the necessity for and progress of corrective action;

there is hereby established in the Office of the Secretary an Office of Audits, Investigations, and Compliance.

"APPOINTMENT OF OFFICERS

"SEC. 152. (a) There shall be at the head of the Office a Director who shall be appointed by the Secretary without regard to political affiliation and solely on the basis of integrity and demonstrated ability in accounting, auditing, financial analysis, law, management analysis, public administration, or investigations. The Director shall report to and be under the general supervision of the Secretary or, to the extent such authority is delegated, the officer next in rank below the Secretary, but shall not be under the control of or subject to supervision by, any other officer of the Department.

"(b) There shall also be in the Office, a Deputy Director appointed by the Secretary, without regard to political affiliation and solely on the basis of integrity and demonstrated ability in accounting, auditing, financial analysis, law, management analysis, public administration, or investigations. The Deputy shall assist the Director in the administration of the Office and shall, during the absence or temporary incapacity of the Director, or during a vacancy in that office, act as Director.

"(c) For the purposes of section 7324 of title 5, United States Code, no Director or Deputy Director shall be considered to be an employee who determines policies to be pursued by the United States in the nationwide administration of Federal laws.

"(d) The Director shall, in accordance with applicable laws and regulations governing the civil service—

"(1) appoint an Assistant Director for Auditing who shall have the responsibility for supervising the performance of auditing activities relating to programs and operations under this Act; and

"(2) appoint an Assistant Director for Investigations who shall have the responsibility for supervising the performance of investigative activities relating to such programs and operations.

"DUTIES AND RESPONSIBILITIES

"SEC. 153. (a) It shall be the duty and responsibility of the Director, with respect to the programs and operations under this Act—

"(1) to supervise, coordinate, and provide policy direction for auditing and investigative activities relating to such programs and operations;

"(2) to recommend policies for, and to conduct, supervise, or coordinate other activities carried out or financed under this Act for the purpose of promoting economy and efficiency in the administration of, or preventing and detecting fraud and abuse in, such programs and operations.

"(3) to recommend policies for, and to conduct, supervise, or coordinate relationships between the Department and other Federal agencies, State and local governmental agencies, and nongovernmental entities with respect to (A) all matters relating to the promotion of economy and efficiency in the administration of, or the prevention and detection of fraud and abuse in, such programs and operations, or (B) the identification and prosecution of participants in such fraud or abuse; and

"(4) to keep the Secretary and the Congress informed, by means of the reports required by section 154 and otherwise, concerning fraud and other serious problems, abuses, and deficiencies relating to the administration of such programs and operations, to recommend corrective action concerning such problems, abuses, and deficiencies, and to report on the progress made in implementing such corrective action.

"(b) In carrying out the responsibilities specified in subsection (a)(1), the Director shall have authority to establish standards for the use of outside auditors and to take other appropriate steps to insure the competence and independence of such auditors.

"(c) In carrying out the duties and responsibilities provided by this Act, the Director shall give particular regard to the activities of the Comptroller General of the United States with a view to avoiding duplication and insuring effective coordination and cooperation.

"(d) In carrying out the duties and responsibilities provided by this Act, the Director shall report expeditiously to the Secretary whenever the Director has reasonable grounds to believe there has been a violation of Federal criminal law.

"REPORTS

"SEC. 154. (a) The Director shall, not later than April 30 and October 31 of each year, prepare and submit to the Congress semiannual reports summarizing the activities of the Office during the immediately preceding 6-month periods ending March 31 and September 30. Such reports shall include, but need not be limited to—

"(1) a description of significant problems, abuses, and deficiencies relating to the administration of programs and operations under this Act disclosed by such activities during the reporting period;

"(2) a description of the recommendations for corrective action made by the Office during the reporting period with respect to significant problems, abuses, or deficiencies identified pursuant to paragraph (1);

"(3) an identification of each significant recommendation described in previous semiannual reports on which corrective action has not been completed;

"(4) a summary of matters referred to prosecutive authorities and the prosecutions and convictions which have resulted;

"(5) a summary of each report made to the Secretary under subsection (c) during the reporting period;

"(6) a summary of each report made to the Secretary under section 155(b)(2) during the reporting period; and

"(7) a listing of each audit and investigative report completed by the Office during the reporting period.

"(b) Notwithstanding any other provision of law, the reports, information, or documents required by or under this section shall be transmitted to the Secretary and the Congress, or committees or subcommittees thereof, by the Director without further clearance or approval. The Director shall, insofar as feasible, provide copies of the reports required under subsection (a) to the Secretary thirty days in advance of the due date for their submission to Congress to provide a reasonable opportunity for comments of the Secretary to be appended to the reports when submitted to Congress.

"(c) The Director shall report immediately to the Secretary whenever the Director becomes aware of particularly serious or flagrant problems, abuses, or deficiencies relating to the administration of programs and operations under this Act. The Deputy and Assistant Directors shall have particular responsibility for informing the Director of such problems, abuses, and deficiencies.

"AUTHORITY; ADMINISTRATION PROVISIONS

"SEC. 155. (a) In addition to the authority otherwise provided by this Act, the Director, in carrying out the provisions of this part, is authorized—

"(1) to have access to all records, reports, audits, reviews, documents, papers, recommendations, or other material which relate to programs and operations under this Act;

"(2) to make such investigations and reports relating to the administration of such programs and operations as are, in the judgment of the Director, necessary or desirable;

"(3) to request such information or assistance as may be necessary for carrying out the duties and responsibilities provided by this part from any Federal, State, or local governmental agency or unit thereof;

"(4) to require by subpena the production of all information, documents, reports, answers, records, accounts, papers, and other data and documentary evidence necessary in the performance of the functions assigned by this part, which subpena, in the case of contumacy or refusal to obey, shall be enforceable by order of any appropriate United States district court: *Provided*, That procedures other than subpenas shall be used by the Director to obtain documents and information from Federal agencies;

"(5) to have direct and prompt access to the Secretary when necessary for any purpose pertaining to the performance of functions and responsibilities under this part;

"(6) to select, appoint, and employ such officers and employees as may be necessary for carrying out the functions, powers, and duties of the Office subject to the provisions of title 5, United States Code, governing appointments in the competitive service, and the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates;

"(7) to obtain services as authorized by section 3109 of title 5, United States Code, at daily rates not to exceed the equivalent rate prescribed for grade GS-18 of the General Schedule by section 5332 of title 5, United States Code;

"(8) to the extent and in such amounts as may be provided in advance by appropriations Acts, to enter into contracts and other arrangements for adults, studies, analyses, and other services with public agencies and with private persons, and to make such payments as may be necessary to carry out the provisions of this part.

"(b)(1) Upon request of the Director for information or assistance under subsection (a)(3), the head of any Federal agency involved shall, insofar as is practicable and not in contravention of any existing statutory restriction or regulation of the Federal agency from which the information is requested, furnish to the Director or to an authorized designee, such information or assistance.

"(2) Whenever information or assistance requested under subsection (a)(1) or (a)(3) is, in the judgment of the Director unreasonably refused or not provided, the Director shall report the circumstances to the Secretry without delay.

"(3) In the event any record or other information requested by the Director under subsection (a)(1) or (a)(3) is not considered to be available under the provisions of section 552a(b)(1), (3), or (7) of title 5, United States Code, such record or information shall be available to the Director in the same manner and to the same extent it would be available to the Comptroller General.

"(c) The Secretary shall provide the Office with appropriate and adequate office space at central and field office locations of Department together with such equipment, office supplies, and communications facilities and services as may be necessary for the operation of such offices, and shall provide necessary maintenance services for such offices and the equipment and facilities located therein.

"TRANSFER OF FUNCTIONS

"SEC. 156. (a) At such time as there is established within the Department of Labor an Office of Inspector General, the functions of the Office of Audits, Investigations, and Compliance, shall be transferred to and vested in the Inspector General.

"(b) The personnel, assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds employed, held, used, arising from, available or to be made available, of the Office shall be transferred to the Office of Inspector General at the time of any transfer under subsection (a).

"(c) Personnel transferred pursuant to subsection (b) shall be transferred in accordance with applicable laws and regulations relating to the transfer of functions except that the classification and compensation of such personnel shall not be reduced for one year after such transfer.

"(d) Upon completion of the transfer pursuant to this section, the Office shall lapse. Any person who, on the effective date of this Act, held a position compensated in accordance with the General Schedule, and who, without a break in service, is appointed in the Office of Inspector General to a position having duties comparable to those performed immediately preceding such appointment shall continue to be compensated in the new position at not less than the rate provided for the previous position, for the duration of service in the new position.

"DEFINITIONS

"SEC. 157. As used in this part—

"(1) the term 'Director' means the Director of the Office;

"(2) the term 'Deputy' means the Deputy Director of the Office;

"(3) the term 'Office' means the Office of Audits, Investigations, and Compliance; and

"(4) the term 'Federal agency' means an agency as defined in section 552(e) of title 5, United States Code, but shall not be construed to include the General Accounting Office.

"OFFICE OF MANAGEMENT ASSISTANCE

"SEC. 158. The Secretary shall establish, in the office of the Secretary, an Office of Management Assistance and shall assign to such

office such especially qualified accountants, management specialists, and other professionals as may be necessary and available to provide management assistance to any prime sponsor—

"(1) seeking the service of such office on its own initiative to assist it in overcoming problems in the management, operation, or supervision of any program or project under this Act;

"(2) identified, pursuant to a complaint investigation, internal audit, or audit or investigation conducted by the Office of Audits, Investigations, and Compliance, or by any entity to which are transferred the functions of such office, as not being in compliance with any important requirement of this Act, of regulations issued thereunder, or of the comprehensive employment and training plan.

Services provided under this section shall be on a reimbursable or nonreimbursable basis, as determined by the Secretary, and shall be allocated in a manner to assure equitable but effective distribution thereof. The Secretary shall periodically publish any proposals for corrective action made by the office which may be useful to other prime sponsors.

"TITLE II—COMPREHENSIVE EMPLOYMENT AND TRAINING SERVICES

"PART A—FINANCIAL ASSISTANCE PROVISIONS

PURPOSE OF PROGRAM

"SEC. 201. It is the purpose of this title to establish programs to provide comprehensive employment and training services throughout the Nation. Such programs shall include the development and creation of training, upgrading, retraining, education, and other services needed to enable individuals to secure and retain employment at their maximum capacities so as to increase their earned incomes.

"ALLOCATION OF FUNDS

"SEC. 202. (a)(1) From the amount available for purposes of this title—

"(A) 60 per centum of such amount shall be allocated in accordance with the provisions of paragraph (2); and

"(B) 30 per centum of such amount shall be allocated in accordance with the provisions of paragraph (3).

"(2)(A) Subject to the provisions of subparagraph (B)—

"(i) 50 per centum of the amount allocated under this paragraph shall be allocated on the basis of the amount allocated to the prime sponsor under this paragraph (or under the comparable provision of this Act prior to the effective date of the Comprehensive Employment and Training Amendments of 1978) in the fiscal year prior to the year for which the determination is made compared to the amount so allocated to all prime sponsors in that year;

"(ii) 37½ per centum of the amount allocated under this paragraph shall be allocated on the basis of the relative number of unemployed persons within jurisdiction of the prime sponsor as compared to such numbers in all such jurisdictions;

"(iii) 12½ per centum of the amount allocated under this paragraph shall be allocated on the basis of the relative number of adults in families with an annual income below the low-income level within the jurisdiction of the prime sponsor compared to such total numbers in all such jurisdictions; and

"(iv) not less than $2,000,000 shall be allocated among Guam, the Virgin Islands, the Northern Marianas, American Samoa, and the Trust Territory of the Pacific Islands, in accordance with their respective needs.

"(B) No prime sponsor shall be allocated an amount which is in excess of 150 per centum of the amount received by the area served by that prime sponsor in the fiscal year immediately preceding the fiscal year for which the determination is made, except that, if the amount so allocated is less than 50 per centum of the amount to which such prime sponsor is entitled under subparagraph (A) in the fiscal year for which a determination was made, then such allocation shall be increased to 50 per centum of the amount of such entitlement.

"(3) The amount allocated under this paragraph shall be allocated among prime sponsors in accordance with the number of unemployed persons residing in areas of substantial unemployment within the jurisdiction of the prime sponsor compared to the number of unemployed persons residing in all such areas.

"(b) Three per centum of the funds available for this title shall be used only for supplemental vocational education assistance under section 204.

"(c) One-half of 1 per centum of the amount allocated under this title shall be available to the Secretary to be allocated in the same manner as provided under subsection (a) to States for the costs of the State employment and training council incurred in carrying out the provisions of section 110, except that no State shall receive an allocation of less than $50,000. If any State does not need the amount allocated under this subsection for any fiscal year, that amount shall be available for the Governor's coordination and special services under section 105.

"(d) Two per centum of the amounts available for this title shall be available to each Governor in the same proportion as that State's allocation under subsection (a) for the Governor's coordination and special services under section 105, and, where deemed necessary by the Governor, for additional support of State employment and training councils.

"(e)(1) Eighty-five per centum of the remainder of the funds shall be available in the Secretary's discretion to be distributed among prime sponsors (or where a prime sponsor's comprehensive employment and training plan has not been approved, an area served by the Secretary under the authority in section 102.) The Secretary shall first utilize such funds to assure that each prime sponsor is provided with (A) an amount for any fiscal year beginning on or after October 1, 1979, equal to 90 percent of the funds allocated to the prime sponsor under subsection (a)(2) of this section for the preceding fiscal year, or (B) an amount for the fiscal year ending September 30, 1979, equal to 90 per centum of the sum of the funds available for expenditure during the fiscal year ending September 30, 1978, by such prime sponsor under sections 103 (a)(2), (f), and (g), and 202(a) (as in effect prior to the effective date of the Comprehensive Employment and Training Amendments of 1978). In utilizing such funds, the Secretary shall provide continued support for concentrated employment program grantees serving rural areas having high levels of unemployment, shall take into account the need for continued funding of programs of demonstrated effectiveness, and shall use such funds to encourage, after consultation with and receiving recommendations from the Governor of the appropriate State, voluntary consortia (formed under section 101(a)(3)) where the Secretary determines, pursuant to regulations, that such consortia demonstrate advantages in delivering employment and training services to substantial portions of functioning labor market areas.

"(2) Not more than 15 per centum of the remainder shall be allocated among the prime sponsors within the jurisdiction of those standard metropolitan statistical areas and central cities for which current population surveys were used to determine annual average rates of unemployment prior to, but not after, January 1, 1978, in proportion to the extent to which such prime sponsors allocations under subsection (a) are reduced as a result of termination of the use of such surveys. This provision shall be in effect until such time as the National Commission on Employment and Unemployment Statistics makes its report to Congress.

"(f) As soon as practicable after funds are appropriated to carry out this Act for any fiscal year, the Secretary shall publish in the Federal Register the allocations made pursuant to this section.

"(g) Prime sponsors are authorized to use funds allocated under this title to support prime sponsor planning councils established pursuant to section 109.

"CONDITIONS FOR RECEIPT OF FINANCIAL ASSISTANCE

"SEC. 203. (a) The Secretary shall not provide financial assistance for any fiscal year to a prime sponsor unless the prime sponsor submits a satisfactory comprehensive employment and training plan pursuant to section 103.

"(b) Not more than 4 per centum of each prime sponsor's allocation under section 202(a) may be used for programs and activities under part C of this title.

"(c)(1) The Secretary shall not provide financial assistance for any fiscal year to a prime sponsor unless the prime sponsor provides assurances that (consistent with needs identified in the prime sponsor's plan submitted under section 103(a)) it shall make agreements with State or local educational agencies or postsecondary educational institutions for the conduct of employment and training programs, which programs may consist of—

"(A) vocational training designed to prepare individuals for employment;

"(B) instruction in basic cognitive skills necessary to obtain employment or pursue further education or training designed to prepare individuals for employment;

"(C) employment of persons in schools controlled by such agencies or in postsecondary institutions; and

"(D) such other employment and training activities as may be consistent with the purposes and provisions of this title.

"(2) Each such agreement entered into under this subsection shall describe in detail the employment opportunities and appropriate educational, training, or other services to be provided, and shall contain provisions to assure that funds utilized pursuant to the agreement will not supplant State or local funds expended for the same purpose.

"(3) In the event a prime sponsor is unable to reach agreements with the appropriate educational agencies or institutions, or in the event such agencies or institutions are dissatisfied with the utilization of their facilities proposed by the prime sponsor, either may request the Secretary to review such arrangements and the Secretary, after affording an opportunity for a hearing and taking into consideration such factors as he considers relevant, may take such action as he deems appropriate within 90 days after receiving such a request.

"SUPPLEMENTAL VOCATIONAL EDUCATION ASSISTANCE

"SEC. 204. (a) From the funds available to him for this section, the Secretary shall make grants to Governors to provide financial assistance, through State vocational education boards, to provide needed vocational education services in areas served by prime sponsors.

"(b) All of the sums available to carry out this section shall be allocated among the States in the manner provided for allocating funds under section 202(a).

"(c)(1) Funds available under this section shall be used only for providing vocational education and services to participants in programs under this title in accordance with an

agreement between the State vocational education board and the prime sponsor.

"(2) The State vocational education board, prior to making any agreement with a prime sponsor as provided in paragraph (1), shall consult with and obtain the advice and comment of the designated representatives of the State agencies and councils which are required to be involved in the formulation of the five-year State plan for vocational education pursuant to section 107(a)(1) of the Vocational Education Act of 1963.

"PART B—SERVICES FOR THE ECONOMICALLY DISADVANTAGED

"DESCRIPTION OF PROGRAM

"SEC. 211. Comprehensive employment and training services may include, but need not be limited to, the following:

"(1) job search assistance, including orientation, counseling, and referral to appropriate employment training or other opportunities;

"(2) outreach to make persons aware of the availability of, and to encourage them to use, employment and training services;

"(3) assessment of the individual's needs, interests, and potential in the labor market;

"(4) education and institutional skill training to prepare persons to enter the labor market, or to qualify for more productive job opportunities and increased earnings;

"(5) on-the-job training;

"(6) transitional entry-level public service employment opportunities or work experience;

"(7) payments or other inducements to public or private employers to expand job opportunities;

"(8) services to individuals to enable them to retain employment;

"(9) payment of allowances to persons in training for which they receive no remuneration, and payment of such allowances for transportation, subsistence, or other expenses incurred in training or employment;

"(10) supportive services, including necessary health care, child care, residential support, or assistance in securing bonds, needed to enable individuals to participate in employment and training;

"(11) development of labor market information;

"(12) job development and related activities such as job restructuring designed to make employment opportunities more responsive to the needs of economically disadvantaged persons;

"(13) displaced homemaker employment assistance programs as described in section 307;

"(14) training, employment opportunities, and related services conducted by community based organizations; and

"(15) any programs or activities authorized by part A of title III, title IV, and title VII of this Act.

"LIMITATIONS ON USE OF FUNDS

"SEC. 212. (a) No prime sponsor shall use more than 50 per centum of the funds allocated to it under section 202(a) to pay wages for public service employment.

"(b)(1) Public service employment under this part—

"(A) shall be designed to lead to unsubsidized employment;

"(B) shall be entry level;

"(C) shall be combined with training and supportive services if such training and services are reasonably available in the area; and

"(D) shall be available only to eligible participants who have been employed for not more than two hundred hours during the preceding ten weeks unless such employment is in connection with a program supported under this title.

"(2) Work experience programs conducted under this part, except for in-school youth, shall—

"(A) be designed to lead to unsubsidized employment, and

"(B) be subject to the limitation on duration specified in section 121(c)(2),

unless the prime sponsor's plan as approved by the Secretary states that the lack of alternative job opportunities in the area makes such progress and duration impractical.

"ELIGIBILITY FOR PARTICIPATION

"SEC. 213. A person shall be eligible to participate in a program receiving financial assistance under this part only if such person is economically disadvantaged and either unemployed, underemployed, or in school.

"PART C—UPGRADING AND RETRAINING

"PROGRAM AUTHORIZED

"SEC. 221. (a) Pursuant to regulations of the Secretary, prime sponsors may conduct occupational upgrading programs, including supportive services, through agreements with public and private employers for employees of such employers. Individuals eligible for such programs shall be those operating at less than their full skill potential, primarily those in entry level positions or positions with little normal advancement opportunities. In any program receiving financial assistance under this section—

"(1) the positions for which employees are being upgraded shall be positions not regularly available to entry level employees, and for which adequately trained persons are not available;

"(2) the selection of employees for upgrading shall be based upon potential and the lack of availability for advancement in a normal promotional line;

"(3) the education and skill training content of the upgrading program shall provide employees with a reasonable progression resulting in qualification for a recognized position of greater skill, responsibility, remuneration, or career advancement in the service of that employer;

"(4) the training period for upgrading shall be reasonable and consistent with periods customarily required for comparable training;

"(5) adequate personnel, attendance and progress records shall be maintained;

"(6) the program shall be designed, to the extent feasible, so that additional vacancies are created for new entry level employees;

"(7) the employees shall receive such wages, including periodic increases, as the Secretary deems reasonable, considering such factors as industry practice and individual proficiency, but not less than received before upgrading; and

"(8) successful completion shall be expected to result in employment with the employer in the occupation for which he or she has been upgraded and at not less than prevailing wages.

"(b)(1) Pursuant to regulations of the Secretary, prime sponsors may conduct retraining programs, including supporting services, directly or through agreements with public and private employers or other organizations or agencies.

"(2) Entry into retraining programs shall be only for individuals who have previously received a bona fide notice of impending layoff, and who are determined, pursuant to regulations of the Secretary, to have little opportunity to be reemployed in the same or equivalent occupation or skill level within the labor market area.

"(3) Retraining programs shall meet such standards as the Secretary shall establish by regulation.

"(c) If upgrading or retraining is for or from jobs covered by collective bargaining agreements, agreements with employers to carry out such program shall have the concurrence of labor organizations representing employees in those jobs.

"TITLE III—SPECIAL FEDERAL RESPONSIBILITIES

"PART A—SPECIAL NATIONAL PROGRAMS AND ACTIVITIES

"SPECIAL PROGRAMS AND ACTIVITIES

"SEC. 301. (a) The Secretary shall use funds available under this title to provide additional employment and training services as authorized under title II to segments of the population that are in particular need of such services, including youth, offenders, handicapped individuals, single parents, persons of limited English-speaking ability, older workers, and other persons which the Secretary determines have particular disadvantages in the labor market. The Secretary shall take into account the need for continued funding of programs of demonstrated effectiveness.

"(b) With respect to programs for persons of limited English-speaking ability under this Act, the Secretary shall establish appropriate procedures to ensure that participants are provided with employment and training and related assistance and supportive services (where feasible, at times designed to meet the needs of individuals unable to attend during normal working hours) designed to increase the employment and training opportunities for unemployed and underemployed persons of limited English-speaking ability, including (1) the teaching of occupational skills in the primary language of such persons for occupations which do not require a high proficiency in English, and (2) developing new employment opportunities for limited English-speaking persons and opportunities for promotion within existing employment situations for such persons, including programs for the dissemination of appropriate information, and job placement, and counseling assistance, and the conduct of training and employment programs, in the primary language of such persons, as well as programs designed to increase the English-speaking ability of such persons.

"(c) The Secretary shall make financial assistance available to conduct a program for offenders to provide employment, training, and related assistance and supportive services (including basic education, drug addiction or dependency rehabilitation, health care, and other services) which will enable them to secure and obtain meaningful employment. Emphasis shall be placed upon serving offenders in contact with the criminal justice system or recently released from criminal justice custody or supervision, providing services that will be comprehensive, and ensuring that recipients of funds will coordinate their activities with other providers of employment and training assistance. Grants may also be provided to the States or prime sponsors for the establishment of units for planning and evaluation of correctional employment and training assistance to offenders. To ensure the objectives of this subsection, the Secretary may, wherever feasible, provide for appropriate arrangements with employers and labor organizations, appropriate parole, probationary and judicial authorities, and for the utilization of training equipment comparable to that currently used for the job in which training is furnished. To support such programs the Secretary shall develop information concerning the special needs of offenders for such services, including special studies regarding the incidence of unemployment among offenders and the means of increasing employment opportunity for offenders. As part of the reporting requirements under section 127(a), the Secretary shall also conduct an annual survey of prime sponsors and States receiving assistance under this Act for the purpose of assessing the scope and implementation of offender programs.

"(d) The Secretary shall carry out fully and effectively his responsibilities for the

assignment of assistant veterans employment representatives under section 2003 of title 38, United States Code, and the Secretary's other responsibilities under chapter 41 of such title and for the listing of all suitable employment openings with local offices of the State employment services by Federal contractors and subcontractors and providing for the affirmative action as required by section 2012(a) of such title.

"(e) The Secretary is also authorized to provide employment and training programs that—

"(1) are most appropriately administered from the national level, such as programs sponsored by public agencies or private organizations that conduct federally assisted activities in more than one State;

"(2) foster new or improved linkages between Federal, State, and local employment and training agencies and components of the private sector, such as the business community, organized labor, and community-based organizations;

"(3) provide continued support for programs of demonstrated effectiveness;

"(4) eliminate or reduce critical skill shortages in the Nation's labor force; or

"(5) serve those who become unemployed as a result of a large-scale loss of jobs in a locality, caused by such things as the closing of a facility, mass layoffs, or natural disasters.

"(f) Notwithstanding any other provisions of this Act, eligibility requirements for programs for workers age fifty-five and older, which were established under title X of the Public Works and Economic Development Act, and which thereafter have been funded under section 304 of this Act prior to the enactment of the Comprehensive Employment and Training Amendments of 1978, shall be those which applied when the programs were established under title X.

"(g) To the extent appropriate, programs financed under this part shall be coordinated with programs conducted by prime sponsors under this Act, and the Secretary shall notify such prime sponsors of the funding of an employment and training program under this part.

"NATIVE AMERICAN EMPLOYMENT AND TRAINING PROGRAMS

"SEC. 302. (a) The Congress finds that (1) serious unemployment and economic disadvantage exist among members of Indian, Alaskan Native, and Hawaiian Native communities; (2) there is a compelling need for the establishment of comprehensive employment and training programs for members of those communities, and Hawaiian Natives; (3) such programs are essential to the reduction of economic disadvantage among individual members of such communities and to the advancement of economic and social development in such communities consistent with their goals and life styles.

"(b) The Congress therefore declares that, because of the special relationship between the Federal Government and most of those to be served by the provisions of this section, (1) such programs can best be administered at the national level; (2) such programs shall be available to federally recognized Indian tribes, bands, and individuals, and to other groups and individuals of Native American descent such as, but not limited to, the Lummis in Washington, the Menominees in Wisconsin, the Klamaths in Oregon, the Oklahoma Indians, the Passamaquoddys and Penobscots in Maine, and Eskimos and Aleuts in Alaska, and Hawaiian Natives; and (3) such programs shall be administered in such a manner as to maximize the Federal commitment to support growth and development as determined by representatives of the communities and groups served by this part.

"(c)(1) In carrying out responsibilities under this section, the Secretary shall, wherever possible, utilize Indian tribes, bands, or groups (including Alaska Native villages or groups as defined in the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688)) having a governing body and such public and private nonprofit agencies as the Secretary determines will best serve Hawaiian Natives, for the provision of employment and training services under this title. To the extent the Secretary determines that such tribe, band, or group has demonstrated the capability to effectively administer a comprehensive employment and training program, he shall require such tribe, band, or group to submit to him a comprehensive plan meeting the requirements of section 103.

"(2) In carrying out his responsibilities under this section the Secretary shall make arrangements with prime sponsors and organizations (meeting requirements prescribed by the Secretary) serving nonreservation Indians for programs and projects designed to meet the needs of such Indians for employment and training and related services.

"(d) Whenever the Secretary determines not to utilize Indian tribes, bands, or groups for the provision of employment and training services under this section, the Secretary shall, to the maximum extent feasible, enter into arrangements for the provision of such services with public or private nonprofit agencies which meet with the approval of the tribes, bands, or groups to be served.

"(e) The Secretary is directed to take appropriate action to establish administrative procedures and machinery (including personnel having particular competence in this field) for the administration of Indian employment and training programs authorized under this Act.

"(f) Funds available for this section shall be expended for programs and activities consistent with the purposes of this part, including but not limited to such programs and activities carried out by eligible prime sponsors under other provisions of this Act.

"(g) For the purpose of carrying out this section, the Secretary shall reserve from funds available for this title an amount equal to not less than 3 percent of the amount allocated pursuant to section 202(a).

"(h) No provision of this section shall abrogate in any way the trust responsibilities of the Federal Government to Indian bands or tribes.

"MIGRANT AND SEASONAL FARMWORKERS EMPLOYMENT AND TRAINING PROGRAMS

"SEC. 303. (a) The Congress finds and declares that—

"(1) chronic seasonal unemployment and underemployment in the agricultural industry, substantially affected by recent advances in technology and mechanization, constitute a substantial portion of the Nation's rural employment and training problem and substantially affect the entire national economy; and

"(2) because of the special nature of certain farmworker employment and training problems such programs can best be administered at the national level.

"(b)(1) Funds available for this section shall be expended for programs and activities consistent with the purposes of this section, including but not limited to programs and activities carried out under other provisions of this Act.

"(2) In carrying out programs and activities under this section, the Secretary shall continue in operation any program which is in existence on the effective date of this paragraph and—

"(A) which is—

"(i) operated through the use of the facilities of any institution of higher education; and

"(ii) designed to assist migrant and seasonal farmworkers who are beyond the age of compulsory school attendance in the State in which the institution is located, through tutoring, counseling, and other similar assistance, in the completion of courses necessary to receive a high school diploma or its equivalent; or

"(B) which serves migrant and seasonal farmworkers who are enrolled in a full-time basis in the first academic year of an undergraduate program at any institution of higher education, and the dependents of migrant and reasonal farmworkers if such dependents are so enrolled, by—

"(i) aiding such individuals in carrying out the transition from secondary school to postsecondary school programs;

"(ii) generating motivation necessary for success in education beyond secondary school; and

"(iii) providing counseling, tutorial, and similar educational services designed to assist such individuals during their first academic year at such institution.

The Secretary shall continue the operation of any such program for so long as such program is consistent with the purposes of this section, as determined by the Secretary.

"(3) For the purpose of carrying out this section, the Secretary shall reserve from funds available for this title an amount equal to not less than 2.6 percent of the amount allocated pursuant to section 202(a). Of the funds reserved under this paragraph, such sums as may be necessary shall be used for the operation of the programs specified in subparagraph (A) and subparagraph (B) of paragraph (2).

"PROGRAMS FOR THE HANDICAPPED

"SEC. 304. (a)(1) The Congress finds and declares that due to the rapid implementation of programs to assist handicapped individuals mandated under the Education for All Handicapped Children Act and section 504 of the Rehabilitation Act of 1973, there is a need for people to provide the special supportive services and removal of architectural barriers required by these Acts.

"(2) The Congress further declares that the individuals to be served under this section represent a large percentage of the unemployed, and that these services will provide meaningful improvement of the lives of the handicapped individuals served.

"(b) The Secretary is authorized to establish programs throughout the Nation which shall train personnel to work with and assist handicapped individuals. These programs may be in any areas of training or education which provide individuals with skills necessary to train or provide assistance to handicapped persons, including, but not limited to, interpreters for the deaf and aides in classrooms to assist in the education of the handicapped.

"(c) The Secretary is authorized to take appropriate action to establish administrative procedures and machinery (including personnel having particular competence in this field) for the administration of programs authorized under this section.

"RELOCATION ASSISTANCE

"SEC. 305. (a) The Secretary is authorized to provide special relocation assistance for unemployed persons who desire such assistance through agreements with States, prime sponsors, or public or private agencies under this section.

"(b)(1) Relocation assistance may be provided in the form of loans or grants, or both, subject to such standards as the Secretary establishes.

"(2) Relocation assistance shall be available only to involuntarily unemployed indi-

viduals who cannot reasonably be expected to secure full-time employment in the community in which they reside, and have bona fide offers of employment (other than temporary or seasonal employment).

"VETERANS INFORMATION AND OUTREACH

"SEC. 306. The Secretary, in consultation and cooperation with the Administrator of Veterans Affairs and the Secretary of Health, Education, and Welfare, shall provide for an outreach and public information program utilizing, to the maximum extent, the facilities of the Departments of Labor and Health, Education, and Welfare and the Veterans' Administration to exercise maximum efforts to develop jobs and job training opportunities for disabled and Vietnam era veterans, and inform all such veterans about employment, job training, on-the-job training and educational opportunities under this Act, under title 38, United States Code, and other provisions of law; and inform prime sponsors, Federal contractors and subcontractors, Federal agencies, educational institutions, labor unions, and employers of their statutory responsibilities toward such veterans, and provide them with technical assistance in meeting those responsibilities.

"DISPLACED HOMEMAKER EMPLOYMENT ASSISTANCE PROGRAM

"SEC. 307. (a) The Secretary shall make available financial assistance to enable private nonprofit organizations and public agencies, including prime sponsors designated under section 101(c), to provide employment opportunities and appropriate training and supportive services to displaced homemakers. Such training and supportive services shall include, but need not be limited to—

"(1) job training, job readiness services, job counseling, job search, and job placement services;

"(2) outreach and information services, including information on available educational opportunities; and

"(3) referrals (through cooperative arrangements, to the maximum extent feasible) to health, financial management, legal, public assistance, and other appropriate supportive services in the community being served.

"(b) To the maximum extent feasible, activities supported under this section shall be coordinated with and supplement, but not supplant, activities supported under other titles of this Act and shall emphasize training and other employment related services for participants that are designed to enhance their employability and earnings. Programs shall concentrate on creating new jobs in the private sector for displaced homemakers in order to meet identified needs within the community.

"(c) To the maximum extent feasible, supervisory, technical, and administrative positions with the program shall be filled by displaced homemakers.

"(d) No funds available under this section shall be used for the purchase, construction, or major rehabilitation of facilities.

"(e) For the purposes of this section, the term 'displaced homemaker' means an individual who—

"(1) has been providing as a predominant activity unpaid services for family members for a substantial number of years;

"(2)(A) has been dependent on the income of another family member but is no longer supported by that income, (B) is receiving public assistance on account of dependent children in the home, or (C) is receiving spousal support; and

"(3) is unemployed or underemployed and is experiencing difficulty in obtaining or upgrading employment.

"(f) For the purposes of carrying out this section, the Secretary shall reserve not more than 2 per centum of the funds made available to carry out this title.

"PARTNERSHIP PROGRAMS

"SEC. 308. (a) From funds available under this title the Secretary is authorized to promote the development of partnership arrangements between prime sponsors and employment security agencies. Such partnerships shall constitute a segment of an integrated and comprehensive intake, service and placement system and shall be designed to achieve an employability plan and comprehensive program of job preparation and job search assistance for all participants under this Act. Such partnerships may also include other related public and private nonprofit agencies and organizations, including community-based organizations.

"(b) Such partnerships may result in—

"(1) the creation of a joint-planning, administrative, and operational entity;

"(2) combining and colocation of staff; and

"(3) a joint data base and information system.

"(c) The Secretary is authorized to reimburse prime sponsors for costs associated with the implementation of a partnership and to provide incentives to ensure that employment security agencies may participate on an equitable basis.

"PART B—RESEARCH, TRAINING, AND EVALUATION

"RESEARCH

"SEC. 311. (a) To assist the Nation in expanding work opportunities and assuring access to those opportunities for all who desire it, the Secretary shall establish a comprehensive program of employment and training research utilizing the methods, techniques, and knowledge of the behavioral and social sciences and such other methods, techniques, and knowledge as will aid in the solution of the Nation's employment and training problems. This program may include, but need not be limited to, studies, the findings of which may contribute to the formulation of employment and training policy; development or improvement of employment and training programs; increased knowledge about labor market processes; reduction of unemployment and its relationships to price stability; promotion of more effective worker development, training, and utilization; improved national, regional and local means of measuring future labor demand and supply; enhancement of job opportunities; skill training to qualify employees for positions of greater skill, responsibility, and remuneration; meeting of worker shortages; easing of the transition from school to work, from income transfer payment dependency to employment, from one job to another, and from work to retirement; usefulness of sheltered employment for the difficult to employ; opportunities and services for older persons who desire to enter or reenter the labor force; and for improvement of opportunities for employment and advancement through the reduction of discrimination and disadvantage arising from poverty, ignorance, or prejudice.

"(b) The Secretary shall establish a program of experimental, developmental, demonstration, and pilot projects, through grants to or contracts with public agencies or other private organizations, for the purpose of improving techniques and demonstrating the effectiveness of specialized methods in meeting the employment and training problems; however, nothing in this subsection shall authorize the Secretary to carry out employment programs experimenting with subsidized wages in the private sector or wages less than those established by the Fair Labor Standards Act of 1938, for employment subject to that Act. In carrying out this subsection, the Secretary shall consult with such other agencies as may be appropriate. Where programs under this section require institutional training, appropriate arrangements for such training shall be agreed to by the Secretary of Labor and the Secretary of Health, Education, and Welfare.

"(c) The Secretary is authorized to conduct supportive employment and training projects of an experimental and demonstration nature as part of, or coordinated with, experimental or demonstration programs of a similar nature that the Secretary has been conducting for unemployed persons with serious problems in the labor market, such as juvenile delinquents, mentally and emotionally handicapped individuals, alcoholics, ex-addicts, ex-offenders, and recipients of aid to families with dependent children, to enable them, through temporary, highly structured and supervised work experience, to make the transition to employment. Such programs shall provide for skill training as required to effect such transition.

"(d) The Secretary is authorized to carry out a special program to demonstrate the efficacy of providing vouchers to economically disadvantaged persons who are unemployed or underemployed. Such vouchers shall entitle private employers who provide employment or training to such individuals to payment in amounts equal to the value of the voucher during periods when, and to the extent that, such persons are not fully productive, pursuant to regulations of the Secretary.

"(e) The Secretary is authorized to undertake research programs to (1) investigate the applicability of job-sharing, work-sharing and other flexible hours arrangements in various settings, and of the incentives and technical assistance required by employers to implement such alternative working arrangements; (2) investigate the extent to which job and wage classification systems undervalue certain skills and responsibilities on the basis of the sex of persons who usually hold the positions.

"(f) The Secretary shall conduct a variety of demonstration and experimental projects to test the best methods of assisting persons, who might otherwise rely on public assistance or other income assistance, to find nonfederally assisted employment in the private and public sectors, and to provide federally assisted work and training opportunities for any such persons who are unable to find nonfederally assisted work or training opportunities.

"(g) The Secretary is authorized to conduct demonstration programs and projects, which provide expanded guidance and counseling services to participants under this Act through community vocational resource centers established in economically distressed communities or areas pursuant to section 132(a)(7) of the Vocational Educational Amendments of 1976. Such programs shall provide State boards of vocational education, which establish such community vocational resource centers, with funding for up to 50 per centum of the cost of such projects. The Secretary may make such funds available to a State board of vocational education when such board reaches agreement with the prime sponsor to assist out-of-school individuals in reentering school at the secondary or postsecondary level, to take advantage of vocational skill training opportunities including cooperative education and work-study programs, and to be offered referral to other training programs, apprenticeship programs, and on-the-job training for which academic credit may be available. Projects shall include provisions for outreach to inform the economically disadvantaged of the assistance available through the community resource centers and to provide assurances that programs will be coordinated with other guidance and counseling activities of the prime sponsor, including activities under section 445(c), other in-school guidance and coun-

seling programs in the area, State employment service offices, and the activities of the private industry councils established pursuant to title VII of this Act.

"(h) The Secretary shall conduct educational and assistance programs designed to eliminate artificial barriers to employment based upon race, sex, national origin, age, records of arrest or conviction, handicaps, marital status, or other criteria. To support such programs, information shall be developed identifying all such artificial barriers, the numbers of persons affected, the manner in which such barriers operate and how such barriers can best be eliminated. In complying with the requirements of this subsection, the Secretary shall consult with the Department of Health, Education, and Welfare, the United States Civil Rights Commission, and the Equal Employment Opportunity Commission.

"LABOR MARKET INFORMATION AND JOB BANK PROGRAM

"SEC. 312. (a) The Secretary shall develop a comprehensive system of labor market information on a national, State, local, or other appropriate basis, which shall be made publicly available in a timely fashion.

"(b) In addition to the monthly national unemployment statistics, the Secretary shall develop reliable methods, including the use of selected sample surveys, to produce more statistically accurate data on unemployment by State and local areas, and shall investigate alterntive methods to produce more accurate data on underempolyment and labor demand by State and local areas.

"(c) The Secretary shall develop data for an annual statistical measure of labor market related economic hardship in the Nation. Among the factors to be considered in developing such a measure are unemployment, labor force participation, involuntary part-time employment, and full-time employment at wages less than the poverty level.

"(d) The Secretary shall develop methods to establish and maintain more comprehensive household budget data at different levels of living, including a level of adequacy, to reflect the differences of household living costs in regions and localities, both urban and rural. The Secretary, in cooperation with the Secretary of Energy and the Secretary of Housing and Urban Development, shall develop methods to ascertain, and shall ascertain, annual energy development and conservation jobs impact data by type and scale of energy technologies used.

"(e) The Secretary shall set aside, out of sums available to the Department for any fiscal year including sums available for this title, an amount which the Secretary determines is necessary and appropriate to carry out the provisions of this section, and shall, no later than sixty days after such sums are appropriated and made available, notify the appropriate committees of the Congress of the amount so set aside and the basis for the determination of need and appropriateness.

"(f) The Secretary shall establish and carry out a nationwide computerized job bank and matching program (including the listing of all suitable employment openings with local offices of the State employment service agencies by Federal contractors and subcontractors and providing for the affirmative action as required by section 2012(a) of title 38, United States Code) on a regional, State, and local basis, using electronic data processing and telecommunications systems to the maximum extent possible for the purpose of identifying sources of available persons and job vacancies, providing an expeditious means of matching the qualifications of unemployed, underemployed, and economically disadvantaged persons with employer requirements and job opportunities, and referring and placing such persons in jobs.

"(g) In carrying out responsibilities under this section the Secretary of Labor shall, in cooperation with the National Occupational Information Coordinating Committee, give special attention to the labor market information needs of youth, including activities such as, but not limited to—

"(1) assisting and encouraging local areas to adopt methods of translating national aggregate occupational outlook data into local terms;

"(2) providing technical assistance for programs of computer on-line terminals and other facilities to utilize and implement occupational and career outlook information and projections supplied by State employment service offices and to improve the match of youth career desires with available and anticipated labor demand;

"(3) assisting and encouraging the development of State occupational information systems, accessible to local schools, including pilot programs in the use of computers to facilitate such access; and

"(4) in cooperation with State and local correctional agencies, encouraging programs of counseling and employment services for youth in correctional institutions.

"EVALUATION

"SEC. 313. (a) The Secretary shall provide for the continuing evaluation of all programs and activities conducted pursuant to this Act, including their cost-effectiveness in achieving the purposes of this Act, their impact on communities and participants, their implication for related programs, the extent to which they meet the needs of persons by age, sex, race, and national origin, and the adequacy of the mechanism for the delivery of services. In conducting evaluations the Secretary shall compare the effectiveness of programs conducted by prime sponsors of the same class and of different classes, and shall compare the effectiveness of programs conducted by prime sponsors with similar programs carried out by the Secretary under the Act. The Secretary shall also arrange for obtaining the opinions of participants about the strengths and weaknesses of the programs.

"(b) The Secretary shall evaluate the effectiveness of programs authorized under this Act and part C of title IV of the Social Security Act with respect to the statutory goals and objectives, including increases in employment and earnings for participants, duration in training and employment situations, information on the post-enrollment labor market experience of program participants for at least a year following their termination from such programs, and comparable information on other employees or trainees of participating employers.

"(c)(1) The Secretary shall—

"(A) develop standard definitions of 'enrollments', 'completions', 'job placements', and 'training-related job placements' for classroom and on-the-job training programs funded under this Act;

"(B) establish procedures for the uniform reporting by prime sponsors of information on enrollments, completions, job placements, and training related placements by detailed occupational or training code for classroom and on-the-job training programs funded under this Act; and

"(C) make a report to the Congress not later than September 30, 1979, and annually thereafter, containing a summary of the information described in subparagraph (B) together with such analysis and recommendations as the Secretary deems advisable.

"(2) For the purposes of this subsection, the term 'detailed occupational or training code' shall mean any occupational or training code equivalent in detail to the Dictionary of Occupational Titles at the six-digit level.

"TRAINING AND TECHNICAL ASSISTANCE

"SEC. 314. The Secretary, in consultation with the Secretary of Health, Education, and Welfare, or other appropriate officials, shall provide directly or through grants, contracts, or other arrangements, appropriate preservice and inservice training for specialized, supportive, supervisory, or other personnel, and appropriate technical assistance with respect to programs under this Act.

"TITLE IV—YOUTH PROGRAMS

"INTENT

"SEC. 400. It is the intent of this title to provide a broad range of coordinated employment and training programs for eligible youth in order to provide effectively for comprehensive employment and training services to improve their future employability and to explore and experiment with alternative methods for accomplishing such purposes.

"GENERAL PROVISIONS

"SEC. 401. (a) For purposes of parts B and C, the term 'eligible youth' means an economically disadvantaged youth who is (1) either unemployed, underemployed, or in school, and (2) either age 16 to 21 inclusive, or if authorized under regulations of the Secretary, age 14 to 15 inclusive. Nothing in this section shall be construed to prohibit the provision of day care for the children of eligible youths.

"(b) Notwithstanding subsection (a), an 'eligible youth' for purposes of subpart 1 of part A means a youth between the ages of 16 and 19 inclusive, the income of whose family is at or below the poverty level determined in accordance with criteria as established by the Director of the Office of Management and Budget.

"(c) Earnings and allowances received by any eligible youth under this title shall be disregarded in determining the eligibility of the youth's family for, and the amount of, any benefits based on need under any Federal or federally assisted program.

"PART A—YOUTH EMPLOYMENT DEMONSTRATION PROGRAMS

"STATEMENT OF PURPOSE

"SEC. 410. It is the purpose of this part to establish a variety of employment, training and demonstration programs to explore methods of dealing with the structural unemployment problems of the Nation's youth. The basic purpose of the demonstration programs shall be to test the relative efficacy of different ways of dealing with these problems in different local contexts, but this basic purpose shall not preclude the funding of programs dealing with the immediate difficulties faced by youths who are in need of, and unable to find, jobs. It is explicitly not the purpose of this part to provide make-work opportunities for unemployed youth; instead, it is the purpose to provide youth, and particularly economically disadvantaged youth, with opportunities to learn and earn that will lead to meaningful employment opportunities after they have completed the program.

"Subpart 1—Youth Incentive Entitlement Pilot Projects

"ENTITLEMENT PILOT PROJECTS AUTHORIZED

"SEC. 411. (a) The Secretary shall enter into arrangements with prime sponsors selected in accordance with the provisions of this subpart for the purpose of demonstrating the efficacy of guaranteeing otherwise unavailable part-time employment, or combination of part-time employment and training for economically disadvantaged youth between the age of sixteen and nineteen, inclusive, during the school year who resume or maintain attendance in secondary school for the purpose of acquiring a high school diploma or in a program which leads to a certificate of high school equivalency and full-time employment or part-time employment and training during the summer months to each such youth.

"(b) Each prime sponsor who applies for and is selected by the Secretary to carry out a pilot project under this subpart shall guarantee such employment to each such unemployed youth who resides within the area or

a designated part thereof served by the prime sponsor and who applies to that prime sponsor for employment. The Secretary shall provide to each prime sponsor, from funds appropriated for carrying out this subpart, in combination with any funds made available by such prime sponsor according to an agreement made pursuant to section 413(a)(4)(F), the amount to which that prime sponsor is entitled under subsection (c).

"(c) Each prime sponsor shall be entitled to receive, for each youth who is provided employment by that prime sponsor, the costs associated with providing such employment. Such costs shall take into account funds made available by such prime sponsor under section 413(a)(4)(F).

"EMPLOYMENT GUARANTEES

"SEC. 412. Employment opportunities guaranteed under this subpart shall take the form of any one of the following or any combination thereof:

"(1) Part-time employment or training or combination thereof during the school year, not to exceed an average of twenty hours per week for each youth employed, and not to last less than six months nor more than nine, on projects operated by community-based organizations of demonstrated effectiveness which have a knowledge of the needs of disadvantaged youth; local educational agencies (as defined in section 801(f) of the Elementary and Secondary Education Act of 1965); institutions of higher education (as defined in section 1201(a) of the Higher Education Act of 1965); nonprofit private organizations or institutions engaged in public service; nonprofit voluntary youth organizations; nonprofit private associat'ons, such as labor organizations, educational associations, business, cultural, or other private associations; units of general local government; or special purpose political subdivisions either having the power to levy taxes and spend funds or serving such special purpose in two or more units of general local government.

"(2) Part-time employment on an individual basis in any of the institutions and under the same conditions provided for in clause (1).

"(3) Part-time employment on either a project or individual basis in any of the institutions and under the same conditions as provided in clause (1) which includes as part of the employment on-the-job or apprenticeship training.

"(4) Full-time employment during the summer months, not to exceed forty hours per week for each youth employed, and not to last less than eight weeks in any of the institutions described in clause (1) of this section.

"SELECTING PRIME SPONSORS

"SEC. 413. (a) In selecting prime sponsors to operate youth incentive entitlement projects, the Secretary shall—

"(1) select prime sponsors from areas with differing socioeconomic and regional circumstances such as differing unemployment rates, school dropout rates, urban and rural variations, size, and other such factors designed to test the efficacy of a youth job entitlement in a variety of differing locations and circumstances;

"(2) take into consideration the extent to which the prime sponsors devote funds made available under title II for the purpose of carrying out a youth incentive entitlement project or for supportive services;

"(3) take in consideration the extent to which new and different classifications, occupations, or restructured jobs are created for youth;

"(4) select only prime sponsors which submit proposals which include—

"(A) a description of the procedure to be utilized by the prime sponsor to publicize, consider, approve, audit, and monitor youth incentive projects or jobs funded by the prime sponsor under this part, including copies of proposed application materials, as well as examples of audit and client characteristics reports;

"(B) a statement of the estimated number of economically disadvantaged youth to be served by the prime sponsor, and assurances that only such disadvantaged youth will be served;

"(C) assurances that the provisions of sections 442 and 443 are met relating to wage provisions and special conditions;

"(D) assurances that the prime sponsor has consulted with public and private nonprofit educational agencies including vocational and post-secondary education institutions and other agencies which offer high school equivalency programs; public employers, including law enforcement and judicial agencies; labor organizations; voluntary youth groups; community-based organizations; organizations of demonstrated effectiveness with a special knowledge of the needs of such disadvantaged youth; and with the private sector in the development of the plan, and assurances that arrangements are made with appropriate groups to assist the prime sponsor in carrying out the purposes of this subpart;

"(E) assurances that arrangements are made with the State employment security agencies to carry out the purposes of this subpart;

"(F) an agreement that title II funds planned for economically disadvantaged youth employment programs and funds available for the summer youth program under part C of this title for youth eligible under subsection (a) will be used in support of the project authorized under this subpart;

"(G) assurances that the employment of eligible youth meets the requirements of eligible activities under section 414;

"(H) assurances that participating youth shall not be employed more than an average of twenty hours per week during the school year and not more than forty hours per week during the summer;

"(I) assurances that a participating youth is not a relative of any person with responsibility for hiring a person to fill that job;

"(J) assurances that whenever employment involves additional on-the-job, institutional, or apprenticeship training provided by the employer, and if such training is not paid for in full or in part by the prime sponsor under any other program authorized under this Act, wages may be paid in accordance with the provisions of subsection (b) of section 14 of the Fair Labor Standards Act of 1938, and with the balance being applied to the cost of training;

"(K) assurances that arrangements have been made with the appropriate local education agency or with the institution offering a certified high school equivalency program that such youth is enrolled and meeting the minimum academic and attendance requirements of that school or education program and with employers that such youth meet the minimum work and attendance requirements of such employment and that any employment guarantee is conditioned on such enrollment; and

"(L) assurances that the prime sponsor will make available the data necessary for the Secretary to prepare the report required by section 415.

"(b) In approving a prime sponsor to operate a youth incentive entitlement pilot project under this subpart the Secretary may also test the efficacy of any such project involving—

"(1) the use of a variety of subsidies to private for profit employers, notwithstanding the provisions of sections 412 and 414(a), to encourage such employers to provide employment and training opportunities under this subpart, but no such subsidy shall exceed the net cost to the employer of the wages paid and training provided;

"(2) arrangements with unions to enable youth to enter into apprenticeship training as part of the employment provided under this subpart;

"(3) a variety of administrative mechanisms to facilitate the employment of youths under an entitlement arrangement;

"(4) the inclusion of economically disadvantaged youths between the ages of nineteen and twenty-five who have not received their high school diploma;

"(5) the inclusion of occupational and career counseling, outreach, career, exploration, and on-the-job training and apprenticeship as part of the employment entitlement; and

"(6) the inclusion of youth under the jurisdiction of the juvenile or criminal justice system with the approval of the appropriate authorities.

"SPECIAL PROVISIONS

"SEC. 414. (a) Employment and training under this subpart shall develop the participant's role as a meaningful member of the community, and may include, but is not limited to, employment and training in such fields as environmental quality, health care, education, social services, public safety, crime prevention and control, transportation, recreation, neighborhood improvement, rural development, conservation, beautification, and community improvement projects.

"(b) No funds for employment under this subpart shall be used to provide public services through a nonprofit organization, association, or institution, or a nonprofit private institution of higher education, or any other applicant, which were previously provided by a political subdivision or local educational agency in the area served by the project of where the employment and training takes place, and no funds will be used under this subpart to provide such services through such an organization or institution which are customarily provided only by a political subdivision or local educational agency in the area served by such project or where the employment and training takes place.

"REPORTS

"SEC. 415. The Secretary shall report to the Congress not later than March 15, 1979, on his interim findings on the efficacy of a youth incentive entitlement. The Secretary shall submit another report not later than December 31, 1979, concerning the youth incentive entitlement projects authorized under this subpart. Included in such reports shall be findings with respect to—

"(1) the number of youths enrolled at the time of the report;

"(2) the cost of providing employment opportunities to such youths;

"(3) the degree to which such employment opportunities have caused out-of-school youths to return to school or others to remain in school;

"(4) the number of youths provided employment in relation to the total which might have been eligible;

"(5) the kinds of jobs provided such youths and a description of the employers—public and private—providing such employment;

"(6) the degree to which on-the-job or apprenticeship training has been offered as part of the employment;

"(7) the estimated cost of such a program if it were to be extended to all areas;

"(8) the effect such employment opportunities have had on reducing youth unemployment in the areas of the prime sponsors operating a project; and

"(9) the impact of job opportunities provided under the project on other job opportunities for youths in the area.

"Subpart 2—Youth Community Conservation and Improvement Projects

"STATEMENT OF PURPOSE

"SEC. 421. It is the purpose of this subpart to establish a program of community conservation and improvement projects to provide employment, work experience, skill training, and opportunities for community service to eligible youths, for a period not to exceed twelve months, supplementary to but not replacing opportunities available under title II of this Act.

"DEFINITIONS

"SEC. 442. As used in this subpart, the term—

"(1) 'eligible applicant' means any prime sponsor qualified under section 101 of this Act, sponsors of Native American programs qualified under section 302(c)(1) of this Act, and sponsors of migrant and seasonal farmworkers programs qualified under section 303 of this Act;

"(2) 'project applicant' shall have the same meaning as in section 125(18) of this Act;

"(3) 'eligible youths' means individuals who are unemployed and, at the time of entering employment under this subpart, are ages sixteen to nineteen, inclusive; and

"(4) 'community improvement projects' means projects providing work which would not otherwise be carried out, including, but not limited to, the rehabilitation or improvement of public facilities; neighborhood improvements; weatherization and basic repairs to low-income housing; energy conservation including solar energy techniques, especially those utilizing materials, and supplies available without cost; and conservation, maintenance, or restoration of natural resources on publicly held lands other than Federal lands.

"ALLOCATION OF FUNDS

"SEC. 423. (a) Funds available to carry out this subpart for any fiscal year shall be allocated in such a manner that not less than 75 per centum of such funds shall be allocated among the States on the basis of the relative number of unemployed persons within each State as compared to all States, except that not less than one-half of 1 per centum of such funds shall be allocated for projects under this subpart within any one State and not less than one-half of 1 per centum of such funds shall be allocated in the aggregate for projects in Guam, the Virgin Islands, American Samoa, the Northern Marianas, and the Trust Territory of the Pacific Islands.

"(b) Of the funds available for this subpart 2 per centum shall be available for projects for Native American eligible youths, and 2 per centum shall be available for projects for eligible youths in migrant and seasonal farmworker families.

"(c) The remainder of the funds available for this subpart shall be allocated as the Secretary deems appropriate.

"COMMUNITY CONSERVATION AND IMPROVEMENT YOUTH EMPLOYMENT PROFITS

"SEC. 424. The Secretary is authorized, in accordance with the provisions of this subpart, to enter into agreements with eligible applicants to pay the costs of community conservation and improvement youth employment projects to be carried out by project applicants employing eligible youths and appropriate supervisory personnel.

"PROJECT APPLICATIONS

"SEC. 425. (a) Project applicants shall submit applications for funding of projects under this subpart to the appropriate eligible applicant.

"(b) In accordance with regulations prescribed by the Secretary, each project application shall—

"(1) provide a description of the work to be accomplished by the project, the jobs to be filled, and the approximate duration for which eligible youths would be assigned to such jobs;

"(2) describe the wages or salaries to be paid individuals employed in jobs assisted under this subpart;

"(3) set forth assurances that there will be an adequate number of supervisory personnel on the project and that the supervisory personnel are adequately trained in skills needed to carry out the project and can instruct participating eligible youths in skills needed to carry out a project;

"(4) set forth assurances that any income generated by the project will be applied toward the cost of the project;

"(5) set forth assurances for acquiring such space, supplies, materials, and equipment as necessary, including reasonable payment for the purchase or rental thereof;

"(6) set forth assurances that, to the maximum extent feasible, projects carried out under this subpart shall be labor intensive; and

"(7) set forth such other assurances, arrangements, and conditions as the Secretary deems appropriate to carry out the purposes of this subpart.

"PROPOSED AGREEMENTS

"SEC. 426. (a) Each eligible applicant desiring funds under this subpart shall submit a proposed agreement to the Secretary, together with all project applications approved by the eligible applicant and all project applications approved by any program agent within the area served by the eligible applicant. With its transmittal of the proposed agreement, the eligible applicant shall provide descriptions of the project applications approved by the eligible applicant and by any program agent within the area served by the eligible applicant, accompanied by the recommendations of the eligible applicant concerning the relative priority attached to each project.

"(2) The functions of a program agent shall be as set forth in section 606(b)(2) of this Act.

"(b) The proposed agreement submitted by any eligible applicant shall—

"(1) describe the method of recruiting eligible youths, including a description of how such recruitment will be coordinated with plans under other provisions of this Act, including arrangements required by section 105 of this Act, and also including a description of arrangements with school systems, the public employment service (including school cooperative programs), and the courts of jurisdiction for status and youthful offenders;

"(2) provide a description of job training and skill development opportunities that will be made available to participating eligible youths, as well as a description of plans to coordinate the training and work experience with school-related programs, including the awarding of academic credit; and

"(3) set forth such other assurances as the Secretary may require to carry out the purposes of this subpart.

"(c)(1) In order for a project application submitted by a project applicant to be submitted to the Secretary by any eligible applicant, copies of such applicant shall have been submitted at the time of such application to the prime sponsor's planning council established under section 109 of this Act (or an appropriate planning organization in the case of sponsors of Native American programs under section 302 of this Act or migrant and seasonal farmworker programs under section 303 of this Act) for the purpose of affording such council (and the youth council established under section 436) an opportunity to submit comments and recommendations with respect to that application to the eligible applicant. No member of any council (or organization) shall cast a vote on any matter in connection with a project in which that member, or any organization with which that member is associated, has a direct interest.

"(2) Consistent with procedures established by the eligible applicant in accordance with regulations which the Secretary shall prescribe, the eligible applicant shall not disapprove a project application submitted by a project applicant unless it has first considered any comments and recommendations made by the appropriate council (or organization) and unless it has provided such applicant and council (or organization) with a written statement of its reasons for such disapproval.

"APPROVAL OF AGREEMENTS

"SEC. 427. (a) The Secretary may approve or deny on an individual basis any of the project applications submitted with any proposed agreement.

"(b) No funds shall be made available to any eligible applicant except pursuant to an agreement entered into between the Secretary and the eligible applicant which provides assurances satisfactory to the Secretary that—

"(1) the standards set forth in subpart 4 of this part will be satisfied;

"(2) projects will be conducted in such manner as to permit eligible youths employed in the project who are in school to coordinate their jobs with classroom instruction and, to the extent feasible, to permit such eligible youths to receive credit from the appropriate educational agency, postsecondary institution, or particular school involved; and

"(3) meet such other assurances, arrangements, and conditions as the Secretary deems appropriate to carry out the purposes of this subpart.

"WORK LIMITATION

"SEC. 428. No eligible youth shall be employed for more than twelve months in work financed under this subpart, except as prescribed by the Secretary.

"Section 3—Youth Employment and Training Programs

"STATEMENT OF PURPOSE

"SEC. 431. It is the purpose of this subpart to establish programs designed to make a significant long-term impact on the structural unemployment problems of youth, supplementary to but not replacing programs and activities available under title II of this Act, to enhance the job prospects and career opportunities of young persons, including employment, community service opportunities, and such training and supportive services as are necessary to enable participants to secure suitable and appropriate unsubsidized unemployment in the public and private sectors of the economy. To the maximum extent feasible, training and employment opportunities afforded under this subpart will be interrelated and mutually reinforcing so as to achieve the goal of enhancing the job prospects and career opportunities of youths served under this subpart.

"PROGRAM AUTHORIZED

"SEC. 432. (a) The Secretary is authorized to provide financial assistance to enable eligible applicants to provide employment opportunities and appropriate training and supportive services for eligible participants including but not limited to—

"(1) useful work experience opportunities in a wide range of community betterment activities such as rehabilitation of public properties, assistance in the weatherization of homes occupied by low-income families, demonstrations of energy-conserving measures including solar energy techniques (especially those utilizing materials and supplies available without cost), park establishment and upgrading, neighborhood revitalization, conservation and improvements and related activities;

"(2) productive employment and work experience in fields such as education, health

care, neighborhood transportation services, crime prevention and control, environmental quality control (including integrated pest management activities), preservation of historic sites, and maintenance of visitor facilities;

"(3) appropriate training and services to support the purpose of this subpart, including but not limited to—

"(A) outreach assessment, and orientation;

"(B) counseling, including occupational information and career counseling;

"(C) activities promoting education to work transition;

"(D) development of information concerning the labor market, and provision of occupational, educational, and training information;

"(E) services to youth to help them obtain and retain employment;

"(F) literacy training and bilingual training;

"(G) attainment of certificates of high school equivalency;

"(H) job sampling, including vocational exploration in the public and private sector;

"(I) institutional and on-the-job training, including development of basic skills and job skills;

"(J) transportation assistance;

"(K) child care and other necessary supportive services;

"(L) job restructuring to make jobs more responsive to the objectives of this subpart, including assistance to employers in developing job ladders or new job opportunities for youths, in order to improve work relationships between employers and youths;

"(M) community-based central intake and information services for youth;

"(N) job development, direct placement, and placement assistance to secure unsubsidized employment opportunities for youth to the maximum extent feasible, and referral to employability development programs;

"(O) programs to overcome sex-stereotyping in job development and placement; and

"(P) programs and outreach mechanisms to increase the labor force participation rate among minorities and women.

"(b) In order to carry out this subpart, a Governor or a prime sponsor may enter into contracts with project applicants (as defined in section 125(18)) or employers organized for profit, but payments to such employers shall not exceed the amounts permitted under section 703, or may operate programs directly if, after consultation with community-based organizations and nonprofit groups, a Governor or prime sponsor determines that such direct operation will promote the purposes of this subpart.

"ALLOCATION OF FUNDS

"SEC. 433. (a) From the sums available for this subpart—

"(1) an amount equal to 75 per centum of such funds shall be made available to prime sponsors for programs authorized under section 432 of this Act;

"(2) an amount equal to 5 per centum of the amount available for this subpart shall be made available to Governors for special statewide youth services under subsection (c) of this section;

"(3) an amount equal to not less than 2 per centum of the amount available for this subpart shall be made available for employment and training programs for Native American eligible youths (deducting such amounts as are made available for such purposes under section 423(b) of this Act);

"(4) an amount equal to not less than 2 per centum of the amount available for this subpart shall be made available for employment and training programs for eligible youths in migrant and seasonal farmworker families (deducting such amounts as are made available for such purposes under section 423(b) of this Act); and

"(5) the remainder of the funds available for this subpart shall be available for the Secretary's discretionary projects authorized under section 438.

"(b)(1) Amounts available for each of the purposes set forth in paragraphs (1) and (2) of subsection (a) shall be allocated among the States in such a manner that—

"(A) 37.5 per centum thereof shall be allocated in accordance with the relative number of unemployed persons within each State as compared to the total number of such unemployed persons in all States;

"(B) 37.5 per centum thereof shall be allocated in accordance with the relative number of unemployed persons residing in areas of substantial unemployment (as defined in section 125(2) of this Act) within each State as compared to the total number of unemployed persons residing in all such areas in all States; and

"(C) 25 per centum thereof shall be allocated in accordance with the relative number of persons in families with an annual income below the low-income level (as defined in section 125(15) of this Act) within each State as compared to the total number of such persons in all States.

"(2) In determining allocations under this subsection the Secretary shall use what the Secretary determines to be the best available data.

"(3) Amounts available to prime sponsors under paragraph (1) of subsection (a) of this section shall, out of the total amounts allocated to each State under such paragraph, be allocated by the Secretary among prime sponsors within each State, in accordance with the factors set forth in paragraph (1) of this subsection.

"(c) The amount available to the Governor of each State under paragraph (2) of subsection (a) of this section shall be used in accordance with a special statewide youth services plan, approved by the Secretary, for such purposes as—

"(1) providing financial assistance for employment and training opportunities for eligible youths who are under the supervision of the State;

"(2) providing labor market and occupational information to prime sponsors and local educational agencies, without reimbursement;

"(3) providing for the establishment of cooperative efforts between State and local institutions, including occupational and career guidance and counseling and placement services for in-school and out-of-school youth;

"(4) providing financial assistance for expanded and experimental programs in apprenticeship trades, or development of new apprenticeship arrangements, in concert with appropriate businesses and labor unions or State apprenticeship councils;

"(5) carrying out special model employment and training programs and related services between appropriate State agencies and prime sponsors in the State, or any combination of such prime sponsors, including subcontractors selected by prime sponsors, with particular emphasis on experimental job training within the private sector.

"(d)(1) Not less than 22 per centum of the amount allocated to each prime sponsor under paragraph (1) of subsection (a) of this section shall be used for programs under this subsection.

"(2) The amount available to each prime sponsor under paragraph (1) of this subsection shall be used for programs for in-school youth carried out pursuant to agreements between prime sponsors and local educational agencies. Each such agreement shall describe in detail the employment opportunities and appropriate training and supportive services which shall be provided to eligible participants who are enrolled or who agree to enroll in a full-time program leading to a secondary school diploma, a junior or community college degree, or a technical or trade school certificate of completion. Each such agreement shall contain provisions to assure that funds received pursuant to the agreement will not supplant State and local funds expended for the same purpose.

"(e) Programs receiving assistance under paragraph (1) of subsection (a) of this section shall give special consideration in carrying out programs authorized under section 432 of this Act, to community-based organizations which have demonstrated effectiveness in the delivery of employment and training services, such as the Opportunities Industrialization Centers, the National Urban League, SER-Jobs for Progress, United Way of America, Mainstream, the National Puerto Rican Forum, neighborhood organizations, community action agencies, union-related organizations, employer-related nonprofit organizations, and other similar organizations.

"ELIGIBLE APPLICATIONS

"SEC. 434. Eligible applicants for purposes of this subpart, except section 438, are prime sponsors qualified under section 101 of this Act, sponsors of Native American programs qualified under section 302(c)(1) of this Act, and sponsors of migrant and seasonal farmworker programs qualified under section 303 of this Act.

"ELIGIBLE PARTICIPANTS

"SEC. 435. (a) Eligible participants for programs authorized under this subpart shall be persons who—

"(1)(A) are unemployed or are underemployed or are in school and are ages sixteen to twenty-one, inclusive; or (B) if authorized under such regulations as the Secretary may prescribe, are in school and are ages fourteen to fifteen, inclusive; and

"(2) are not members of households which have current gross family income, adjusted to an annualized basis (exclusive of unemployment compensation and all Federal, State, and local income-tested or needs-tested public payments) at a rate exceeding 85 per centum of the lower living standard income level, except that, pursuant to regulations which the Secretary shall prescribe, persons who do not meet the requirements of this subparagraph but who are otherwise eligible under this subpart may participate in appropriate activities of the type authorized under paragraph (3) of section 432(a).

Notwithstanding the provision of this subsection, 10 per centum of the funds available for this subpart may be used for programs which include youths of all economic backgrounds to test the desirability of including youths of all economic backgrounds.

"(b) For purposes of this section, the term 'lower living standard income level' means that income level (adjusted for regional and metropolitan and urban and rural differences and family size) determined annually by the Secretary based upon the most recent 'lower living standard budget' issued by the Bureau of Labor Statistics of the Department of Labor.

"CONDITIONS FOR RECEIPT OF FINANCIAL ASSISTANCE

"SEC. 436. (a) The Secretary shall not provide financial assistance to an eligible applicant for programs authorized under section 432 unless such eligible applicant provides assurances that the standards set forth in subpart 4 of this part will be met and unless such eligible applicant submits an application in such detail as the Secretary may prescribe.

"(1) describe the programs, projects or activities to be carried out with such assistance, together with a description of the relation-

ship and coordination of services provided to eligible participants under this subpart for similar services offered by local educational agencies, postsecondary institutions, the public employment service, other youth programs, community-based organizations, businesses and labor organizations consistent with the requirements of sections 121 and 203 of this Act, and assurances that, to the maximum extent feasible, use will be made of any services that are available without reimbursement by the State employment service that will contribute to the achievement of the purposes of this subpart;

"(2) include assurances that the application will be coordinated to the maximum extent feasible, with the plans submitted under title II, but services to youth under that title shall not be reduced because of the availability of financial assistance under this subpart;

"(3) provide assurances, satisfactory to the Secretary, that in the implementation of programs under this subpart, there will be coordination, to the extent appropriate, with local educational agencies, postsecondary institutions, community-based organizations, businesses, labor organizations, job training programs, other youth programs, the apprenticeship system, and (with respect to the referral of prospective youth participants to the program) the public employment service system;

"(4) provide assurance satisfactory to the Secretary that allowances will be paid in accordance with the provisions of section 123 of this Act and such regulations as the Secretary may prescribe for this subpart;

"(5) provide assurances that the application will be reviewed by the appropriate prime sponsor planning council in accordance with the provisions of section 109;

"(6) provide assurances that a youth council will be established under the planning council of such eligible applicant (established under section 109 of this Act) in accordance with subsection (b) of this section;

"(7) provide assurances satisfactory to the Secretary that effective means will be provided through which youths participating in the projects, programs, and activities may acquire appropriate job skills and be given necessary basic education and training and that suitable arrangements will be established to document the competencies, including skills, education and training, derived by each participant from programs established under this subpart;

"(8) provide assurances that the eligible applicant will take appropriate steps to develop new job classifications, new occupations, and restructured jobs;

"(9) provide that the funds available under section 433(d) shall be used for programs authorized under section 432 for in-school youth who are eligible participants through arrangements to be carried out by a local educational agency or agencies or post-secondary educational institution or institutions; and

"(10) provide such other information and assurance as the Secretary may deem appropriate to carry out the purposes of this subpart.

"(b) Each youth council established by an eligible applicant shall be responsible for making recommendations to the planning council established under section 109 of this Act with respect to planning and review of activities conducted under this subpart and subpart 2. Each such youth council's membership shall include representation from the local educational agency, local vocational education advisory council, postsecondary educational institutions, business, unions, the public employment service, local government and nongovernment agencies and organizations which are involved in meeting the special needs of youths, the community served by such applicant, the prime sponsor, and youths themselves.

"(c) No program of work experience for in-school youth supported under this subpart shall be entered into unless an agreement has been made between the prime sponsor and a local educational agency or agencies, after review by the youth council established under subsection (b) of this section. Each such agreement shall—

"(1) set forth assurances that participating youths will be provided meaningful work experience, which will improve their ability to make career decisions and which will provide them with basic work skills needed for regular employment not subsidized under this in-school program;

"(2) be administered, under contracts with the prime sponsor, by a local educational agency or agencies or a postsecondary educational institution or institutions within the area served by the prime sponsor, and set forth assurances that such contracts have been reviewed by the youth council established under subsection (b) of this section;

"(3) set forth assurances that job information, counseling, guidance, and placement services will be made available to participating youths and that funds provided under this program will be available to, and utilized by, the local educational agency or agencies to the extent necessary to pay the cost of school-based counselors to carry out the provisions of this in-school program;

"(4) set forth assurances that jobs provided under this program will be certified by the participating educational agency or institution as relevant to the educational and career goals of the participating youths;

"(5) set forth assurances that the eligible applicant will advise participating youths of the availability of other employment and training resources provided under this Act, and other resources available in the local community to assist such youths in obtaining employment;

"(6) set forth assurances that youth participants will be chosen from among youths who are eligible participants who need work to remain in school, and shall be selected by the appropriate educational agency or institution, based on the certification for each participating youth by the school-based guidance counselor that the work experience provided is an appropriate component of the overall educational program of each youth.

"REVIEW OF PLANS BY SECRETARY

"SEC. 437. The provisions of sections 102, 104, and 107 of this Act shall apply to all programs and activities authorized under 432.

"SECRETARY'S DISCRETIONARY PROJECTS

"SEC. 438. (a)(1) The Secretary of Labor is authorized, either directly or by way of contract or other arrangement, with prime sponsors, public agencies and private organizations to carry out innovative and experimental programs to test new approaches for dealing with the unemployment problems of youth and to enable eligible participants to prepare for, enhance their prospects for, or secure employment in occupations through which they may reasonably be expected to advance to productive working lives. Such programs shall include, where appropriate, cooperative arrangements with educational agencies to provide special programs and services for eligible participants enrolled in secondary schools, postsecondary educational institutions and technical and trade schools, including job experience, counseling and guidance prior to the completion of secondary or postsecondary education and making available occupational, educational, and training information through statewide career information systems. When funds are provided for the development or implementation of statewide career information systems, the occupational data contained within such systems shall be subject to the approval of the appropriate State occupational information coordinating committee established pursuant to section 161(b)(2) of the Vocational Education Act of 1963.

"(2) In carrying out or supporting such programs, the Secretary of Labor shall consult, as appropriate, with the Secretary of Commerce, the Secretary of Health, Education, and Welfare, the Secretary of Housing and Urban Development, the Secretary of Agriculture, the Director of the ACTION Agency, and the Director of the Community Services Administration.

"(3) Funds available under this section may be transferred to other Federal departments and agencies to carry out functions delegated to them pursuant to agreements with the Secretary.

"(b) The Secretary and prime sponsors, as the case may be, shall give special consideration in carrying out innovative and experimental programs assisted under this section to community-based organizations which have demonstrated effectiveness in the delivery of employment and training services, such as the Opportunities Industrialization Centers, the National Urban League, SER-Jobs for Progress, United Way of America, Mainstream, the National Puerto Rican Forum, neighborhood organizations, community action agencies, union-related organizations, employer-related non-profit organizations, and other similar organizations.

"(c)(1) In carrying out its responsibilities under this subsection and under section 161 of the Vocational Education Act, the National Occupational Information Coordinating Committee shall give special attention to the problems of unemployed youths. The Committee shall also carry out other activities consistent with the purposes of this title, including but not limited to the following:

"(A) assisting and encouraging local areas to adopt methods of translating national aggregate occupational outlook data into local terms;

"(B) assisting and encouraging the development of State occupational information systems, to be used in the maintenance of local job banks and job vacancy reports, accessible to local schools, and including pilot porgrams in the use of computers to facilitate such access;

"(C) in cooperation with State and local correctional agencies, encouraging programs of counseling and employment services for youth in correctional institutions;

"(D) providing technical assistance for programs of computer on-line terminals and other facilities to uitlize and implement occupational and career outlook information and projections supplied by State employment service offices and to improve the match of youth career desires with available and anticipated labor demand;

"(E) in cooperation with State and local educational agencies, and other appropriate persons and organizations, encouraging programs to make available employment and career counseling to presecondary youths; and

"(F) providing technical assistance for programs designed to encourage public and private employers to list all available job opportunities for youths with the appropriate eligible applicant conducting occupational information and career counseling programs, local public employment services offices and to encourage cooperation and contact among such eligible applicants, employers, and offices.

"(2) All funds available to the National Occupational Information Coordinating Committee under this Act and under section 161 of the Vocational Education Act may be used by the Committee to carry out any of its functions and responsibilities authorized by law.

"Subpart 4—General Provisions

"DISTRIBUTION OF FUNDS

"SEC. 441. Of the sums available for carrying out the provisions of this part—

"(1) 15 per centum shall be available for subpart 1;

"(2) 15 per centum shall be available for subpart 2; and

"(3) 70 per centum shall be available for subpart 3.

"WAGE PROVISIONS

"SEC. 442. Rates of pay under this part shall be no less than the higher of—

"(1) the minimum wage under section 6 (a)(1) of the Fair Labor Standards Act of 1938, but in the case of an individual who is fourteen or fifteen years old, the wage provided in accordance with the provisions of subsection (b) of section 14 of the Fair Labor Standards Act of 1938;

"(2) the State or local minimum wage for the most nearly comparable employment, but in the case of an individual who is fourteen or fifteen years old the wage provided in accordance with the applicable provisions of the applicable State or local minimum wage law; or

"(3) the prevailing rates of pay, if any, for occupations and job classifications of individuals employed by the same employer, except that—

"(A) whenever the prime sponsor has entered into an agreement with the employer and the labor organization representing employees engaged in similar work in the same area to pay less than the rates provided in this paragraph, youths may be paid the rates specified in such agreement;

"(B) whenever an existing job is reclassified or restructured, youths employed in such jobs shall be paid at rates not less than are provided under paragraph (1) or (2) of this section, but if a labor organization represents employees engaged in similar work in the same area, such youths shall be paid at rates specified in an agreement entered into by the appropriate prime sponsor, the employer, and the labor organization with respect to such reclassified or restructured jobs, and if no agreement is reached within thirty days after the initiation of the agreement procedure referred to in this subparagraph, the labor organization, prime sponsor, or employer may petition the Secretary of Labor who shall establish appropriate wages for the reclassified or restructured positions, taking into account wages paid by the same employer to persons engaged in similar work;

"(C) whenever a new or different job classification or occupation is established and there is no dispute with respect to such new or different job classification or occupation, youths to be employed in such jobs shall be paid at rates not less than are provided in paragraph (1) or (2) of this section, but if there is a dispute with respect to such new or different job classification or occupation, the Secretary of Labor shall, within thirty days after receipt of the notice of protest by the labor organization representing employees engaged in similar work in the same area, make a determination whether such job is a new or different job classification or occupation; and

"(D) in the case of projects to which the provision of the Davis-Bacon Act (or any Federal law containing labor standards in accordance with the Davis-Bacon Act) otherwise apply, the Secretary is authorized, for projects financed under subparts 2 and 3 of this part under $5,000, to prescribe rates of pay for youth participants which are not less than the applicable minimum wage but not more than the wage rate of the entering apprentice in the most nearly comparable apprenticeable trade, and to prescribe the appropriate ratio of journeymen to such participating youths.

"SPECIAL CONDITIONS

"SEC. 443. (a) The Secretary shall provide financial assistance under this part only if he determines that the activities to be assisted meet the requirements of this section.

"(b) The Secretary shall determine that the activities assisted under this part—

"(1) will result in an increase in employment opportunities over those opportunities which would otherwise be available;

"(2) will not result in the displacement of currently employed workers (including partial displacement such as reduction in the hours of nonovertime work or wages or employment benefits);

"(3) will not impair existing contracts for services or result in the substitution of Federal for other funds in connection with work that would otherwise be performed;

"(4) will not substitute jobs assisted under this part for existing federally assisted jobs;

"(5) will not employ any youth when any other person is on layoff by the employer from the same or any substantially equivalent job in the same area; and

"(6) will not be used to employ any person to fill a job opening created by the act of an employer in laying off or terminating employment of any regular employee, or otherwise reducing the regular work force not supported under this part, in anticipation of filling the vacancy so created by hiring a youth to be supported under this part.

"(c) The jobs in each promotional line will in no way infringe upon the promotional opportunities which would otherwise be available to persons currently employed in public services not subsidized under this Act and no job will be filled in other than an entry level position in each promotional line until applicable personnel procedures and collective-bargaining agreements have been complied with.

"(d) Where a labor organization represents employees who are engaged in similar work in the same area to that proposed to be performed under the program for which an application is being developed for submission under this part, such organization shall be notified and shall be afforded a reasonable period of time prior to the submission of the application in which to make comments to the applicant and to the Secretary.

"(e) Activities funded under this part shall meet such other standards as the Secretary may deem appropriate to carry out the purposes of this Act.

"(f) Funds under this part shall not be used to provide full-time employment opportunities (1) for any person who has not attained the age with respect to which the requirement of compulsory education ceases to apply under the laws of the State in which such individual resides, except (A) during periods when school is not in session, and (B) where employment is undertaken in cooperation with school-related programs awarding academic credit for the work experience, or (2) for any person who has not attained a high school degree or its equivalent if it is determined, in accordance with procedures established by the Secretary of Labor, that there is substantial evidence that such person left school in order to participate in any program under this part.

"SPECIAL PROVISIONS FOR SUBPARTS 2 AND 3

"SEC. 444. (a) Appropriate efforts shall be made to insure that youths participating in programs, projects, and activities under subpart 2 and 3 of this part shall be youths who are experiencing severe handicaps in obtaining employment, including but not limited to those who lack credentials (such as a high school diploma), those who require substantial basic and remedial skill development, those who are women and minorities, those who are veterans of military service, those who are offenders, those who are handicapped, those with dependents, or those who have otherwise demonstrated special need, as determined by the Secretary.

"(b) The Secretary is authorized to make such reallocation as the Secretary deems appropriate of any amount of any allocation under subparts 2 and 3 of this part to the extent that the Secretary determines that an eligible applicant will not be able to use such amount within a reasonable period of time. Any such amount may be reallocated only if the Secretary has provided thirty days' advance notice of the proposed reallocation to the eligible applicant and to the Governor of the State of the proposed reallocation, during which period of time the eligible applicant and the Governor may submit comments to the Secretary. After considering any comments submitted during such period of time, the Secretary shall notify the Governor and affected eligible applicants of any decision to reallocate funds, and shall publish any such decision in the Federal Register. Priority shall be given in reallocating such funds to other areas within the same State.

"(c) The provisions of section 121(g)(1)(D) of this Act shall apply to subparts 2 and 3 of this part.

"ACADEMIC CREDIT, EDUCATION CREDIT, COUNSELING AND PLACEMENT SERVICES, AND BASIC SKILLS DEVELOPMENT

"SEC. 445. (a) In carrying out this part, appropriate efforts shall be made to encourage the granting by the educational agency or school involved of academic credit to eligible participants who are in school.

"(b) The Secretary, in carrying out the purposes of this part, shall work with the Department of Health, Education, and Welfare to make suitable arrangements with appropriate State and local education officials whereby academic credit may be awarded, consistent with applicable State law, by educational institutions and agencies for competencies derived from work experience obtained through programs established under this title.

"(c) All activities assisted under this part, pursuant to such regulations as the Secretary shall prescribe, shall provide appropriate counseling and placement services designed to facilitate the transition of youth from participation in the project to (1) permanent jobs in the public or private sector, or (2) education or training programs.

"DISREGARDING EARNINGS

"SEC. 446. Earnings received by any youth under this part shall be disregarded in determining the eligibility of the youth's family for, and the amount of, any benefits based on need under any Federal or federally assisted programs.

"RELATION TO OTHER PROVISIONS

"SEC. 447. The provisions of title I of this Act shall apply to this part, except to the extent that any such provision may be inconsistent with the provisions of this part.

"PART B—JOB CORPS

"STATEMENT OF PURPOSE

"SEC. 450. This part establishes a Job Corps for economically disadvantaged young men and women, sets forth standards and procedures for selecting individuals as enrollees in the Job Corps, authorizes the establishment of residential and nonresidential centers in which enrollees will participate in intensive programs of education, vocational training, work experience, counseling and other activities, and prescribes various other powers, duties, and responsibilities incident to the operation and continuing development of the Job Corps. The purpose of this part is to assist young persons who need and can benefit from an unusually intensive program, operated in a group setting, to become more responsible, employable, and productive citizens; and to do so in a way that contributes,

where feasible, to the development of National, State, and community resources, and to the development and dissemination of techniques for working with the disadvantaged that can be widely utilized by public and private institutions and agencies.

"ESTABLISHING OF THE JOB CORPS

"SEC. 451. There is established within the Department of Labor a 'Job Corps'.

"INDIVIDUALS ELIGIBLE FOR THE JOB CORPS

"SEC. 452. To become an enrollee in the Job Corps, a young man or woman must be an eligible youth who—

"(1) requires additional education, training, or intensive counseling and related assistance in order to secure and hold meaningful employment, participate successfully in regular school work, qualify for other suitable training programs, or satisfy Armed Forces requirements;

"(2) is currently living in an environment so characterized by cultural deprivation, a disruptive homelife, or other disorienting conditions as to substantially impair prospects for successful participation in other programs providing needed training, education, or assistance;

"(3) is determined, after careful screening as provided for in sections 453 and 454 to have the present capabilities and aspirations needed to complete and secure the full benefit of the Job Corps and to be free of medical and behavioral problems so serious that the individual could not adjust to the standards of conduct, discipline, work, and training which the Job Corps involves; and

"(4) meets such other standards for enrollment as the Secretary may prescribe and agrees to comply with all applicable Job Corps rules and regulations.

"SCREENING AND SELECTION OF APPLICANTS—GENERAL PROVISIONS

"SEC. 453. (a) The Secretary shall prescribe specific standards and procedures for the screening and selection of applicants for the Job Corps. To the extent practicable, these rules shall be implemented through arrangements with agencies and organizations such as community action agencies, public employment offices, professional groups, labor organizations, and agencies and individuals having contact with youth over substantial periods of time and able to offer reliable information as to their needs and problems; and shall provide for necessary consultation with other individuals and organizations, including court, probation, parole, law enforcement, education, welfare, and medical authorities and advisers. The rules shall also provide for the interviewing of each applicant for the purpose of—

"(1) determining whether the applicant's educational and vocational needs can best be met through the Job Corps or an alternative program in the applicant's home community;

"(2) obtaining from the applicant pertinent data relating to background, needs, and interests for determining eligibility and potential assignment; and

"(3) giving the applicant a full understanding of the Job Corps and what will be expected of an enrollee in the event of acceptance.

"(b) The Secretary shall make no payments to any individual or organization solely as compensation for referring the names of candidates for Job Corps.

"(c) The Secretary shall assure that Job Corps enrollees include an appropriate number of candidates selected from rural areas, taking into account the proportions of eligible youth who reside in rural areas and the need to provide residential facilities for such youth.

"SCREENING AND SELECTION—SPECIAL LIMITATIONS

"SEC. 454. (a) No individual shall be selected as an enrollee unless there is reasonable expectation that the individual can participate successfully in group situations and activities, is not likely to engage in behavior that would prevent other enrollees from receiving the benefit of the program or be incompatible with the maintenance of sound discipline and satisfactory relationships between the center to which the individual might be assigned and surrounding communities, and unless the individual manifests a basic understanding of both the rules to which the individual will be subject and of the consequences of failure to observe those rules.

"(b) No individual shall be denied a position in the Job Corps solely on the basis of that individual's contact with the criminal justice system.

"ENROLLMENT AND ASSIGNMENT

"SEC. 455. (a) No individual may be enrolled in the Job Corps for more than two years, except as the Secretary may authorize in special cases.

"(b) Enrollment in the Job Corps shall not relieve any individual of obligations under the Military Selective Service Act (50 U.S.C. App. 451 et seq.).

"(c) After the Secretary has determined whether an enrollee is to be assigned to a Job Corps Center or a Job Corps Civilian Conservation Center, the enrollee shall be assigned to the center of the appropriate type which is closest to the enrollee's home, except that the Secretary may waive this requirement for good cause, including to insure an equitable opportunity for youth from various sections of the country to participate in the program, to prevent undue delays in assignment, to adequately meet the educational or other needs of an enrollee, and for efficiency and economy in the operation of the program.

"JOB CORPS CENTERS

"SEC. 455. (a) The Secretary may make agreements with Federal, State, or local agencies, or private organizations for the establishment and operation of Job Corps centers. Job Corps centers may be residential or nonresidential in character, or both, and shall be designed and operated so as to provide enrollees, in a well-supervised setting, with education, vocational training, work experience (either in direct program activities or through arrangements with employers), counseling, and other services appropriate to their needs. The centers shall include Civilian Conservation Centers, located primarily in rural areas, which shall provide, in addition to other training and assistance, programs of work experience to conserve, develop, or manage public natural resources or public recreational areas or to develop community projects in the public interest. The centers shall also include training centers located in either urban or rural areas which shall provide activities including training and other services for specific types of skilled or semi-skilled employment.

"(b) To the extent feasible, Job Corps centers shall offer education and vocational training opportunities, together with supportive services, on a nonresidential basis to participants in other programs under this Act. Such opportunities may be offered on a reimbursable basis or through such other arrangements as the Secretary may specify

"PROGRAM ACTIVITIES

"SEC. 457. (a) Each Job Corps center shall provide enrollees with an intensive, well-organized and fully supervised program of education, vocational training, work experience, planned vocational and recreational activities, physical rehabilitation and development, and counseling. To the fullest extent feasible, the required program shall include activities to assist enrollees in choosing realistic career goals, coping with problems they may encounter in home communities, or in adjusting to new communities, and planning and managing daily affairs in a maner that will best contribute to long-term upward mobility. Center programs shall include required participation in center maintenance work to assist enrollees in increasing their sense of contribution, responsibility and discipline.

"(b) The Secretary may arrange for enrollee education and vocational training through local public or private educational agencies, vocational educational institutions, or technical institutes, whenever such institutions provide training substantially equivalent in cost and quality to that which the Secretary could provide through other means.

"(c) To the extent feasible, arrangements for education both on and off center shall provide opportunities for qualified enrollees to obtain the equivalent of a certificate of graduation from high school. The Secretary, with the concurrence of the Secretary of Health, Education, and Welfare, shall develop certificates to be issued to each enrollee who satisfactorily completes his or her service in the Job Corps and which will reflect the enrollee's level of educational attainment.

"ALLOWANCES AND SUPPORT

"SEC. 458. (a) The Secretary may provide enrollees with such personal, travel, and leave allowances, and such quarters, subsistence, transportation, equipment, clothing, recreational services, and other expenses as he may deem necessary or appropriate to their needs. Personal allowances shall be established at a rate not to exceed $60 per month during the first six months of an enrollee's participation in the program and not to exceed $100 per month thereafter, except that allowances in excess of $60 per month, but not exceeding $100 per month, may be provided from the beginning of an enrollee's participation if it is expected to be of less than six months' duration and the Secretary is authorized to pay personal allowances in excess of the rates specified herein in unusual circumstances as determined by him. Such allowances shall be graduated up to the maximum so as to encourage continued participation in the program, achievement and the best use by the enrollee of the funds so provided and shall be subject to reduction in appropriate cases as a disciplinary measure. To the degree reasonable, enrollees shall be required to meet or contribute to costs associated with their individual comfort and enjoyment from their personal allowances.

"(b) The Secretary shall prescribe specific rules governing the accrual of leave by enrollees. Except in the case of emergency, he shall in no event assume transportation costs connected with leave of any enrollee who has not completed at least six months' service in the Job Corps.

"(c) The Secretary may provide each former enrollee upon termination, a readjustment allowance at a rate not to exceed $100 for each month of satisfactory participation in the Job Corps. No enrollee shall be entitled to a readjustment allowance, however, unless he has remained in the program at least ninety days, except in unusual circumstances as determined by the Secretary. The Secretary may, from time to time, advance to or on behalf of an enrollee such portions of his readjustment allowances as the Secretary deems necessary to meet extraordinary financial obligations incurred by that enrollee; and he may also, pursuant to rules or regulations, reduce the amount of an enrollee's readjustment allowance as a penalty for misconduct during participation in the Job Corps. In the event of an enrollee's death during his period of service, the amount of any unpaid readjustment allowance shall be paid in accordance with the provisions of section 5582 of title 5, United States Code.

"(d) Under such circumstances as the Secretary may determine, a portion of the readjustment allowance of an enrollee not ex-

ceeding $50 for each month of satisfactory service may be paid during the period of service of the enrollee directly to a spouse or child of an enrollee or to any other relative who draws substantial support from the enrollee, and any sum so paid shall be supplemented by the payment of an equal amount by the Secretary.

"STANDARDS OF CONDUCT

"SEC. 459. (a) Within Job Corps centers standards of conduct shall be provided and stringently enforced. If violations are committed by enrollees, dismissal from the Corps or transfers to other locations shall be made if it is determined that retention in the Corps, or in the particular center, will jeopardize the enforcement of such standards or diminish the opportunities of other enrollees.

"(b) To promote the proper moral and disciplinary conditions in the Job Corps, the directors of Jobs Corps centers shall take appropriate disciplinary measures against enrollees including, but not limited to, dismissal from the Job Corps, subject to expeditious appeal to the Secretary.

"COMMUNITY PARTICIPATION

"SEC. 460. The Secretary shall encourage and cooperate in activities to establish a mutually beneficial relationship between Job Corps centers and nearby communities. These activities shall include the establishment of community advisory councils to provide a mechanism for joint discussion of common problems and for planning programs of mutual interest. Youth participation in advisory council affairs shall be encouraged and separate youth councils may be established composed of enrollees and young people from the communities. The Secretary shall assure that each center is operated with a view to achieving, so far as possible, objectives which shall include—

"(1) giving community officials appropriate advance notice of changes in center rules, procedures, or activities that may affect or be of interest to the community;

"(2) affording the community a meaningful voice in center affairs of direct concern to it, including policies governing the issuance and terms of passes to enrollees;

"(3) providing center officials with full and rapid access to relevant community groups and agencies, including law enforcement agencies and agencies which work with young people in the community;

"(4) encouraging the fullest practicable participation of enrollees in programs for community improvement or betterment, with appropriate advance consultation with business, labor, professional, and other interested community groups;

"(5) arranging recreational, athletic, or similar events in which enrollees and local residents may participate together;

"(6) providing community residents with opportunities to work with enrollees directly as part-time instructors, tutors, or advisers, either in the center or in the community;

"(7) developing, where feasible, job or career opportunities for enrollees in the community; and

"(8) promoting interchanges of information and techniques among, and cooperative projects involving, the center and community schools, educational institutions, agencies serving young people and recipients of funds under this Act.

"COUNSELING AND JOB PLACEMENT

"SEC. 461. (a) The Secretary shall counsel and test each enrollee at regular intervals to measure progress in educational and vocational programs.

"(b) The Secretary shall counsel and test enrollees prior to their scheduled terminations to determine their capabilities and shall make every effort to place them in jobs in the vocation for which they are trained or to assist them in attaining further training or education. In placing enrollees in jobs, the Secretary shall utilize the public employment service system to the fullest extent possible.

"(c) The Secretary shall determine the status and progress of terminees and make every effort to assure that their needs for further education, training, and counseling are met.

"(d) The Secretary shall arrange for the readjustment allowance to be paid to former enrollees (who have not already found employment) at the State employment service office nearest the home of any such former enrollee who is returning home, or at the nearest such office where the former enrollee has indicated an intent to reside. If the Secretary uses any other public agency or private organization in lieu of the public employment service system, the Secretary shall arrange for that organization or agency to pay the readjustment allowance.

"EXPERIMENTAL AND DEVELOPMENTAL PROJECTS

"SEC. 462. (a) The Secretary may undertake experimental, research, or demonstration projects to develop or test ways of better using facilities, encouraging a more rapid adjustment of enrollees to community life that will permit a reduction in their period of enrollment, reducing transportation and support costs, or otherwise promoting greater efficiency and effectiveness in the program. These projects shall include one or more projects providing youths with education, training, and other supportive services on a combined residential and nonresidential basis. The Secretary may undertake one or more pilot projects designed to involve youth who have a history of serious and violent behavior against persons or property, repetitive delinquent acts, narcotics addiction, or other behavioral aberrations. Projects under this subsection shall be developed after appropriate consultation with other Federal or State agencies conducting similar or related programs or projects and with the prime sponsors in the communities where the projects will be carried out. They may be undertaken jointly with other Federal or federally assisted programs, and funds otherwise available for activities under those programs shall, with the consent of the head of any agency concerned, be available for projects under this section to the extent they include the same or substantially similar activities. The Secretary may waive any provision of this part which the Secretary finds would prevent the carrying out of elements of projects under this subsection essential to a determination of their feasibility and usefulness. The Secretary shall, in the annual report of the Secretary, report to the Congress concerning the actions taken under this section, including a full description of progress made in connection with combined residential and nonresidential projects.

"(b) In order to determine whether upgraded vocational education schools could eliminate or substantially reduce the school dropout problem, and to demonstrate how communities could make maximum use of existing educational and training facilities, the Secretary, in cooperation with the Secretary of Health, Education, and Welfare, may enter into one or more agreements with State educational agencies to pay the cost of establishing and operating model community vocational education schools and skill centers.

"ADVISORY BOARDS AND COMMITTEES

"SEC. 463. The Secretary may make use of advisory committees in connection with the operation of the Job Corps, and the operation of Job Corps centers, whenever the Secretary determines that the availability of outside advice and counsel on a regular basis would be of substantial benefit in identifying and overcoming problems, in planning program or center development, or in strengthening relationships between the Job Corps and agencies, institutions, or groups engaged in related activities.

"PARTICIPATION OF THE STATES

"SEC. 464. (a) The Secretary shall take action to facilitate the effective participation of States in the Job Corps programs, including, but not limited to, consultation with appropriate State agencies on matters pertaining to the enforcement of applicable State laws, standards of enrollee conduct and discipline, the development of meaningful work experience and other activities for enrollees, and coordination with State-operated programs.

"(b) The Secretary may enter into agreements with States to assist in the operation or administration of State-operated programs which carry out the purpose of this part. The Secretary may, pursuant to regulations, pay part or all of the costs of such programs.

"(c) No Job Corps center or other similar facility designed to carry out the purpose of this part shall be established within a State unless a notice setting forth such proposed establishment has been submitted to the Governor, and the establishment has not been disapproved by the Governor within thirty days of such submission.

"(d) All property which would otherwise be under exclusive Federal legislative jurisdiction shall be under concurrent jurisdiction with the appropriate State and locality with respect to criminal law enforcement as long as a Job Corps center is operated on such property.

"APPLICATION OF PROVISIONS OF FEDERAL LAW

"SEC. 465. (a) Except as otherwise provided in this subsection and in section 8143(a) of title 5, United States Code, enrollees in the Job Corps shall not be considered Federal employees and shall not be subject to the provisions of law relating to Federal employment including those regarding hours of work, rates of compensation, leave, unemployment compensation, and Federal employee benefits:

"(1) For purposes of the Internal Revenue Code of 1954 (26 U.S.C. 1 et seq.) and title II of the Social Security Act (42 U.S.C. 401 et seq.) enrollees shall be deemed employees of the United States and any service performed by an individual as an enrollee shall be deemed to be performed in the employ of the United States.

"(2) For purposes of subchapter I of chapter 81 of title 5 of the United States Code (relating to compensation to Federal employees for work injuries), enrollees shall be deemed civil employees of the United States within the meaning of the term 'employee' as defined in section 8101 of title 5, United States Code, and the provisions of that subchapter shall apply except as follows:

"(A) the term 'performance of duty' shall not include any act of an enrollee while absent from his or her assigned post of duty, except while participating in an activity (including an activity while on pass or during travel to or from such post of duty) authorized by or under the direction and supervision of the Job Corps;

"(B) in computing compensation benefits for disability or death, the monthly pay of an enrollee shall be deemed that received under the entrance salary for a grade GS–2 employee, and sections 8113 (a) and (b) of title 5, United States Code, shall apply to enrollees; and

"(C) compensation for disability shall not begin to accrue until the day following the date on which the injured enrollee is terminated.

"(3) For purposes of the Federal tort claims provisions in title 28, United States Code, enrollees shall be considered employees of the Government.

"(b) Whenever the Secreary finds a claim for damages to persons or property resulting

from the operation of the Job Corps to be a proper charge against the United States, and it is not cognizable under section 2672 of title 28, United States Code, the Secretary may adjust and settle it in an amount not exceeding $1,500.

"(c) Personnel of the uniformed services who are detailed or assigned to duty in the performance of agreements made by the Secretary for the support of the Corps shall not be counted in computing strength under any law limiting the strength of such services or in computing the percentage authorized by law for any grade therein.

"SPECIAL PROVISIONS

"SEC. 466. (a) The Secretary shall immediately take steps to achieve an enrollment of 50 per centum women in the Job Corps consistent with (1) efficiency and economy in the operation of the program, (2) sound administrative practice, and (3) the socioeconomic, educational, and training needs of the population to be served.

"(b) The Secretary shall assure that all studies, evaluations, proposals, and data produced or developed with Federal funds in the course of the Job Corps program shall become the property of the United States.

"(c) Transactions conducted by private for-profit contractors for Job Corps centers which they are operating on behalf of the Secretary shall not be considered as generating gross receipts.

"GENERAL PROVISIONS

"SEC. 467. The Secretary is authorized to—

"(1) disseminate, with regard to the provisions of section 4154 of title 39, United States Code, data and information in such forms as the Secretary shall deem appropriate, to public agencies, private organizations, and the general public;

"(2) collect or compromise all obligations to or held by the Secretary and all legal or equitable rights accruing to the Secretary in connection with the payment of obligations until such time as such obligations may be referred to the Attorney General for suit or collection; and

"(3) expend funds made available for purposes of this part—

"(A) for printing and binding, in accordance with applicable law and regulation; and

"(B) without regard to any other law or regulation, for rent of buildings and space in buildings and for repair, alteration, and improvement of buildings and space in buildings rented by the Secretary; but the Secretary shall not utilize the authority contained in this subparagraph—

"(i) except when necessary to obtain an item, service, or facility, which is required in the proper administration of this part, and which otherwise could not be obtained, or could not be obtained in the quantity or quality needed, or at the time, in the form or under the conditions in which it is needed; and

"(ii) prior to having given written notification to the Administrator of General Services (if the exercise of such authority would affect an activity which otherwise would be under the jurisdiction of the General Services Administration) of the Secretary's intention to exercise such authority, the item, service, or facility with respect to which such authority is proposed to be exercised, and the reasons and justifications for the exercise of such authority.

"UTILIZATION OF FUNDS

"SEC. 468. Notwithstanding the limitations of title II and part C of this title, financial assistance under title II and part C of this title which is used for the Job Corps program, may be used in accordance with the provisions of this part.

"PART C—SUMMER YOUTH PROGRAM

"ESTABLISHMENT OF PROGRAM

"SEC. 480. (a) The Secretary shall provide financial assistance to prime sponsors to conduct programs for eligible youth during the summer months.

"(b) Programs shall provide eligible youth with useful work and sufficient basic education and institutional or on-the-job training to assist these youths to develop their maximum occupational potential and to obtain employment not subsidized under this Act.

"PRIME SPONSORS

"SEC. 481. Prime sponsors eligible for assistance under this part shall be prime sponsors designated under section 101(c) and Native American entities described in section 302(c)(1).

"FINANCIAL ASSISTANCE

"SEC. 482. (a) In order to receive financial assistance under this part, a prime sponsor shall submit to the Secretary an annual plan pursuant to section 103.

"(b) The funds appropriated for this part in any fiscal year shall be allocated according to the procedures set forth in subsection (c) except that the Secretary may reserve up to 5 percent of the appropriated funds to be used in the Secretary's discretion.

"(c)(1) In allocating funds under this part, the Secretary shall add to the new appropriation the total amount of summer funds unspent in the previous year's summer program.

"(2) Funds for prime sponsors designated under section 101(c) shall be allocated as follows:

"(A)(i) 50 percent of such funds shall be allocated on the basis of each prime sponsor's proportion of the funds allocated for the previous year's summer programs;

"(ii) 37½ per centum of the funds shall be allocated based on the ratio of the annual average number of unemployed persons in the prime sponsor's area to the total annual average number of unemployed persons in the United States;

"(iii) 12½ per centum of the funds shall be allocated based on the ratio of the number of adults in low-income families in the prime sponsor's area to the total number of adults in low income families in the United States; except that—

"(B) each prime sponsor shall receive an allocation which, when added to its unexpended allocation for the previous fiscal year, shall be at least equal to the amount available to it for its summer program in the previous fiscal year.

"(3) Funds for Native American entities described in section 302(c)(1) shall be allocated based on the ratio of the number of Native American youths 14 through 21 years of age inclusive in the eligible prime sponsor's area to the total number of Native American youths 14 through 21 years of age inclusive in all Native American entity areas, except that each Native American entity shall receive an amount of funds equal to the amount allocated to it is the previous fiscal year.

"(4) The total allocation to Guam, the Virgin Islands, American Samoa, Northern Marianas, and the Trust Territory of the Pacific Islands shall be equal to the same percentage of the funds allocated to Guam, the Virgin Islands, American Samoa, Northern Marianas, and the Trust Territory of the Pacific Islands under the previous year's summer program.

"SECRETARIAL AUTHORITY

SEC. 483. Programs under this part shall meet such regulations, standards, and guidelines as the Secretary shall establish.

"TITLE V—NATIONAL COMMISSION FOR EMPLOYMENT AND TRAINING POLICY

"STATEMENT OF PURPOSE

"SEC. 501. The purpose of this title is to establish a National Commission for Employment and Training Policy which will have the responsibility for examining broad issues of development, coordination and administration of employment and training programs, and for advising the Secretary on national employment and training issues.

"COMMISSION ESTABLISHED

"SEC. 502. (a) There is established a National Commission for Employment and Training Policy (formerly known as the National Commission for Manpower Policy and hereinafter referred to as the 'Commission') which shall consist of twenty-seven members selected as follows—

"(1) The Secretary of Labor, the Secretary of Health, Education, and Welfare, the Secretary of Defense, the Secretary of the Interior, the Secretary of Energy, the Secretary of Transportation, the Secretary of Housing and Urban Development, the Administrator of Veterans Affairs, the Chairman of the Equal Employment Opportunity Commission, and the Director of the Community Services Administration; and

"(2) A representative of the National Advisory Council on Vocational Education created pursuant to section 162 of the Vocational Education Act of 1963; and

"(3) Fourteen members broadly representative of labor, industry, commerce, education (including vocational and technical education), veterans, State and local elected officials (including two Governors, two county officials, and two city officials who are currently serving in a prime sponsor area), community-based organizations, persons served by employment and training programs and of the general public appointed by the President for terms of two years beginning at the start of a fiscal year, except that (A) appointments to fill the unexpired portion of any term shall be for such portion only and (B) the terms, for which the first members are appointed, shall begin October 1, 1978, of which seven terms shall be for one year, and seven for two years.

"(b) The Commission shall meet not fewer than three times a year at the call of the Chairperson who shall be selected by the President and who shall be one of the 14 appointed public members.

"(c) The Chairperson (with the concurrence of the Commission) shall appoint a Director, who shall be chief executive officer of the Commission and shall perform such duties as are prescribed by the Chairperson. The Director may appoint, with the concurrence of the Chairperson and the Secretary of Labor, such clerical staff as are necessary. The Commission may utilize such staff from the Department of Labor, the Department of Health, Education, and Welfare, and such other Federal agencies as may be available to assist the Commission in carrying out its responsibilities.

"(d) The Commission may accept in the name of the Department of Labor and employ or dispose of gifts or bequests, to carry out its responsibilities under this title.

"(e) Members of the Commission who are not officers or employees of the Federal Government shall be paid compensation at a rate of up to the per diem equivalent to the rate for GS–18 when engaged in the work of the Commission, including travel time, and shall be allowed travel expenses and per diem in lieu of subsistence as authorized by law (5 U.S.C. 5703) for persons in the Government service employed intermittently and receiving compensation on a per diem, when actually employed, basis.

"FUNCTIONS OF THE COMMISSION

"SEC. 503. The Commission shall—

"(1) identify the employment and training goals and needs of the Nation and assess the extent to which employment and training, vocational education, institutional training, vocational rehabilitation, economic opportunity, and other programs under this and related Acts represent a consistent, integrated, and coordinated approach to meeting such needs and achieving such goals;

"(2) conduct such studies, hearings, research, or other activities as it deems necessary to enable it to formulate appropriate recommendations;

"(3) examine and evaluate the effectiveness of any federally assisted employment and training programs (including those assisted under this Act), with particular reference to the contributions of such programs to the achievement of objectives sought by the recommendations under clause (2) of this section;

"(4) examine and evaluate major Federal programs which are intended to (or potentially could) contribute to achieving major objectives of existing employment and training and related legislation or those set forth in the recommendations of the Commission and particularly the program which are designed (or could be designed) to develop information and knowledge about employment and training problems through research and demonstration projects or to train personnel in fields (such as occupational counseling, guidance, and placement) which are vital to the success of employment and training programs;

"(5)(A) identify, after consultation with the National Advisory Council on Vocational Education, the employment and training and vocational education needs of the Nation and assess the extent to which employment training, vocational education, vocational rehabilitation, and other programs assisted under this and related Acts represent a consistent, integrated, and coordinated approach to meeting such needs; and (B) comment, at least once annually, on the reports of the National Advisory Council on Vocational Education which comments shall be included in one of the reports submitted by the National Commission pursuant to this title and in one of the reports submitted by the National Advisory Council on Vocational Education pursuant to section 162 of the Vocational Education Act of 1963; and

"(6) evaluate and continue to study and make recommendations to the Congress on the impact of energy shortages and new energy developments upon employment and training needs and include these findings and recommendations with respect thereto in the reports required by section 504.

"REPORTS

"SEC. 504. The Commission shall make at least annually a report of its findings and recommendations to the President and the Congress. The Commission may make such interim reports or recommendations to the Congress, the President, Secretary of Labor, or to the heads of other Federal departments and agencies, and in such form, as it may deem desirable.

"TITLE VI—PUBLIC SERVICE EMPLOYMENT PROGRAM

"STATEMENT OF PURPOSE

"SEC. 601. It is the purpose of this title to provide for temporary employment in public service employment during periods of high unemployment. It is the intent of Congress that such employment be provided during periods when the national rate of unemployment is in excess of 4 per centum and that the number of jobs funded shall be sufficient to provide jobs for 25 per centum of the unemployed in excess of 4 per centum of the labor force.

"REPORT ON APPROPRIATIONS

"SEC. 602. (a) On or before March 1 of each year, the Secretary of Labor shall report to the Congress the amount that would need to be appropriated in order to achieve the level of public service employment specified in section 601. Such report shall contain the Secretary's estimate of the unemployment rate for the following fiscal year, the number of unemployed that he estimates in excess of 4 per centum of the labor force, and the average man-year cost of each public service employment opportunity.

"(b) The Secretary shall submit supplemental reports every three months thereafter containing any necessary revisions in the report required under subsection (a) due to changes in his estimates of unemployment or the cost of providing public service jobs under this title.

"(c) The Secretary shall, as soon as practicable after submission of the report required under subsection (a), inform each prime sponsor of its estimated allocation on the basis of the appropriation proposed in such report. Each prime sponsor's annual plan for using funds provided under this title shall contain provisions for an orderly transition from the number of jobs funded for the current year to the number of jobs which would be funded under such proposed appropriation.

"FINANCIAL ASSISTANCE

"SEC. 603. (a) In order to be eligible to receive financial assistance under this title for any fiscal year, a prime sponsor shall submit to the Secretary an annual plan pursuant to section 103.

"(b) Not more than 15 per centum of the funds allocated in accordance with the provisions of this title may be used for administrative and other allowable costs (such as supplies, materials, and equipment) incurred by the prime sponsor, program agents, project applicants or subgrantees or contractors, in accordance with such regulations as the Secretary may prescribe.

"(c) In filling teaching positions in elementary and secondary schools with financial assistance under this title, each prime sponsor shall give special consideration to unemployed persons with previous teaching experience who are certified by the State in which that prime sponsor is located and who are otherwise eligible under the provisions of this title.

"ALLOCATION OF FUNDS

"SEC. 604 (a)(1) The Secretary shall reserve an amount equal to not less than 2 per centum of the amounts made available pursuant to section 602 for any fiscal year to enable Native American entities which are eligible entities under section 606(a)(2) to carry out public service employment programs. Such funds shall be allocated by the Secretary in accordance with paragraph (3).

"(2) Not less than 90 per centum of the amounts made available pursuant to section 602 for any fiscal year shall be allocated among eligible prime sponsors by the Secretary in accordance with the provisions of paragraph (3).

"(3)(A) Fifty per centum of the amount allocated under this subsection shall be allocated among eligible prime sponsors in proportion to the relative number of unemployed persons who reside within the jurisdiction of each such prime sponsor as compared to the number of unemployed persons who reside in all the States.

"(B) Twenty-five per centum of the amount allocated under this subsection shall be allocated among eligible prime sponsors in accordance with the number of unemployed persons residing in areas of substantial unemployment within the jurisdiction of the prime sponsor compared to the number of unemployed persons residing in all areas of substantial unemployment.

"(C) Twenty-five per centum of the amount allocated under this subsection shall be allocated among eligible prime sponsors on the basis of the relative excess number of unemployed persons who reside within the jurisdiction of the eligible prime sponsor as compared to the total excess number of unemployed persons who reside within the jurisdiction of all eligible prime sponsors. For purposes of this subparagraph, the term 'excess number' means (i) the number of unemployed persons, residing in the jurisdiction of the eligible prime sponsor, in excess of 4½ per centum of the labor force residing in such jurisdiction or (ii) in the case of an eligible prime sponsor which is a State, the greater of the number determined under clause (i) or the number of unemployed persons in excess of 4½ per centum of the labor force in areas of substantial unemployment located in the jurisdiction of such eligible prime sponsor.

"(b)(1) Eighty-five per centum of the remainder of the amount made available pursuant to section 602 shall be available to the Secretary for financial assistance to prime sponsors as the Secretary deems appropriate, taking into account changes in rates of unemployment.

"(2) Whenever the Secretary allocates such funds through a formula, the Secretary shall, not later than thirty days prior to such allocation, publish the formula in the Federal Register for comment along with the rationale for the formula, and the proposed amount to be distributed to each prime sponsor. After consideration of comments received under the preceding sentence, the Secretary shall public final allocations.

"(c) Not more than 15 per centum of the remainder shall be allocated among the prime sponsors within the jurisdiction of those standard metropolitan statistical areas and central cities for which current population surveys were used to determine annual average rates of unemployment prior to, but not after, January 1, 1978, in proportion to the extent to which such prime sponsors allocations under subsection (a) are reduced as a result of termination of the use of such surveys. This provision shall be in effect until such time as the National Commission on Employment and Unemployment Statistics makes its report to Congress.

"Expenditure of funds

"SEC. 605. (a) Fifty per centum of the funds available to any prime sponsor under this title may be used only for employment in projects (carried out by project applicants) of a limited duration established by the prime sponsor for each project. Employment that is not in such projects must be at entry level.

"(b) Each project applicant shall submit a project application to the appropriate program agent or prime sponsor. Such application shall contain such information as required by the Secretary's regulations.

"Prime Sponsors and program agents

"SEC. 606. (a) The Secretary shall provide financial assistance under this title only to—

"(1) prime sponsors designated under section 101(c), and

"(2) Native American entities described in section 302(c)(1).

"(b)(1) Whenever a unit of general local government or combination of such units having a population of fifty thousand or more (but less than that necessary to qualify as a prime sponsor under section 101) is within a prime sponsor's area, the prime sponsor shall if such unit or units so desire, subgrant to such unit or units of general local government the functions of program agent with respect to the funds allocated to such prime sponsor on account of the area served by the program agent.

"(2) For purposes of this subsection, the functions of program agent include the administrative responsibility for developing, funding, overseeing, and monitoring programs within the area, but such functions shall be consistent with the annual plan, which shall be developed by the prime sponsor in cooperation with the program agent.

"(3) Whenever two or more units of general local government qualify as program agents with respect to the same area qualifying assistance, the provisions of section 101(b)(2) shall be applicable.

"ELIGIBILITY

"SEC. 607. An individual eligible to be employed in a position supported under this title shall be a person who has been unemployed for at least eight weeks and who is not a member of a household which has a current gross family income, adjusted to an annualized basis (exclusive of unemployment compensation and all Federal, State, and local income-tested or needs-tested public payments) at a rate exceeding 100 per centum of the lower living standard income level. For purposes of this section, family income shall be determined on the basis of the income over the three-month period prior to application for participation.

"WAGE SUPPLEMENTATION

"SEC. 608. The wages of public service employees under this title may be supplemented by a prime sponsor from sources other than this Act subject to the following conditions:

"(1) the total amount of funds which may be used to provide such supplemented wages may not exceed a sum equal to 10 per centum of such prime sponsor's allocation under this title;

"(2) the number of such employees whose wages are supplemented shall not exceed—

"(A) 25 per centum to the total number of employees under this title in the fiscal year ending September 30, 1979;

"(B) 20 per centum of such total in the fiscal year ending September 30, 1980;

"(C) 15 per centum of such total in the fiscal years ending September 30, 1981 and September 30, 1982; and

"(3) no employee whose wage is supplemented under the authority of this section shall be paid at a rate in excess of 125 per centum of the permissible maximum under section 121(c)(1)(B).

"UTILIZATION OF FUNDS

"SEC. 609. Funds available under this title to a prime sponsor may be used, with respect to individuals qualifying for assistance under this title, for programs authorized under title II (other than public service employment), part A of title III, title IV, and title VII.

"TITLE VII—PRIVATE SECTOR OPPORTUNITIES FOR THE ECONOMICALLY DISADVANTAGED

"STATEMENT OF PURPOSE

"SEC. 701. It is the purpose of this title to demonstrate the effectiveness of a variety of approaches to increase the involvement of the business community, including small business and minority business enterprises, in employment and training activities under this Act, and to increase private sector employment opportunities for economically disadvantaged persons.

"FINANCIAL ASSISTANCE

"SEC. 702. (a) The Secretary shall provide financial assistance to each prime sponsor designated under section 101(c) which includes satisfactory provisions in its annual plan for title II activities for carrying out the purposes of this title. Funds made available for carrying out this title shall be allocated by the Secretary on an equitable basis among such prime sponsors, taking into account the factors used in allocating funds under title II.

"(b) The Secretary shall establish appropriate procedures to assure that the Department of Labor will review at the national level any proposal to make payments to private for-profit employers for any activities which are not covered by regulations under this Act.

"PRIVATE INDUSTRY COUNCILS

"SEC. 703. (a) Any prime sponsor receiving financial assistance under this title shall establish a private industry council. Such council shall consist of representatives from industry and the business community (including small business and minority business enterprises), organized labor, and educational institutions and may include representation from community-based organizations which have demonstrated their effectiveness in working with the private sector. In no event shall representatievs of industry and business haev less than a majority on the council, at least half of such industry and business representatives shall be representatives of small business. Such council may consist of an existing or a newly formed organization and may be established to cover two or more prime sponsor areas pursuant to arrangements between the prime sponsors for such areas and the council. For purposes of this subsection, the term 'small business' means any private, for profit enterprise employing five hundred or fewer employees.

"(b) Such council shall participate with the prime sponsor in the development and implementation of programs under this title. In carrying out its responsibilities, such council shall utilize, to the extent appropriate, community based organizations, labor organizations, educational agencies and institutions, and economic development programs.

"(c) The Secretary shall not, by regulation or otherwise, require that any prime sponsor, in establishing such council, give a presumptive role to any particular organization.

"PRIVATE SECTOR PROGRAM

"SEC. 704. Each prime sponsor desiring to receive financial assistance under this title, as part of its plan for title II activities, shall describe its proposed private sector initiatives under this title and the integration of such initiatives with other training and placement activities under this Act. The description shall include an analysis of private sector job opportunities, including estimates by occupation, industry, and location utilizing information provided by the private industry council.

"PRIVATE ACTIVITIES

SEC. 705. Prime sponsors receiving assistance under this title shall, consistent with section 702(b), carry out private sector initiatives to demonstrate the purposes of this title. Such activities shall augment private sector-related activities under title II, including arrangements for on-the-job training with private employers, and may include—

"(1) coordinating programs of jobs and training and education enabling individuals to work for a private employer while attending an education or training program;

"(2) developing relationships between employment and training programs, educational institutions, and the private sector;

"(3) developing useful methods for collecting information about Federal Government procurement contracts with private employers, new and planned publicly supported projects such as public works, economic development and community development programs, transportation revitalization, alternative energy technology development, demonstration, and utilization projects, energy conservation projects, and rehabilitation of low income housing as part of a community revitalization or stabilization effort, which provide work through private sector contractors;

"(4) developing and marketing model contracts designed to reduce the administrative burdens on the employer and model contracts to meet the needs of specific occupations and industries;

"(5) coordinating programs under this title, with other job development, placement, and employment and training activities carried out by public and private agencies;

"(6) providing on-the-job training subsidies on a declining ratio to wages over the period of training;

"(7) providing followup services with employees placed in private employment and employers who hire recipients of services under this Act;

"(8) encouraging employers to develop job skill requirement forecasts and to coordinate such forecasts with prime sponsors;

"(9) using direct contracts for training and employment programs with private for profit and private nonprofit organizations;

"(10) developing apprenticeship or comparable high-skill training programs for workers regardless of age in occupations where such programs do not exist presently in the area;

"(11) increasing opportunities for upgrading from entry level jobs by providing counseling and other services to employees and employers beyond initial training periods;

"(12) providing technical assistance to private employers to reduce the administrative burden of employment and training programs; and

"(13) disseminating information to private employers so that they may more fully utilize programs under this Act.

"REPORT

"SEC. 706. (a) The Secretary shall provide to the Congress by March 1, 1980, an evaluation of the activities conducted under this title accompanied by recommendations for legislation.

"(b) The Secretary shall disseminate among prime sponsors information concerning successful programs under this title.

"TITLE VIII—YOUNG ADULT CONSERVATION CORPS

"STATEMENT OF PURPOSE

"SEC. 801. It is the purpose of this title to establish a Young Adult Conservation Corps to provide employment and other benefits to youths who would not otherwise be currently productively employed, through a period of service during which they engage in useful conservation work and assist in completing other projects of a public nature on Federal and non-Federal public lands and waters.

"ESTABLISHMENT OF YOUNG ADULT CONSERVATION CORPS

"SEC. 802. To carry out the purposes of this title, there is hereby established a Young Adult Conservation Corps to carry out projects on Federal or non-Federal public lands or waters. The Secretary of Labor shall administer this title through interagency agreements with the Secretaries of the Interior and Agriculture. Pursuant to such interagency agreements, the Secretaries of the Interior and Agriculture shall have responsibility for the management of each Corps center, including determination of Corps members' work assignments, selection, training, discipline, and termination, and shall be responsible for an effective program at each center.

"SELECTION OF ENROLLEES

"SEC. 803. (a) Enrollees of the Corps shall be selected by the Secretaries of the Interior and Agriculture only from candidates referred by the Secretary of Labor.

"(b)(1) Membership in the Corps shall be limited to individuals who, at the time of enrollment—

"(A) are unemployed;

"(B) are between the ages 16 to 23 inclusive;

"(C) are citizens or lawfully permanent residents of the United States or lawfully admitted refugees or parolees; and

"(D) are capable, as determined by the Secretary of Labor, of carrying out the work of the Corps for the estimated duration of each such individual's enrollment.

"(2) Individuals who, at the time of enrollment, have attained age 16 but not attained age 19 and who have left school shall not be admitted to membership in the Corps

unless they give adequate assurance, under criteria established by the Secretary of Labor, that they did not leave school for the purpose of enrolling in the Corps and obtaining employment under this title.

"(c) The Secretary of Labor shall make arrangements for obtaining referral of candidates for the Corps from the public employment service, prime sponsors designated under section 101 of this Act, sponsors of Native American programs designated under section 302 of this Act, sponsors of migrant and seasonal farmworker programs under section 303 of this Act, the Secretaries of the Interior and Agriculture, and such other agencies and organizations as the Secretary may deem appropriate. The Secretary of Labor shall undertake to assure that an equitable proportion of candidates shall be referred from each State.

"(d) In referring candidates from each State in accordance with subsection (c), preference shall be given to youths residing in rural and urban areas within each such State having substantial unemployment including areas of substantial unemployment determined by the Secretary of Labor under section 125 of this Act to have rates of unemployment equal to or in excess of 6.5 per centum.

"(e)(1) No individual may be enrolled in the Corps for a total period of more than twelve months, with such maximum period consisting of either one continuous twelve month period, or three or less periods which total twelve months, except that an individual who attains the maximum permissible enrollment age may continue in the Corps up to the twelve-month limit provided in this subsection only as long as the individual's enrollment is continuous after having attained the maximum age.

"(2) No individual shall be enrolled in the Corps if solely for purposes of membership for the normal period between school terms.

"ACTIVITIES OF THE CORPS

"SEC. 804. (a) Consistent with each interagency agreement, the Secretary of the Interior or Agriculture, as appropriate, in consultation with the Secretary of Labor shall determine the location of each residential and nonresidential Corps center. The Corps shall perform work projects in such fields as—

"(1) tree nursery operations, planting, pruning, thinning, and other silviculture measures;

"(2) wildlife habitat improvements and preservation;

"(3) range management improvements;

"(4) recreation development, rehabilitation, and maintenance;

"(5) fish habitat and culture measures;

"(6) forest insect and disease prevention and control;

"(7) road and trail maintenance and improvements;

"(8) general sanitation, cleanup, and maintenance,

"(9) erosion control and flood damage;

"(10) drought damage measures;

"(11) other natural disaster damage measures; and

"(12) integrated pest management, including activities to provide the producers of agricultural commodities with information about the appropriate amount of chemical pesticides which, when used in conjunction with nonchemical methods of pest control (A) will provide protection against a wide variety of pests, (B) will preserve to the greatest extent possible the quality of the environment, and (C) will be cost effective.

"(b)(1) The Secretary of the Interior and the Secretary of Agriculture shall undertake to assure that projects on which work is performed under this title are consistent with the Forest and Rangeland Renewal Resources Planning Act of 1974, as amended by the National Forest Management Act of 1976, and such other standards relating to such projects as each Secretary shall prescribe consistent with other provisions of Federal law.

"(2) The Secretary of the Interior and the Secretary of Agriculture shall place individuals employed as Corps members into jobs which will diminish the backlog of relatively labor intensive projects which would otherwise be carried out if adequate funding were made available.

"(c) To the maximum extent practicable, projects shall—

"(1) be labor intensive;

"(2) be projects for which work plans could be readily developed;

"(3) be able to be initiated promptly;

"(4) be productive;

"(5) be likely to have a lasting impact both as to the work performed and the benefit to the youths participating;

"(6) provide work experience to participants in skill areas required for the projects;

"(7) if a residential program, be located, to the maximum extent consistent with the objectives of this title in areas where existing residential facilities for the Corps members are available; and

"(8) be similar to activities of persons employed in seasonal and part-time employment in agencies such as the National Park Service, United States Fish and Wildlife Service, Bureau of Reclamation, Bureau of Land Management, Bureau of Indian Affairs, Forest Service, Bureau of Outdoor Recreation, and Soil Conservation Service.

"(d)(1) The Secretary of the Interior and the Secertary of Agriculture, pursuant to agreements with the Secretary of Labor, may provide for such transportaiton, lodging, subsistence, medical treatment, and other services, supplies, equipment, and facilities as they may deem appropriate to carry out the purposes of this title. To minimize transportation costs. Corps members shall be assigned to projects as near to their homes as practicable.

"(2) Whenever economically feasible, existing unoccupied or underutilized Federal, State, and local government facilities and equipment of all types shall, where appropriate, be utilized for the purposes of the Corps centers with the approval of the Federal agency, State, or local government involved.

"(e) The Secretary of Labor, in carrying out the purpose of this title shall work with the Department of Health, Education, and Welfare to make suitable arrangements whereby academic credit may be awarded by educational institutions and agencies for competencies derived from work experience obtained through programs established under this title.

"CONDITIONS APPLICABLE TO CORPS ENROLLEES

"SEC. 805. (a) Except as otherwise specifically provided in this subsection, Corps members shall not be deemed Federal employees and shall not be subject to the provisions of law relating to Federal employment including those regarding hours of work, rates of compensation, leave, unemployment compensation, and Federal employee benefits:

"(1) For purposes of the Internal Revenue Code of 1954 (26 U.S.C. 1 et seq.) and title II of the Social Security Act (42 U.S.C. 401 et seq.), Corps members shall be deemed employees of the United States and any service performed by a person as a Corps member shall be deemed to be performed in the employ of the United States.

"(2) For purposes of subchapter 1 of chapter 81 of title 5 of the United States Code, relating to compensation to Federal employees for work injuries, Corps members shall be deemed civil employees of the United States within the meaning of the term 'employee' as defined in section 8101 of title 5, United States Code, and provisions of that subchapter shall apply, except that the term 'performance of duty' shall not include any act of a Corps member while absent from the member's assigned post of duty, except while participating in an activity (including an activity while on pass or during travel to or from such post of duty) authorized by or under the direction and supervision of the Secretary.

"(3) For purposes of chapter 171 of title 18 of the United States Code, relating to tort claims procedure, Corps members shall be deemed civil employees of the United States within the meaning of the term 'employee of the Government" as defined in section 2671 of title 28, United States Code, and provisions of that chapter shall apply.

"(4) For purposes of section 5911 of title 5 of the United States Code, relating to allowances for quarters, Corps members shall be deemed civil employees of the United States within the meaning of the term 'employee' as defined in that section, and provisions of that section shall apply.

"(b) The Secretary of Labor shall, in consultation with the Secretaries of the Interior and Agriculture, establish standards for—

"(1) rates of pay which shall be at least at the wage required by section 6(a)(1) of the Fair Labor Standards Act of 1938;

"(2) reasonable hours and conditions of employment; and

"(3) safe and healthful working and living conditions.

"STATE AND LOCAL PROGRAMS

"SEC. 806. (a) Consistent with interagency agreements with the Secretary of Labor, the Secretaries of the Interior and Agriculture may make grants or enter into other agreements—

"(1) after consultation with the Governor, with any State agency or institution;

"(2) after consultation with appropriate State and local officials, with (A) any unit of general local government, or (B)(i) any public agency or organization, specifically including the Federal Extension Service and the cooperative extension service of any State with respect to projects described in section 804(a)(12), or (ii) any private nonprofit agency or organization which has been in existence for at least two years;

for the conduct under this title of any State or local component of the Corps or of any project on non-Federal lands or waters or any project involving work on both non-Federal and Federal lands and waters.

"(b) No grant or other agreement may be entered into under this section unless an application is submitted to the Secretary of the Interior or the Secretary of Agriculture, as the case may be, at such times as each such Secretary may prescribe. Each grant application shall contain assurances that individuals employed under the project for which the application is submitted—

"(1) meet the qualifications set forth in section 803(b);

"(2) shall be employed in accordance with section 805(b); and

"(3) shall be employed in activities that—

"(A) will result in an increase in employment opportunities over those opportunities which would otherwise be available,

"(B) will not result in the displacement of currently employed workers (including partial displacement such as reduction in the hours of nonovertime work or wages or employment benefits),

"(C) will not impair existing contracts for services or result in the substitution of Federal for other funds in connection with work that would otherwise be performed,

"(D) will not substitute jobs assisted under this title for existing federally assisted jobs, and

"(E) will not result in the hiring of any youth when any other person is on layoff

from the same or any substantially equivalent job.

"(c) Thirty percent of the sums appropriated to carry out this title for any fiscal year shall be made available for grants under this section for such fiscal year and shall be made on the basis of total youth population within each State.

"SECRETARIAL REPORTS

"SEC. 807. The Secretary of Labor, the Secretary of the Interior, and the Secretary of Agriculture shall jointly prepare and submit to the President and to the Congress a report detailing the activities carried out under this title for each fiscal year. Such report shall be submitted not later than February 1 of each year following the date of enactment of this Act. The Secretaries shall include in such report such recommendations as they deem appropriate.

"ANTIDISCRIMINATION

"SEC. 808. The Corps shall be open to youth from all parts of the country of both sexes and youth of all social, economic, and racial classifications.

"TRANSFER OF FUNDS

"SEC. 809. Funds necessary to carry out their responsibilities under this title shall be made available to the Secretaries of the Interior and Agriculture in accord with interagency agreements between the Secretary of Labor and the Secretaries of the Interior and Agriculture.".

Mr. HAWKINS (during the reading). Mr. Chairman, I ask unanimous consent that further reading of title I be dispensed with and that title I be considered as read and printed in the RECORD and open to amendment at any point.

The CHAIRMAN. The Chair would like to advise the gentleman from California that, as the gentleman knows, the bill is now being read by sections, and section 2 extends to page 225 of the bill. Does the gentleman from California ask unanimous consent to dispense with further reading as to section 2?

Mr. HAWKINS. Yes, Mr. Chairman, I do.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. SARASIN. Mr. Chairman, I want to be sure I followed that request. I am not sure I understood.

The CHAIRMAN. Will the gentleman from California (Mr. HAWKINS) state his request again, please?

Mr. HAWKINS. Mr. Chairman, I ask unanimous consent that further reading of section 2 be dispensed with and that it be printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

AMENDMENT OFFERED BY MR. CORNELL

Mr. CORNELL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CORNELL: Page 26, line 25, insert "(1)" immediately after "(c)"; on page 27, lines 6, 11, 14, and 16, redesignate paragraphs (1), (2), (3), and (4) as subparagraphs (A), (B), (C), and (D), respectively; and after line 20 insert the following new paragraph:

(2) If the Secretary finds that a public service employment program is being conducted in violation of section 121 (e)(2), (e)(3), or (g)(1), the Secretary shall, after notice and opportunity for a hearing, revoke all or any part of that portion of the affected prime sponsor's comprehensive employment and training plan pertaining to such program and terminate financial assistance with respect to such portion.

Mr. CORNELL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. CORNELL. Mr. Chairman, this amendment would establish a firm enforcement policy for the most frequently abused provision in CETA—substitution. Simply stated, my amendment would require the Secretary of Labor to suspend all or a portion of the prime sponsor's public service employment funds if he determines that the prime sponsor is violating provisions of the act.

Mr. Chairman, I doubt whether there is a single Member in this Chamber who has not heard complaints about the breakdown of the maintenance of effort provisions in CETA. The committee has certainly recognized the problem and has prominently mentioned the issue on page 2 of the committee report:

The growth of the public service employment program in response to the need for alleviating excessive unemployment has been accompanied by widespread concern that the programs may not achieve their objective of creating new jobs. This is the case if Federal dollars are not buying new jobs but are merely financing jobs that would have been otherwise funded by State or local governments. The objective evidence on the extent of such substitution in the program is by no means good, with estimates running from almost zero to almost 100 percent in the long run.

Although various studies have been conducted on the extent of substitution, there is a wide discrepancy in the actual percentages of violations of this provision in the law. There is no question, however, that millions of dollars, originally earmarked for job creation, are being misspent at the local level because of substitution.

The facts show that CETA workers make up about 16 percent of the municipal work force in 48 major cities (according to a Treasury report). In two cities, Miami and San Diego, this percentage is as high as 47 percent. The law clearly forbids local governments from using CETA money in place of their own funds to pay employees they would have hired anyway, but these figures strongly suggest that the law is being widely violated in this respect. Unlike several of the speakers that we heard, during the general debate, who condemned violations of CETA but found no such violations in their own cities or areas, I find that in my own district and my own State there have been such violations.

The unfortunate part of such a situation is that the hard core unemployed, whom this program was designed to help, are being lost in the shuffle and the CETA program, which was created primarily as a transitory program to be curtailed when unemployment declines, is beginning to look more and more like a permanent supplement to revenue sharing. If localities need Federal funds to assure essential serviecs, let us vote on that as a separate issue and put an end to the false hope that we hold out to the jobless that this bill will somehow help them.

In all fairness this bill does contain additional prohibitions that are designed to control substitution. I applaud the chairman and members of the Employment Opportunities Subcommittee for their efforts to reduce substitution. My concern, however, is that prohibitions are not worth the paper they are printed on without an effective enforcement remedy. I suggest that my amendment provides that remedy. In the absence of such an enforcement provision, I am afraid that local officials, wanting to appease those citizens with tax revolt on their minds, will not be able to resist the temptation to substitute CETA workers for regular employees. Currently local officials hardly have to worry about penalties if they violate the substitution provisions in the law. The Department of Labor has developed an abysmal record of enforcement with respect to substitution. Consider, for example, the fact that the Department of Labor, in a letter to the subcommittee, has stated that only "about $1.4 million has been disallowed as a result of maintenance of effort violations." Although this amount is in a context that implies "a number of cases where penalties have been imposed," it is almost equal to the amount that the city of Chicago had to repay ($1 million) for allegedly misusing CETA funds. What about the other 47 major cities with high percentages of CETA workers? The Department of Labor openly admits that substitution "may be as low as 18 percent" but 18 percent of a multibillion-dollar program equals millions and millions of dollars and makes the $1.4 million enforcement effort look like a mere pittance. These statistics strongly indicate that only a fraction of those who violate the maintenance of effort provisions are penalized.

My amendment will correct this situation by providing a clear and effective enforcement policy. Support for this amendment will inform the prime sponsors that if substitution continues, such action will be interpreted as a sign that there is no interest in or need for Federal funds to create new jobs and funds will be suspended.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. CORNELL. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, I wish to commend the gentleman in the well for offering his amendment. I would like to indicate that we on this side are willing to accept the amendment.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. CORNELL. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, I thank the gentleman for yielding. I have no

basic objection to the gentleman's amendment and would be willing to accept it. I would like to ask whether the gentleman does not think that section 4 on page 27, in connection with line 25 on page 26 gives the Secretary almost the same power?

Mr. CORNELL. As I understand it, it gives the Secretary more discretionary power, rather than this which requires the Secretary to take such action. I am afraid, under the wording of the bill, that the Secretary of Labor, in some instances, would be under tremendous political pressure, whereas, in this way, it would remove a lot of that discretionary power on the part of the Secretary of Labor and would require him to take action.

I know, in the particular instance in my area, where I had complained of alleged violations, I found out from the prime sponsor that they had been told that they should not do it and that was all the action that was taken.

Mr. SARASIN. Again, I commend the gentleman in the well, and we will accept the gentleman's amendment on our side.

AMENDMENT OFFERED BY MR. BUTLER TO THE AMENDMENT OFFERED BY MR. CORNELL

Mr. BUTLER. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. BUTLER to the amendment offered by Mr. CORNELL:

Strike the period in the second paragraph and insert: "and shall require the prime sponsor to refund to the Department of the Treasury any and all funds found to have been expended in violation of such section."

Strike the last "and" which appears in the second paragraph and insert in lieu thereof a comma.

Mr. BUTLER. Mr. Chairman, I will not take the full 5 minutes allotted to me.

Mr. Chairman, I applaud the efforts of the gentleman from Wisconsin (Mr. CORNELL) in offering his amendment. The purpose of offering my amendment is to strengthen somewhat the gentleman's amendment.

I believe the language is self-explanatory, it says "and shall require the prime sponsor," in addition to the other things, "to refund to the Department of the Treasury any and all funds found to have been expended in violation of such section."

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. BUTLER. I yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Chairman, I would like to commend the gentleman for his addition to the amendment offered by the gentleman from Wisconsin (Mr. CORNELL) because I think it is very effective and important.

I am, as you know, one of the many Members in the House in whose district some of the misappropriations of funds have occurred. I am concerned that if we do not have this amendment, we might leave it open for plea bargaining that is very common in our courts now, of having some arrangement made outside of the sphere of the Department of Labor. If you put it in the law that any funds that are misappropriated shall be repaid I think it would strengthen what the gentleman from Wisconsin (Mr. CORNELL) is trying to do.

So, Mr. Chairman, I am very happy to join the gentleman from Virginia in supporting his amendment. I hope that the Members of the Committee will accept the amendment because I believe it helps get at some of the wrongs and to know that if you have such a situation—and, hopefully, none will occur—but if you do, then those involved know that they will have to pay that money back in addition to any criminal penalties assessed by a court.

Mr. BUTLER. Mr. Chairman, I thank the gentleman for his support, and I urge the House to accept the amendment and proceed to other business.

Mr. HAWKINS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to commend the gentleman from Virginia (Mr. BUTLER) on his amendment. The amendment is acceptable on this side, and again, I commend the gentleman for offering the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia (Mr. BUTLER) to the amendment offered by the gentleman from Wisconsin (Mr. CORNELL).

The amendment to the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin (Mr. CORNELL), as amended.

The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. CORNELL. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair would like to advise the gentleman from Wisconsin that the ayes prevailed and the amendment was agreed to.

Mr. CORNELL. I am aware of that, Mr. Chairman, but I still make the point of no quorum, pending my demand for a recorded vote.

The CHAIRMAN. The Chair will count. Thirty-four Members are present, not a quorum.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

The CHAIRMAN. A quorum of the Committee of the Whole has not appeared.

The Chair announces that a regular quorum call will now commence.

Members who have not already responded under the noticed quorum call will have a minimum of 15 minutes to record their presence. The call will be taken by electronic device.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 669]

Abdnor	Goldwater	Murphy, Ill.
Andrews, N.C.	Hansen	Murphy, N.Y.
Annunzio	Harrington	Nix
Archer	Harsha	Pettis
Armstrong	Heckler	Pike
Bellenson	Huckaby	Railsback
Brown, Calif.	Jacobs	Rhodes
Buchanan	Jenkins	Rodino
Burke, Mass.	Johnson, Colo.	Rosenthal

Fowler	Milford	Wiggins
Frey	Miller, Calif.	Wilson, Tex.
Gammage	Moorhead, Pa.	Yatron

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. NATCHER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill, H.R. 12452, and finding itself without a quorum, he had directed the Members to record their presence by electronic device, whereupon 354 Members recorded their presence, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Wisconsin (Mr. CORNELL) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 407, noes 1, not voting 24, as follows:

[Roll No. 670]

So the amendment, as amended, was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. QUIE

Mr. QUIE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. QUIE: Page 177, line 3, after "or local agencies," insert: "including a State board or agency designated pursuant to section 104(a)(1) of the Vocational Education Act of 1963 which operates or wishes to develop area vocational education school facilities or residential vocational schools (or both) as authorized by such Act,".

Mr. QUIE. Mr. Chairman, this is an amendment to the Job Corps section of the bill which would enable, if the Secretary deems fit, to work out an arrangement for a Job Corps center in area vocational technical school. If the residential facilities are added to the AVTI, the Job Corps enrollees could attend on an integrated basis along with those that are not economically disadvantaged. If there is going to be further expansion of Job Corps opportunities, this might be one option the Department of Labor might want to utilize.

I know in Minnesota the Native Americans are considering applying for a Job Corps center and it may be an option they might want to utilize to deal with an area vocational technical school.

Mr. Chairman, that is an explanation of what the amendment does. I have talked to the chairman of the subcommittee about it.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. QUIE. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, I wish to state that it is true the gentleman from Minnesota has discussed this amendment with us. I think it is a very excellent one and we are delighted to accept it.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. QUIE. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, we are also happy to accept the amendment on this side.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota (Mr. QUIE).

The amendment was agreed to.

AMENDMENTS OFFERED BY MR. HAWKINS

Mr. HAWKINS. Mr. Chairman, I offer amendments which are technical in nature.

The Clerk read as follows:

Amendments offered by Mr. HAWKINS: Page 3, strike out "SEC. 211. Eligibility for participation." and insert in lieu thereof the following: "SEC. 221. Eligibility for participation."

Page 5, insert immediately after the item pertaining to section 446 the following new item: "SEC. 447. Relation to other provisions.".

Page 6, insert immediately after the item pertaining to section 705 the following new item: "SEC. 706. Report.".

Page 12, line 3, strike out "advisory" and insert in lieu thereof "planning" and on line 7 strike out "education" and insert in lieu thereof "educational".

Page 15, line 2, strike out "community based" and insert in lieu thereof "community-based".

Page 19, strike out line 11 and insert in lieu thereof the following: "section 203(c) of this Act.".

Page 20, line 7, strike out "community based" and insert in lieu thereof "community-based".

Page 22, line 14, strike out "after" and insert in lieu thereof "between".

Page 25, line 24, strike out "recipient of" and insert in lieu thereof "prime sponsor receiving".

Page 27, line 4, strike out "is" and insert in lieu thereof "are".

Page 31, line 4, insert "or recipient" immediately after "prime sponsor".

Page 35, beginning on line 14, strike out "with respect to the general public".

Page 36, line 16, strike out "State agency" and insert in lieu thereof "State agencies".

Page 37, line 13, strike out "agencies" and insert in lieu thereof "officials".

Page 43, line 25, strike out "section 121(c)(1)(B)" and insert in lieu thereof "subparagraph (B) of this paragraph".

Page 61, line 7, strike out "require" and insert in lieu thereof "requires".

Page 65, line 4, strike out "126," and insert in lieu thereof "126.".

Page 66, immediately after line 8, insert the following new subsection:

"(c) Notwithstanding any other provision of this Act, no authority to enter into contracts under this Act shall be effective except to such an extent or in such an amount as are provided in advance in appropriations Acts.

Page 68, line 7, insert a comma after "shall", and on line 10, insert "to" immediately before "comply".

Page 71, strike out line 14 and insert in lieu thereof the following: "in a pattern or practice in violation of the provisions of".

Page 74, line 14, strike out "obtains for" and insert in lieu thereof "obtains by", and on line 16, strike out "this Act" and insert in lieu thereof "such Act".

Page 75, line 11, strike out "Secretary" and insert in lieu thereof "Secretary of Labor"; on line 18, strike out "this Act" and insert in lieu thereof "the Comprehensive Employment and Training Act of 1973"; and on line 21 strike out "this Act" and insert in lieu thereof "such Act".

Page 76, line 3, strike out "Secretary" and insert in lieu thereof "Secretary of Labor"; on lines 4 and 8 strike out "the Secretary's" and insert in lieu thereof "such Secretary's"; and on line 7 strike out "the Secretary" and insert in lieu thereof "such Secretary".

Page 84, line 22, strike out "adults" and insert in lieu thereof "audits".

Page 98, line 8, strike out "setcion" and insert in lieu thereof "section".

Page 98, line 18, strike out "been employed for not more" and insert in lieu thereof "not been employed for more", and on line 21, strike out "title" and insert in lieu thereof "Act".

Page 101, line 1, strike out "not less than" and insert in lieu thereof "at not less than the rate".

Page 102, line 12, strike out "which" and insert in lieu thereof "who".

Page 106, line 16, strike out ", and Hawaiian Natives".

Page 107, line 10, strike out "part" and insert in lieu thereof "section", and on line 19, strike out "title" and insert in lieu thereof "section".

Page 117, line 14, insert "testing the" immediately before "usefulness", and on line 23, strike out "other".

Page 127, strike out lines 13 and 14 and insert in lieu thereof the following:

"(b) for the purposes of subpart 1 of part A, the term 'eligible youth' means a youth".

Page 134, line 25, strike out "report" and insert in lieu thereof "reports".

Page 148, line 21, strike out "section 703" and insert in lieu thereof "section 121(j)".

Page 150, line 13, strike out "section 125 (2)" and insert in lieu thereof "section 125 (2)(A)".

Page 158, line 21, strike out "contracts" and insert in lieu thereof "agreements".

Page 200, line 19, insert "for the following fiscal year" immediately after ""appropriated".

Page 210, lines 7 and 8, strike out "community based" and insert in lieu thereof "community-based".

Page 215, line 10, strike out "estabilshed" and insert in lieu thereof "established".

Page 216, line 5, strike out "section 125" and insert in lieu thereof "section 125 (2)(A)".

Mr. HAWKINS (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD, and that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HAWKINS. Mr. Chairman, these are purely technical amendments coming out of the committee, one which complies with one of the waivers of the Budget Act provided in the rule which was brought to our attention in a letter which was submitted to the committee by the Budget Committee.

The other amendments are purely technical. They have been seen by the minority and I believe they have no objection to the amendments.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, the amendments offered by the gentleman from California are technical in nature. We would certainly accept them on this side.

The CHAIRMAN. The question is on the amendments offered by the gentleman from California (Mr. HAWKINS).

The amendments were agreed to.

AMENDMENT OFFERED BY MR. ERLENBORN

Mr. ERLENBORN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ERLENBORN: Page 45, strike out line 8 and everything that follows through line 16, and insert in lieu thereof the following:

(B) All persons employed in public service jobs under this title will be assured of workmen's compensation, health insurance, unemployment insurance, and other benefits at the same levels and to the same extent as other employees of the employer and to working conditions and promotional opportunities neither more nor less favorable than such other employees enjoy. Nothing in this subparagraph or in paragraph (4) shall be deemed to require the enrollment of persons employed in public service jobs in retirement systems or plans for the purpose of providing retirement benefits based on age or service, or both.

Page 45, beginning on line 20, strike out "1979" and insert in lieu thereof "1980"; and beginning on line 20, strike out "With respect to" and everything that follows through line 25 and insert in lieu thereof the following: "With respect to participants other than those described in the preceding sentence, funds under this Act may, notwithstanding paragraph (3)(B), be used for contributions to retirement systems or plans (other than pursuant to the Social Security Act) only to the extent such contributions are used to provide benefits such as health and death and disability and are not used for retirement benefits based on age or service, or both."

Mr. ERLENBORN (during the reading). Mr. Chairman, since this amendment has previously been published in the RECORD, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ERLENBORN. Mr. Chairman, the major purpose of the CETA is to provide training to the unemployed and to those who need new jobs skills to become employable and employed. Unfortunately, most of it has gone to hire public service employees into make work jobs.

And the fact is that a certain portion of the funds that have been made available have been paid to State and local retirement funds for these employees because of the requirements of the law that the employees not be classified separately, and, therefore, they must be treated the same as full-time public employees. But CETA participants are limited to participation of 18 months. The fact is that there are to my knowledge no plans—and certainly if there are any, they are extremely few—where an employee could gain any vested right in the 18-month period while the employee is a public employee under the CETA program. What is the point of providing benefits to individuals we limit to 18 months, and who are expected to move from public service employment to full-time private employment in the private sector.

The prohibition against classification of the employees and their treatment as full-time regular public employees mean that the contributions made on their behalf into the retirement funds become a windfall to the employer, and in fact this has become a backdoor revenue sharing program.

It is my purpose through this amendment to see that the funds that were meant for job training are used for job training in the CETA program and not as backdoor revenue sharing. My amendment would accomplish the following:

It would direct the CETA dollars to the purpose of employing people rather than subsidizing the retirement system. It would allow those States that require local governments to include CETA employees in their retirement plans sufficient time to change their laws accordingly, because the full effect of this will not take place until January 1, 1980.

It would allow the use of CETA funds to continue to be made for contributions for disability, death, and health insurance.

I know there are other Members who have been concerned about this same problem, and there probably will be another amendment offered. I will address myself to that amendment if and when it is offered.

Let me explain the magnitude of this problem just a little further. This applies to my amendment, and it would apply to the other amendment as well that may be offered.

In Illinois, my home State, for example, 3.4 percent of the payroll is paid to the retirement plan for each employee. Thus the annual contribution for one $10,000 employee is $343. If there are, say, in Illinois, 10,000 such workers, the annual contribution then amounts to $3,430,000. So we are talking about substantial sums of money that are being diverted from employing the unemployed and that are going into the retirement plans, thus relieving the State and local sponsors of the burden of supporting those retirement plans, the necessity for making the contributions themselves, because these funds would escheat to the plans to make the payments to workers, to full-time workers, who do vest and ultimately draw benefits.

There have been some concerns about the tax qualifications of these public plans because there is a nondiscrimination provision in the Internal Revenue Code. Let me assure those who might be concerned that this is not a problem.

First of all, there is a moratorium at the present time by the Internal Revenue Service relative to planned qualification for public retirement plans. I do not necessarily think that is right, but that happens to be the fact.

The fact is that public plans are not now required by the Internal Revenue Service to comply with the Internal Revenue Code to be treated as a qualified plan under the Internal Revenue Code provisions. So if there is classification of employees and thus discrimination under the code, it will not affect the tax status of these public employee plans.

To sumarize, Mr. Chairman, I think it is absolutely necessary that we adopt this amendment to redirect these Federal funds to the employment of those who are unemployed rather than to use the funds for subsidizing the system.

AMENDMENT OFFERED BY MR. GOODLING TO THE AMENDMENT OFFERED BY MR. ERLENBORN

Mr. GOODLING. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. GOODLING to the amendment offered by Mr. ERLENBORN: On line 5, strike out "unemployment insurance."

On line 13, strike the period and insert "; or the payment of unemployment insurance benefits to such persons."

Mr. GOODLING. Mr. Chairman, with this amendment I am merely saying that the prime sponsor has the option whether to or not to provide unemployment insurance.

At the present time the bill says they must. I think the danger of saying they must would lead people to believe that this is some kind of a permanent job.

I think all I am saying here is that it is not supposed to be considered a permanent job. We do not want to get into the business of 18 months' training, then on unemployment, and then back to the business of 18 months' training again.

Mr. Chairman, some will quickly say, "Well, what happens after they are trained if there is no job available? Do they then become a part of the welfare system?"

Well, yes, either way they do. If there is no job and we come to unemployment insurance, it is tax dollars that have provided that. If in fact they go to the regular welfare programs, it is again tax dollars that are involved.

So, basically, what I am saying is that we do not want to give anyone any kind of encouragement that this is in fact some kind of a full-time job that they are involved in; that there should not be necessarily the requirement that the prime sponsor must in fact provide unemployment insurance.

AMENDMENT OFFERED BY MR. KREBS AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. ERLENBORN

Mr. KREBS. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. KREBS as a substitute to the amendment offered by Mr. ERLENBORN: Page 45, strike out lines 8 through 25 and insert in lieu thereof the following:

"(B) All persons employed in public service jobs shall be provided workers' compensation, health insurance, unemployment benefits, and other benefits and working conditions at the same level and to the same extent as other employees working a similar length of time, doing the same type of work, and similarly classified. Any such classifications under any applicable civil service or merit law or regulation must be reasonable, and must include nonfederally financed employees, but within any single classification a distinction may be made between public service employees and other employees for purposes of determining eligibility for participation in retirement systems or plans which provide benefits bases on age or service or both. Nothing in this subparagraph or in paragraph (4) shall be deemed to require a contribution to a retirement system or plan for the purpose of providing retirement benefits based on age or service, or both, to a public service employee unless funds under this Act are available, pursuant to paragraph (4), to make such contribution."

Mr. KREBS (during the reading). Mr. Chairman, in view of the fact that this amendment was printed in the RECORD, I ask unanimous consent that the substitute amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. KREBS. Mr. Chairman, this subject of retirement for CETA employees is rather involved, and I hope that I will be able to outline the difference here that exists between the bill as it is before us, the amendment offered by the distinguished gentleman from Illinois (Mr. ERLENBORN), and my own amendment.

Mr. Chairman, let me state at the outset, before I do this, that my amendment is designed to represent a reasonable compromise—as self-serving as this may sound—between the spirit of the amendment offered by the gentleman from Illinois (Mr. ERLENBORN) and the retirement as it is outlined in the legislation as it came out of the committee. It has the support of the National Association of Counties, the League of Cities, various labor unions, and it will give us an opportunity to save substantial amounts of money and yet, for lack of a better description, we will not throw the baby out with the bath.

Under the legislation that is now before us, namely, the committee bill, retirement benefits would continue to be paid out of CETA funds for all employees under CETA until the first of 1979.

Under my amendment, such payment would continue until June 30, 1979.

Under the Erlenborn amendment, as I understand it, such payment would continue until the first of 1980.

Under the committee bill, however, the requirement still is in it which requires equal pay for equal work.

Under the committee bill, subsequent to the cut-off dates that I just mentioned a minute ago, CETA funds will only be used for the payment of retirement in those situations where there is a reasonable likelihood of vesting of the retirement, or in the situation where the CETA employee lands a permanent job and opts to buy into the retirement system.

This would mean, in turn, that local and State governments would end up footing the bill for CETA employees in those situations where the CETA funds will no longer be available after the cut-off date.

What my amendment is designed to do is to take this burden away from the State and local government and to provide that CETA retirement benefits will be available out of CETA funds until, as I said a minute ago, June 30, 1979, but after that date only in those situations where there is a high likelihood of vesting or where the CETA employee lands a permanent job.

In all other cases, there will be no retirement pay. Mr. Chairman, I sincerely believe that this does represent an opportunity for us to save substantial amounts of money. Let me specifically mention here that over a 21-month period beginning in July 1974, $109 million was paid in retirement funds. Most of these funds accrued to local and State retirement systems without the CETA employee ever benefiting from these retirements.

So, under the amendment I am proposing as a substitute, the involvement of the Federal Government would be substantially reduced by only limiting it to those cases where there is a high likelihood of vesting. It would, indeed, relieve State and local governments of a substantial burden without having the Federal Government pick up the tab. So, Mr. Chairman, I urge the committee to adopt this substitute over the amendment proposed by the gentleman from Illinois (Mr. ERLENBORN).

The CHAIRMAN. The time of the gentleman from California has expired.

(At the request of Mr. PATTERSON of California and by unanimous consent, Mr. KREBS was allowed to proceed for 3 additional minutes.)

Mr. PATTERSON of California. Mr. Chairman, will the gentleman yield?

Mr. KREBS. I yield to my colleague from California.

Mr. PATTERSON of California. Mr. Chairman, I thank the gentleman for yielding to me, and commend him on his amendment. It appears to me that it very ably takes care of a problem in my home State of California, and I am sure in others, by preserving and clarifying congressional intent that the Federal Government not pay retirement benefits for CETA employees in short-term public service jobs unless those benefits accrue directly to the benefit of the CETA participant.

I have an amendment to the gentleman's amendment which I have shown to the gentleman and which is available at the desk. I would ask him if he has read it and if he would accept it at this point. The amendment would merely add one sentence to the end of the gentleman's amendment. That sentence would be:

Pursuant to sections 158 and 314 of this Act, the Secretary shall provide technical assistance to recipients to enable retirement systems or plans to comply with paragraphs (3)(B) and this paragraph.

This would insure that the Department of Labor will cooperate in a timely and responsible manner to assist the States and prime sponsors in meeting the requirement of the law as it directly relates to the payment of retirement benefits, and would actually, I think, blend quite well with the gentleman's amendment.

Mr. KREBS. I did read the amendment and I discussed it with my colleague from California. I think it will indeed help, for lack of a better description, the working relationship between the Labor Department and the local and State governments. I am willing to accept the amendment.

The CHAIRMAN. Does the gentleman from California ask unanimous consent to modify his amendment?

Mr. KREBS. Yes, Mr. Chairman, I ask unanimous consent that I be permitted to modify the amendment.

The CHAIRMAN. The Clerk will report the modification.

The Clerk read as follows:

At the end of the Krebs amendment to section 121(c)(4) insert immediately after the period the following:

"Pursuant to sections 158 and 314 of this Act, the Secretary shall provide technical as-

sistance to recipients to enable retirement systems or plans to comply with paragraph (3)(B) and this paragraph."

The CHAIRMAN. Is there objection to the request of the gentleman from California (Mr. KREBS)?

Mr. SARASIN. Mr. Chairman, reserving the right to object, is it my understanding that the gentleman in the well is expanding his amendment so that amendments will still be in order to his substitute?

The CHAIRMAN. That is correct.

Mr. SARASIN. I thank the chairman.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from California (Mr. KREBS)?

There was no objection.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. KREBS. I yield to the gentleman from California (Mr. LAGOMARSINO).

Mr. LAGOMARSINO. Mr. Chairman, I thank the gentleman from California (Mr. KREBS) for yielding.

I commend the gentleman on his amendment. As the gentleman knows, some of us from California have been serving on an ad hoc task force on proposition 13.

The CHAIRMAN. The time of the gentleman from California (Mr. KREBS) has expired.

(On request of Mr. LAGOMARSINO, and by unanimous consent, Mr. KREBS was allowed to proceed for 3 additional minutes.)

Mr. LAGOMARSINO. Mr. Chairman, if the gentleman will yield further, as I said, the gentleman from California (Mr. KREBS) and I and others have been acting on an ad hoc task force trying to determine what effects proposition 13 would have or will have on certain Federal programs, including the CETA program. We have discussed the content of this statement in our discussions of that ad hoc committee.

I must say to the gentleman from California, I have received word from the people who operate the CETA program in my district. They are strongly in favor of the Krebs amendment. They feel it will bring the program in line with the Labor Department policy requiring retirement coverage only for those who will be able to benefit from it and it will provide strong incentives to make changes in their retirement laws and insure, most important of all, that Federal funds go for the purposes intended, not for retirement assistance to those who already have jobs. So I hope the committee will adopt the gentleman's amendment.

Mr. DON H. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. KREBS. I yield to the gentleman from California (Mr. DON H. CLAUSEN).

Mr. DON H. CLAUSEN. Mr. Chairman, I rise in support of the amendment.

A number of my own constituents and political subdivisions have written to me indicating their support for the amendment.

Mr. Chairman, I would like to commend my colleague from California (Mr. KREBS) for his foresight in drafting this amendment. It addresses a very serious problem facing our local governments and provides a reasonable and straightforward solution. I would also like to concur in the remarks of my other colleague from California (Mr. LAGOMARSINO) who is also supporting this amendment.

My colleagues and I are all members of the special ad hoc committee on proposition 13. As such, we have been conducting hearings to ascertain the precise impact of certain programs on California as a result of proposition 13. The CETA program has come up quite often during the course of our discussions, and we have reviewed the effect of this amendment. As a result, it has bipartisan support in the California delegation.

The purpose of the amendment is to address the Department of Labor regulations and the Federal requirement of providing retirement coverage for public service employment participants.

In discussions with elected officials in my congressional district, it has been pointed out to me that the DOL regulations are in direct conflict with the State retirement law.

Jim Howard and Ernest Cobine, both of the Eureka City Council, outlined the problem saying:

Up until now this benefit (retirement) has been paid for out of CETA funds. The regulations require cities to provide all employee benefits to CETA employees as they do regular employees. Obviously, regular employees receive retirement benefits. The Department of Labor has concluded that since CETA is temporary employment, the employees would never be able to vest in a retirement program; therefore, they will no longer pay the contributions into the retirement system. (Section 98125) The State PERS retirement system requires all full-time employees must be a member of the retirement system. Obviously, there is a conflict here beyond the control of local governments.

They went on to emphasize the seriousness of the problem by saying that if it is not resolved "many California cities will have to discontinue participation in the program due to the additional financial burden. This action not only defeats the purpose of CETA but penalizes the participants in it."

I was also directly contacted by Sara Parsons, a member of the Humboldt County Board of Supervisors, and the city of Blue Lake specifically asking for my help in resolving this dilemma. In addition, I have also received comments from the city of Petaluma, the city of Arcata, and Mendocino and Sonoma Counties regarding the CETA program in general. I am grateful to them for their advice and assistance.

I will be voting for the amendment as offered by my colleague from California (Mr. KREBS). I understand that there will also be a revised amendment offered by the gentleman from Illinois (Mr. ERLENBORN) to provide benefits such as health, death, and disability for these employees but no funds can be used for retirement benefits and nothing shall be deemed to require the enrollment of persons employed in public service jobs in the retirement systems or plans for the purpose of providing retirement benefits. I agree that these basic benefits should be provided.

Both amendments are structured as to address a problem of serious consequence presented to me by a number of the cities and counties in my congressional district.

Our objective is to bring into line with the Department of Labor policy the Federal requirement of providing coverage for PSE participants to insure that no State or local governments will be forced to pay retirement contributions for enrollees.

I urge my colleagues to support the amendment.

Mr. KREBS. Mr. Chairman, as a distinguished former supervisor, the distinguished gentleman from California (Mr. DON H. CLAUSEN) is certainly aware of the problems of the local governments.

I certainly appreciate his support.

Mr. ERLENBORN. Mr. Chairman, I rise in opposition to the Krebs amendment.

I know that the gentleman has tried very hard to arrive at an amendment that would be acceptable to everyone, but I think the final result is that it does satisfy the National League of Cities and the National Association of Counties and other public employers, because the net effect of the Krebs amendment is to allow this current situation to continue, and that is the use of CETA funds for making contributions to retirement plans.

Let me tell the Members why I think that is true. It is true because in one part of the amendment, part (B) it says:

Nothing in this subparagraph or in paragraph (4) shall be deemed to require a contribution to a retirement system or plan for the purpose of providing retirement benefits. . . .

So it still makes it optional, apparently at this point the amendment says it is no longer required.

But that is qualified. It goes on to say:

. . . unless funds under this Act are available, pursuant to paragraph (4), to make such contributions.

So that means if such funds are available under paragraph (4), then the contribution is required.

What does the paragraph (4) say? It has two provisos. The first proviso says:

Funds available for employment benefits under this Act may be used, for the duration of participation, for contributions on behalf of participants who are, prior to July 1, 1979, enrolled. . . .

I find no fault with that. What happens after that? Are funds going to be available? Here is what it says:

With respect to participants enrolled in retirement systems or plans on or after such date, no funds under this Act may be used for contributions to retirement systems or plans. . . .

It sounds like we are taking the money away again, but then it goes on to say:

. . . unless such contributions bear a reasonable relationship to the cost of providing benefits to participants.

How do you decide whether there is a reasonable relationship to the cost of the contributions to the cost of providing the benefits? I submit the only way you can do that is to see what it costs the others who are participating in the system. So when you get through reading it, unless you are charging more for CETA employees than you are for your own permanent employees, you are then required to make the contribution for retirement purposes.

So twice in the amendment you have taken something away then you have given it back. One says that there is no requirement unless funds are available, and then in the next paragraph it makes those funds available.

I do not know whether the gentleman from California (Mr. KREBS) is aware that that is the effect of his amendment or not, but I have read it very carefully. If any of the Members have copies of the amendment, I wish they would look at it carefully because I think it is not capable of any other interpretation.

It clearly says, in the first place, that nothing is required unless funds are made available, and then in paragraph 4, you would be required, if there is a reasonable relationship of the benefits to the cost of providing the benefits. If you are making the same contribution for CETA employees as you are your regular employees, you have to make the contribution, it is still going to be required as it is under present law.

It is understandable why the cities and States and other employers would want to support the Krebs amendment because it does not change a darned thing, and they continue to get their windfall of back-door revenue sharing.

Mr. KREBS. Mr. Chairman, if the gentleman will yield, let me point out to the gentleman that under the terms of the amendment he says, "I have read it," and he says, "Others who have read it agree with me." But, under the terms of this amendment, after the copperplate, the only obligation the local governments are to have is in those States where local or State governments are in a position to adjust their rules and regulations because of contractual relationships.

Mr. ERLENBORN. I see nothing in the amendment that says that.

Mr. KREBS. If the gentleman will excuse me, I have not finished. Maybe the things that are giving the gentleman from Illinois (Mr. ERLENBORN) some difficulty—and I do not blame him, it gave me some difficulty too, but it says, "Unless such contributions bear a reasonable relationship to the cost of providing benefits to participants," and this "reasonable relationship" will be determined on the basis of actuarial studies to determine what probability does exist that such a reasonable relationship does exist.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. KREBS, and by unanimous consent, Mr. ERLENBORN was allowed to proceed for 1 additional minute.)

Mr. KREBS. If the gentleman will continue to yield, only in cases where the actuarial studies will show that there is a reasonable relationship to the cost of the retirement, only in those situations, in those very limited situations, on the basis of those actuarial studies, will retirement benefits be paid, in those situations only.

Mr. ERLENBORN. I thank the gentleman for his explanation, but I am afraid that the reading of the amendment does not necessarily lead one to the conclusion that that is what the amendment says because a reasonable relationship of such contributions to the cost of providing benefits to the participants does not necessarily mean that we are going to have such actuarial studies, but let me add, if the actuarial study concludes, however, that permanent employees are getting a pretty fair shake for the cost to them, then that would bear a reasonable relationship to the cost of providing benefits and the same contribution for permanent employees could be made for these employees.

The CHAIRMAN. The time of the gentleman has again expired.

(On request of Mr. ASHBROOK and by unanimous consent, Mr. ERLENBORN was allowed to proceed for 2 additional minutes.)

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman from Ohio.

Mr. ASHBROOK. Mr. Chairman, I am wondering if my colleague, the gentleman from Illinois (Mr. ERLENBORN) would agree with an amendment I want to offer that seems to be in line with what he is talking about on page 2 of his amendment, just strike that last sentence with respect to "enrolled in retirement systems or plans on or after such date, no funds under this act may be used for contributions to retirement systems or plans unless such contributions bear a reasonable relationship to the cost of providing benefits to participants."

If we just knock that sentence out, I think that would cure the situation.

Mr. ERLENBORN. I think if that were removed, it would be quite clear that CETA funds would not be used for retirement purposes, which is the purpose of my amendment. My amendment is also pending, and this amendment is a substitute to my amendment. I think, however, that my amendment is more artfully drawn.

Mr. ASHBROOK. I thank the gentleman.

AMENDMENT OFFERED BY MR. GOODLING TO THE AMENDMENT, AS MODIFIED, OFFERED BY MR. KREBS AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. ERLENBORN

Mr. GOODLING. Mr. Chairman, I offer an amendment to the amendment, as modified, offered as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. GOODLING to the amendment, as modified offered by Mr. KREBS as a substitutes for the amendment offered by Mr. ERLENBORN: On line 5, strike out "unemployment insurance."

On line 21, strike the period and insert "; or the payment of unemployment insurance benefits to such persons."

Mr. GOODLING. Mr. Chairman, I do not think that I have to repeat.

I am just merely being protective so that if the substitute passes, my amendment is also available. If it does not, the amendment is also attached to the Erlenborn original amendment. All I am trying to do, of course, is to again say that we want to make sure that the prime sponsors have that option as far as unemployment insurance is concerned; and we want to make sure that we do not encourage people to think that these are full-time, long-term jobs and that we do not get caught in the bind of 18 months' training and then unemployment compensation and then back again for 18 months more.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. GOODLING) to the amendment offered by the gentleman from Illinois (Mr. ERLENBORN).

The question was taken; and on a division (demanded by Mr. SIMON) there were—ayes 17, noes 20.

RECORDED VOTE

Mr. GOODLING. Mr. Chairman I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 197, noes 211, not voting 24, as follows:

[Roll No. 671]

NOT VOTING—24

Abdnor	Kasten	Rhodes
Dent	Krueger	Rodino
Flowers	LaFalce	Rose
Flynt	Le Fante	Sisk
Frey	Lloyd, Tenn.	Teague
Gudger	McDonald	Tsongas
Hansen	Mathis	Wylie
Jenkins	Miller, Calif.	Young, Tex.

The Clerk announced the following pairs:

On this vote:

Mr. McDonald for, with Mr. Rodino against.

Mrs. Lloyd of Tennessee for, with Mr. Krueger against.

Mr. Teague for, with Mr. Miller of California against.

Mr. Flynt for, with Mr. Le Fante against.

Mr. HOWARD and Mr. GARCIA changed their vote from "aye" to "no."

So the amendment to the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. GOODLING) to the amendment, as modified, offered by the gentleman from California (Mr. KREBS) as a substitute for the amendment offered by the gentleman from Illinois (Mr. ERLENBORN).

The amendment to the amendment, as modified, offered as a substitute for the amendment was rejected.

AMENDMENT OFFERED BY MR. ASHBROOK TO THE AMENDMENT, AS MODIFIED, OFFERED BY MR. KREBS AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. ERLENBORN

Mr. ASHBROOK. Mr. Chairman, I offer an amendment to the amendment, as modified, offered as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. ASHBROOK to the amendment, as modified, offered by Mr. KREBS as a substitute for the amendment offered by Mr. ERLENBORN: On page 2, line 4, strike all that follows after period.

Mr. ASHBROOK. Mr. Chairman, for the 30 or 40 Members who were here when my colleague, the gentleman from Illinois (Mr. ERLENBORN), made his very intelligent, articulate statement, I think he clearly pointed out some of the problems in the amendment of my friend and colleague, the gentleman from California (Mr. KREBS).

Mr. Chairman, I, of course, would prefer that the amendment of my colleague, the gentleman from Illinois (Mr. ERLENBORN), would prevail. But judging by the last vote, I would have to say that at this point we probably should amend the Krebs amendment just in case the Erlenborn substitute, which is highly preferable, does not prevail.

As was pointed out, there is a defect in the Krebs amendment. It says, on page 2:

Funds available for employment benefits under this Act may be used, for the duration of participation, for contributions on behalf of participants who are, prior to July 1, 1979, enrolled in retirement systems or plans.

That would seem to cover the situation, but we get down to the bottom of the gentleman's amendment and we have words tucked in there which say,

Unless such contributions bear reasonable relationship to the cost of providing benefits to participants.

I would point out in all fairness that the amendment does not do what it purports to do, because those words—and I read them again—

Unless such contributions bear a reasonable relationship to the cost of providing benefits to participants.

Those words negate the entire thrust of subsection (4).

Mr. PATTERSON of California. Mr. Chairman, will the gentleman yield? I would be happy to explain the intent of this language.

Mr. ASHBROOK. I would be very glad to yield to my colleague.

Mr. PATTERSON of California. I thank the gentleman for yielding. The purpose of that language in the last sentence was to apply to those States where they have within their retirement programs other sorts of benefits, which might be unemployment insurance, disability insurance, health benefits. The intent of this language is so that we will not have to unravel all of the different plans that a State or locality might have in order to assess the portion that might go to retirement. So, the wording says that no funds may be used for contributions to retirement systems or plans unless they bear reasonable relationship to the cost of providing benefits to participants.

So, I would say that by eliminating that language, we would eliminate any benefits at all for CETA employees, which really takes us back to the Erlenborn amendment. With the language in there, we allow those States that have a multipurpose fringe benefits program to retain CETA employees within that program.

Mr. ASHBROOK. Could my colleague tell me for the record how many States are involved? It is my recollection that it would be most States.

Mr. PATTERSON of California. I think that roughly half of the States would be involved. So, what the Krebs language would do would be to allow those States to basically review their programs, and they would not have to have a different program for CETA. The CETA employees could be classified in a manner that would exclude them from retirement benefits. The way it would be determined is whether the plan provides any actual, direct benefit to the employees. If it does not, then there would be no CETA funds used in that retirement program.

Mr. ASHBROOK. I appreciate what my colleague is saying, but the bottom line is that the amendment, in effect, after July 1, 1979, will be business as usual. Then, the gentleman goes on to say that the funds for retirement systems will be blocked except in the very States he is talking about, which adds up to most States. This means, in effect, that there is really nothing in the amendment cutting back on the very abuses Mr. KREBS indicated he wanted to restrain.

Mr. ERLENBORN. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Illinois.

Mr. ERLENBORN. Mr. Chairman, I thank the gentleman for yielding. Again, I am afraid that though the sponsor's intent may be quite good, the amendment is not drawn properly to carry it out.

There is no differential made in the Krebs amendment between health, death, disability benefits, and retirement benefits. As a matter of fact, in my amendment it says specifically that funds may be used to the extent that such contributions are used to provide benefits such as health and death and disability, and are not used for retirement purposes.

So we have carefully distinguished between the two types of benefits. We allow CETA funds for death, health, and disability, but prohibit them for retirement.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. ASHBROOK) has expired.

(On request of Mr. ERLENBORN, and by unanimous consent, Mr. ASHBROOK was allowed to proceed for 3 additional minutes.)

Mr. ASHBROOK. This is precisely why I say to my colleague that I support his amendment. I have offered this amendment in case his amendment does not pass, so at least to try to perfect some of the shortcomings I see in the Krebs amendment.

Mr. ERLENBORN. Mr. Chairman, if the gentleman will yield further, as to the interpretations of the Krebs amendment, may I read? The amendment says:

Nothing in this subparagraph or in paragraph (4) shall be deemed to require a contribution to a retirement system or plan for the purpose of providing retirement benefits * * *

That is what we are talking about—not the health, disability, or anything else. It is the retirement benefits. It says:

* * * unless funds under this Act are available, pursuant to paragraph (4) * * *

Then section 4 says that funds are available unless they do not bear a reasonable relationship to the cost. How do we determine cost in a pension system? The gentleman suggested earlier if they do not vest, it would not be reasonable. That is not the way it is determined.

This is the same way as it is with insurance. One can buy fire insurance on his house and pay for that fire insurance and never collect a dime. One may not have a fire and he never collects a dime. The same thing is true in determining reasonable costs of retirement benefits. The person may pay in for 3 or 4 years, not vest, and never get a dime out, and yet that is a reasonable cost. What we are saying is if somebody is going to be hired for only 18 months, he is not going to vest, then do not pay in at all.

If we adopt my amendment or the Ashbrook amendment to the Krebs amendment, we will accomplish that purpose.

Mr. ASHBROOK. One might say that in the 30 or more States which would allow this payment, if the amendment passes as the Krebs amendment stands, it will simply make it possible to do the same thing sooner or later in the other States. It is holding out a carrot to them. They are smart enough to change their laws to get the Federal funds.

Mr. ERLENBORN. I do not say it is only 30 States. I say the Krebs amendment would allow, in fact require contributions in all States as long as they are not charging CETA employees more than permanent employees.

Mr. ASHBROOK. I think the gentleman may be right.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. ASHBROOK) to the amendment, as modified, offered by the gentleman from California (Mr. KREBS) as a substitute for the amendment offered by the gentleman from Illinois (Mr. ERLENBORN).

The question was taken; and on a division (demanded by Mr. ASHBROOK) there were—ayes 50, noes 48.

RECORDED VOTE

Mr. KREBS. Mr. Chairman I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 209, noes 194, not voting 29, as follows:

[Roll No. 672]

NOT VOTING—29

Abdnor	Kasten	Moss
Burke, Mass.	Krueger	Nix
Delaney	LaFalce	Rhodes
Dornan	Le Fante	Rodino
Flowers	Leggett	Sisk
Flynt	Lloyd, Tenn.	Teague
Frey	McDonald	Tsongas
Giaimo	Mathis	Ullman
Hansen	Miller, Calif.	Young, Tex.
Jenkins	Moakley	

The Clerk announced the following pairs:

On this vote:

Mr. Flynt for, with Mr. Rodino against.

Mrs. Lloyd of Tennessee for, with Mr. Miller of California against.

Mr. McDonald for, with Mr. Krueger against.

Mr. Teague for, with Mr. Le Fante against.

Mr. Nix for, with Mr. Burke of Massachusetts against.

So the amendment to the amendment, as modified, offered as a substitute for the amendment was agreed to.

The result of the vote was announced as above recorded.

Mr. ERLENBORN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am only going to take a moment. I am sensitive to the fact that we have spent too much time on this issue already and we are going to be here late tonight.

The parliamentary situation is that the Krebs amendment has been amended by the Ashbrook amendment; so it clearly prohibits the use of CETA funds for contribution to retirement plans.

I think the next question will come on the Krebs amendment, which is a substitute for my amendment.

Mr. Chairman, I urge a vote against the Krebs amendment for this reason. My amendment specifically allows contributions for health, death, and disability benefits.

The Krebs amendment is silent on that point. They both do the same thing relative to retirement; so if you want to be sure the CETA employees have health, death, and disability insurance, please vote for my amendment and against the Krebs amendment.

The CHAIRMAN. The question is on the amendment, as modified, as amended, offered by the gentleman from California (Mr. KREBS) as a substitute for the amendment offered by the gentleman from Illinois (Mr. ERLENBORN).

The amendment, as amended, as modified, offered as a substitute for the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. ERLENBORN).

RECORDED VOTE

Mr. ERLENBORN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 254, noes 148, answered "present" 1, not voting 29 as follows:

[Roll No. 673]

ANSWERED "PRESENT"—1

Applegate

NOT VOTING—29

Abdnor	Krueger	Nolan
Burke, Mass.	Le Fante	Rhodes
Filippo	Leggett	Rodino
Flowers	Lloyd, Tenn.	Sisk
Flynt	McDonald	Teague
Frey	Mathis	Tsongas
Giaimo	Meeds	Vanik
Hansen	Miller, Calif.	Wiggins
Jenkins	Moakley	Young, Tex.
Kasten	Moss	

The Clerk announced the following pairs:

On the vote:

Mrs. Lloyd of Tennessee for, with Mr. Burke of Massachusetts against.

Mr. Teague for, with Mr. Rodino against.

Mr. Flynt for, with Mr. Krueger against.

Mr. McDonald for, with Mr. Le Fante against.

Mr. TUCKER changed his vote from "aye" to "no."

Messrs. WALGREN, NATCHER, and DON H. CLAUSEN changed their vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. OBEY

Mr. OBEY. Mr. Chairman, I have five amendments at the desk, four of them to be considered later en bloc, but I offer one amendment, labeled No. 1, for consideration now.

The Clerk read as follows:

Amendment offered by Mr. OBEY: Page 26, beginning on line 5, strike out "promptly made" and insert in lieu thereof "made not later than 60 days after the filing of the grievance involved".

Page 26, line 18, insert after the period the following: "The Secretary shall conduct such investigation, and make the final determination required by the following sentence regarding the truth of the allegation or belief involved, not later than 120 days after receiving the complaint.".

Mr. OBEY (during the reading). Mr. Chairman, I ask unanimous consent that further reading of the amendment be dispensed with and that it be printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. OBEY. Mr. Chairman, I understand this amendment will be accepted by the committee. It is a very simple amendment. All it does is to put a specific period of time in the bill during which the prime sponsor must answer a complaint lodged against it for violations of the conditions under which the CETA program exists in the first place, and also it establishes a 120-day time limit on the time during which the Labor Department can consider a complaint before it has to proceed.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from California (Mr. HAWKINS).

Mr. HAWKINS. Mr. Chairman, we have seen the amendment. We accept the amendment.

If the gentleman would further yield, do I understand from the gentleman from Wisconsin (Mr. OBEY) that if the determination is not made in a speci-

fied time it shall not affect the Secretary's jurisdiction in the matter?

Mr. OBEY. That is correct.

Mr. HAWKINS. With that understanding we do accept the amendment.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, let me say that we have considered this on this side. This is a very good amendment and we certainly would accept it.

Mr. OBEY. I thank both gentlemen.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin (Mr. OBEY).

The amendment was agreed to.

AMENDMENTS OFFERED BY MR. OBEY

Mr. OBEY. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. OBEY: Page 43, line 7, strike out ", but such maximum" and all that follows through "upward by the" and insert in lieu thereof a period.

Page 43, strike out line 8 and all that follows through line 12.

Page 43, line 23, strike out "$7,800" and insert in lieu thereof "$7,000".

Page 43, line 25, after the period strike out "such" and all that follows down through line 3 on page 44 and insert in lieu thereof the following:

"Such national average may, to the extent deemed necessary by the Secretary, be adjusted annually by a percentage not to exceed the percentage change in the Consumer Price Index."

Page 208, strike out lines 1 and 2 and insert in lieu thereof the following: "in excess of the permissible maximum under section 121(c)(1)(B), except that such rate shall be adjusted upward, not to exceed 20 per centum, by the ratio that the annual average wages within the area served by the prime sponsor exceed the average of the total of such wages nationally in accordance with a wage adjustment index to be published annually by the Secretary.".

Mr. OBEY. Mr. Chairman, I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. OBEY. Mr. Chairman, while I think these amendments will be quite controversial, I think that their effect is fairly clear.

The present bill provides that with Federal money there is a limitation on CETA salaries of $10,000, and it provides that that can be augmented in high wage areas by up to $2,000. In addition, it provides that any prime sponsor may supplement those wages up to 25 percent of their particular limit.

For example, if you have a limitation of $10,000 you could supplement it by $2,500. If you have a limit of $12,000, you could supplement this up to $3,000.

This amendment is very simple. What we are trying to do here—and I should say that I am offering this amendment in behalf of the gentleman from Connecticut (Mr. SARASIN), the gentleman from Illinois (Mr. MICHEL), the gentleman from Connecticut (Mr. GIAIMO), and the gentleman from Ohio (Mr. ASHLEY), Mr. SHUSTER, Mr. ASHBROOK, Mrs. PETTIS, Mr. ERLENBORN, Mr. PIKE, Mr. GOODLING, Mr. CONTE, and Mr. MATTOX; but, as I say, it is a simple amendment. It simply says we will put a limit of $12,000 for any CETA job in high-wage areas and $10,000 in any low-wage area rather than the $15,000 and the $12,000 which we have in the bill.

We further provide that the average wage for CETA should be, as is the present law, $7,000 rather than $7,800, which we have in the bill.

I know that some Members will say, and some have said with considerable force, that the figure which we have in these amendments is too low.

Let me point out here that on the CETA issue I am no enemy of CETA and I have not tried to kill and am not trying to kill CETA.

I have four times in the last 5 years offered amendments in the Committee on Appropriations or on the floor—in fact, twice I offered amendments on the floor—to add to the funding level of the Committee on Appropriations for CETA.

Those amendments carried. Therefore, I come to this debate as a friend of CETA, and I do not want to be in a position where, after this amendment or after this bill is passed, we face in the Committee on Appropriations, very frankly, an effort to limit CETA jobs to the minimum-wage level.

Mr. Chairman, if I can use the name of the gentleman from Illinois (Mr. MICHEL) in vain to make a point, I can recall just a year ago when the gentleman from Illinois (Mr. MICHEL) succeeded in attaching to the bill in the Committee on Appropriations an amendment which limited unemployment compensation to the minimum-wage level. I would submit that he would have a good chance of attaching that same kind of amendment in the Committee on Appropriations to CETA funding later on in the year.

I do not want to see that happen because I do not think we ought to be limited to minimum-wage levels at all times; but I do think a $15,000-a-year job for CETA is simply, in plain English, politically indefensible. I do not think our constituents understand why we ought to be paying people that large a salary for a CETA job. If we look at the facts, in New York, which is one of the cities understandably troubled by this amendment, one-third of the workers earn less than $10,000.

I would point out to those who say that this dollar limit is too low that the $12,000 limit in this bill is higher—is higher, I repeat—than the national average for non-CETA jobs in all sectors of the economy, which is $11,000. I would point out to those who say that the $7,000 figure is too tight one simple fact: This bill is presented to the House as a bill which tightens up considerably on CETA. It really does, and I give the committee great credit for doing that. I know that with all the pressures on them, it is a very difficult job to do. However, I submit that the pressures are going to be even greater when we come to the appropriations process than they are on this bill. If the Members think we have trouble in passing this bill, I invite them to watch the trouble we are going to have in funding the appropriation down the line. I want us to be in a position where we can intellectually and politically defend CETA. I do not think we can do it if, under the guise of tightening up the average wage under this bill, we, in fact, raise the average wage to $7,800, as the committee bill does. I think we ought to return it to the $7,000 level. That is what this amendment does.

Mr. Chairman, I want to point out one other thing: A great number of people have said to me, "Your intention of limiting the amount of time during which someone who is grandfathered in under a higher salary under this bill can stay on the public rolls at a higher salary, your intention of limiting that grandfathering to 6 months is too tough." As a consequence, what I have done is that I have eliminated that portion from my amendment. I do not any longer try to limit that grandfathering to 6 months. They have longer than that. They have as long as the bill allows to get off the sauce.

However, I do think that the cities have to get off the sauce because if they do not, they are going to continue to make the CETA program the second most unpopular program in the country after welfare. Then, in the long run, we will not be able to sustain it, and I think that will be economically disastrous to the country.

Mr. Chairman, I urge the Members to support my amendments.

Mr. HAWKINS. Mr. Chairman, I rise in opposition to the amendments.

Mr. Chairman, this amendment, I think, is a very destructive one. I think it is well intended, and I think that it sounds very reasonable.

In support of it, it has been said that this individual or some other individual is earning $12,000 or $15,000 in the program. There are, obviously, such individuals; but we are not told that even under the current law, that is a very rare occasion. We are not given the reason for it.

Mr. Chairman, the $10,000 ceiling is in the law at the present time; and it has been in the present law since 1973, but it is not indexed in accordance with wage differentials. Under the Obey amendment we would lose the flexibility in the committee bill which allows higher rates in high-wage areas. We would have what approaches a uniform system across the country, regardless of the wage differentials which prevailed.

Mr. Charman, I think the Obey approach is very unfair. It is very unreasonable, and I think it is most unworkable. I think we need the flexibility which the committee bill is asking for. In the operation of the current law the average wage today is in the neighborhood of $7,000. It adds up to simple arithmetic. In order to meet the average wage mandated under the bill it would be necessary to have at least six enrollees at the minimum wage for every person paid $12,000. Any local prime sponsor who is attempting to have any appreciable number of individuals at the higher

bracket would be discouraged because they would be using up their allocation and obviously would not be able to get the average down. It is the average we should be looking at rather than the maximum ceiling.

There is a reason also for allowing a few individuals to earn the higher wage. As I say, it is only a few. Under the Obey amendment we are talking about only 7,000 altogether in a program today of 725,000 persons. There is obviously a feeling in this House that these individuals should be trained. They should not remain on the program. During that training period they should be encouraged to seek higher wages, to seek more skill, and to prepare themselves for entrance into the labor market. This is not going to be done if we discourage them through keeping the wage down to the minimum wage. In addition to that, it is obvious that if they are going to be trained and going to be engaged in useful activity, a few responsible individuals as lead persons, for example supervisors and trainers, will be required on these programs and these individuals are not going to be those that we could compensate with a $6,000 or $7,000 income or a minimum wage. Can the Members imagine a group of individuals going out to weatherize the homes of individuals, elderly citizens, and others, and not having someone in that group who knows something about weatherizing techniques? Do we intend to pay that individual at this lower wage? Probably in many instances we will have 1 or 2 persons in a group of 15 or 20 or even 30 or 40 who would be paid this higher wage, and we would have people who would obviously be responsible for the accounting system that we insist upon in this particular bill.

When we begin to look at the actual situation, it is very different from those who would take an individual situation, use a lot of rhetoric to blow it up and put it in magazines to sell and to be listened to over radio and television in order to excite people, without explaining what the program is all about.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. HAWKINS was allowed to proceed for 1 additional minute.)

Mr. HAWKINS. I say this, that if we intend for this program to be something more than training individuals for menial, low-paying jobs and to get them out of the program into subsidized employment, this is not the way to do it. The Obey amendment will certainly not accomplish it.

I hope that the Members will stick with the committee. The committee has taken the present situation where a $10,000 ceiling is allowed, but remember that we also today allow supplementation so that the $10,000 limit can be supplemented. The committee has eliminated, has prohibited that altogether in title II and limited it in title VI, so that in effect we have said you cannot supplement. Having taken away supplementation, it is the Federal payment that then becomes the wage rate and not the Federal wage rate supplemented at the local area. I think this amendment, as I say, is a very destructive one, and I hope the Members will reject it.

Mr. SARASIN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendments.

Mr. Chairman, I rise in very strong support of the Obey amendment. I think what we are looking at here is an attempt to do some economic justice to provide for the individual who will become part of the CETA program and also at the same time to provide for equity and justice for the taxpayers who will foot the bill for this program.

We have ended up with the situation in CETA where unfortunately it is much more attracive to be in this program than it is to be in the real world; than it is to be part of the working poor; than it is to be out there and trying to earn a living for your family, than what the Government says you must have, which is at least a minimum wage; so we find more and more people who are making their career ladder one step after another through the CETA program. That is not what CETA was intended to do. It is an employment and training program, not a career opportunity. It is designed to take care of the unemployed and the underemployed to give them some skills they did not have before and to allow them to be in a better position to make their way in the real world.

Instead, we have made it more attractive, not lucrative by any means, but more attractive, so attractive that they are encouraged to stay within the system, rather than to go out and take their chance in the real world in the private sector or in the unsubsidized public sector.

I think what we find in the Obey amendment is certainly an advantage to the individual who becomes a CETA participant; the incentive is there to go and learn to earn and become a productive part of society. At the same time, it is a great advantage to the taxpayers, because we will be able to handle more people. God knows we are not taking care of all those individuals who are eligible for the CETA program. If we are able to limit the dollars spent, we can apply these services and that training to skills improvement, and there are many people out there looking for that kind of help. So from all aspects, it is a serious attempt to provide equity and justice. On that basis, I support it very strongly.

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. SARASIN. I yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Chairman, I would like to respond to a couple of points made by the gentleman from California.

First of all, the Manpower Advisory Commission which we established recommended that supplementation be limited to no more than 15 percent of a $10,000 base. We are being $500 more generous than that Commission.

Second, I want to point out, I simply do not want to have any more stories appearing in newspapers, such as the column by Mr. Kilpatrick, which indicates that the Washington City Council hired 56 CETA people at an average wage of $18,000 a year for jobs that paid only $8,500 in other Government agencies.

Third, I want to point out that this amendment does not require people to take only menial jobs, because as I pointed out earlier, this level is higher than the average wage for all American workers in this country, and I do not think that half of the American people have menial jobs.

Mr. SARASIN. Mr. Chairman, I certainly agree with the gentleman.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. SARASIN. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Chairman, I rise in strong suppport of the Obey amendment.

The point that the gentleman from Wisconsin (Mr. OBEY) just made is one we should really be stressing a lot here. The public is not all that happy with the CETA program, anyway. It resents the high-paid public payroll jobs that are higher, as the gentleman pointed out, than many jobs in the private sector and it is not the kind of image we should be projecting in this legislation.

I urge my colleagues to vote for this amendment. It substantially improves the legislation.

Mr. SARASIN. Mr. Chairman, I thank the gentleman.

Certainly there is not any attempt by me or by the gentleman from Wisconsin (Mr. OBEY) to kill the CETA program. That is not our intention at all, but what we are trying to do with this amendment is to try to make some sense out of it and try to make it more attractive for the people, not only who are participants, but the people paying for it. CETA is a training instrument, to provide upgrading for people who need training and skills in the labor market and also the public service employment aspect that is connected with it.

Again, I strongly support the amendment of the gentleman from Wisconsin.

Mr. WEISS. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendments.

Mr. Chairman, I appreciate the past commitment that the gentleman from Wisconsin (Mr. OBEY) has to this legislation, and my concern is that this time around he may not really have read fully what it is that the committee has done to meet some of the very objections that he had and which he suggests his amendment would cure. I think the Members ought to know that in an effort to cure some of the very serious complaints about how these jobs are becoming permanent public service employment positions, the committee included a provision in the bill before us which limits participation and limits the length of time which a particular CETA employee can serve under title VI to 18 months. So far starters there is no longer the possibility of a long-term, continuing participation.

Beyond that, I would remind the Members that there are many ways of killing legislation, even when one is doing it out of the best of motives.

In the high-cost areas of this country, if we set the standards we would set in this proposed amendment, we are going to be prohibiting participation because the entry level for most jobs will shortly, and many already exceed what the average limits are here. The fact is that right now the average CETA wage, on a nationwide basis, is only $7,000. There are only a few areas in which it is above that figure. Ninety percent of CETA workers earn less than $10,000. The exceptions are in the very high-cost areas, and those areas and the people who live in them would be excluded from this program, under the gentleman's amendments.

I think we also ought to bear in mind that, with all the talk about minimum wages, currently minimum wages provide for $5,500 a year. As of January 1979, a scant few months away, minimum wages will provide $6,000 a year. We are not that far apart; we really are not. Indeed, there is the very real likelihood that in order to meet the $7,000 average, many employees of CETA would have to be paid less than an annual minimum wage.

As the distinguished chairman of the subcommittee explained, with the average included in the legislation, we cannot have any large numbers of people who are earning around the $10,000 level because we have to have people below the average in order to make up the balance.

It seems to me that the choice we have is of providing such a balance that it will not be more attractive for people to go on welfare rather than to seek jobs, because with all the benefits that are concomitant to welfare, including medicare and medicaid, day care provisions, et cetera, we can very easily reach a point where a prospective employee of CETA will say, "It's not worth my while. It is going to cost my family in care and money if I take that job."

It seems to me that we really must to keep that balance in mind.

I happen to have the privilege as a member of the subcommittee to serve on the Ad Hoc Welfare Reform Committee. We were considering a jobs opportunities program which the President asked of us, and we were talking about creating on top of the 725,000 CETA jobs some 800,000 jobs. The purpose of that was to encourage people to leave welfare and to take jobs.

It now seems to me we are just throwing all of our thinking out the window and because of horror stories, which I deplore as much as anybody else, without recognizing that those very horror stories are proof that the system is working, because those people were caught, we are ready to throw the baby out with the bathwater. Say what you will, for all practical purposes, in the high-cost areas of this country where we have a large number of the poor unemployed, we are in fact going to be killing the CETA program.

Mr. Chairman, I could not urge any more strongly, if we want CETA to survive, with all the stringencies already built into this legislation by the committee, that we should defeat these amendments.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Wisconsin (Mr. OBEY).

The question was taken; and the chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. OBEY. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 230, noes 175, not voting 27, as follows:

[Roll No. 674]

Jenkins	Moss	Young, Tex.

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, with Mr. Burke of Massachusetts against.

Mr. McDonald for, with Mr. Rodino against.

Messrs. GONZALEZ, DOWNEY, FORD of Tennessee, and Mrs. HECKLER changed their vote from "aye" to "no."

Mr. LEHMAN changed his vote from "no" to "aye."

So the amendments were agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. YOUNG OF ALASKA

Mr. YOUNG of Alaska. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. YOUNG of Alaska: Page 43, line 4, strike out "Funds" and insert in lieu thereof "(i) Except as provided in division (ii), funds" and immediately after line 12 insert the following:

"(ii) Notwithstanding division (i) of this subparagraph, the Secretary may, with respect to any State—

"(I) in which the average wage (during the calendar year preceding the beginning of the applicable fiscal year) in employment covered under Federal or State unemployment compensation laws (without regard to any limitation on the amount of wages subject to contribution under such law) exceeds the national average wage in such employment by more than 50 per centum, and

"(II) in which employees of the Government receive allowances pursuant to section 5941 of title 5, United States Code,

waive the maximum which would otherwise apply to wages paid to persons employed in public service positions in such State and establish, in lieu thereof, limitations consistent with the purposes of this Act and with the requirements of programs under this Act in such State.

Mr. YOUNG of Alaska. Mr. Chairman, the amendment I am offering allows the Secretary of Labor to waive the maximum limitation on wages for CETA public service employees in jurisdictions identified in 5 U.S.C. 5941, where the annual average wage covered by unemployment compensation laws exceeds the national average by more than 50 percentum. Alaska is the only State which qualifies under the provisions of this amendment.

For many months now, as this bill was sidered by the Subcommittee on Employment Opportunities and by the Committee on Education and Labor, we have attempted to convince Congress that H.R. 12452 is too restrictive to work effectively in Alaska. At each step of the way, I have been assured that everyone understands that Alaska needs some exemptions because of its unique problems. Chief among them are that Alaska is the only State with double digit unemployment—11.4 percent—and it has the highest wage rates in the entire country. Alaska's average annual wage covered by unemployment insurance is 250 percent of the national average.

But in spite of all the assurances that Alaska's problems are recognized and would be taken care of, nothing has yet been done to provide the flexibility we need to carry out the intent of this Act. So here I am today, down to the wire so to speak, with a solution to the problem that is agreeable to my State and to committee members of both parties. It is certainly not a final solution because all it does is take the problem out of the hands of Congress and put it before the Secretary of Labor for further study. It is assumed that the Secretary will carry out the intent of Congress in determining a fair wage rate for Alaska's public service employees. Unless a waiver is granted, there will be little incentive for Alaska's unemployed persons to make any effort to work in CETA programs since a welfare family of four qualifies for at least $13,500 in benefits—$1,500 more than the highest PSE salary permitted under this bill.

It would be ironic if the State most in need of a strong employment and training program would be unable to effectively participate in the proposed public service employment program. Without the flexibility that could be granted to Alaska by my amendment, it will be extremely difficult for Alaska prime sponsors to operate an effective public service employment program.

I would like to make it very clear that this amendment is not intended to tie any wage adjustment to the cost of living index. Title 5 of the United States Code was cited simply to identify by statute jurisdictions eligible under this waiver. The amendment represents a rational method for dealing with Alaska's excessively high wage rate structure.

I urge my colleagues to adopt my amendment to allow the Secretary of Labor to look at Alaska's situation in more depth and determine a wage limitation consistent with the purposes of the act.

The committee bill recognizes that entry level public service wage rates in a number of high wage areas exceed the current ceiling of $10,000 and therefore allows an adjustment to this ceiling of up to 20 percent. This is insufficient for Alaska, however. No other State or territory experiences as high a wage structure as Alaska. In 1977, for example, the average weekly wage covered by unemployment insurance was $493.51. Compare this to the next highest State, Michigan, where the figure was $247.71 and to the national average which was $203.88. An analysis of entry level public service wage classifications indicates that the lowest entry level classification for a State of Alaska employee pays a statewide average of $12,876 per year while the average entry level wage for State workers is estimated at $17,000. As H.R. 12452 is written, the salary limitations would put a large part of the PSE program in the position of undermining the existing wage rate structure and ignoring the concept of equal pay for equal work.

The intent of CETA is that workers be treated equitably and given the same benefits for performing the same work as other employees of the same employer. As a general rule, CETA workers are to be placed in existing job titles. In order to comply with this intent, the State of Alaska has had to supplement over half—55 percent—of the PSE—titles II and VI—employees in Alaska at an average of over $4,000. Yet the provisions in this reauthorization severely restrict the State's flexibility in supplementing wages. The majority of public service employees in Alaska are currently receiving wages in excess of the limitations imposed by H.R. 12452.

This amendment will accommodate a real need in Alaska and insure that the equal pay for equal work provisions of the act are maintained. The Secretary will be authorized to study the wage structure in Alaska and determine what wage rates are necessary to maintain the integrity of the program. I might also add that H.R. 12452 defines economically disadvantaged in relation to a person whose family income is at or below 70 percent of the BLS lower budget. For Alaska, 70 percent of the lower budget is approximately $12,000. The current provisions in the bill would limit the earnings of PSE participants in Alaska to $12,000, or to a level of earning at or below that considered to be economically disadvantaged. This fact would appear to violate the intent of the act and serve as a disincentive to work if one considers that a welfare family of four can receive more benefits under welfare than they can earn under CETA.

The May 1978 unemployment rate in Alaska was 11.2 percent, which represented a dramatic increase over the 9.4 percent unemployment rate of the previous year. These figures are even more important if one considers that the unemployment rate nationally has decreased during the last 12 months, For the rural areas of Alaska where the structural unemployment problem is most severe, there are pockets of unemployment as high as 50 percent. Yet it is in these very same areas where costs-of-living and wage rates are highest in the State. Allowing the Secretary to use his discretion to waive wage limitations is the most appropriate way for Congress to deal with the unique set of circumstances under which Alaska's prime sponsors must operate.

Mr. Chairman, as I said, I talked with the chairman of the subcommittee and the chairman of the full committee and also with the ranking member on the minority side. They have indicated they would accept my amendment.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, the gentleman from Alaska (Mr. YOUNG) is exactly right. We have discussed his amendment, and we are willing to accept it.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, we have discussed the amendment with the gentleman, and certainly we do support it on this side.

Mr. YOUNG of Alaska. Mr. Chairman, I thank both gentlemen.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alaska (Mr. YOUNG).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. JEFFORDS

Mr. JEFFORDS. The Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JEFFORDS: Page 38, strike out line 1 and all that follows through line 8 and insert in lieu thereof the following:

"(3) For the fiscal year ending September 30, 1979, there are authorized to be appropriated for carrying out the provisions of this Act an amount not to exceed—

"(A) $4,000,000,000 for carrying out the provisions of title II;

"(B) $2,250,000,000 for carrying out the provisions of title IV;

"(C) $3,200,000,000 for carrying out the provisions of title VI, except that (i) if the rate of unemployment projected by the Secretary pursuant to section 602 exceeds 6.5 per centum, such authorization shall be such sums as may be necessary; or (ii) if the rate of unemployment is such that the number of jobs projected by the Secretary under section 602 requires less than such authoriza-

tion, then such authorization shall be reduced to take into account such projection by the Secretary;

"(D) $500,000,000 for carrying out the provisions of title VII; and

"(E) $267,000,000 for carrying out the provisions of title VIII.

"(4) For the fiscal year ending September 30, 1980, there are authorized to be appropriated for carrying out the provisions of this Act an amount not to exceed—

"(A) $4,290,000,000 for carrying out the provisions of title II;

"(B) $2,400,000,000 for carrying out the provisions of title IV;

"(C) $3,200,000,000 for carrying out the provisions of title VI, except as provided for in paragraph (3)(C);

"(D) $525,000,000 for carrying out the provisions of title VII; and

"(E) $290,000,000 for carrying out the provisions of title VIII.

"(5) For the fiscal year ending September 30, 1981, there are authorized to be appropriated for carrying out the provisions of this Act an amount not to exceed—

"(A) $4,583,000,000 for carrying out the provisions of title II; and

"(B) $3,200,000,000 for carrying out the provisions of title VI, except as provided for in paragraph (3)(C).

"(6) For the fiscal year ending September 30, 1982, there are authorized to be appropriated for carrying out the provisions of this Act an amount not to exceed—

"(A) $4,876,000,000 for carrying out the provisions of title II; and

"(B) $3,200,000,000 for carrying out the provisions of title VI, except as provided for in paragraph (3)(C)."

Page 37, line 21, strike out all after "Except as provided in" and insert in lieu thereof "paragraphs (3) through (6), there are".

Mr. JEFFORDS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD. It is substantially the same as the amendment previously printed in the RECORD, and I will explain it.

The CHAIRMAN. Is there objection to the request of the gentleman from Vermont?

There was no objection.

Mr. JEFFORDS. Mr. Chairman, this amendment attempts to reorient our priorities somewhat within the funding parameters of the bill. What it says is that our biggest problem in unemployment is with youth unemployment, and that is where we ought to restore balance to the program by rechanneling money into programs which help young people.

The controversy and the problems have been in the area of public service employment. That is where the problems have arisen, and that is where the programs have become so large, so fast, that the program has almost gone out of control.

Mr. Chairman, what this amendment would do would be to take approximately $1 billion out of title VI and take a half of that, put approximately $400 million into youth unemployment programs and $100 million into the new title VII program, private sector opportunities for the economically disadvantaged.

It would cap title VI, which is public service employment, at $3.2 billion, except—and this is an important exception—that if unemployment does reach a critical level, that is, if the Secretary projects that unemployment will rise above 6.5 percent, then the Committee on Appropriations could appropriate such sums as were necessary under the guidelines established in the bill.

Second, if unemployment should go down to such an extent that less than $3.2 billion would be required for this title, then that lesser sum should be provided.

As I said, the real problem with unemployment, from all statistics, is with young people. Out of the 6 million people who are unemployed in this country right now, 3 million, or 50 percent, of those people are 24 or younger. Yet we only put about 20 percent of our funding into youth unemployment.

Moreover, Mr. Chairman, we can get more jobs for the dollar. Because of different costs per person put to work for youth we can almost end up with the same number of people getting employment. We still can save over $500 million. The bill also recognizes that we have a serious problem with transition from public service employment into private sector employment. Experience has shown us that the transition level in our youth unemployment programs is better than it is under title VI. Also the bill would increase the funding which will go into the experimental programs under title VII by $100 million to further assist us to find better ways for the transition of the public into the private sector.

Also from an inflationary point of view, as pointed out in the committee report, this will take money from the inflationary programs in title VI and put it into the noninflationary programs of youth employment in the other programs because we have different economic principles involved and, thus, we will also be reducing inflationary pressures by this amendment.

In total what we will be doing here, as I see it, is we will be attempting to cut inflation, cut waste, and help our young people, who have the most serious problem with unemployment. We will help them find employment that they badly need at this time, at a time when statistics show that more young people are coming into the youth market than at any time in history.

I urge the Members to support the amendment.

Mr. ANDERSON of Illinois. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Illinois.

Mr. ANDERSON of Illinois. I thank the gentleman for yielding. I should like to congratulate the gentleman in the well for introducing this amendment. I think that the statistics that he has given speak for themselves when there are 3 million young people between 16 and 24 who cannot find work. This is the problem. With respect to black teenagers, I am told that the unemployment rate is 2½ times that for white teenagers, something like 40 percent in some of the metropolitan areas of this country.

I think the gentleman's amendment would have the effect of prioritizing this program in a way so we would be addressing the greatest need, which is youth unemployment. I congratulate the gentleman on his amendment. I hope it is adopted.

Mr. JEFFORDS. I thank the gentleman. I would also point out relative to that, that the recent rise in unemployment was due almost entirely to youth unemployment. Youth unemployment went from 14.2 to 16.3 percent, which almost totally accounts for the recent increases we had this past month in unemployment statistics. This is the area of need, and this is the area where we should put our money.

Mr. HAWKINS. Mr. Chairman, I rise to oppose the amendment. Mr. Chairman, may I place this amendment in its proper perspective. It sounds very good, and I think anyone not paying too much attention would be misled by what has been said. It is true that a great number of young people are unemployed, but to say that we should shift the attention from the parents to the young people and put them to work and put the parents out of jobs accomplishes absolutely nothing. In a sense this is what this amendment is going to do. It says that it is shifting the money from one title to another. It pretends to shift it to the youth title, title IV.

We have had testimony before the committee from the Secretary of Labor that they already have adequate funding in that title, all they can reasonably use in this next fiscal year. So to say that we are going to give them more money when they have already testified that they have adequate funding in that title is, I think, simply misleading the House into believing that they are shifting this money from an unpopular program to something which is popular.

The other shift is supposed to occur to the private sector, and that is title VII.

We have already earmarked $400 million for that title.

In the testimony of the National Alliance of Business and the other business interests of this country, as well as the Labor Department, it is a pilot program. It is to demonstrate in a 2-year period, and there is only a 2-year authorization of this program, what can be done. It is going to take time to tool up for that program.

Now, if they wish additional money, I call attention of the Membership that under section 609 of the bill on page 208, it provides that the money available in title VI can be used, too, in title VII. In other words, if there is a demonstration that the business groups of this country under title VII can demonstrate the need for additional money, that money is already available; so this amendment will certainly be useless.

Mr. Chairman, it adds up to this. The effect of the amendment is merely to knock out of the program 100,000 jobs next year. That is the practical effect of this amendment. That is what it is designed to do.

Now, if you want to do that and create a disastrous situation in many parts of the country, with an unemployment rate which is likely to rise and certainly did rise this month, then that is what this amendment would do.

I urge that we look thoroughly

through this and not be misled that by this amendment you are helping the youth of this country. I think we all want to do that, but this will not do that. It is simply sacrificing the parents of these youths, who if they had jobs many of these young people could go back to school, rather than seeking employment, and that would be in many instances if the parents had decent jobs. I say that would be a disastrous situation.

Mr. Chairman, I hope we reject this amendment.

The CHAIRMAN. The time of the gentleman from California (Mr. HAWKINS) has expired.

(At the request of Mr. PERKINS, and by unanimous consent, Mr. HAWKINS was allowed to proceed for 2 additional minutes.)

Mr. PERKINS. Mr. Chairman, will the gentleman yield to me?

Mr. HAWKINS. I yield to the gentleman from Kentucky.

Mr. PERKINS. Mr. Chairman, I think the contention of the gentleman from Vermont is absolutely erroneous; but I would like to ask the gentleman from California this question. Under title VI, where the gentleman proposes to cut out 100,000 slots and claims he is saving a billion dollars by transferring it to title VII and other titles, do we not have at the present time 600,000 slots under title VI, and we are only proposing, before the Jeffords amendment, that we have 490,000 slots under title VI in this bill?

Mr. HAWKINS. That is correct. It is 600,000 in the existing law and the committee bill entitles them to 500,000.

Mr. PERKINS. And the unemployment rate has just risen again to 6.2 percent?

Mr. HAWKINS. That is correct, so we already adjusted for the gentleman's argument that this is expanding, rather than being made more stringent, and we have already transferred those to the other titles the gentleman speaks of.

Mr. PERKINS. Mr. Chairman, if the gentleman will yield further, all of the funds that the administration requested for title IV and title VII have been put in there, have they not?

Mr. HAWKINS. That is correct; there has been no testimony in any of the hearings in support of this type of program.

Mr. ANDERSON of Illinois. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from Illinois.

Mr. ANDERSON of Illinois. Mr. Chairman, I am informed, and I ask the gentleman from California if it is not correct, that even with the amendment proposed by the gentleman from Vermont (Mr. JEFFORDS) that it would be still there. There will be under title II no less than $2 billion that would be available for public services employment. About $3.2 billion will be available for public service employment under title VI, and with the adoption a few minutes ago of the Obey amendment, this means there would be a total of about 666,000 public service employment jobs that would be available under these two titles.

Mr. HAWKINS. Mr. Chairman, may I explain it this way. That is an authorized limit. It does not mean you would have that amount available in title II. That is the largest amount that could be made available.

Mr. ANDERSON of Illinois. Of course, we have to get that funded. We understand that.

Mr. HAWKINS. The amount would be set through the appropriation process and if the appropriating committees would determine they needed less, they would obviously appropriate less. We only say that is the top limit. We have limited, rather than authorized that amount.

The CHAIRMAN. The time of the gentleman from California (Mr. HAWKINS) has expired.

(On request of Mr. ANDERSON of Illinois, and by unanimous consent, Mr. HAWKINS was allowed to proceed for 1 additional minute.)

Mr. ANDERSON of Illinois. Mr. Chairman, if the gentleman will yield further, I accept everything that the gentleman from California (Mr. HAWKINS) has said, but the fact remains that under the authorizations provided for in these two titles there would be that many public service jobs available.

Mr. HAWKINS. Yes, if the Committee on Appropriations agreed to appropriate the money. These are only guidelines; they are not mandatory requirements. We have not actually appropriated anything. We have set these as maximum limits. If the Committee on Appropriations agreed with us and it was within the budget resolution, obviously, the gentleman would be correct, but I say that is still subject to the will of this House.

Mr. ANDERSON of Illinois. Mr. Chairman, will the gentleman yield further?

Mr. HAWKINS. I yield to the gentleman from Illinois.

Mr. ANDERSON of Illinois. Mr. Chairman, I have just been handed some figures that indicate that back in June of 1975, which was, I think the gentleman would agree, at a time when we were just coming out of the depths of the 1974–75 recession in the economy, we had at that time 277,900 public service employment jobs.

Mr. MITCHELL of Maryland. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I, as one Member of this House, will not take second place to any other Member in this House in terms of fighting for youth employment. Particularly, for black youth, the unemployment figures are absolutely horrendous.

Those Members who serve on the Committee on the Budget with me and those who have been around the House for some time have known I have fought as hard as I could to put our young people to work.

Very often, however, the best-intentioned legislation can have disastrous results. If we are looking just at the matter of putting youth back to work, if we do that in a vacuum, that is a mistake.

In my city of Baltimore, we were lucky enough to be chosen as one of the cities to participate in the youth entitlement program where youth can work and go to school.

The sad fact of the matter is that the children are working and the parents are not. I would implore my colleagues to look at what that does to family life when the father comes to the son and says, "Let me borrow 2 bucks from you so I can go out and look for work." Do we not see the kind of damage we would in that type of situation?

In addition to that, the amendment is totally diastrous in terms of black unemployment. The black male rate of unemployment is still astronomically high. I think it is around 9.5, almost 10 percent. We cannot just write off that problem and say we are going to focus all our attention on youth.

I argue against the amendment primarily because of the damage it does to the stability of family life. I argue against the amendment because what we are doing, with special reference to the black community, is pitting one group of unemployed against another. I argue against the amendment, despite the fact it is well-intentioned, simply because it will not in my area benefit the groups that need it the most. It would benefit only a portion of it, not the total.

Mr. Chairman, I hope we vote down the amendment.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Chairman, I think the gentleman will agree with me, though, that the rate of unemployed black youth is about 37 percent. At least, that is the statistical information I have. The gentleman indicated that the rate of black male unemployed is about 9 percent. So we have a rate of unemployment that is almost 4 times higher among black youth than among black adults.

Mr. MITCHELL of Maryland. I agree.

Mr. JEFFORDS. Yet the program is tilted in the other direction.

Mr. MITCHELL of Maryland. Mr. Chairman, I agree with the gentleman's data, but let me lay that data against a real living family. That is my argument. My argument is that we should not take the whole statistics and say, "OK, son, you to to work, but Dad you can't work."

It seems to me there is another danger to this amendment. What in fact we are doing by this is writing off a part of the structurally unemployed that has been in the black community since the end of World War II. Once again, by this amendment we are discounting the importance of trying to move those people back into the job market, and again we are saying, "We will start with another generation, but with you, we write you off."

Mr. Chairman, this is a bad amendment, and I urge its defeat.

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from California.

Mr. DELLUMS. Mr. Chairman, if I may, I will just suggest another answer to the question. Yes, the unemployment rate among black youth in this country is somewhere around 40 percent, but we are talking about approximately 400,000 youths. When we look at the number of black male and female workers out of work, we see that that number far exceeds 400,000.

So if we attempt to compare the 40 percent with the 9 percent and try to find where the emphasis is, we should first look at the numbers.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Maryland. Mr. Chairman, I will recapture my time.

I want to make one other statement. I want to make it very clear to the distinguished gentleman that I am not denigrating his effort. But so often in this House we think we are doing the right thing, not we are really creating additional problems.

I want to stress again and again that it is not simply a matter of putting a young person to work. You have to weigh that alongside the stability of the family, alongside the role model of the father in that family, you have to weigh that alongside the whole area of factors that enter into a sense of security in work for my community.

Mr. Chairman, I urge that the Committee defeat the amendment.

Mr. PICKLE. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I think this may be one of the most, if not the most, important amendments that we have before us tonight, and I hope that other Members who feel the importance of it might express themselves.

Mr. Chairman, I have always been a supporter of the CETA program, and I think it affords a good opportunity for local communities. I have been as unhappy as many people have been about the abuses that occurred across the country, and I want to do something about it. But I think, basically, the Federal Government is saying we are going to provide the training and we are looking to the cities and the counties of the State to say, "You be the deliverer of these jobs and you give the training."

Mr. Chairman, we have two types of programs now, the structurally unemployed and the countercyclical. I think the probable goals of the two have been somewhat in conflict. I do not think under the present operation of the bill we give local sponsors enough mix to allow a better balance of work and training.

What the gentleman from Maryland has said may be true in Baltimore, but it is not true in my part of the country. It seems to me that what the gentleman from Vermont (Mr. JEFFORDS) is doing is trying to put emphasis on youth employment and private initiative. It seems to me that too great an emphasis has been on public service employment, and that is what we need to correct. I do not think we are doing it enough by this bill.

Mr. Chairman, public service employment is supposed to be a countercyclical component of CETA. And if it is a countercyclical program, then it ought to diminish as the economy improves.

In my part of the country the economy is better than it is in Baltimore or in other parts of the country. And yet the emphasis is still on public service employment, not on the training. It seems to me that if we are going to get a proper mix, we ought to be willing to put a cap on PSE.

I do not think the cap destroys or endangers public service employment. There is a lot of money in it still for cities like Baltimore and other areas. It does not give a proper opportunity for other parts of the country to give our youth the best mix for training and experience for work. If we are going to expect our cities to be the deliverer of these jobs—and they ought to be—then we ought to put the emphasis more on training and more away from public service employment.

If it is true, as the gentleman from Illinois (Mr. ANDERSON) pointed out, that there are $2 billion still left in the public service, or at least the authorization is there, I would say that we are really not hurting public service employment that much.

What the gentleman from Vermont (Mr. JEFFORDS) attempts to do is take $1 billion and put one-half of that over into youth training and the private sector.

What we need to do is get the people trained so that they go into private employment and not stay on public service employment.

So it seems to me that the amendment does not hurt the bill. I do not think the cap hurts the PSE program that much. I would think it is an amendment that we can support, and it really goes to the heart of the CETA program, that is, having a proper mix in the entire program.

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield?

Mr. PICKLE. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. I thank the gentleman for yielding.

Mr. Chairman, would not the gentleman agree with me that it is disastrous to write off a group of people?

Mr. PICKLE. What is the writing off?

Mr. MITCHELL of Maryland. Let me just try to point out how it is. I am not talking about just Baltimore. I am talking about every major metropolitan area where we have heavy concentrations of minorities, blacks, and others. We have the problem of high unemployment. When we start shifting in terms of priorities, then we are writing off a group of adults who are unemployed. That is a mistake we made since 1945 and 1946, since the end of World War II. That is one of the reasons why we have structurally unemployed in this country.

Mr. PICKLE. I submit to the gentleman that if we continue on our present course, we are going to then be giving continued emphasis on public service employment. I assume there are ample funds to take care of the situation the gentleman mentions. I hope that he would feel that way.

The CHAIRMAN. The time of the gentleman from Texas has expired.

(At the request of Mr. DELLUMS and by unanimous consent, Mr. PICKLE was allowed to proceed for 3 additional minutes.)

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. PICKLE. I will be happy to yield.

Mr. DELLUMS. Mr. Chairman, I respect the kindness and the rationality of the gentleman's arguments, but I would like to ask two questions. Is the gentleman aware of the fact that this committee received testimony from the administration that indicated that as of this very moment, they are having difficulty attempting to spend the resources that they presently have, and the administration indicated in the testimony before this committee that they had more than enough money to spend in the next fiscal year in the youth program category?

Question two: Is the gentleman aware of the fact that moneys can be used now from title VI for certain title VII programs if they are experimental or demonstration in nature?

My question to the gentleman is, if he answers both those questions, why make this effort to put money into a program where the administration cannot spend the money they already have, and there are ample resources in the private sector?

Why are we putting money in there? I ask this in a very rational, logical, and kind manner.

Mr. PICKLE. I am mindful that the administration has stated that, by listening to debate earlier, that they had ample funds to employ youth. I had not heard that until just a few minutes ago. I am mindful of the administration position. I speak, though, from a part of the country that is not looking at the program just strictly as Baltimore or San Francisco, but also from the Southwest. I submit to the gentleman that I think it is eminently fair and important that we put emphasis on training, including youth.

If we were doing damage to the older employees who were structurally unemployed, I would say that would be unfair, but I think there are ample funds in there for those kinds of programs. I cannot understand why there would be this much objection to just shifting over one-half the funds into the private sector.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. PICKLE. I yield to the gentleman from California.

Mr. HAWKINS. I wonder if the gentleman is aware of the fact that the title II program that he is speaking of—the $2 billion, I think he referred to—that under title II, which is the structurally unemployed title, that training is mandated and is required of every prime sponsor, and that it is spelled out? I wonder if the gentleman is aware of the

fact that under the other title, title VI, the so-called countercyclical title—and we have separated those two for the first time so that we can deal with countercyclical as those programs should be dealt with, we have provided that assuming the unemployment rate goes down, the number of public service jobs must go down.

I wonder if the gentleman is aware of that, because he indicated it should phase down as things get better, and we hope that they will.

The CHAIRMAN. The time of the gentleman from Texas has again expired.

(By unanimous consent Mr. PICKLE was allowed to proceed for 1 additional minute.)

Mr. PICKLE. I am advised that title II does have training. Title II, though, has it for the structurally unemployed. We have got training also in title VI. I am saying to the gentleman that there are funds in it for the structurally unemployed, but when we get to the countercyclical, that is where I think we put too much emphasis on the public service employment and not enough on the training.

That is what I think that amendment would accomplish.

Mr. HAWKINS. That is the purpose of the countercyclical programs under title VI, and that is what it was designed for, to take care of the recession which we had experienced and still have. After 3 months of so-called recovery, we still have almost 10 million persons unemployed. I think the gentleman would agree that certainly there is still a need for a countercyclical program such as we have in title VI. When times get better, and we hope they do, the phasing down of it is automatically taken care of.

The CHAIRMAN. The time of the gentleman from Texas (Mr. PICKLE) has expired.

(On request of Mr. SARASIN, and by unanimous consent, Mr. PICKLE was allowed to proceed for 2 additional minutes.)

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. PICKLE. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, I would like to go back to a statement made earlier, supposedly on the administration's claim that they have more than enough money to take care of the youth program. My understanding was their statement was they had never gotten their act together quickly enough, so they had more money than they spent, but certainly they did not have more than enough to meet the problem of the Nation's youth. I did not believe they took that position at all.

Mr. PICKLE. I cannot believe the administration said: "We have ample money to do that. We do not need more funds for youth training." I cannot quite believe that. I cannot debate that because I am not familiar with the situation.

Mr. ANDERSON of Illinois. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. ANDERSON of Illinois. Mr. Chairman, I am absolutely confident that there is not one Member of this body who does not have his or her favorite CETA "horror story." Some of these woeful tales, like those described in the August 1978 issue of Reader's Digest, are barely printable. But my favorite is the 30-foot high mountain of steel-reinforced concrete for aspiring rock climbers in Salem, Oreg. With all due respect to those who conceived and executed the project, I would suggest that there are more effective ways to spend the Federal manpower dollar. Yet Salem's new mountain is a molehill compared to CETA scandals we have read about lately: To wit, charges of CETA funds finding their way into political patronage jobs in Baltimore, the Westchester County (N.Y.) district attorney's description of "pervasive corruption" of their job-relief programs, and—right here in the Nation's Capital under the very nose of the Government which created the CETA program—"the extensive (in the words of a recent Washington Star article) and sometimes illegal use of Federal job funds to create one of the largest city council staffs in the country," the New York Times recently summed up this farrago of good intentions and bad management thusly:

> Just as CETA workers were becoming part of the fabric of almost every community, however, there were reports of improper hiring, nepotism, kickbacks, bogus jobs and unsupervised work in a number of cities . . . (May 14, 1978)

These reports notwithstanding, I am encouraged by the action taken by the committee to tighten up on the fraud, waste, and mismanagement that plague our Federal employment and training program. The new law provides for stringent criminal and civil sanctions against program abuse by prime sponsors and subcontractors, a new Office of Audit, Investigation and Compliance to zero in on charges of mismanagement, a new Office of Management Assistance to help prime sponsors improve the effectiveness of their programs, and new restrictions to prevent substitution and abuse in public service employment. I am hopeful that these four basic reforms will help us get the "biggest bang for our CETA buck" and that they will ultimately address the concerns outlined earlier this year in a minority staff report of the House Budget Committee which found that many State and local governments use Federal funds for jobs they would pay for anyway—that CETA helps the most employable at the expense of those most in need of training—and that CETA does pitifully little to help those at the bottom of the employment ladder to find permanent, private sector jobs.

Yet I would suggest to my distinguished colleagues that neither Salem's manmade mountain nor the truly horrific stories of abuse and scandal typify the veritable outrage that is, to me, synonymous with CETA. I am as distressed as the next person over reports of money misspent—there is absolutely no excuse for some of the stories we have heard. Indeed, they beggar the imagination! But as misguided as some of CETA's projects are, as patently dishonest as others may be, the real scandal of the Federal Government's employment and training effort is not how the $25½ billion has been spent since CETA's inception in 1973, but how it has not been spent. We are not just wasting the taxpayer's dollar—we are wasting a precious national resource that grows less and less recoverable with each passing day. I am speaking about the young people of our Nation.

Ask the youth of this Nation, Is the Government's jobs-relief program "comprehensive"?

Ask them, Does it mean "employment" for them?

Ask them, Does it mean "training" for them?

The answer in each case is for the most part a lamentable, heart-rending "No." The real scandal of CETA is not fraud, abuse, or mismanagement. It is youth unemployment.

In this respect, I am reminded of the remarks of a colleague of ours (Mr. DELLUMS) whose concern and expertise in the area of youth unemployment is well known in this body:

> The challenge of youth unemployment is probably one of the most difficult questions of economic policy we face today. It seems unresponsive to traditional economic policy. It does not have an organized and politically sophisticated interest group pressing for solutions: on the contrary, it is a source of alienation and hopelessness. It is a social time bomb for the future, and an economic waste today.

Since Congressman DELLUMS made that observation in the March 30, 1977 CONGRESSIONAL RECORD, the overall unemployment rate for all workers has dropped from 7.4 percent to 6.2 percent. Yet during the same time period, teenage unemployment has remained scandalously high: It now stands at 16.3 percent—2.4 percentage points below the March 1977 high of 18.7 percent. As jarring as these figures are, they tell only part of the story. While youth unemployment is shamefully high, particular categories of American young people bear the brunt of our economy's indifference. In particular, I am speaking of our black youth and other minorities. The July 1978 unemployment rate for black youngsters is a mind-boggling 37 percent. While the overall youth unemployment rate has dropped significantly since the 1975 recession, the unemployment rate for nonwhite teenagers has actually risen.

As agonizing as it is for us to contemplate, the severest aspects of the youth unemployment problem in this Nation break down along racial lines. According to a recent report of the Congressional Budget Office, if you were a white high school graduate in 1976, your chances of being unemployed would have been 1 in 8. If your skin was black, you automatically doubled your chances of not being able to find a job. If you were black and lived in the central area of a large city, your chances of being jobless would mount to 2 in 5. And what is worse, since 1976, the outlook has not improved one whit—instead, it has deteriorated.

It is not just statistics that document our miserable failure. Listen to the assessments of some of the prime sponsors of public service employment programs as cited earlier this year in the RECORD by my colleague from New York (Mr. CONABLE):

Baltimore: While there has been limited success in bringing about the transition to unsubsidized employment, the balance of those individuals unable successfully to meet the transition is great and troubling to economic planners.

Detroit: The public service employment programs as currently enacted are ineffective in resolving unemployment problems.

Kansas City: We do not feel these programs are effective in attacking unemployment. The long-term unemployed need training, not just a job.

In my own district, my home town of Rockford has had equally unsatisfactory experience with CETA's public service employment programs. Indeed, I am told by Rockford's director of comprehensive employment training that the city cannot effectively use all of the "pse" funds allocated to it and would greatly appreciate the flexibility of devoting some of these funds to youth employment and training.

We have an opportunity today to address what I see as the real scandal of CETA by focusing more of the Federal Government's jobs-relief activity on our young people, and it is for that reason that I rise in strong support of the amendment offered by the gentleman from Vermont.

As the gentleman from Texas reminded us a moment ago, we have got to look in greater measure to the private sector if we are going to do something about this problem. One of the benefits from the amendment of the gentleman from Vermont is under a reallocation of the funds that it would provide $1 million which would go to the new title VII program, the so-called private sector initiative program. I got, and perhaps the Members got the same letter a few days ago from the National Alliance of Businessmen. Let me quote from that letter:

The business community in general has had limited participation in CETA. Last year, for example, only $147 million was spent with private industry out of a total appropriation in excess of $8 billion. That is incredibly low when you consider that 5 out of 6 jobs in our economy are in the private sector. The private sector support represents the best hope for addressing the structural problem that CETA was originally set up to solve.

That is why I would plead with this House this evening to consider the amendment that has been offered by the gentleman from Vermont and to vote for that amendment because I think it is the last best hope we have of really doing something meaningful about this program of youth unemployment.

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON of Illinois. I yield to my friend, the gentleman from California, whose name I mentioned a moment ago.

Mr. DELLUMS. Mr. Chairman, I thank the gentleman for yielding.

I also thank the gentleman for repeating my remarks. I meant them then and I mean them now.

The gentleman from Connecticut (Mr. SARASIN) is precisely correct. They have not been able to get their act together and spend the money they presently have.

My point is this: It defies logic to put $400 million into a program where they are not capable at this point of even putting in place the programs they already have funded.

We certainly could use this money in the youth category, because they are geared up to do it.

I am not suggesting in any way that we have addressed in this body the significant needs of the unemployment of our youth in this country, because we are too busy building submarines and playing war games.

My point is that the present administration is not geared up enough so that they can fund the program, so why push more money into a program where they cannot spend it, and, put it into a program where it can be spent and where there are young people who are desperately needing the money in a program that can be funded? That is the question I raise.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON of Illinois. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, let me point out that when we are talking about the administration's inability to spend funds on the Youth Demonstration Act, that is a program to provide on a pilot basis a job program for young people but they did not get it together quickly enough, not that there are not needy youth in the country who need to be addressed.

If you want to look at a program that is not working just look at the public service employment because the transition rate, your rate of moving from the public service employment program into the real world is about 3 percent and yet billions of dollars are being spent. So, if there is a failure somewhere it is not in the youth program. So let us try to improve those. Let us try to deal with the young people who are unemployed and keep the young people from becoming tomorrow's adult unemployed. Let us deal with that area with greater emphasis than we have in the past.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. DELLUMS and by unanimous consent, Mr. ANDERSON of Illinois was allowed to proceed for 1 additional minute.)

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON of Illinois. I yield to the gentleman from California (Mr. DELLUMS).

Mr. DELLUMS. Mr. Chairman, I want to thank the gentleman from Illinois, Mr. ANDERSON, for yielding.

Mr. Chairman, I think this colloquy is important. The gentleman from Connecticut made the comment a few minutes ago, that as I understood it, that the administration had not "gotten their act together." If they have not gotten their act together enough to spend this additional $400 million, that may be one thing, but the gentleman did not respond to my question.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON of Illinois. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, let me say to the gentleman from California (Mr. DELLUMS) that the program is still ongoing, the pilot projects are still being conducted and certainly those dollars will be in a position to be spent because we are talking about the next fiscal year, yes, I think they will be, without any problem.

Mr. DELLUMS. That is just speculation.

Mr. SARASIN. And if they are not able to it is still a better investment.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON of Illinois. I yield to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Chairman, I would like to point out that there is still $5.2 billion plus in this bill for public service employment. Almost half the bill is still going in that area. All we are doing is cutting $1 billion out of that area and we will still have 660,000 public service jobs. We add probably an equal amount of jobs to the other programs where money is shifted.

● Mr. Chairman, let me describe again how this amendment to the CETA bill works. First, let me say that the net effect is to create more jobs than were projected by the committee for the original bill, service many more people, and yet spend one-half billion less dollars. One billion dollars will be cut from the title VI public service employment (PSE) program, which the committee proposed funding at $4.2 billion for fiscal year 1979. This ceiling of $3.2 billion will be in effect for title VI unless the unemployment rate becomes critically high, or low enough to require less public service employment expenditures. If unemployment is projected by the Secretary of Labor—pursuant to section 602—to be greater than 6.5 percent, then the $3.2 billion ceiling would be lifted, and "such sums as are necessary" would be in effect.

On the other hand, if unemployment decreases according to the administration's projections to a level which would not require $3.2 billion to fund public service employment—pursuant to section 601—then the authorization will be reduced to take into account the Secretary's projection.

The 6.5 percent figure was picked as it generally represents the point at which unemployment is considered critical. For instance the 6.5 percent critical unemployment figure can also be found in the funding allocation formulas in both titles II and VI in the "areas of substantial unemployment" (ASU) factor.

It should also be pointed out that in addition to the $3.2 billion in title VI for PSE after the amendment, there is

an additional $2 billion for PSE in title II, for a total of $5.2 billion.

Of the $1 billion which is cut from title VI public service employment, $500 million will be directed into youth and private sector programs in the following proportions: $350 million to title IV youth programs, $100 million to title VII private sector opportunities for the economically disadvantaged programs, and $50 million into the title VIII youth program.

The effect of this funding shift will be an emphasis on the programs which have better transition rates, serve our nation's youth, and are the most targeted on the economically disadvantaged. It will reduce funds for public service employment, which is too big, too wasteful, too inflationary—and has an extremely poor transition rate. It is the area of the bill in which most of the fraud and abuse takes place.

Let us take a look at the jobs impact of my amendment. The committee requested funding for 725,000 public service employment slots for fiscal year 1979. Under my amendment—taking into consideration the effect of the Obey amendment to hold the cost of the average public service employment salary for next year to $7,000—we will create 642,451 PSE jobs. This is a net reduction of 82,549 PSE jobs. However, by channeling $500 million into titles IV, VII, and VIII, we will create 110,061 new jobs. Overall, then, we have increased the number of job slots in the bill by 27,512. If we look at the number of participants who could be served under the lost PSE jobs compared with the amount who can be served by the new distribution of the $500 million, those figures are 158,748 participants, and 349,162 participants. In other words, we can serve over 190,000 more people by distributing the money into these programs rather than PSE.

Again, I would like to mention that this job increase is coupled with an actual cut in overall expenditures of half a billion dollars.

In order to calculate the number of new youth jobs in title IV, the assumption was made that the $350 million would be distributed in the same proportion as exists in present expenditures. This assumption was made to reduce any subjective approach to the division of funds, and to arrive at a more realistic estimate.

However, the Department of Labor, in implementing this change, may be advised that certain factors should be taken into consideration when this $350 million is distributed throughout the five programs in title IV. The programs which target the economically disadvantaged and transition the most participants into unsubsidized employment should receive a higher percentage of the money available by this funding shift. I call your attention to the following analysis and table from an August 1978 Congressional Budget Office study of CETA—background paper: CETA reauthorization issues, page 38, 41–43:

Summer Youth Program. The eligibility rules for the Summer Youth Program appear relatively well targeted in relation to the characteristics of youth with labor-market difficulties. In fact, the characteristics of participants served during the last quarter of fiscal year 1976 are more in line with labor-market problems than those of the eligible population, with the exception of those from families receiving cash assistance benefits.[7]

In many ways, the characteristics of program eligibles and participants suggest that the Summer Youth Program is operated to reduce the "riot potential" in large cities. Jobs are generally filled by males who are currently attending high school (Table 10). Females are underserved relative to their proportion in the eligible population. 33.8 percent of the 7.5 million eligibles in fiscal year 1976 were nonwhite, but 49 percent of program participants were nonwhite. While 14 percent of those eligible for jobs were unemployed, about 41 percent of program participants had been unemployed prior to entry.[8] More than 70 percent of program eligibles had not completed high school compared with 83 percent of participants.

Recipiency rates for cash assistance benefits differed substantially between eligibles and participants, except for the Food Stamp Program. While 34 percent of eligibles were AFDC recipients, only 25 percent of participants were. Thirteen percent of eligibles were from SSI recipient families compared with 6 percent of participants. Nearly equal proportions of eligibles and participants were food stamp recipients.

Other Youth Programs. The characteristics of those eligible for the various other youth programs differ widely as a result of eligibility rules (Table 11). Disadvantaged youths are most prevalent in the populations eligible for the Summer Youth Program, the youth entitlement, program, and the Job Corps. Eligible populations for the Youth Community Conservation and Improvement Projects (YCCIP), Youth Employment and Training Program (YETP), and Young Adult Conservation Corps (YACC) programs are less numerous and have higher family incomes.

The racial composition of the eligibles for all youth programs varies from two-thirds to three-fourths white. Because of varying age restrictions, there are large differences among the programs in the proportion of eligibles who have not completed high school. Fewer than 30 percent of Summer Youth Program eligibles, who must be 14–21 years old and economically disadvantaged, have completed a high school education. On the other hand, about half of the youths eligible for Youth Incentive Entitlement Pilot Projects (YIEPP) and the Youth Employment and Training Program have finished at least 12 years of school.

The incidence of cash assistance recipients is considerably higher in those programs (for example, the Summer Youth Program) that base eligibility in part on being economically disadvantaged. In the Youth Community Conservation and Improvement Projects (YCCIP), for which eligibles need only be 16–19 years old and unemployed, fewer than one in five eligibles receives cash welfare benefits. The effect of different eligibility is large variation across programs in the number of eligibles; more than 8 million youths would have been eligible for the youth entitlement program (YIEPP).

Different eligibility rules also result in considerable variation in the family income of eligibles across the various youth programs (Table 12). While less than 2 percent of eligibles for the Summer Youth Program, Job Corps, and YIEPP have family incomes of $15,000 or more, 37 percent of YETP and YACC eligibles and 41 percent of YCCIP eligibles do. The characteristics of eligibles for YETP, YACC, and YCCIP make skimming for the best qualified candidates more feasible than in the other three programs. And while it is true that youths must be unemployed to be eligible for YETP and YACC, the characteristics of those eligible for these programs and YCCIP are not consistent with those of youths with labor-market difficulties.

Although youths eligible under the Summer Youth Program, Job Corps and YIEPP account for 71 percent of those eligible for all CETA youth programs, the President's proposed fiscal year 1979 budget would allocate only 55 percent of youth program funds to these activities.[9]

[7] The conclusions also hold relative to the population eligible for the program before the changes in regulations that occurred during fiscal year 1976. The change in definition of economically disadvantaged increased the eligible population by 1.1 million youths.

[8] To the extent that the Summer Youth Program serves in-school youths, the March unemployment rate of program eligibles would be expected to be lower than that prevailing during the summer months.

[9] Unpublished data, U.S. Department of Labor, Office of Administration and Management, Budget Division.

TABLE 11.—ELIGIBLES FOR CURRENT YOUTH PROGRAMS: PERCENT DISTRIBUTION, 1975

Characteristics	Summer Youth	Job Corps	YIEPP[1]	YCCIP[2]	YETP[3]	YACC[4]
White	66.1	66.9	69.5	74.4	73.9	74.4
Male	30.3	29.9	31.5	38.1	38.0	38.9
Female	35.8	37.0	37.9	36.3	36.0	35.4
Nonwhite	33.8	33.1	30.5	25.6	26.0	25.6
Male	15.7	15.1	13.1	13.2	13.2	12.5
Female	18.1	18.0	17.4	12.4	12.8	13.1
Less than high school graduate	71.1	60.4	50.3	64.8	52.1	46.7
In labor force	44.3	54.4	58.4	100.0	100.0	100.0
Employed	30.4	37.5	42.1	----------	6.3	----------
Unemployed	13.9	17.0	16.4	100.0	93.7	100.0
Age:						
14 to 15	27.1	----------	----------	----------	----------	----------
16 to 19	50.5	69.2	45.8	100.0	67.8	54.3
20 and over[5]	22.4	30.8	54.2	----------	32.2	45.7
Primary earner	12.0	16.1	26.7	3.2	7.5	11.1
Cash assistance:						
AFDC	34.1	32.2	29.0	14.4	14.3	12.7
SSI	12.7	12.0	10.8	4.7	5.0	4.5
Food stamps	30.0	27.4	27.1	12.0	12.4	12.4
Region:						
Northeast	18.9	18.9	19.0	24.7	24.3	24.9
Midwest	23.4	23.7	23.3	25.0	25.6	25.1
South	39.9	39.5	37.7	31.8	31.4	30.6
West	17.8	17.9	19.9	18.5	18.7	19.4
Total (in thousands)	7,544.8	5,502.4	8,306.2	1,950.9	3,060.6	3,593.5

[1] Youth incentive entitlement pilot projects.
[2] Youth community conservation and improvement projects.
[3] Youth employment and training program.
[4] Young Adult Conservation Corps.
[5] The upper age limit is 21 yrs. for Summer Youth Corps, Job Corps, and YETP; 23 for YACC; and 25 for YIEPP.

Source: CBO tabulation of the 1976 SIE.

These figures should be contrasted with the characteristics of participants in the title VI PSE program, which can be found on page 37 of the GAO report. The report shows for example, that out of a possible 52 percent AFDC eligibles, only 4 percent were served in title VI of CETA.

In this reauthorization of the CETA program, one of the most important things we can do for the health of the program is to effectively target our money. The House's decision to reduce PSE spending and channel some of this money into youth and private sector programs is a major one. However, a further step must be taken by the Department of Labor of targeting this money into the programs which best meet the goals defined by the Congress.

It is interesting to note that the title VI public service program began with a $400 million appropriation, and this year is expected to cost about $5.3 billion. Although the employment rate has been decreasing fairly steadily since 1974, PSE enrollments have increased at an extremely rapid rate. This is unusual, as the program was designed as a means to fight countercyclical unemployment—see table:

PSE and unemployment

Quarter	*Enrollment* [1]	*Unemployment* [2]
Dec. 1974	55,200	7.2
Mar. 1975	242,900	8.6
June 1975	277,900	8.7
Sept. 1975	299,900	8.5
Dec. 1975	329,300	8.2
Mar. 1976	344,500	7.6
June 1976	300,400	7.5
Sept. 1976	289,100	7.7
Dec. 1976	271,400	7.8
Mar. 1977	306,600	7.4
June 1977	361,200	7.1
Sept. 1977	532,900	6.8
Dec. 1977	615,100	6.4
Mar. 1978	759,278	6.2
(May 1978)	736,456	6.1

[1] Represents enrollment in PSE in titles II and VI of CETA.

[2] BLS National Unemployment Rate (percent).

We spent almost four times as much money on public service employment as youth programs in 1977, and almost three times as much money on public service employment programs as youth programs in 1978, although half of the unemployed people in this country are under 24 years old. The July BLS estimates show that there are 6,193,000 unemployed people in this country The number of unemployed teenagers—aged 16 to 19—is 1,538,000; the number of unemployed aged 20 to 24 is 1,477,000, for a total of 3,061,000, or about half our total unemployed. To spend three times as much, then, on PSE as youth programs in CETA, is ridiculous, especially when the program's impact is questionable at best. The CBO report sums it up like this:

About 9.5 percent of CETA Title VI participants during fiscal year 1977 left the program to enter unsubsidized employment, mostly in the public sector. According to the NPA study of PEP, those most likely to obtain permanent public sector jobs were white, professional or clerical workers, and highly educated. (p. 19)

Thus, Mr. Chairman, support for this amendment is well justified.●

The CHAIRMAN. The time of the gentleman has again expired.

The question is on the amendment offered by the gentleman from Vermont (Mr. JEFFORDS).

The question was taken and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. HAWKINS. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 221, noes 181, not voting 30, as follows:

NOT VOTING—30

Abdnor	Kasten	Rooney
Beilenson	Krueger	Sikes
Burke, Mass.	Le Fante	Sisk
Diggs	Lloyd, Tenn.	Spellman
Flowers	McDonald	Teague
Flynt	Mathis	Tsongas
Frey	Miller, Calif.	Whalen
Goldwater	Moss	Whitten
Hansen	Rhodes	Wilson, C. H.
Jenkins	Rodino	Young, Tex.

The Clerk announced the following pairs:

On the vote:

Mrs. Lloyd of Tennessee for, with Mr. Burke of Massachusetts against.

Mr. McDonald for, with Mr. Rodino against.

Mr. Sikes for, with Mr. Rooney against.

Mr. Flynt for, with Mrs. Spellman against.

Mr. Teague for, with Mr. Miller of California against.

Mr. Whitten for, with Mr. Krueger against.

Mr. MOORE changed his vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENTS OFFERED BY MR. DE LA GARZA

Mr. DE LA GARZA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DE LA GARZA: Page 16, line 23, insert immediately before the period the following: ", including adequate assurances that books of accounts on the expenditure of funds provided under this Act will be maintained in a manner sufficient to assure adequate supervision and monitoring".

Mr. DE LA GARZA. Mr. Chairman. I have another amendment that I wish to offer which goes to page 20, line 11. That amendment is the same amendment as the one just read, but it is to another section.

Mr. Chairman, I ask that the other amendment be reported, and I ask unanimous consent that the amendments be considered en bloc.

The CHAIRMAN. The Clerk will report the additional amendment.

The Clerk read as follows:

Amendment offered by Mr. DE LA GARZA: Page 20, line 11, insert immediately after the period the following: "The Secretary shall, prior to approval of any plan, require the inclusion in such plan of specific management and accounting procedures to assure adequate supervision and monitoring of the programs to be conducted pursuant to such plan, and shall require the adoption of specific procedures (such as accrual accounting procedures) where necessary for such purpose."

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. DE LA GARZA. Mr. Chairman, the gentleman from Virginia (Mr. BUTLER) and I have collaborated on these amendments. I offer them in the spirit of trying to strengthen this legislation and to make it a workable, viable piece of legislation for the people of this country.

The reason I am interested in these amendments is that some of the abuses of the program happened in my congressional district. One of them came about directly because of a lack of rules or law, which is what I am trying to provide by offering these amendments.

The problem was that there was no adequate provision for monitoring the auditing procedures of the grantee of the prime sponsor. The prime sponsor retained an auditor. The Labor Department was satisfied and accepted the reports of the auditor. Later we found out that the sponsor and the auditor were working together and in effect defrauded the Government of several thousand dollars.

When I looked at the legislation, I found that, in all of the directives to the Secretary as to what he shall do and the requests that he shall make on the prime sponsor, there was nothing about accounting procedure. All this says is that the Secretary shall ask what type of accounting you have. That is simply what it does, Mr. Chairman, in both instances—that the Secretary provide the necessary request to the sponsor that the books be made and kept in a manner in which they can be monitored and audited by the Secretary. I think it enhances the legislation. A quick perusal of the requirements does not show that there is anything relating to the books, and I think that this would help and would give the Secretary the needed authority to try to prevent situations such as those that happened in my district, where they have no provision for monitoring the auditing that was being done of the sponsoring agency.

Mr. Chairman, I would hope that the Members would support these amendments in order to strengthen the legislation.

Mr. BUTLER. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from Virginia.

Mr. BUTLER. I thank the gentleman for yielding.

Mr. Chairman, I appreciated the opportunity to work with the gentleman on these amendments. His experience parallels an experience we had in our district. I think the solution will require more accountability at the local level and will strengthen the legislation.

Mr. Chairman, I urge support of the amendments.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Texas (Mr. DE LA GARZA).

The amendments were agreed to.

AMENDMENTS OFFERED BY MR. QUIE

Mr. QUIE. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. QUIE: Page 123, beginning with line 17, strike out everything through line 13 on page 124, and after line 20 on page 126 insert a new section as follows:

"NATIONAL OCCUPATIONAL INFORMATION COORDINATING COMMITTEE

"SEC. 315. (a) In carrying out its responsibilities under this Act and under section 161 of the Vocational Education Act, the National Occupational Information Coordinating Committee shall give special attention to the problems of unemployed youths. The Committee shall also carry out other activities consistent with the purposes of this title, including but not limited to the following:

"(1) assisting and encouraging local areas to adopt methods of translating national aggregate occupational outlook data into local terms;

"(2) assisting and encouraging the development of State occupational information systems, to be used in the maintenance of local job banks and job vacancy reports, accessible to local schools, and including pilot programs in the use of computers to facilitate such access;

"(3) in cooperation with State and local correctional agencies, encouraging programs of counseling and employment services for youth in correctional institutions;

"(4) providing technical assistance for programs of computer on-line terminals and other facilities to utilize and implement occupational and career outlook information and projections supplied by State employment service offices and to improve the match of youth career desires with available and anticipated labor demand;

"(5) in cooperation with State and local educational agencies, and other appropriate persons and organizations, encouraging programs to make available employment and career counseling to presecondary youths; and

"(6) providing technical assistance for programs designed to encourage public and private employers to list all available job opportunities for youths with the appropriate eligible applicant conducting occupational information and career counseling programs, local public employment services offices and to encourage cooperation and contact among such eligible applicants, employers, and offices.

"(b) All funds available to the National Occupational Information Coordinating Committee under this Act and under section 161 of the Vocational Education Act may be used by the Committee to carry out any of its functions and responsibilities authorized by law.

And conform the Table of Contents accordingly.

Page 39, line 13, strike out "438(c)" and insert in lieu thereof "315".

Page 162, beginning with line 5, strike out everything through line 24 on page 163.

Mr. QUIE (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read, printed in the RECORD, and that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. QUIE. Mr. Chairman, these are amendments to which there would be no objection.

There are two conflicting references in the bill to the National Occupational Information Coordinating Committee. This is a technical amendment, with several conforming amendments, to combine these provisions into a single directive for NOICC, which was established under the Vocational Education Act Amendments of 1976, and was funded under both that act and CETA.

Mr. Chairman. I do not believe there is any objection to it.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. QUIE. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, the gentleman in the well is correct. We accept the amendments.

Mr. SARASIN. Mr. Chairman, will the gentleman yield?

Mr. QUIE. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, we accept the amendments on this side.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Minnesota (Mr. QUIE).

The amendments were agreed to.

AMENDMENT OFFERED BY MR. MAGUIRE

Mr. MAGUIRE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MAGUIRE: Page 52, line 19, insert "(1)" immediately after "(g)" and immediately after line 25 insert the following new paragraphs:

"(2) Nothing in section 121 or this section shall be deemed to authorize the Secretary to pre-approve the selection of legal counsel by a prime sponsor, but the Secretary shall assure that no funds available for administrative costs under any title of this Act are used by a prime sponsor for making payments on contracts for legal or other associated services unless substantively comparable services are not available from the Department of Labor (provided use of such services would not cause a conflict of interest within the Department of Labor) and the prime sponsor certifies that—

"(A) the payments are not unreasonable in relation to the fees charged by other con-

tractors providing similar services, and in any event, do not exceed the rate of pay of GS–18; and

"(B) the services could not be competently provided through employees of the prime sponsor or other available State or local governmental employees.

"(3) Where a prime sponsor has incurred legal costs in litigation with the Department of Labor, and such costs are questioned in a Department audit, the allowability shall be determined in the office of the Assistant Secretary of Labor for Employment and Training.

Mr. MAGUIRE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. MAGUIRE. Mr. Chairman, I have a number of amendments, some of which will be offered later en bloc since they are going to be acceptable to both sides. I would like to proceed with this amendment now because of its importance and the lateness of the hour.

Mr. Chairman, I think the public rightly demands that we tighten up the CETA program, eliminate fraud and abuse, and make sure that the program reaches the people for whom it is intended. The committee, I think, has done an admirable job, and the amendments which I offer, Mr. Chairman, are really in the same spirit as some of the things that the committee has already done. They emerge from some investigative work that was done by the Subcommittee on Manpower and Housing of the Committee on Government Operations, chaired very ably by Congresswoman CARDISS COLLINS.

The amendment to which I draw the committee's attention now is an amendment which provides minimum standards for allowable expenditures for outside consultants. Under my amendment, a prime sponsor may use an outside consultant for legal or associated services if the fees are reasonable, if the prime sponsor's own employees that are already on the staff, or those that are available to him from the locality, the State, or the Department of Labor, are not already available and competent.

Finally, if there is any conflict of interest question whatsoever about having an already available and competent person represent the prime sponsor in, for example, a dispute with the Department of Labor, then under my amendment an outside legal consultant could be retained. What the amendment does is simply establish some minimum standards for allowable expenditures.

The evidence indicates that there have been ripoffs of the CETA program, and what I am asking for here is simply that we limit the outside consulting expenditures to those that are necessary, and not permit the kind of billing that has unfortunately gone on in all too many locations for outside consultants to do the sort of administrative and other work which ought to be done under this program by people who are in fact already being paid to do that work.

So, Mr. Chairman, that is my amendment. I have discussed it with the able chairman of the subcommittee, the gentleman from California.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. MAGUIRE. I will be happy to yield to the gentleman from California.

Mr. HAWKINS. An earlier version, I thought, had in the paragraph 2, the line beginning with "prime sponsor" for making payments on contracts for legal or other "personal services."

Mr. MAGUIRE. No, we changed it to "and associated services" so it would be more narrowly drawn.

Mr. HAWKINS. Will the gentleman explain the reason for that, because we certainly had no objection to the words "personal services." I do not know whether or not the gentleman has substantially changed the meaning. That is the only thing I question.

Mr. MAGUIRE. If the gentleman would permit, I think the drafting of it was tightened up a little bit so that we were not talking about every conceivable thing, but rather legal and any other associated services.

Mr. HAWKINS. Associated with legal services?

Mr. MAGUIRE. Yes.

Mr. HAWKINS. With legal services?

Mr. MAGUIRE. Yes, because this appears to be the area in which there has been a problem. I would be happy to accept the original language, however.

Mr. HAWKINS. If that is the explanation of the meaning of it, I think that is the same. I would accept it on the basis of that as the intent.

Mr. MAGUIRE. I thank the gentleman.

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. MAGUIRE I yield to the gentleman of California.

Mr. DELLUMS. The gentleman is just talking about legal association, and is not talking about programmatic competency?

Mr. MAGUIRE. No; I am talking about people who are retained as legal consultants to do a variety of tasks which really are not tasks that should be reimbursed.

Mr. DELLUMS. I understand. I thank the gentleman.

Mr. SARASIN. Mr. Chairman, I rise in opposition to the amendment.

I would like to direct the attention of the gentleman from New Jersey to what I think is a copy of his amendment. Do I read it as saying that no funds under the act are to be used by a prime sponsor for making payments for legal or other personal services?

Mr. MAGUIRE. Mr. Chairman, if the gentleman would permit me, the amendment as it was finally read and presented at the desk did have a word change, so that it reads:

. . . legal or other associated services . . .

Mr. SARASIN. How does the gentleman define "associated"?

Mr. MAGUIRE. So that the amendment is more narrowly drawn, which I think the gentleman would be more sympathetic to.

Mr. SARASIN. How does the gentleman define "associated"?

Mr. MAGUIRE. It is associated with legal so that a lawyer could not be hired to perform a whole raft of services such as administrative and reviewing of audits, and so forth, which has, in fact, occurred in all too many instances and conducting administrative business representing the CETA program at meetings at which already employed administrative personnel could be representing CETA rather than a high-priced lawyer with expensive travel, and so forth.

Mr. SARASIN. My opposition to the amendment would still stand.

I do not understand what the gentleman's fear is here. Obviously, the Department of Labor is not in a position to provide all the counsel necessary for the primes to do their jobs and we cannot make it as a matter of fact that the prime sponsors have on their staff full-time attorneys to do all the work that has to be done.

Mr. MAGUIRE. If the gentelman will yield, my amendment does allow specifically for the instance that the gentleman has described in which the personnel would not be available and competent, but the amendment is designed to eliminate the situation which has occurred where people have been in effect on $3,000 a month retainers to do anything and everything without much supervision. Unfortunately too many such instances are there and can be documented. If the gentleman feels there would be a case in which there would not be an available or competent person to represent the prime sponsor, then the prime sponsor under my amendment could go and get that special assistance only for that special case, but only for that case and not as a general rule.

Mr. SARASIN. I think I could perhaps look more favorably if the gentleman were somehow limiting the ability of the Labor Department rather than the prime sponsor to go out and hire consultants, because of what I think has been a Labor Department ripoff. But I think we ought to allow the prime sponsor to get the help he needs to do his job better. I do not think this is a laudatory amendment and therefore I oppose it.

Mr. MAGUIRE. If the gentleman will yield further, I would be glad to share with the gentleman a whole raft of vouchers about these problems that have taken place and the gentleman would, I think, then agree that the amendment is very worthwhile and necessary.

Mr. STEIGER. Mr. Chairman, I rise to strike the requisite number of words.

Mr. Chairman, the gentleman from New Jersey was kind enough to show me a copy of the amendment and talk with me about this.

I must say I come in this with a perspective that may somewhat be different because while I am not on the Committee on Education and Labor any more, I was at one point rather deeply involved in the Comprehensive Employment and Training Act.

There are two problems with the Maguire amendment. One is that it is a restriction on prime sponsors in a way that I frankly do not think is appropriate.

The Members of the House will remember, I am sure, that we began this process of changing the Manpower De-

velopment and Training Act and all of its predecessor acts in an effort to insure that we would give decentralized administration to prime sponsors and limit the ability of the Labor Department to have to go through the endless contract by contract settlement procedure and negotiation.

What the Maguire amendment does is to impose a further restriction upon the ability of prime sponsors to maintain their own ability to run their own programs. I think that is wrong.

There is a second problem with where the Maguire amendment goes from my perspective and that is that one ought not to limit the ability of prime sponsors to seek legal counsel and rather have to rely more on the Labor Department, in effect, to represent them.

So that the amendment falls for two reasons and I hope it can be rejected.

I would urge the Members to maintain the ability of the comprehensive employment and training program to do what we started out to do and that is to limit the ability of the Labor Department to control prime sponsors and to allow the prime sponsors, even when, at times, they may make mistakes, to be able to be fully free to do their own jobs.

There is always a tendency in a situation like this—and I must say I am somewhat distressed at some of the amendments that have already been adopted and in fact were agreed to by the committee—the tendency is that we will keep chipping away at that basic thrust of what CETA was all about. And by the time we are through tonight, in spite of some of the improvements that have been made in this bill, what we are doing is further limiting the ability of the prime sponsors. We are imposing Federal restrictions upon the ability of the prime sponsors. We are creating all kinds of new national emphasis programs and that is not the way we ought to be operating. So I think that the Maguire amendment does not belong in this bill, is wrongly directed and does not serve the public interest in our efforts to insure that prime sponsors remain free from the kinds of letters that are imposed on them by this amendment.

Mr. MAGUIRE. Mr. Chairman, will the gentleman yield?

Mr. STEIGER. I yield to the gentleman from New Jersey.

Mr. MAGUIRE. Mr. Chairman, I hear what the gentleman from Wisconsin (Mr. STEIGER) is saying, but I am wondering if the gentleman would feel that that freedom ought to be totally unrestricted if in fact a situation exists in which public funds are being misappropriated or being spent for unnecessary and unessential purposes at exorbitant rates of payment. Would the gentleman feel the same way, or would he feel that some minimum standards ought to be put into force within which it would be possible for prime sponsors to continue to do anything which is really necessary, which is what my amendment provides?

Mr. STEIGER. Mr. Chairman, what I am saying to my friend, the gentleman from New Jersey (Mr. MAGUIRE) is that I am exceedingly hesitant to make the kind of judgment the gentleman is making about whether or not those payments are "exorbitant," are "unnecessary," and all of the other words that the gentleman has used. The kind of judgment that we are leaving with the locally elected officials as prime sponsors is one point I believe that ought to be preserved jealously. If there are mistakes to be made, if there are in fact payments to be made that were made that are not appropriate under the law, then there is already a mechanism under the law to correct that kind of mistake. But the direction in which the gentleman is taking us is the direction that, in my view, is not one that is appropriate and we ought to resist it.

Therefore I hope we reject the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. MAGUIRE).

The question was taken; and on a division (demanded by Mr. MAGUIRE) there were—ayes 22, noes 28.

RECORDED VOTE

Mr. MAGUIRE. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 200, noes 198, not voting 34, as follows:

[Roll No. 676]

Messrs. CARNEY, LONG of Maryland, MOORHEAD of Pennsylvania, ULLMAN, BARNARD, and JACOBS changed their vote from "no" to "aye."

Messrs. LIVINGSTON, BREAUX, WATKINS, BEVILL, and GILMAN changed their vote from "aye" to "no."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENTS OFFERED BY MRS. FENWICK

Mrs. FENWICK. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mrs. FENWICK: Page 18, after Line 9, insert the following:

"(6) a list of the specific contracts from the previous year with those institutions providing training programs including information and date of job placement for those who have completed such programs;

Redesignate the subsequent paragraphs accordingly.

Page 20, Line 11, after the period insert the following:

Prior to approval of any plan, the Secretary shall review the success of any training program which is to be refunded and be satisfied that such program has achieved sufficient results in job placement to merit continuation. The Secretary can require modification of such funding where necessary.

Page 20, line 11, after the period, insert the following: "The Secretary shall, prior to approval of any plan, insure that the prime sponsor has demonstrated a recognizable and proven method of verifying eligibility of all recipients. The Secretary can require modification or the adoption of specific procedures where necessary for such purposes. The Secretary shall also develop recognizable penalties and inform the prime sponsors of such penalties to be applied upon a finding of the ineligibility of any recipient."

Page 53, line 25, immediately after the word "Secretary" insert the following: "shall be responsible for the allocation of such funds and the eligibility of those enrolled in the program and"

Page 54, at the end of line 4 insert the following: "Prime sponsors may delegate the responsibility for determination of eligibility under reasonable safeguards, including provisions for reimbursement of cost incurred because of erroneous determinations made with insufficient care, provided that the Secretary has approved such an arrangement pursuant to the provisions of section 104 (a)."

Mrs. FENWICK (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD, and that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentlewoman from New Jersey?

Mr. ASHBROOK. Mr. Chairman, reserving the right to object, I did not hear what the unanimous-consent request was.

Mrs. FENWICK. Mr. Chairman, if the gentleman will yield, I ask unanimous consent that the amendments be considered as read, printed in the RECORD, and that they be considered en bloc.

Mr. ASHBROOK. I thank the gentlewoman, and I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentlewoman from New Jersey?

There was no objection.

Mr. HAWKINS. Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, I did not understand which of the three amendments we are considering at this time. Could the gentlewoman so indicate?

Mrs. FENWICK. Yes. On page 18, after line 9.

The next one is page 20, line 11.

They provide for the verification of the competence of the educational institutions that are being used. The point is to make sure that the institutions that have been used have been able to do something for the people who were trained there.

Mr. HAWKINS. If the gentlewoman will yield further, I am not really addressing myself to the substance of the amendments. If they are the three that I think they are, we will accept them and save time. I am simply trying to identify the amendments.

Mrs. FENWICK. Page 18, line 9; page 20, line 11; also on page 20, line 11, I have another amendment referring to eligibility; and page 53, line 25.

Mr. HAWKINS. I thank the gentlewoman.

Mrs. FENWICK. These amendments have to do with an effort to make sure that the educational institutions can really do something for the individuals who are being trained there. The institutions which have had previous contracts with CETA should report the results of those contracts. That is one set of amendments.

The other pair deals in the same way with responsibility for the eligibility of recipients.

Since it is very late, I do not wish to take the time of the Committee, but I believe the Members on both sides of the aisle will find these amendments satisfactory.

Mr. Chairman, I urge the adoption of these amendments.

Mr. SARASIN. Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. I yield to the gentleman from Connecticut.

Mr. SARASIN. Mr. Chairman, I want to be sure we are talking about the same amendments. May I address this question to the gentlewoman from New Jersey: Does the gentlewoman say that on page 20, line 11, she has an amendment?

Mrs. FENWICK. Yes.

Mr. SARASIN. Mr. Chairman, I have 2 amendments for page 20, line 11, and I am wondering if we are talking about both of them or one of them.

Mrs. FENWICK. Mr. Chairman, they are 2 different amendments, as the gentleman will see. One has to do with the success of the training program, and the other has to do with the eligibility of the recipients. Like the excellent amendments offered by the gentleman from Texas (Mr. DE LA GARZA), they are all on page 20, line 11, because they are put in at the same place.

Mr. SARASIN. Both amendments are to be inserted at that place?

Mrs. FENWICK. Yes.

Mr. SARASIN. I thank the gentlewoman.

Mr. Chairman, we accept the amendments.

The CHAIRMAN. The question is on the amendments offered by the gentlewoman from New Jersey (Mrs. FENWICK).

The amendments were agreed to.

AMENDMENT OFFERED BY MR. ASHBROOK

Mr. ASHBROOK. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ASHBROOK: On page 50, after line 25, add the following new paragraph:

"(1) No funds under this Act shall be used to aid the efforts of any labor organization to organize, to engage in collective bargaining, or to engage in any political activity. Without limiting the powers otherwise granted to the Secretary, funds found by the Secretary or by a court of law shall be refunded promptly to the United States Treasury."

Mr. ASHBROOK. Mr. Chairman, I feel this amendment is absolutely necessary because of an outrageous grant of $683,000.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. Yes; I will be glad to yield to my colleague.

Mr. HAWKINS. I wonder if the gentleman would kindly furnish us with a copy of the amendment.

Mr. ASHBROOK. Maybe my desk over here has failed. I thought we had. I am sorry.

Mr. Chairman, this amendment, I believe, is necessary because of an outrageous grant of $683,000 to the National Farm Workers Center. The National Farm Workers Service Center located in La Paz, Keene, in Kern County, Calif., is a separately incorporated nonprofit corporation set up by the United Farm Workers of America, AFL–CIO. The same location is headquarters of the Farm Workers Union, and the president of both organizations is Caesar Chavez. The center is an affiliate of the Farm Workers Union.

At the table I have the proposals that were made by the United Farm Workers for the attention of the Secretary of Labor. I think it is particularly interesting to note that while our colleague, the late William Ketchum, was alive and investigating this, he kept the heat, so to speak, on this particular project. It was not funded.

On August 1, this $683,000 grant—that is exactly what it is—was given to the service group.

Mr. THOMPSON. Mr. Chairman, will the gentleman yield a moment?

Mr. ASHBROOK. I yield to the gentleman from New Jersey.

Mr. THOMPSON. I thank my friend for yielding. Would this center be held up, I say to my distinguished friend from Ohio, until he and I return from that study trip we are going to take?

Mr. ASHBROOK. The difference is that I do not dare go near that territory.

Mr. THOMPSON. I will cover it and report to the gentleman back at the hotel.

Mr. ASHBROOK. Listen to the amendment, and let us take a look.

Mr. THOMPSON. All right.

Mr. ASHBROOK. Here are some of the things involved in the grant request: Workers' education will be stressed to include union contract implementation, grievance procedures, public speaking, parliamentary law, California farm labor history, and so forth and so on.

The AFL–CIO wrote Mr. Chavez as follows:

AMERICAN FEDERATION OF
LABOR AND CONGRESS OF
INDUSTRIAL ORGANIZATIONS,
Washington, D.C., Sept. 8, 1977.

Mr. CAESAR CHAVEZ,
President, National Farm Workers Service Center, Inc., La Paz, Keene, Calif.

DEAR CAESAR: The AFL–CIO Department of Education has reviewed your plans to operate a Residential Center to train Farm Workers in various skills under the President's Economic Stimulus Act.

We will be available to assist you in establishing the Center. We will also be glad to offer suggestions regarding the type of educational equipment you may need. As in the past, we stand ready to assist in program development leading to the training of your teachers in modern methods of adult education. Moreover, we would also help evaluate, periodically, the progress made in reaching your goals.

I wish you the best of success in developing the Center. It will provide both higher skills for Farm Workers and a better understanding of the role of the union in the agricultural economy of the nation.

Warm personal regards.

Fraternally yours,

WALTER G. DAVIS,
Director, Department of Education.

The documents are there for everybody to examine. I think we all understand that certain money is time and time again used for these purposes. My amendment, very simply, would prevent this act from being used to aid the efforts of any labor organization to organize, engage in collective bargaining, or any political activity.

Mr. ERLENBORN. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I will be glad to yield to the gentleman from Illinois.

Mr. ERLENBORN. I thank the gentleman. Just this afternoon a copy of the contract which has been signed, the grant award, was delivered to my office. I had a chance to look at it. Is this the same one that provides that the skilled training will be in having these—I think some 80 or 81 people—under the $683,000 contract work at improving the buildings at the site where their residence is?

Mr. ASHBROOK. No; basically it is in communications. I think we know what that is a euphemism for. It is a communication to the workers of their rights to organize, and union responsibilities, and so forth.

Mr. ERLENBORN. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Illinois.

Mr. ERLENBORN. Mr. Chairman, in the proposal of the grant award I saw there was also the statement that they were going to establish microwave communications between La Paz and the various sites in California where migrant workers are employed, so that they could have better communication with the workers.

Mr. ASHBROOK. That is correct. It is strictly communications.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

(By unanimous consent, Mr. ASHBROOK was allowed to proceed for 2 additional minutes.)

Mr. ASHBROOK. It talks in terms as a cover. It says communication facilities. What they are talking about are technicians, offset presses, camera workers, binders, and so forth. But basically that is the thrust of it, and it is very clear if we read the letters and who is on the committee. It is a great nonpartisan committee. They indicate their professional technical assistance will come from Walter Davis, director of AFL-CIO's Department of Education; Fred Hoehler, executive director of the George Meany Labor Studies Center; and Dr. John Sloan, director of the Center for Labor Research and Education, Institute for Industrial Relations, University of California at Berkeley.

Let us be honest about it. We know exactly what is happening in that. It is $683,000 that is going to the Chavez forces for nothing more—and they put it in as unblemished as they can—union contract implementation, grievance procedures, administrative procedures, public law, farm labor history.

I think as a body we have to decide whether or not we want CETA money to go for those purposes. I think our taxpayers do not. How we will vote may be something else again.

Mr. ERLENBORN. Mr. Chairman, if the gentleman will yield, I have this information on the grant award. It shows the number 98–8–1736–15–44. Let me read one paragraph.

A low-cost, Statewide, rural communications system is needed to effectively link all elements of the farmworkers organizations together into an effective operation. The NFWFC is currently building just such a system, which functions on the microwave principle, establishing a series of mountain top stations that can relay message channels up and down the length of California. Two Communications Technicians will be trained according to the requirements as specified in DOT Code No. 825.281.

Apparently this is where part of these funds are going.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. ASHBROOK) has expired.

(On request of Mr. WEISS, and by unanimous consent, Mr. ASHBROOK was allowed to proceed for 3 additional minutes.)

Mr. WEISS. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. In just one second.

The only thing I would add to what my colleague, the gentleman from Illinois, said about all the abuses, they have been discussed as if they were in the long distant past. What I would like to mention is this contract was issued at the present time, on August 1, 1978. It was not in the long distant past. It is in 1978, on August 1.

Mr. Chairman, I yield now to the gentleman from New York (Mr. WEISS).

Mr. WEISS. Mr. Chairman, I thank the gentleman for yielding.

Would the gentleman advise me as to whether or not in his opinion if the amendment were adopted there is any kind of CETA placement which would be permissible if the placement were to a labor organization?

Mr. ASHBROOK. If the gentleman is talking about a labor organization, that is different from organizing activities. That is what we are talking about in this amendment.

Mr. WEISS. Mr. Chairman, if the gentleman will yield further, if I read his amendment correctly, he says that no funds under this act shall be used to pay the efforts of any labor organization to organize, as set forth, and then he read from a contract which said that these people are going to be taught collective bargaining procedures, grievance procedures, parliamentary procedures, and so forth. Does he consider those descriptions within the contract to be within the prohibition he is offering in the amendment?

Mr. ASHBROOK. I would be frank to say to my friend, the gentleman from New York, I have researched this, and I doubt whether my amendment would stop the abuse of the Secretary of Labor in awarding this contract.

Mr. WEISS. Then, if the gentleman will yield further, why is he raising that contract if the amendment does not reach it?

Mr. ASHBROOK. Because in the future, if we can just send a message to the Secretary of Labor that: "No funds under this act shall be used to aid the efforts of any labor organization to organize, to engage in collective bargaining, or to engage in any political activity * * *" if we can only do that, that would be something that would be beneficial.

The original question was whether or not one could work for a union.

Of course you could work for a union.

Mr. WEISS. All right.

Mr. ASHBROOK. You could be in an apprentice program, you could do anything as long as you were not organizing or engaging in collective bargaining or political activity.

Mr. WEISS. Would the gentleman yield further?

Mr. ASHBROOK. I would be glad to.

Mr. WEISS. If I understand the gentleman correctly, then, he is telling us that all of the people who were placed in the contract that was entered into on August 1, were, in the gentleman's judgment, not violative of the law, legitimate and proper, and would not be subject to any charge of violation of the law we have before us?

Mr. ASHBROOK. I do not feel that they violate the law, it is a violation of policy. I am only saying in my amendment that we should prevent this from happening in the future. We have had many amendments that have dealt with many abuses, the abuses were not always illegal and not always stretching the law, they were merely improper.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. ASHBROOK).

The amendment was agreed to.

AMENDMENTS OFFERED BY MR. GLICKMAN

Mr. GLICKMAN. Mr. Chairman, I offer two amendments and I ask unanimous consent that they may be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Kansas?

There was no objection.

The Clerk read as follows:

Amendment offered by Mr. GLICKMAN: Title III is amended by adding new subsections 305 (c), (d), and (e), at the end of page 112, as follows:

"(c) Relocation efforts shall focus on shifting unemployed individuals to employment surplus areas where their skills could be suitably employed, provided that such relocation does not result in residents of the area to which persons are relocated not securing jobs for which they would also qualify.

"(d) In instances where a proposed relocation would likely result in a sizable influx of persons into a particular area, the Secretary shall consult, in advance of authorizing assistance, with appropriate Federal, state and local officials with regard to the potential impact on provision of housing and other services to area residents, including the new population anticipated as a result of the proposed relocation.

"(e) The Secretary shall coordinate, to the maximum extent feasible, the relocation assistance programs authorized under this section and the job bank and matching program authorized under Section 312(f) of this Act.";

And by adding the following to section 312(f) after line 16 on page 123: "The information gathered under this subsection with regard to available persons and job vacancies shall be coordinated, to the maximum extent feasible, with the relocation assistance programs authorized under Section 305 to permit those relocation programs to be utilized, when necessary and appropriate, in facilitating the match of available persons and job vacancies sought under this subsection."

and in

Section 705 is amended by deleting the period at the end of line 10 on page 213, and inserting in its place the following: "; and,

"(14) encouraging unemployed individuals to relocate to areas of the country where employment opportunities appropriate to their skills generally exist which cannot reasonably be expected to be filled from within those areas' job markets."

Mr. GLICKMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. GLICKMAN. Mr. Chairman, the committee did a very innovative thing in this bill in section 305 on page 112, the bill contains a provision providing for relocation assistance. Through this program the Secretary of Labor is given the authority to provide relocation assistance to move people where jobs are available. The amendments I offer, and I have talked with the committee on this, gives some greater strength to that section to provide the Secretary of Labor in moving people where jobs are.

I became interested in this section when I looked at the job services, occupation and demand brochure the Department of Labor puts out every month. If you look through this list you will see several hundred thousand jobs in this country that go unfilled every month at medium pay, at low pay and at high pay, all over this country.

For example, let us take the computer program, they had about 4,000 jobs in the United States available in June in places like Newark, New York City, Philadelphia, Milwaukee, Houston, Dayton, Phoenix, and Denver.

One of the things that struck me, Mr. Chairman, is that there does not seem to be any incentive any more to move where jobs are available. I would say that 15, 20, or 25 years ago if you did not move where the jobs were that you probably would starve to death but today because of a variety of reasons, such as inflation, the incentive is to stay where you are. There is no incentive to move where the jobs are available.

Mr. Chairman, there are in fact several hundred thousand available jobs both public and in the private sector all over this country.

The question is how do we try to relocate those people, using good judgment so as not to take jobs away from people who live in those areas.

They have a pilot program that is headquartered in Georgia. In this organization they have relocated approximately 850 people to 33 States in this country, primarily they are located in the Southeast part of the country and, while they have not reached any final determination yet, they have moved people into productivity, both in private sector and public sector jobs.

All I am saying is that we know there are thousands and thousands of jobs in this country, and they are in New York, in Pennsylvania, in California, in Kansas. The least we ought to do is to beef up the ability of the Secretary of Labor so as to give him flexibility to see whether these relocation programs work.

My amendment just builds on the relocation amendments in the bill. It provides that the relocation shall not result in residents of the area to which persons are relocated not securing jobs for which they would qualify. Therefore, it does not take away from jobs in the particular area where the relocation is occurring. It requires coordination with local authorities to make sure there is enough housing impact on population, and it requires the Secretary to coordinate this program with the National Job Data Bank, which is also beefed up through this bill.

I commend the chairman of the subcommittee for putting in a provision which I think is positive, and I think will substantially contribute to the real issue we are dealing with today, and that is how to provide people long-term, unsubsidized jobs.

Mr. Chairman, I offer these amendments in order to strengthen those sections.

Mr. GARY A. MYERS. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Pennsylvania.

Mr. GARY A. MYERS. Mr. Chairman, I thank the gentleman for yielding.

Of course, I have no argument with the parts of the program aimed at providing jobs for people.

My only question to the gentleman is this: In every area the gentleman mentioned there are literally tens of millions of dollars flowing into that area out of the CETA program to provide make-work jobs for people in that area. Why should we then have to use CETA money to transfer other people into those areas so that they can try to pick up these jobs?

Mr. GLICKMAN. We should not because in those particular cases, where jobs are available, then the CETA people, the manpower people in those areas should not place people from outside the area in the jobs.

That is one of the provisions in this amendment, in which I preclude the ability to place people in jobs where there are otherwise available people.

Mr. GARY A. MYERS. I do not know of one section of the country that is not getting CETA funds now. How can the gentleman say that? If the gentleman could show me sections of the country which are not getting CETA funds, he could then make me believe that there is no labor surplus there. In that event, I could see the argument for transferring people into the area.

The CHAIRMAN. The time of the gentleman from Kansas (Mr. GLICKMAN) has expired.

(On request of Mr. GARY A. MYERS and by unanimous consent, Mr. GLICKMAN was allowed to proceed for 2 additional minutes.)

Mr. GARY A. MYERS. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Pennsylvania.

Mr. GARY A. MYERS. To continue, Mr. Chairman, that is the problem I have in understanding. I think that there is a need to try to move people into private jobs, but I think the emphasis ought not to be so much on transferring people from one section of the country to another, but, rather, in each area or in each district, to confront them with the job opportunities that are there. If the CETA workers do not want to take those jobs, they ought not to be given the CETA option.

Mr. GLICKMAN. In many places in the country the issue is one of job training, and perhaps the CETA people in the localities need to do a better job of job training and placement.

All my amendment does is to permit the Secretary of Labor to have a bit more flexibility in these relocation programs.

There are many areas of this country where unemployment may be high, but in certain areas there may be no justification for employment in that area for some reason or another.

Mr. GARY A. MYERS. If the gentleman will yield further, the part of this program that is important, then, is the training aspect, not to bring somebody else in, but to train people or improve skills in that district. I thought that was the objective of the program.

Mr. GLICKMAN. The objective of what program, relocation?

Mr. GARY A. MYERS. No, the CETA program the basic objective was to train people.

Mr. GLICKMAN. It may be that we may have some cross-fertilization on the training with respect to people moving into other areas. All I am saying is that this should be part of the national policy so as to give the Secretary of Labor discretion. I merely provide that it be coordinated with the national job data bank, that local officials be consulted before it is done, and give it some teeth in the process.

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Chairman, I just want to ask a couple of questions and to express a caution.

The gentleman stated that the Labor Department is presently doing an experimental program on this matter.

Mr. GLICKMAN. That is correct.

Mr. MITCHELL of Maryland. I would want to go slowly with this approach until we see how that works out.

The CHAIRMAN. The time of the gentleman from Kansas (Mr. GLICKMAN) has expired.

(On request of Mr. MITCHELL of Maryland and by unanimous consent, Mr. GLICKMAN was allowed to proceed for 2 additional minutes.)

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield further?

Mr. GLICKMAN. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. I am thinking primarily of the inability of this Nation up to this point to provide the new housing that is needed in communities. I am thinking of maybe a group of people that we train in Bedford-Stuyvesant who have highly technical skills and we move into Phoenix, Ariz., where the community is ready to absorb them. I am thinking of getting higher-skilled trained people in Watts for example, and moving them into the Midwest or Phoenix, Ariz., or somewhere like that.

I am cautioning that while the intent is good, let us hold it and see what happens with the demonstration program.

Mr. GLICKMAN. I agree entirely with the gentleman. I have talked with the Department of Labor. They do not intend to give substantial expeditious emphasis on this program. They have no objection to my language because it tightens it, but my language does indicate that the Secretary before he can implement this program must take into account housing problems, local problems, school problems, and must determine the impact in all of these areas, on all of these social issues, before he can do any massive relocation. Let me just point out one thing: The effort of the pilot project has been on an individual basis. Let us say an individual comes in with a peculiar skill and cannot get a job in his area, but there is a job 75 or 200 miles away. I think the Department of Labor needs the flexibility to try to place that person there.

Mr. MITCHELL of Maryland. I thank the gentleman for his explanation. Let me add I will try to get a little group together of peculiarly skilled people and move them into Grand Rapids, Mich., if I can.

Mr. GLICKMAN. That will be fine.

Mr. PERKINS. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the chairman of the committee, the gentleman from Kentucky.

Mr. PERKINS. I thank the gentleman for yielding. Let me say to the gentleman in the well that we have spent hundreds of millions of dollars on relocation ever since we enacted the law back in 1961 or 1962. If the gentleman will turn to page 112 of the bill, he will find relocation assistance, section 305(a).

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. PERKINS, and by unanimous consent, Mr. GLICKMAN was allowed to proceed for 2 additional minutes.)

Mr. PERKINS. If the gentleman will yield further, that section provides that—

The Secretary is authorized to provide special relocation assistance for unemployed persons who desire such assistance through agreements with States, prime sponsors, or public or private agencies under this section.

(b)(1) Relocation assistance may be provided in the form of loans or grants, or both, subject to such standards as the Secretary establishes.

(2) Relocation assistance shall be available only to involuntarily unemployed individuals who cannot reasonably be expected * * *

And we go on there. But I want to make the point that relocation assistance has been provided by hundreds of millions of dollars since we originally enacted the Manpower Development and Training Act.

Of course, the gentleman's amendment, I take it, goes a little farther and spells it out more fully. I do not know. I presume that is the intent of his amendment; is that correct?

Mr. GLICKMAN. Yes, but the intent is not to change the basic thrust of section 305(a) as it is in the law.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Kansas (Mr. GLICKMAN).

The question was taken; and on a division (demanded by Mr. GLICKMAN) there were—ayes 26, noes 29.

Mr. GLICKMAN. Mr. Chairman, I demand a recorded vote, and pending that I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. One hundred and forty-eight Members are present, a quorum.

The pending business is the demand of the gentleman from Kansas (Mr. GLICKMAN) for a recorded vote.

A recorded vote was refused.

So the amendments were rejected.

PREFERENTIAL MOTION OFFERED BY MR. DELLUMS

Mr. DELLUMS. Mr. Chairman, I offer a preferential motion.

The Clerk read as follows:

Mr. DELLUMS moves that the Committee do now rise and report the bill back to the House with the recommendation that the enacting clause be stricken out.

Mr. DELLUMS. Mr. Chairman, I do not seek this vehicle as a parliamentary tactic. I make it with deadly seriousness. Whether one is on the winning side or the losing side of these many amendments is not important. I have been on the losing side of many of these amendments.

I dare say I am the only Member of the House of Representatives that has ever administered a manpower program. I would say to you from that area of competence that we have done a grave disservice this evening. I am horrified that the leadership would even put a CETA bill, "A Democratic program" on the schedule to be made a mockery of after 9 o'clock at night.

Mr. Chairman, whether you are on the winning side or on the losing side, the issue, I think, if I were to ask each of you seriously alone, you would all agree with me that virtually no one in this Chamber knows what we have done this evening. I would suggest that we are making a mockery of the legislative process. We came in at 10 o'clock this morning. People who labor go home after 8 hours. People who type letters get off after 8 hours. What makes us think we are so super intelligent that we can make complicated decisions at this hour of night, when no one on the floor even understands what we are doing?

Mr. Chairman, this piece of legislation speaks to people who are in pain and suffering in our community, and what are we doing? We are laughing, joking, playing games. Members come on the floor and ask, "Which amendment are you talking about, which line are you striking?"

If the committee does not know, how would those of us not on the committee understand?

We are tearing this legislation apart. This committee has worked for months on this legislation and right before our weary eyes, some are sleepy, others just bored to death—but many of us do not understand what is going on.

I would suggest that you vote for this preferential motion and get out of here and go home and save the taxpayers some misery and save the poor people in our various communities their hopes and dreams and their aspirations, which are tied up and locked up in this legislation. Let us not rip it apart playing games. I know people want to go home and campaign and win, to seek high office; but there are tiny people not running for political office, who just want a job and just want a decent way of life.

I suggest, if I were sitting in the galleries, I would realize this is just playing games. People in the galleries are looking at this like they are watching a peak-time television program. This is not a serious debate.

Mr. Chairman, let us vote for this preferential motion. Let us get out of here and vote for our families and children and not mess up our lives dealing with this kind of legislation.

Mr. SARASIN. Mr. Chairman, I rise in opposition to the preferential motion.

The CHAIRMAN. The gentleman from Connecticut (Mr. SARASIN) is recognized for 5 minutes.

Mr. SARASIN. Mr. Chairman, I rise in opposition to the preferential motion offered by the gentleman from California (Mr. DELLUMS).

I think I speak for the vast majority of Members in the House, who do feel they know what they are voting on, who have taken the time to go through the "Dear Colleague" letters, and who have taken the time to try to understand this very complicated piece of legislation.

I would suggest that this committee has put in a great deal of time trying to develop the program that was brought initially to the floor. We have not done violence to this bill. The amendments that have been offered have been offered in great seriousness, not in jest.

We are talking about a bill that would be a massive, major improvement over what we already have even if we had not added any amendments to it. I think we have improved it, and I have been on the winning and the losing side of that issue as well.

I do not see people playing games with this, and I do not see any people intoxicated among the Members on the floor of the House. I am offended by the comments of the gentleman from California (Mr. DELLUMS) when he makes that accusation against Members of the House.

Mr. DELLUMS. Mr. Chairman, will the gentleman yield briefly?

Mr. SARASIN. I yield to the gentleman from California.

Mr. DELLUMS. Mr. Chairman, I really did not say that. If I had said it, I would be man eough to say that I did and I would take my blows, but I did not say that.

Mr. SARASIN. Mr. Chairman, as I understood the gentleman, he talked about some people who were asleep and maybe intoxicated; then he made a couple of little extra moves, and I am offended by it. I do not think that was a proper comment.

Mr. DELLUMS. Mr. Chairman, if the gentleman is offended, I will ask unanimous consent to remove that line. I am not interested in that. What I am interested in is something that many people are not interested in, and that is dealing with a piece of legislation that seriously concerns the lives of thousands of people.

Mr. SARASIN. Mr. Chairman, if I may, I will state to the gentleman from California (Mr. DELLUMS) that I wish to reclaim my time.

Mr. Chairman, I understood the point the gentleman is making, but I do feel that the Members are very serious about this. They put a great deal of time and effort into their amendments, and they are trying to make the best possible explanation of them. If all the Members in this group would provide them with the audience and the attentiveness that is necessary, we could finish this business.

Mr. DELLUMS. Mr. Chairman, will the gentleman yield briefly to me?

Mr. SARASIN. Just briefly.

Mr. DELLUMS. Mr. Chairman, the last amendment, for example, offered by the gentleman from Ohio (Mr. ASHBROOK) may have been offered in great wisdom, but I am sure that many Members of the House have no idea as to the ramifications of that particular amendment. All they talked about was excessive union activities in California. They fought that fight in California, and we should not be fighting it on the floor of Congress. I think that when we have legislation with such great ramifications and make our political statements on the floor, we do not do the people a great service.

Mr. SARASIN. Mr. Chairman, I will reclaim my time.

Mr. DELLUMS. Mr. Chairman, why does the gentleman not make a motion that the committee do now rise?

The CHAIRMAN. The Chairman will state that the time is controlled by the gentleman from Connecticut (Mr. SARASIN).

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. SARASIN. I yield to the gentleman from Ohio.

Mr. ASHBROOK. Mr. Chairman, I would merely point out that the Chair has not restrained any Member from being recognized. Our honorable friend, the gentleman from California, has not moved to close any debate. Any Member can stand at any time he so desires and ask any question, and if the propounder of the amendment cannot respond to it or cannot answer the question correctly, the amendment should rise and fall on that basis.

Mr. Chairman, I think we have had an orderly debate across the board.

Mr. JOHN L. BURTON. Mr. Chairman, will the gentleman yield?

Mr. SARASIN. I yield to the gentleman from California.

Mr. JOHN L. BURTON. Mr. Chairman, let me ask the gentleman, when does he think we can finish the bill tonight.

Mr. SARASIN. Mr. Chairman, I cannot give the gentleman a time. There are a number of amendments at the desk. However, I think if we would spend our time trying to debate those amendments rather than argue motions that are only going to delay us, we could move this bill tonight and get out a good piece of legislation. I am interested in doing that.

Mr. JOHN L. BURTON. Mr. Chairman, I will ask the gentleman, when was the last piece of good legislation gotten out after the hour of 11 o'clock?

Mr. SARASIN. The gentleman asks, when was the last piece of legislation gotten out after 11 o'clock.

I will state that we do not run the calendar on this side. I have often thought that the best thing the Congress could do for the people of the United States would be to adjourn, but we are now in the middle of a very important piece of legislation, and I would like to see us finish it.

The CHAIRMAN. The question is on the preferential motion offered by the gentleman from California (Mr. DELLUMS).

Mr. HAWKINS. Mr. Chairman, I rise in opposition to the preferential motion.

The CHAIRMAN. The Chair will state that all time for debate on the preferential motion has expired.

The question is on the preferential motion offered by the gentleman from California (Mr. DELLUMS).

The preferential motion was rejected.

The CHAIRMAN. For what purpose does the gentleman from California (Mr. HAWKINS) rise?

Mr. HAWKINS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I had earlier consulted both the minority and other Members of the House, including the Speaker. I had indicated that I would make a motion to rise at 10 o'clock. I am sorry that there has been this interruption in the debate, and without prejudice one way or the other, I will state that my motion that the Committee rise at this time is not going to be made as a result of anything that has been said in the last 10 or 15 minutes.

We have tried to hold the debate within certain limits and to structure it in such a way that we would give due consideration to both viewpoints, and if our efforts have not resulted in that, I certainly hope that the Committee will not be held responsible.

I do think that, as a result of the various suggestions from Members on both sides of the aisle, they have generally agreed that it would be in the best interest of the Nation, for that matter, and certainly for this legislative process, that we do rise.

Mr. WAGGONNER. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from Louisiana.

Mr. WAGGONNER. I thank the gentleman for yielding.

Mr. Chairman, I think it needs to be said that the distinguished gentleman from California (Mr. HAWKINS), the chairman of this subcommittee, has come here, as he always does, in totally good faith. The gentleman has worked hard to bring this bill out of committee, whether the individual Members agree or disagree with it.

Mr. Chairman, I am just one Member of this House, but I think I express the opinions of a number of other Members. I want to say that I appreciate the effort that the gentleman has put forth on this legislation and the manner in which he has proceeded during this debate. I just want to express my confidence and appreciation to the gentleman from California.

Mr. HEFTEL. Mr. Chairman, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from Hawaii.

Mr. HEFTEL. I thank the gentleman for yielding.

Mr. Chairman, just quickly I would like to observe that CETA was developed as a legislative concept for the employment of those who are basically structurally unemployable. Unfortunately, CETA jobs have basically fallen to those who were not the people originally intended. To the extent that this legislation can be improved to reach its objective, I think that this body and the chairman have worked diligently, and we should not compromise the objective which I think was set out by the chairman and by this body tonight.

Mr. HAWKINS. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee arose; and the Speaker having resumed the chair (Mr. NATCHER) Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 12452) to extend and amend the Comprehensive Employment and Training Act of 1973, and for other purposes, had come to no resolution thereon.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 13511, REVENUE ACT OF 1978

Mr. BOLLING, from the Committee on Rules, submitted a privileged report (Rept. No. 95–1461) on the resolution

(H. Res. 1306) providing for consideration of the bill (H.R. 13511) to amend the Internal Revenue Code of 1954 to reduce income taxes, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REQUEST TO MAKE IN ORDER ON MONDAY NEXT OR ANY DAY THEREAFTER CONSIDERATION OF HOUSE CONCURRENT RESOLUTION 683 SECOND BUDGET RESOLUTION FOR FISCAL YEAR 1979

Mr. ROUSSELOT. Mr. Speaker, notwithstanding the provisions of clause 2 (1)(6) of rule XI or section 305(a)(1) of Public Law 93-344, I ask unanimous consent that it shall be in order to consider House Concurrent Resolution 683 on Monday, August 14, 1978, or any day thereafter.

Mr. Speaker, the reason I make this request is that the gentleman from Connecticut had asked unanimous consent earlier today for the Budget Committee to be able to bring the resolution to the floor on Monday, August 14, 1978, and I would like to make that unanimous-consent request.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. LEVITAS. Mr. Speaker, reserving the right to object, I do so for the purpose of making an inquiry of the gentleman from California.

Mr. ROUSSELOT. That would be fine.

Mr. LEVITAS. What is the purpose of the request that the gentleman is making?

Mr. ROUSSELOT. The reason for the request is that previously today my colleague from Maryland objected when unanimous consent was asked to have the budget resolution brought up. So, I was just asking unanimous consent to bring it up on Monday, waiving the 10-day rule, or any day thereafter.

Mr. LEVITAS. I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. ROSTENKOWSKI. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

NUCLEAR FUEL CYCLE OPTIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. GOLDWATER) is recognized for 5 minutes.

● Mr. GOLDWATER. Mr. Speaker, the Department of Energy's Los Alamos Scientific Laboratory in Los Alamos, N.M., publishes technical digests called Mini-Reviews on a regular basis. I have found that these publications provide useful background on many energy technology issues before the Congress.

A recent Mini Review from LASL "Nuclear Fission Energy Fuel Cycle Options" is particularly useful in assessing alternatives to the present "once-through" nuclear fuel cycle. This review article points out what new concepts are being studied as well as the status of available technology for reprocessing and enriching. It is worth noting that from the perspective of both new and on-hand technology that the "back-end" wastes from nuclear fuel are potentially very valuable. I recommend this article to my colleagues and remind them that the administration has chosen to indefinitely defer nuclear reprocessing.

NUCLEAR FISSION ENERGY FUEL CYCLE OPTIONS

INTRODUCTION

As world reserves of conventional energy sources decrease, we must develop alternate sources. During the transition period until ultimate sources are developed, nuclear fission and coal are the most likely sources. The question marks are that it is not known to what extent coal and nuclear will be used to close the transition-period energy gap, because economic, environmental, and sociopolitical considerations are still being debated.

In this mini-review we focus on nuclear fission energy and discuss the present cycle as well as several options that have not been fully explored.

NUCLEAR FISSION

In the fission reaction, if certain kinds of heavy atoms (called fissile fuels) such as uranium-235 (U-235) capture a stray neutron, they split into lighter atoms (called fission fragments) and emit more than one neutron of their own in the process, along with considerable energy. Expressed as a formula, this reaction is

U-235 + neutron—fission fragments + 2.5 neutrons (av) + energy.

The emitted neutrons in turn can be captured by other U-235 atoms, thus causing additional splits and releasing more and more neutrons. Repeated capturing and splitting is called a chain reaction. It is sustained if there are enough fissile fuel atoms close enough together that the emitted neutrons will be recaptured. Having enough fissile atoms close together is called having a critical mass.

Sometimes the emitted neutrons are captured by different kinds of heavy atoms such as Uranium-238 (U-238) and thorium 232 (TH-232) which aren't readily fissionable. These atoms once altered, can be used as fissile fuel; the process of transforming them is called converting, or breeding. Expressed as formulas, these reactions are:

U-238 + neutron— . . . —plutonium-239 (Pu-239)

Th-232 + neutron— . . . —Uranium-233 (U-233)

REACTORS

A reactor that simply "burns" fissile fuels such as U-235 is called a "burner." A reactor that also has atoms like U-238 and Th-232 in or near its core, so that those atoms can be bred into fissile fuel, is called a "converter." If the conversion proceeds so well that more fuel is produced than is consumed, the reactor is then called a breeder. At present, the 68 commercial reactors in the United States are only burners of U-235. Some Pu-239 is produced in them, but the reactor designs aren't optimized for breeding, nor is the Pu-239 currently recycled.

TODAY'S NUCLEAR FUEL CYCLE

The present nuclear fuel cycle is simply described. Naturally occurring uranium is found in ores as a mixture of U-238 (99.3%) and U-235 (0.7%). At the beginning of the fuel cycle, the ore is mined, milled, leached with chemicals, and processed into a form called yellow cake. The waste products of this process, called mill tailings, (about 99% of the original ore mass) currently are disposed of in tailings ponds (called tailings piles in the industry).

The yellow cake (1 lb produces about the same amount of energy as 7.5 tons of coal) is shipped to conversion plants where it reacts chemically with fluorine to form the gas uranium hexafluoride (UF_6). The slight difference between the weight of the U(235) F_6 molecules and the U-238F_6 molecules enhancement of the U-235F_6 concentration of the mixture in the next step of the process.

The historical technique for U-235 enrichment is called gaseous difussion, but other techniques such as the centrifuge process are being developed, and new techniques using lasers are under research. The United States Government controls all domestic U-235 enrichment.

The amount of fuel enrichment done depends on the need or reactor type for which the U-235/U-238 will be used. In general, the higher the concentrations of U-235 (the fissile part) the more flexibility there is in reactor design, but most current reactors need fuel enriched to only about 3%. The fluorine in the enriched UF_6 mixture is then chemically replaced with oxygen, and the enriched uranium oxide is fabricated into fuel pins clad in metal.

The byproducts of the enrichment process are called uranium enrichment tails, depleted in U-235 (conversely, enriched in U-238). These are currently stored for possible use in a breeder reactor in the future. If the enrichment tails in storage now were bred into Pu-239, the energy from burning the Pu-239 could supply this country's electrical needs for many decades.

At the reactor, the fuel pins are placed into rods, and enough fuel rods, along with neutron-absorbing control rods, are inserted into the reactor core, close enough together so that a critical but manageable mass of fissile fuel results. The nuclear chain reaction begins, liberating neutrons, fission fragments and energy. The fission fragments remain trapped inside the fuel pins. The released energy is used to heat water, converting it into steam that turns turbines for generating electricity.

As the fuel "burns," it becomes depleted in U-235, and eventually the U-235 concentration becomes too low for effective reactor operation. The fuel pins must be replaced about every three years, usually one-third of them every year.

The "spent" fuel pins still contain some U-235, as well as fission fragments, U-238, and some Pu-239 bred from U-238. If the pins were reprocessed, the U-235 and Pu-239 could be reused as fuel, and the U-238 could be used in a breeder to breed more Pu-239. However, reprocessing isn't currently done in the United States.

Instead, the spent fuel pins are sent to interim storage. They are called reactor nuclear waste, but as mentioned above, that is a poor choice of words because of the valuable U-235, U-238, and Pu-239 content of the pins. Storage is a problem, however, because the pins are radioactive. The Pu-239 has a decay time of thousands of years. Fission fragments most dangerous to man, strontium-90 (Sr-90) and cesium-137 (Cs-137), have decay times of hundreds of years.

Research is underway on the suitability of deep underground sites for permanent storage of nuclear fuel cycle byproducts. They would likely be stored in solid form, for example melted with and solidified into glass—a process called vitrification.

The discussion above outlined the nuclear fuel "cycle" that is now used in this country. However, in fact it isn't a cycle—it is a one-pass system. It would be a cycle, though, if spent fuel pins were reprocessed.

OPTIONS

There are other potential pathways for developing nuclear fission energy with continued mining of raw high-grade uranium ore, our supplies will be depleted in just a few decades. Even without breeding, one pathway is the use of reprocessed U-235 and Pu-239, separately or combined as so-called

mixed oxide fuels (MOX), in burners. Reprocessing would save between 20 and 40% on the amount of raw uranium that would need to be mined for a reactor. Reprocessing would also change the mixture of byproducts put into permanent storage, because most of the U-235 and U-238, and Pu-239 would be removed for reuse. A chemical reprocessing method, called PUREX, recovers 99.9% of the uranium and plutonium, but it is now used only on nuclear weapons program byproducts, not commercial reactor byproducts.

Use of breeders to create Pu-239 from U-238, or U-233 from Th-232, is another option that could supply the United States with fission/electric power for centuries.

The term "conventional" breeder is a misnomer in that this country doesn't have a "ready to order" U-238 breeder yet; further research and development is needed before breeders become a real commercial option.

Two other potential (but no commercially real) breeder options are possible. Electronuclear breeding would use accelerated hydrogen atoms to knock neutrons out of targets, and the neutrons then would bombard Th-232 to breed U-233. The conceptal fusion/fission hybrid would use neutrons from fusion reactions to cause fission reactions and additional energy release in a subcritical fissile-fuel blanket surrounding the fusion core.

The kind of reactor used (burner, breeder, hybrid) would dictate the pathways up to the reactor—the so-called front end of the cycle—and would, in part, dictate the pathway used after the reactor—to so-called back end of the cycle.

Note the options currently bypassed in the back end of the cycle. As mentioned, chemical/metallurgical reprocessing would provide substantial fuel recovery. But what about the other radioactive fission fragments? One option is laser photochemical separation (a technique that allows activation and separation of just one kind of atom or molecule in a mixture of several kinds), which may provide:

Separation of uranium and plutonium from liquid waste for fuel recycling.

Separation of long-lived fission products, such as iodine-129, zirconium-93 and technitium-99, that could be returned to a reactor where nuclear transmutations would reduce them to stable nonradioactive isotopes.

Separation of heat-generating radioactive elements, such as Sr-90 and Cs-137. Removal would reduce the heat load of the remaining byproducts. Such isolated elements might profitably be used to supply process heat (heat for an industrial process) during their decay (half-life about 30 years). Also, research is underway to use Cs-137 to irradiate municipal sewage sludge to make the sludge biologically inactive and thus suitable for fertilizer.

Recovery of valuable metals such as rhodium and palladium that could be sold.

If laser photochemical separations were done, the remaining toxic wastes could be much more easily stored; after 700 years, less than one ten-millionth of the initial toxicity would remain.

Laser photochemistry is a new field, and little work has been done on the use of lasers at the back end of the cycle. This option needs further study.

In the meantime, these fuel cycle back-end wastes should be viewed as potentially very valuable, and perhaps a "permanent" storage facility should be designed for retrieval.●

EXPLANATION OF CALIFORNIA SSI/FOOD STAMP BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Califorina (Mr. CORMAN) is recognized for 5 minutes.

● Mr. CORMAN Mr. Speaker, the purpose of this statement is to explain a bill I am introducing today that would allow the State of California to continue to pay cash in lieu of food stamps to SSI recipients.

Currently, recipients of supplemental security income (SSI) benefits in California are ineligible for food stamps. When the SSI program began in 1974, California included in its State supplementary cash payment an amount equal to the bonus value of food stamps that SSI recipients in the State generally would have been eligible to receive. In other words, the State provided SSI recipients with an additional amount of cash generally equivalent to, and in place of, food stamps, and in this sense "cashed-out" food stamps for SSI recipients. California was able to maintain this "cash-out" status as long as the Federal Government was contributing to the cost of the State supplementary payment through the hold harmless provision of section 401 of Public Law 92-603.

In 1976, as a result of increases in the Federal SSI benefit level, California became ineligible for Federal hold harmless payments and, consequently, would have lost the "cash-out" status allowed under the provisions of Federal law then in effect. At that time, at the request of the State of California, Congress enacted legislation (Public Law 94-379) that allowed California to continue its "cash-out" status as long as it met two conditions: beginning June 1976, and for every month thereafter, the States nad to: First, pass through to SSI recipients any cost-of-living increases provided in the Federal SSI benefits and Second, provide a yearly cost-of-living increase in the State supplementary payment. California has continued to meet these two conditions up to this time and, therefore, SSI recipients in the State are ineligible for food stamps.

Beginning in September 1978, however, California will cease to meet the second of these statutory conditions because the State suspended, as of September 1, 1978, the cost-of-living increase in its SSI supplementary payment. As of this date, because the State will no longer satisfied the second condition stated above, the State will lose its 'cash-out" status. SSI recipients will then be entitled to apply for food stamps, and most noninstitutionalized, single, aged or disabled individuals who apply will qualify for the minimum food stamp allotment of $10 per month. SSI couples and most single, blind recipients will not qualify for food stamps because the level of their SSI payments exceed the income limits under the food stamp program. Institutionalized SSI recipients will not qualify for food stamps because they do not constitute an eligible household under the provisions of the food stamp law.

At this time, California has reached an oral agreement with the Department of Agriculture under which, at least until December 1978, food stamps will be distributed to eligible SSI recipients under a demonstration project system which will greatly simplify the eligibility determination and food stamp distribution procedures. The State estimates that during these 4 months approximately 90 percent of the noninstitutionalized, single, aged, and disabled individuals who would be entitled to $10 a month of food stamps will participate in the program. The estimated annual cost under the demonstration project system is $51 million for food stamp benefits and $6 million for administration.

According to the State, as of January 1, 1979, they will have to begin converting SSI recipients from the demonstration project system to the regular food stamp eligibility determination and distribution procedures. SSI recipients will then have to make application for stamps at the local welfare offices and pick up the stamps at designated locations. After conversion to the regular food stamp system, the State estimates that the participation rate will drop to 42 percent and, on an annual basis, $25 million will be paid in food stamp benefits with administrative costs increasing to approximately $75 million. Of the total cost of $100 million, the Federal Government will pay all of the costs of the benefits and one-half of the administrative costs, with the State paying the other half.

The objective of the bill I am introducing today, which amends section 8(d) of Public Law 93-233, is to provide SSI recipients in California who would be eligible for food stamps an amount in cash equivalent to the value of their food stamp entitlement, and to do so in a manner that minimizes administrative procedures and costs. Under this legislation, if requested by the State of California, the Secretary of Health, Education, and Welfare would make an additional monthly cash payment of $10 (the minimum food stamp allotment for an eligible one person household) to noninstitutionalized, single SSI recipients. This additional payment would be included in or with the individual's SSI check. Eligible SSI individuals would receive this cash payment in place of food stamps.

The amendment would allow California to resume "cash-out" status beginning with the first month in which the additional payments in lieu of food stamps provided under this bill are actually made by the Secretary of HEW. These additional payments would end with the first month California comes back into compliance with the two conditions contained in Public Law 94-379. Thus if California should resume including cost-of-living increases in its supplementary payments, including amounts necessary to reflect all increases in the cost of living which have occurred since June 1976, the special $10 payments would cease and the State could continue its "cash-out" status under the provisions of current law. The amendment also specifies that the requirements of paragraph (2) of section 8(d) will be considered to have been met when California does make the required cost-of-living increases. This language is necessary to make clear that, when California does resume making annual cost-of-living increases in its State supplementary payment as required under Public Law

94–379, the State will be considered to have satisfied the requirement of paragraph (2) of section 8(d) that such increases have been paid for all months since June 1976.

Under the proposed legislation, non-institutionalized, single SSI recipients in the State would receive the monthly $10 additional cash payment in lieu of food stamps. It is estimated that the total annual cost under this bill, benefits plus administration, will be approximately $60 million; or about the same as under the food stamp demonstration project system scheduled to begin on September 1, 1978. Benefit costs will be somewhat higher but administrative costs should be less. It should be noted, however, that this is $40 million less than the total estimated cost (benefits plus administration) after conversion to the regular food stamp program. Under the regular food stamp program, the State estimates that it will cost about $75 million to administer $25 million worth of food stamps, and the total yearly cost to the Federal Government will exceed $60 million. Under this legislation, approximately $60 million in benefits will be provided to needy aged, blind and disabled individuals with negligible administrative costs. In other words, twice as many individuals will receive benefits under this bill at essentially the same cost to the Federal Government.●

A BASIC GUIDELINE FOR FREEDOM: THE ANNUAL CAPTIVE NATIONS WEEK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. FLOOD) is recognized for 5 minutes.

● Mr. FLOOD. Mr. Speaker, in one of the numerous rallies about the country the 1978 Captive Nations Week was aptly described as a basic guideline for freedom. This is a concise but exquisite expression of this annual national observance. And how fundamentally true in thought and essence it is. Since World War II, for instances, we have encountered the Korea crisis, the Cuba one, the Vietnam war and now face an indirect confrontation in both Africa and the Mideast. These are all fluctuations about the norm of Soviet Russian imperialist aggression, resulting at times and with bitter cost in lives and treasure, not to mention our national prestige and leadership. But none of these sets a guideline in total perspective for freedom as does the annual Captive Nations Week, along with the congressional resolution and the main indicator, the CNL—the Captive Nations List.

For further examples of the scope and intensity of the 20th observance, I submit in my report the following: First, the statement by Governor Pierre S. DuPont of Delaware and the proclamation by Mayor John Seymour of the city of Anaheim; second, a report in the July 12 Oakland Tribune; third, "Human rights held focus of Captive Nations Week" in the July 15 AFL–CIO News; fourth, the declaration of the 1978 Captive Nations Week rally of the Republic of China; and fifth, "Captive Lands Remembered" in the July 19 Newark Star Ledger:

STATEMENT BY GOVERNOR PIERRE S. DU PONT IN OBSERVANCE OF CAPTIVE NATIONS WEEK

Whereas, the imperialistic politics of Russian Communists have led, through direct and indirect aggression, to the subjugation and enslavement of the peoples of Poland, Hungary, Lithuania, Ukraine, Czecho-Slovakia, Latvia, Estonia, Byelorussia, Romania, East Germany, Bulgaria, Mainland China, Armenia, Azerbaijan, Georgia, North Korea, Albania, Idel-Ural, Serbia, Croatia, Slovenia, Tibet, Cossackia, Turkestan, North Vietnam, Cuba, Cambodia, South Vietnam, Laos and others; and

Whereas, the desire for liberty and independence by the overwhelming majority of peoples in these conquered nations constitutes a powerful deterrent to any ambitions of Ccmmunist leaders to initiate a major war; and

Whereas, the freedom loving peoples of the captive nations look to the United States as the citadel of human freedom and human rights and to the people of the United States as the leaders in bringing about their freedom and independence; and

Whereas, the Congress of the United States by unanimous vote passed Public Law 86–90 establishing the third week in July each year as Captive Nations Week and inviting the people of the United States to observe such week with appropriate prayer, ceremonies and activities; expressing their sympathy with and support for the just aspirations of the captive nations:

Now, therefore, I, Pierre S. du Pont, Governor of the State of Delaware, do hereby proclaim the week of July 16–22, 1978, as Captive Nations Week in Delaware, and call upon our citizens to join with others in observing this week by offering prayers and dedicating their efforts for the peaceful liberation of oppressed and subjugated peoples all over the world.

PIERRE S. DU PONT,
Governor.

A PROCLAMATION

Whereas, the imperialistic politics of Russian Communists have led, through direct and indirect aggression, to the subjugation and enslavement of the peoples of Poland, Hungary, Lithuania, Ukraine, Czecholovakia, Latvia, Estonia, Byelorussia, Romania, East Germany, Bulgaria, Mainland China, Armenia, Azerbaijan, Georgia, North Korea, Albania, Idel-Ural, Serbia, Croatia, Slovenia, Tibet, Cossackia, Turkestan, North Vietnam, Cuba, Cambodia, South Vietnam, Laos and others; and

Whereas, the desire for liberty and independence by the overwhelming majority of peoples in these conquered nations constitutes a powerful deterrent to any ambitions of Communist leaders to initiate a major war; and

Whereas, the freedom loving peoples of the captive nations look to the United States as a citadel of human freedom and human rights and to the people of the United States as the leaders in bringing about their freedom and independence; and

Whereas, thousands of Americans have lost their lives fighting Communist aggression in Vietnam and the world over;

Now be it therefore proclaimed by the Anaheim City Council that the period which began July 16, 1978, extending to July 31, 1978, be designated as "Captive Nations Weeks in Anaheim" and further calls upon the citizens of our community to join with the Congress of the United States and others in observing this period by offering prayers and dedicating efforts for the peaceful liberation of the oppressed and subjugated peoples all over the world.

CAPTIVE NATIONS WEEK

WASHINGTON.—President Carter yesterday set aside the week beginning Sunday as Captive Nations Week and invited Americans to renew their dedication "to the cause of all people who seek freedom, independence and basic human rights."

HUMAN RIGHTS HELD FOCUS OF CAPTIVE NATIONS WEEK

Nations and people of the Free World must redouble their efforts on behalf of individuals who are denied their basic freedoms and liberties, AFL–CIO President George Meany said in a statement marking observance of Captive Nations Week, July 16–20.

Meany noted that the American labor movement has consistently supported the struggle for human rights and that it applauds groups that speak out on behalf of the oppressed.

"We must not permit political or economic expediency to dull our words," he stressed. "Those individuals actively involved in this struggle look to us for support and assistance. They must be continually assued that their trust is not misplaced."

In proclaiming the Captive Nations Week observance, President Carter urged Americans to renew their dedication "to the cause of all people who seek freedom, independence and basic human rights."

Meany also noted that a statement adopted at the AFL–CIO convention last year expressed concern that "abuses and threats to basic human rights are the most searching issues that divide the world today, and the clearest tests of American ideals and resolve. Where these issues are concerned—whether in Southern Africa, Chile, Uganda or the Soviet Union—there are no longer any purely internal affairs."

DECLARATION—1978 CAPTIVE NATIONS WEEK RALLY OF THE REPUBLIC OF CHINA

To provide further assistance to the Iron Curtain peoples' struggle for freedom, we the people from the Republic of China's various circles have gathered for a Captive Nations Week Rally in Taipei on this 21st day of July 1978 together with freedom-fighter leaders and anti-Communist youth representatives from the Americas, Europe, Africa, the Middle East and various other Asian countries.

The assembly is aware that the world situation today still is fundamentally a bi-polar confrontation between freedom forces and those bent on perpetuating Communism. The unceasing expansionist race of international Communists in Asia and Africa and their fanatic instigation of wars and disturbances have shattered free nations' wishful hopes to coexist with them. Their unchanged scheme of world communization and human enslavement has been thoroughly exposed.

The assembly also is aware that international politics cannot contradict man's basic need of survival, that free peoples' demands for protection of human rights and freedom are now tied closely with the Iron Curtain peoples' steps to end slavery and win liberty, and that the tide of will power thus forged is steering politics in the direction of justice, righteousness and morality. No politician can resist or turn this trend.

The assembly furthermore is aware that because of the excessive fear of nuclear holocaust, certain free nations still are vainly seeking power equilibrium, ready to settle with even the most precarious of peace, and mistakenly attempting to pit Peking against Moscow. This strategic deviation is being positively used by the international Communists as a gap for nuclear blackmail and attempts to isolate individual free nations, employ secondary enemies as proxies against primary targets, then one after another defeat all those who stand against Communism.

The assembly moreover is aware that the

Republic of China not only is a model of free world anti-Communism by dint of her staunch stand for freedom and democracy as well as unflinching struggle but more importantly also is functioning as an effective shield and stabilizing force in crisis-ridden Asia. The ROC has long been the hope of all Chinse and a major guardian of Asian-Pacific security.

Basing our reasoning on the above-mentioned developments, we the rally participants hereby reiterate the oft-stated fact that the destiny of mankind has closely to do with the future of the 800 million Chinese mainland people and that the ROC security and the entire free world security are inseparably interdependent. Furthermore, this Captive Nations Week Rally declares the following and solemnly urges commensurate steps by all:

First, the Chinese traditionally have been a freedom-loving, justice-respecting people, and the Republic of China is strongly anti-Communist. China's 5,000-year-old outstanding cultural tradition is the weapon the Chinese through the centuries have used for emerging victorious from ordeals under tyrants. The Chinese now face destruction by an ever more intense brute force, but we are confident that the destiny of China is firmly in the Chinese grasp and that righteous joint endeavor will give full play to our cultural strength for the overpowering of Communists. The mainland will be recovered and our compatriots restored to freedom and human rights. Our political system based on the Three Principles of the People will enable all the people of our nation to enjoy liberty, democracy, prosperity and well-being.

Second, the Republic of China's national reconstruction bases—the islands of Taiwan, Penghu, Kinmen and Matsu—are controlling important anti-Communist strategic points in the Western Pacific, blocking eastward Chinese Communist expansion by sea or air, and harnessing Peiping's aggressive moves against Southeast Asia. Ours are democratic open political and social systems. Our economic construction has been well in progress for growing prosperity. We furthermore possess strong defense capabilities and unity of mind for anti-Communism. Never shall we permit infiltration and sabotage by Communist elements, nor shall we ever allow any international force to harm our national position, right or interest. Persisting in our confidence and determination, we will continue to support our government, unite forces for freedom and democracy, carry out epochal mission to safeguard the freedom and security of all Asians, and deal fatal blows to our common enemy.

Third, the United States as a Pacific nation cannot dodge her historic responsibility to maintain Asian-Pacific common security as she strives to bring lasting freedom and human rights to all mankind. President Carter's human rights campaign, moral principles and open diplomacy are the most powerful calls America has issued on the stage of international affairs in the present decade. As such, their values and standards should never be damaged or lowered, not by Americans above all. We therefore earnestly urge the U.S. Government to face the stark fact that the international Communists, bent on world communization, still treat and will keep on regarding America as their major enemy and that therefore absolutely no "common interest" exists between the U.S. and any Communist regime. For the protection of her own benefit and security and for the boosting of the morale of all those who are striving to free themselves from bondage, America has to cast aside any illusory hope that Peiping may be won over for the checking of Moscow, stop moving towards "normalization of relations" with the Chinese Communists, start vigorous leading of free nations, and with a renewed dedication actively assist seekers of freedom, independence and fundamental human rights.

Fourth, the security of Asia, Africa and Latin America is in a state of emergency. Long a source of Latin American turmoil, Cuba under the direction of Russians has grown as an aggressor against Africa and a force of threat to Middle East peace. Because of the multifront expansionist attempts of the North Korean, Vietnamese, Cambodian and Loatian Communists, not to mention the Chinese Communist moves, Asia's free nations are under heavy Red menace of war. We therefore urgently ask that a consolidated security system be formed by the free nations of Northeast Asia and Southeast Asia so that the region can be saved from wholesale communization. We furthermore call upon the free nations of Africa, Latin America and the Middle East to reject Communist economic baits, foil Red tactics of alienation, stand together on a clearly-drawn anti-Communist front line, and jointly exert themselves to keep their independence and freedom intact.

Fifth, Japan as the center of viable Asian-Pacific economy and as a country under America's nuclear umbrella has the solemn duty to combat Communism. Our expectation is ardent that the Japanese Government, acting in the name of justice, will resolutely suspend its negotiation with the Chinese Communists about a so-called "treaty of peace and amity." Japan furthermore should strengthen her cooperation with the Republic of China and the Republic of Korea for stronger common defense, for effective checking of the Communist race for expansion and hegemony in Asia and the Pacific, and for an early return to freedom of all captive Asians.

Sixth, our call to the masses of enslaved people in North Korea, Indochina, Communist-ruled African countries, Cuba, the USSR and East European states is that, in view of the steady decline of Communism and the aggravating split and withering of Red Forces, all should rise in unity for the ignition of a huge anti-Communist torch behind the Iron Curtain and for the puncturing of the Communist stronghold from within. When their strength is combined with that of all those outside who similarly stand for freedom, a decisive end will be put to Communist rule everywhere.

Seventh, even more strongly we now urge our 800 million compatriots on the Chinese mainland—military personnel, party cadres, gallant youthful anti-Communist fighters and all the others behind the enemy line—to see clearly that collective resistance wherever they are is a sure short cut to destruction of tyranny and assurance of freedom. Now that the regime is split into pieces as a result of its endless cycle of power struggle, the time is ripe for an all-out anti-Communist revolution to pull down tyranny and gain a sweeping victory.

Be it known to all those who are strongly for human rights and freedom, those of the younger generation in particular, that the will power of mankind to gain liberty and remain free has now been brought to a climax and that Communist rampancy is quickly going through its final stage. Without distinction of race, nationality, region or religion, let us unite as one and fight on shoulder to shoulder until Communism gets defeated and replaced by lasting freedom and human rights for all.

CAPTIVE LANDS REMEMBERED

DEAR EDITOR: In this 20th observance of "Captive Nations Week," enacted into law as the third week in July and signed by President Dwight D. Eisenhower, the world is again reminded to cherish the freedoms which are its inalienable right, and to note with apprehension the loss of the basic freedoms of speech, assembly and religion in oppressive dictatorships.

In totalitarian regimes, service to the state is primary, thus relegating individual freedoms meaningless; voting is a farce where only one candidate appears on the ballot, and "kangaroo court" trials of dissidents render justice insensately.

At present, there are over 30 captive nations, mostly under the domination of the Soviet Union, with the list still growing. Among them is the Ukraine, with people such as Valentyn Moroz, Mykola Rudenko and Oleska Tykhy, daring to demand self-determination for the Ukraine and freedom for people of all nations.

As the struggle for human rights moves forward, an increasing awareness of personal and cultural identity is emerging as people are displaying a renewed interest in their national roots. Observing "Captive Nations Week" serves to lay bare the Soviet version of the Promised Land as a fraud, and warns the world to counter oppressive tactics by standing up for basic human freedoms.

MICHAEL CIAPKA,
Irvington.●

ANNOUNCEMENT OF HEARINGS ON GROUP LIFE INSURANCE FOR PUBLIC SAFETY OFFICERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. EILBERG) is recognized for 5 minutes.

● Mr. EILBERG. Mr. Speaker, I wish to announce that the Subcommittee on Immigration, Citizenship, and International Law of the Committee on the Judiciary will begin public hearings Wednesday, August 16, on H.R. 6845, a bill which I have introduced to provide group life insurance for public safety officers.

The hearing will be held in room 2226, Rayburn House Office Building, and will commence at 9:30 a.m.

Testimony will be received from the Department of Justice, various police unions, and representatives from the life insurance industry. Members of Congress interested in testifying at such hearing, please address their request to my Subcommittee on Immigration, Citizenship, and International Law, Rayburn House Office Building 2137, or call my subcommittee staff at 225–5727.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. OTTINGER) is recognized for 5 minutes.

● Mr. OTTINGER. Mr. Speaker, on rollcall 661 and 662 yesterday, both amendments to cut defense appropriations, I was absent because the Speaker had announced that the House was going out of session at 8 p.m., both votes were taken after that hour and I had left in reliance on the Speaker's announcement. Had I been present, I would have voted, "aye", on both amendments.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. DRINAN) is recognized for 5 minutes.

● Mr. DRINAN. Mr. Speaker, yesterday I was unable to be in the Chamber of the House of Representatives during two recorded votes.

Had I been present, I would have voted "aye" on rollcall No. 661, the Mitchell amendment in the nature of a substitute to reduce the Department of Defense appropriation by 1 percent. I also would have voted "aye" on rollcall No. 662, the Harkin amendment to reduce the Defense appropriation by 2 percent.●

"AN ARREST IN MOSCOW: WHAT'S AT STAKE FOR U.S. BUSINESS"

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ROSTENKOWSKI) is recognized for 10 minutes.

● Mr. ROSTENKOWSKI. Mr. Speaker, on Monday, in a speech on the House floor, I expressed my concern with the pending swap involving the two Soviet espionage agents now facing trial in the United States, for the imprisoned Soviet dissident Anatoly Shcharansky. I urged the administration to continue to give first priority to obtaining the release of Mr. F. Jay Crawford who is, after all, an American citizen.

In this morning's Washington Post, I read an excellent article by Mr. Barrett Prettyman, Jr., entitled "An Arrest in Moscow . . ." Mr. Prettyman is a noted Washington attorney who recently returned from a six-nation factfinding trip that took him to the Soviet Union. Together with six of his colleagues, he was able to arrange a private meeting with Mr. Crawford that lasted over 4 hours.

After reading his article, my concerns have intensified. This morning, a member of my staff was in direct contact with Mr. Prettyman, who informs us that despite Crawford's usual optimism, he has expressed a deep concern over the outcome of his trial. Feeling "lost and left out," he asked Prettyman to do what he could to draw attention back to his case, which he feels has been eclipsed by the recent international coverage of the Shcharansky case and the trial of the two American newsmen.

Mr. Prettyman then related an episode that seems to shed more light on the situation. He revealed that the top trial lawyers in the Soviet Union were completely unaware of the Crawford case. When asked to comment on a hypothetical in which a man is dragged from his car, the attorneys responded that it would be a clear case of "hooliganism" under Soviet law. Asked if this would still be the case if the KGB was involved in pulling the man out—a clear reference to what occurred to Crawford in June—they responded affirmatively. Had they been aware of the case, they would probably have had a different answer. The fact that these lawyers were in the dark indicates that the Soviets do not intend to prosecute the case in the normal manner, and points to the high-level involvement of the Soviet Government.

Frankly, Mr. Speaker, I think Crawford has good reason to feel "lost and left out": he continues to be a pawn in a larger case involving the two Soviet espionage agents who are now in American custody. Crawford's trial date has now reportedly been set for September, coinciding with the time the two Soviets face spy charges in New Jersey. The connection is inescapable.

Mr. Speaker, I believe that more can be done to bring this case to a speedy resolution. I enclose a copy of the Prettyman article for the RECORD.

[From the Washington Post, Aug. 9, 1978]

AN ARREST IN MOSCOW: WHAT'S AT STAKE FOR U.S. BUSINESS

(By E. Barrett Prettyman Jr.)

American business either is insufficiently aware of a series of events now taking place in Moscow, or does not understand the implications of those events for all persons seeking to do business with the Soviet Union. I refer to the arrest, continued interrogation and probable trial of Francis ("Jay") Crawford, the American senior manager for the Soviet Union of International Harvester Export Company.

On June 12, a number of plainclothes members of the KGB forcibly dragged Crawford from his car in downtown Moscow, gashing his head and bruising his arms and legs in the process. Thereafter, they held him for an initial period of 15 days for questioning. His fiancée, the secretary to an American embassy official, was with him at the time of his arrest, and she, too, was manhandled and hurt, although she was allowed to drive off after Crawford was placed under KGB control.

During a just-completed trip to six cities in Europe to study economic policies and international antitrust problems, a contingent of seven out of 32 American attorneys made a side trip one evening to meet secretly for almost four hours with Crawford, who by then had been placed under the restricted custody of our ambassador, at the apartment of a U.S. official. Crawford was forthright and even vigorous in defense of all his actions and adamant about his innocence.

Immediately after his arrest, he said, he asked to call the American embassy. His request was denied. The Russians notified our embassy the day after his arrest, and an embassy official was allowed to visit him briefly, but the two were not permitted to speak alone.

The single possible charge against Crawford mentioned to him at the outset of his interrogation related to alleged customs or smuggling violations. No details were given to him. Although Crawford is prohibited by the terms of his release from discussing precisely what was done to him while in custody, it was obvious from his recitation that during the next five days, various types of psychological stresses—the "good guy, bad guy" approach in particular—were used against him, and he was forced to trace in detail all aspects of his life while working for International Harvester in the Soviet Union.

Among other things, he told the KGB how, some two years before, the curtains in his office were discovered to be of unequal length, and he sought out a seamstress to correct the problem. He was introduced to a Russian seamstress and her husband, and the wife performed the necessary cutting and weaving, at the same time refusing to take any money for her work.

Over the succeeding two years, Crawford saw the same couple on a number of occasions, including social ones. The seamstress performed various small sewing tasks for him, each time refusing payment, and he in turn gave the couple several small gifts, none of any substantial value, in return for the couple's friendship and generosity.

At the end of five days of interrogation and his recitation of those facts among many others, the case took a dramatic turn. Crawford was confronted with a sworn statement from the seamstress. A few days later, he was shown a second statement, from her husband. The statements alleged that Crawford had given the couple 8,500 American dollars in exchange for from 20,000 to 24,000 Soviet rubles. As a result of those statements, the possible charges against Crawford were changed from those relating to customs to alleged currency violations.

Crawford strongly ridiculed the charges to our group, claiming that they were absurd on their face. Anyone even vaguely familiar with the Soviet black market knows that Crawford, if he had been interested in profiteering, could have obtained a much better exchange rate from any cab driver or from any of the hordes of black marketeers who roam the streets of Moscow. Moreover, all of his finances were so carefully monitored by his employer and the company's accountants that such trading would have been impossible.

Crawford said that after he had initialed pages summarizing his five-day interrogation—no verbatim transcript was made or at least shown to him—all questions about currency violations ceased, and he was thereafter asked solely about such matters as the makeup, layout and operation of the American embassy. Ten more days were spent in that type of ordeal.

In response to a question from me, Crawford said the first thought that went through his mind when he was arrested was that he was being taken as a hostage for the two Soviet government employees who had been arrested in Newark, N.J., for allegedly seeking to buy intelligence information. Crawford feels that he will be found guilty if they are, despite his innocence. His trial has been set for September to coincide with the New Jersey proceedings. If convicted, he faces eight years of hard labor and three years of exile. In the meantime, he continues to be questioned on an intermittent basis for many hours at a time by the KGB.

This small, portly, unimposing man, whom all American officials in Moscow described to us as the least likely person to commit any type of criminal offense, asks in wonder why he should become a pawn in international politics, why his life should be ruined as a result of events thousands of miles away and having nothing to do with him. These are, of course, personal and highly understandable concerns.

But there are other aspects of the case that are less understandable. An informal poll by the Associated Press of 25 firms doing business in Moscow following a plea for support by International Harvester's president resulted in only five direct expressions of such support. Three firms expressed no interest, seven were noncommittal and the remaining seven refused all comment. No discernible reaction has come from business in the United States outside of International Harvester itself.

That, I submit, reflects either a dangerous lack of knowledge of the affair or a total failure to recognize what is at stake for every American who is conducting business with the Soviet Union, or who is contemplating the possibility of doing so.

It is clear from the Crawford case and similar incidents that incriminating statements against American citizens can easily be obtained by the KGB from Russians who themselves fear for their lives. Moreover, Soviet currency laws are so complicated that technical violations can be conjured up virtually at will.

But it is also clear that Russians respect and react to a show of force and to group pressure. If American business made it unmistakably clear that it would not stand for the kind of treatment being accorded Crawford, even if such a stand meant a slowdown or cessation of Soviet-American

business transactions, such incidents would be far less likely to occur. But if it is to be "business as usual," as the Russians made clear to us they fully expect it to be, then these incidents will escalate, and the personal safety of all Americans who find themselves in the Soviet Union for whatever purposes will increasingly be jeopardized.

Jay Crawford's case should make it clear that anyone can become an unwitting and unwilling pawn in the Soviet-American political chess game, even if he does nothing but go about his daily business. Only a show of absolute abhorrence for brutal arrests, extended and secret interrogations, and manufactured charges will have any effect on the Russians in the future.

Our group of 32 did its part. We spoke out with vigor at each of our limited opportunities. But we felt very much alone.●

CONGRESSIONAL INTERPRETATION OF STATE "SUPER-MAJORITY" LAWS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 15 minutes.

● Mr. LAFALCE. Mr. Speaker, today I have introduced House Joint Resolution 1110 which, if enacted by both Houses, would establish fundamental congressional policy with respect to the ratification of pending and future amendments to the U.S. Constitution. Article V of the Constitution prescribes for the Congress a prominent role in the formulation of amendments as well as the determination of the mode of ratification to be followed by the States. My resolution represents an attempt to assert our constitutional role, and express congressional intent with respect to the requisite majority within an individual State legislature necessary to secure that State's ratification.

Specifically, the resolution provides that a simple majority affirmative vote of each house of a legislature is sufficient to constitute ratification of a proposed constitutional amendment. The Congress has never adopted an official position on this critical procedural issue, and in the absence of congressional guidance or directives in the past, a number of States have implemented laws which require their respective legislatures to accept Federal constitutional amendments by greater than a simple majority to effectuate ratification.

At the present time, seven States require a "super-majority" of the legislature to ratify. Arkansas, Colorado, Georgia, Idaho, and Kansas require a two-thirds vote of each House; Illinois requires three-fifths in each House; and Alabama requires a three-fifths vote in the lower chamber.

There is convincing evidence that the framers of the Constitution assumed that State legislatures would act by majority vote in considering ratification. Patrick Henry lamented that a "bare majority" in a few small States might hinder the adoption of amendments, and nowhere in the Convention debates is a "super-majority" contemplated. It is likely that the framers never addressed the issue because they assumed that simple majorities in the several State legislatures would be the accepted legislative practice.

It is also readily understandable why the issue has remained dormant for so many years. Never has the presence of extraordinary majority rules interfered with previous amendments to the Constitution—until now. Illinois' three-fifths majority requirement has been the only perceived impediment to ratification of the equal rights amendment by that State's legislature to date. In fact, were the resolution I have today submitted enacted tomorrow, we would be 2 States and not 3 short of the 38 necessary for final ratification of the Equal Rights Amendment.

Any constitutional amendment must be approved by three-fourths of the States, and there is no doubt that the framers had every intention of making the amending process a difficult one which would assure a true national consensus when completed. But States should not be granted the capacity to set up additional roadblocks to the ratification of amendments—it is a tortuous enough route under the article V requirements alone. State "super-majority" requirements are just that—unnecessary, undesirable, and unfair roadblocks to a uniquely national amendment process. As the Supreme Court stated in *Leser* v. *Ferguson* (1921), "The function of a State legislature in ratifying a proposed amendment to the Federal Constitution, like the function of Congress in proposing the amendment, is a Federal function derived from the Federal Constitution; and it transcends any limitations sought to be imposed by the people of a State."

I requested the American Law Division of the Library of Congress to analyze the full scope of congressional authority to interpret the ratification votes taken in individual State legislatures, and to prescribe ratification procedures in the legislatures that may differ from existing State practices. At this point, I would like to insert the Library of Congress memorandum, which concludes that Congress does have the constitutionally derived authority to dictate the mode of ratification to be employed by State legislatures.

LIBRARY OF CONGRESS, AMERICAN LAW DIVISION

CONGRESS AUTHORITY TO DETERMINE WHEN AN AMENDMENT TO THE U.S. CONSTITUTION IS RATIFIED

Our examination of the relevant case law in the area has led us to conclude that in view of the "political question" doctrine as formulated in *Coleman* v. *Miller*, 307 U.S. 433 (1939), and applied in subsequent cases by the Supreme Court, Congress would have the authority to determine in an individual case that a majority vote in a single state will suffice for ratification purposes, notwithstanding contrary provisions in the state legislature's rules of procedure. *Baker* v. *Carr*, 369 U.S. 186 (1962); *Powell* v. *McCormack*, 395 U.S. 486 (1969); and *Gilligan* v. *Morgan*, 413 U.S. 1 (1973).[1]

Several questions were presented to the Court in *Coleman* including whether the Lieutenant Governor of a State, as presiding officer of its Senate, could break a tie on a federal constitutional amendment; what length or lapse of time could cause a pending constitutional amendment to lose its vitality; and whether a legislature having once rejected a proposed amendment could thereafter vote to ratify it. The eight Justices on the Court split evenly with respect to whether the Lieutenant Governor's tie-breaker presented a judicial question for the Court to decide or a political question for Congress to decide. But six of the eight were in agreement that the other questions were political and that Congress' discretion to decide the issues was final and unreviewable by the courts. It would appear that Congress' decision to accept a State's ratification of a proposed amendment to the U.S. Constitution based upon its passage by a majority vote in face of its legislature's own extraordinary majority procedural rules, e.g. Illinois, is a political question and not a judicial one. There is no court precedent holding to that effect; however, it does appear that Congress as the body with the responsibility for proposing constitutional amendments is charged with the responsibility for determining the resolution of questions arising in the course of the process. Furthermore, if there are political considerations involved in the issue, then under the political question doctrine, Congress is charged with the responsibility of acting. In this instance once Congress decided to accept the state's majority vote as adequate for ratification purposes and expressed this decision in the form of a resolution such action would be unreviewable by the courts. Congress, of course, may not act outside the Constitution.

In addition to the political question doctrine upon which Congress' authority to act in this situation woud probably be derived, there is also the historical precedent of the 39th Congress' determination that the Fourteenth Amendment was duly ratified by the necessary three-fourths of the States. When the 39th Congress was confronted with the issue of determining whether the requisite three-fourths of the States had ratified the Fourteenth Amendment so that it could be deemed duly adopted, the Congress simply acted by adopting a concurrent resolution expressing that there was in fact the necessary three-fourths. U.S. Statutes-At-Large, Vol. 15, Part 2, Appendix, at 709–710. While the example of the Fourteenth Amendment is not entirely identical to the situation of Congress determining in an individual case that a majority vote in a single state is sufficient for ratification purposes, notwithstanding contrary provisions in the state legislature's rules of procedure, it is similar enough that it can be cited as persuasive precedent. Both situations are similar in the sense that they relate to Congress' considering a problem regarding a proposed constitutional amendment but not relating at all to the actual content of the amendments. In each instance, Congress is reviewing the validity of a state's action and determining whether in fact its legislature has ratified. In the case of the Fourteenth Amendment, Congress decided that the rescissions of Ohio and New Jersey were invalid, and it did this by simply including these two States in the list of all the other States which had ratified the amendment without having rescinded and announced that three-fourths of the States had approved the Fourteenth Amendment and it was part of the U.S. Constitution. This action by Congress was final and unreviewable by the courts.

[1] In *Dyer* v. *Blair*, 390 F. Supp. 1291, 1299–1303 (D.C.N.D. Ill. 1975) (three-judge court), then-Judge Stevens concluded that not all such issues are political questions and proceeded to adjudicate the validity of a legislative requirement of an extraordinary majority to ratify. His rationale was, however, that unlike those matters treated in *Coleman*, the question at issue was not one previously considered and decided by Congress. In the situation posed by the issue addressed in this memorandum, as part of its Article V power to determine when an amendment has been ratified, Congress will be "speaking," i.e. making a determination as to what type of vote by a state legislature is adequate for ratification.

With respect to the situation where Congress would decide to accept a majority vote in a single state as adequate for ratification even though the state legislature's rules required a supermajority for approval, Congress could pass a concurrent resolution by majority vote indicating that the action in the state legislative body was sufficient. Unlike the instance of the Fourteenth Amendment, Congress in the situation presented in this memorandum would be acting prematurely, i.e. the question whether a proposed amendment to the U.S. Constitution has been adopted is determined at the time that three-fourths of the States (38) have ratified. Of course, questions of "ripeness" and "justiciability" are terms that are crucial to the courts. A court cannot rule on a matter until the issue is "ripe" or when there is clearly a "justiciable controversy" because a court cannot render an advisory opinion. Congress, the political branch, is different and not governed by these rules. It can express its intent at any time by passing a resolution. However, it should be kept in mind that the actions of one Congress cannot bind a future Congress. Therefore, it is conceivable that a subsequent Congress, when actually confronted with deciding whether three-fourths of the States have in fact ratified a proposed constitutional amendment, could decide *not* to accept a majority vote in a single state as sufficient for ratification purposes in the fact of a contrary provision for a supermajority in the state legislature's rules of procedure.

The full text of H.J. Res. 1110 follows:

H.J. RES. 1110

Joint resolution making the congressional determination that a simple majority of each body of a State legislature is sufficient for the purposes of proposed constitutional amendments for which the mode of ratification is by State legislatures

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress determines that, notwithstanding any provision of the constitution or laws of a State to the contrary, a simple majority affirmative vote of each body of the legislature of a State is sufficient to constitute ratification of a proposed amendment to the Constitution of the United States for which the mode of ratification proposed under article V of the Constitution of the United States is by the legislatures of three-fourths of the several States.

Sec. 2. This joint resolution applies to all votes in a body of a legislature of a State on the question of ratification of any proposed amendment to the Constitution of the United States pending on or after the date of the adoption of this resolution.

The language in the resolution calling for "a simple majority affirmative vote" is intended as a Federal requirement that still permits some flexibility on the part of a State legislature to determine whether it will require a simple majority vote on the part of those legislators present and voting; or 50 percent plus one of all elected legislators; or a majority of legislators when a quorum is present. Any one of those alternative "simple majorities" would satisfy the requirement contained in the resolution.

The resolution takes no position whatever on the alternative ratification route expressed in article V—that of ratification by conventions in three-fourths of the States. Finally, the resolution pertains to presently pending and future proposed amendments to the Constitution. The term "pending" is intended to refer exclusively to the equal rights amendment, and does not embrace the three amendments proposed in the late 1700's or the child labor amendment of this century, all of which were proposed without limits on the time required for passage, but which are no longer "ripe" for ratification.

In conclusion, Mr. Speaker, I urge my colleagues to give this measure their full attention and support so that Congress may perform its vital constitutional role in establishing modes of ratification that do not exalt a minority over a majority in any State legislature. Amending the Federal Constitution is too critical a Federal process to permit any State to erect substantial legislative roadblocks to hamper passage.

THE PROMISE OF MHD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Montana (Mr. BAUCUS) is recognized for 5 minutes.

● Mr. BAUCUS. Mr. Speaker, magnetohydrodynamics (MHD) is rapidly emerging as the most promising technology for generating electricity from coal cleanly, efficiently, and economically.

As Congressman from the western District of Montana, which includes Butte, where a major MHD test facility is being constructed by the U.S. Department of Energy (DOE), I think the benefits of this exciting technology should receive wider attention. I would like to recommend to my colleagues an excellent article by Peter Britton that appeared in the August issue of Popular Science:

MHD GENERATORS—MORE KILOWATTS FROM A TON OF COAL

(By Peter Britton)

EVERETT, MASS.—Dr. Arthur Kantrowitz peered through his office-window drapes at white smoke billowing from a distant shed. "Yup. She's still going strong. Want to take a look?" he asked.

I did indeed. "She" was Avco Everett Research Laboratory's off-again/on-again magnetohydrodynamic (MHD) generator, now halfway through an important 250-hour test run. A short time later we were nearing the device, which was cordoned off to protect workers from high-voltage electricity. I heard a loud humming sound.

The generator, about the size of a large automobile, bristled with tubes, wires, pipes; near its middle was the hump of a large water-cooled magnet.

There was little to suggest the enormous potential of this advanced energy source. Yet its backers are convinced that the technology it represents could be critically important in years to come.

"This machine," said Dr. Kantrowitz, feisty Avco chairman and longtime MHD advocate, "could be a key element in the country's energy program in just a few years—if industry could get the half-billion dollars it needs to develop a pilot plant. But the government's too damn timid to take that vital step. We're way behind schedule in this and other energy matters."

MHD backers think the technology is vital because it offers important advantages. It promises to wring up to 50 percent more kilowatts from each ton of coal, barrel of oil, or cubic foot of gas used to generate electricity. Even using high-sulfur coal, it could still meet stringent EPA antipollution requirements.

With advantages such as these, why isn't MHD now at work producing power? Because the technology also involves a number of ferocious problems. Since Popular Science last reported on MHD (Mar. 1978), there's been much research aimed at solving these problems. And, as I learned in recent visits to some of the country's leading research centers, considerable progress has been made in a number of critical areas.

NO MOVING PARTS

MHD generation is as simple in principle as it is difficult in execution. To generate electricity, move a conductor through a magnetic field. In a conventional generator, the conductor is a coil of copper wire. In an MHD machine, it is a stream of fast-moving plasma—gas that has been heated to the point where its electrons have been stripped from the atoms. As this conducting gas moves through the magnetic field, positive ions and free electrons separate. These charged particles are trapped by electrodes along opposite sides of the channel through which the gas moves, and direct current flows.

This simple process has certain attractive features. First, it eliminates moving parts, which makes the generator simpler and more trouble-free—at least in principle. Second, it is inherently far more efficient than the process currently used to generate electricity. Present conventional power plants go through a clumsy, complex process: First, fuel (coal, oil, gas, or other) is burned to create heat. The heat boils water and makes steam. The steam drives a turbine which is connected to a generator. The generator turns and makes electricity. At each step, some energy is wasted.

A given amount of fuel contains a specific amount of chemical energy. But the laws of physics dictate that the efficiency of a heat cycle that extracts this energy is limited by the temperature differential between the hottest and coolest parts of the cycle. The greater the temperature drop, the higher the efficiency. Modern high-temperature generating plants make superheated steam at around 1000° F, but even at this level the final efficiency of the plant is only about 35 percent.

An MHD generator neatly sidesteps this built-in limitation because it is not a thermal engine at all. It simply heats the gases to make them conductive and to propel them through the magnetic field. Since the system goes directly from moving gas to electricity, its energy efficiency is potentially very high.

Further, after an MHD generator has converted some of the kinetic energy in the moving plasma stream into electricity, the gas is still very hot. So it can now be used to boil water, which can run a conventional generator, and more electricity can be extracted. This two-stage process—MHD plus turbine—can turn 50 or even 60 percent of the potential energy in fuel into electricity rather than 35 percent managed by conventional plants.

But with MHD's advantages comes a package of problems. To ionize the gas, temperatures in the region of 5,000° F must be created. To do that, coal is pulverized and burned in a special combustor. But the ionized gas, while conductive, is not conductive enough for efficient power production. So metal ions of potassium or cesium are added. Then the ionized, seeded gas is blasted at about the speed of sound through a rectangular channel mounted in a magnet field. Several tough engineering problems grow out of the attempt to get the whole process working.

ELECTRODE LIFE

The biggest problem to date has been electrode erosion. The nearly supersonic blast of 5,000-degree plasma can eat away electrodes in a matter of hours. And you can't have a power plant that has to shut down for major repairs every couple of hours. At Avco, I saw how much progress has been made toward the solution of this one.

As we ducked into the control room, Dr. Kantrowitz showed me a circular chart recording the steady 220-kW output of the MHD generator. "This is quite a significant test," he said. "Two hundred and fifty hours. That is approaching the time that begins to arouse the interest of the electric-power utilities."

Near the thick glass panel of the control room, I watched the needles of hundreds of monitors flicker, registering the currents and voltages being recorded simultaneously by a nearby computer. To simulate burning coal, Avco researchers were burning fuel oil injected with fly ash and a potassium-carbonate seed. The test, which was costing about $1000 an hour, achieved much higher interior current density and electric fields than had been found before in equipment operated for such long duration. Most important, the 250-hour test indicated that electrode design was progressing nicely, if slowly.

Avco has developed anodes made of copper with 0.02-inch-thick platinum caps. The cathodes were made of copper with 1/16-inch-thick tungstein-copper caps. Significantly, the electrodes were undamaged after the test.

Projects elsewhere are attacking the electrode-erosion problem in completely different ways. The Avco MHD generator is what engineers call an open-cycle machine. The working fluid is seeded coal gas, and after a single pass through the channel, the hot gases are exhausted. Researchers at the General Electric Space Sciences Laboratory in Valley Forge, Pa., are using quite a different approach. The machine there uses a closed cycle. Argon gas is the working fluid. It is heated, then constantly recycled through the channel in a closed loop. (Closed-cycle plants might ultimately be used with nuclear reactors to increase the efficiency of that process.) This cycle works efficiently at a somewhat lower temperature than the open cycle—about 3000° F as opposed to 5000° F. Also, the gas is less corrosive. The result is that electrode erosion bcomes much less of a problem. (See box, pp. 78–79, for detailed explanation of the operation of the two cycles.)

Dr. Bert Zauderer, who heads the GE program, explained some differences between the systems. "Open-cycle systems present mainly a materials problem," he says. "With a closed-cycle system the problem is more one of economics. The much lower temperature is easier on the electrodes, but the cost of maintaining argon purity creates an engineering problem. In open cycle, I think that the big problems are still going to be in the combuster, the generator, and the radiant boiler seed-recovery system. All in all, however, we're a hell of a lot further along in trying to understand what makes both MHD systems work."

MAGNETIC FIELDS

MHD generators require enormously powerful magnetic fields if they are to be efficient enough to be practical. The Avco generator I saw has the channel mounted in a huge water-cooled magnet. But everyone agrees that commercial-size machines will have to use superconducting magnets. These devices are wound from metals that lose all resistance to electric current when cooled to a temperature near absolute zero. The magnet can generate high magnetic fields with nearly zero power consumption. Such magnets are now being designed and built. General Electric, under a Department of Energy (DOE) and Massachusetts Institute of Technology contract for $7 million, will build a 24-foot-long, 14-foot-high superconducting magnet that can generate the high-density fields needed for MHD.

Last year, a smaller (40-ton) magnet made by Argonne National Laboratory was airlifted to Moscow in an MHD scientific exchange program for experiments with the U–25, a 20-MWMHD generator combined with a 50-MW steam generator. The Russians use natural gas as a fuel.

Research on these and many other aspects involved in the development of MHD is underway in scores of centers around the world, and interest is clearly growing. Among recent significant developments:

The DOE budget for MHD has jumped from $6 million to $72 million in four years. DOE has a $37-million center underway in Butte, Mont. There we will build a modest-size MHD generator, then an engineering test facility and much larger demonstration plant.

The world's first commercial MHD power plant—500 MW—may be built soon by the Soviets. They have been developing MHD assiduously since 1966.

Electric utilities, through the Electric Power Research Institute (EPRI) and its annual $500,000 MHD budget, are investigating serveral areas of MHD power.

For example, the EPRI's Palo Alto research facility is working with Stanford University to investigate slag behavior in MHD channels, the process of transporting current, and pollution problems.

At the University of Tennessee's Space Institute, Dr. John Dicks has been using his 100-kW coal-fired MHD generator to test combustion at various temperatures, aspects of slag formation, and other problems. Dr. Dicks and his group have found that chemical recovery of the potassium seed used is critical for economic MHD operation.

There are a number of other countries, corporations, and groups studying MHD. Japan, Germany, and Poland, as well as UNESCO, are involved in MHD programs. MIT and Reynolds Metals Co. are looking at an advanced system called the MHD disc generator, whose main feature is the use of only two electrodes. Argonne National Laboratory is constructing a large MHD channel for further testing with the Soviets. TRW has an extensive program in combustor research. Stanford University and Westinghouse Electric are engaged in various aspects of MHD.

MHD development seems at a crucial point today—a go or no-go stage. The ascendancy of coal, the need to decrease dependency on foreign oil, environmental cleanliness, health, natural resource conservation, consumer costs—these all argue persuasively for MHD. And there appears to be rekindled enthusiasm throughout the MHD community.

"I see more interest in MHD now than a few years ago," says Vance Cooper, EPRI's power-generation program manager. "But even so we figure we won't see the first commercial plant of about 500 megawatts in place until 1995 or 2000."

It may not even be that soon. Today MHD is in the same R&D bag with other advanced alternative-energy systems. Some day the enormous problems of developing MHD are too knotty to solve economically. The government thinks there's a good chance of solving the problems, but says go slow. Yet another school has MHD, with its enormous payoffs, virtually up and running. "We're ready to move on a commercial track," says Dr. Dicks. "I think MHD should move ahead twice as fast as the government projects." He adds that TVA has volunteered to host a 250-MW demonstration plant that could be built after an intermediate 100-MW MHD plant.

While still on a meager budget, MHD seems to have some powerful friends. At a recent talk at Princeton University, Energy Secretary James Schlesinger noted: "We're greatly in favor of MHD. Next year's budget will likely be over $100 million."

Mr. Speaker, there is a widespread misconception that MHD is a Montana project. This could not be further from the truth. In fact, many areas of the country have benefited from MHD research and, to date, Montana has received only a small portion of the program's total expenditures.

To document this, I would like to include in the RECORD the following figures, which were supplied by DOE:

MHD budget by State, Feb. 24, 1978

[Dollars in thousands]

	Estimated contracts in place total fiscal year 1978	Estimated contracts in place total fiscal year 1979
Alabama	$305	------
California	7,279	$1,075
District of Columbia	933	990
Illinois	4,610	4,674
Massachusetts	13,210	11,507
Mississippi	817	1,200
Montana	3,355	[1] 3,000
New Mexico	200	200
New York	53	
Ohio	1,500	1,353
Pennsylvania	9,200	6,532
Tennessee	3,917	------
Virginia	95	------
Washington	535	515
Totals by State	46,009	31,046
Additional in progress	26,141	39,454
Total budget	[2] 72,150	70,500

[1] Capital construction funds.

[2] Includes $650,000 carryover of fiscal year 1977 funds.

Mr. Speaker, I was gratified that the House authorized fiscal year 1979 funding for MHD at $92 million, $20 million more than recommended by the Carter administration. Unfortunately, the House appropriated only $72 million. The Senate is expected to appropriate at least $100 million, however, and I hope House-Senate conferees will be able to agree on a level of funding that is close to what the House authorized.

I would like to note that DOE has developed capability plans for fiscal year 1979 programs of both $92 million and $110 million.

DOE's MHD Division, under the capable direction of Dr. Richard Shanklin, is developing plans that could lead to commercialization in the late 1980's, instead of the 1990's as envisioned under the present baseline development program. The accelerated program would call for an engineering test facility (ETF) the next step after the component development and integration facility (CDIF), which is being built in Butte as the topping cycle on an existing or new steam powerplant. This would eliminate need for a demonstration plant after the ETF and involve financial participation by utilities at an earlier date.

While this accelerated program will cost more over the next few years than the baseline approach, it will result in substantial savings to the Federal Government in the long run.

Next year, Congress must reduce the Federal deficit. In the area of energy, this will be extremely difficult because of the many worthwhile technologies, all of which will demand increased funding if

they are to be developed to their full potentials. We face some hard choices, but we must make them. We would be making a grave mistake if we attempt to fund all these technologies at reduced levels.

Only a few weeks ago, the U.S. Environmental Protection Agency denied permits for two large coal-fired powerplants in Montana—Colstrip 3 and 4—because they would degrade air quality at a nearby Indian reservation. Some cite this as evidence that we should relax our clean air standards. I think it shows that we must work harder to develop a technology for burning coal that is environmentally acceptable.

MHD is such a technology. Research in recent years has brought us a long way toward making it workable. The Federal Government must increase its funding commitment to MHD, not cut it back at this critical time.

This will be the hardest choice next year: Deciding to push some technologies at the expense of others. I believe our energy situation is critical enough to require those choices. We must develop better ways to use coal; technologies that can be commercialized in the near future. MHD can produce electricity for the lowest cost, achieve at least 50 percent overall efficiency and meet all environmental standards. It is within our grasp if we will only commit adequate funds to complete research and development.●

CIVIL CONTEMPT PROCEEDINGS AGAINST HANCHO C. KIM

(Mr. FLYNT asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. FLYNT. Mr. Speaker, I take this time to advise Members that it is my intention to call up for consideration during the week of September 11, 1978, House Report 95–1214 and an accompanying resolution relating to civil contempt proceedings against Hancho C. Kim for refusal to answer a question in proceedings before the Committee on Standards of Official Conduct.

Counsel for the respondent has requested the committee to include a brief submitted on behalf of the respondent to be published in the RECORD. In the interested of fairness this appears to be a reasonable request.

The brief follows:

[Before the U.S. House of Representatives, H. Rept. 95–1214]

PROCEEDINGS AGAINST HANCHO C. KIM

BRIEF OF HANCHO C. KIM

On May 24, 1978, the Committee on Standards of Official Conduct filed a Report, H. Rept. 95–1214, recommending that Hancho C. Kim be cited for contempt of Congress and that the charge be referred to the Department of Justice for prosecution. The Report of the Committee on Standards of Official Conduct is now before the United States House of Representatives.

This Report, and the proceedings which led to its approval by the Committee on Standards of Official Conduct, represent an unfortunate and altogether misguided attempt by the Special Staff of the Committee to influence an ongoing judicial proceeding to the detriment of Hancho C. Kim. In its efforts, the Special Staff has (1) committed an avowed breach of the lawful Immunity Order of the United States District Court for the District of Columbia, (2) undercut Mr. Kim's rights under the Fifth Amendment to the United States Constitution, (3) ventured outside the zone of permissible Legislative Branch investigatory power, and (4) impinged upon the wholly separate judicial power of the District Court and executive power of the United States Attorney.

Hancho C. Kim has become the punching bag for "Koreagate." Tongsun Park has escaped all punishment and has left the country. Sang Keun Kim has full immunity and is under the protective custody of the United States Government. Kim Dong Jo is unavailable and apparently unreachable. Hancho C. Kim, an American citizen, is the only Korean face left.

Hancho C. Kim has already been convicted of two criminal offenses in the United States District Court for the District of Columbia. He has been sentenced to a term of incarceration as a result of these convictions. In addition, Hancho C. Kim faces trial on a two-count indictment in the United States District Court for Maryland. If convicted, he could be sentenced to serve additional time in jail.

Yet, the Department of Justice conceded at the outset of Mr. Kim's trial and in its closing argument to the jury that there is no evidence that Hancho C. Kim bribed or attempted to bribe any Members of Congress. Indeed, there is no evidence in the possession of the Department of Justice or the Committee on Standards of Official Conduct that Mr. Kim improperly influenced the acts of any government official.

This brief is submitted in the hopes that it may convince the United States House of Representatives not to add an unwarranted contempt of Congress charge to the burdens Mr. Kim has already shouldered.

Statement of facts

On September 27, 1977, a United States Grand Jury in the District of Columbia returned a two-count indictment against Hancho C. Kim. Count I charged that Mr. Kim conspired with others to defraud the United States and the Congress of the United States of their respective rights to function free from corrupt and improper influence in violation of Title 18, United States Code, Section 371. Count II charged Mr. Kim with violating Title 18, United States Code, Section 1623 by making a false declaration before the Grand Jury. Specifically, Mr. Kim was accused of testifying falsely when he denied having received money from Sang Keun Kim, an agent of the Korean Central Intelligence Agency. *See* H. Rept. 95–1214, Exhibit I to Appendix III, pp. 22–27.

On the same day, a United States Grand Jury in Baltimore, Maryland also returned an indictment. This indictment charged Mr. Kim and his wife, Soonduk E. Kim, with two counts of tax evasion in violation of Title 28, United States Code, Section 7201. The indictment was based upon the theory that Mr. and Mrs. Kim failed to report and pay taxes on $600,000 that Mr. Kim allegedly received from Sang Keun Kim. *See* H. Rept. 95–1214, Exhibit 2 to Appendix III, pp. 28–29.

On November 17, 1977, as Mr. Kim and his attorneys were preparing for trial on the District of Columbia charges, Mr. Kim was served with a subpoena from the House Committee on Standards of Official Conduct. The subpoena ordered Mr. Kim to appear before the Committee and testify.[1] *See* H. Rept. 95–1214, Appendix I, p. 9.

Prior to serving the subpoena on Mr. Kim the Committee sought an Order granting Hancho C. Kim immunity for his testimony before the Committee. On October 13, 1977, the United States District Court for the District of Columbia issued an Order conferring immunity upon Hancho C. Kim for his testimony before the Committee on Standards of Official Conduct. *See* H. Rept. 95–1214, Appendix VII, p. 44.

For present purposes, it is important to note that the District Court's Order required "that no testimony or other information compelled under this ORDER may be used against [Hancho C. Kim] in any criminal case, except a prosecution for perjury, giving a false statement, or failing to comply with this ORDER."

Hancho C. Kim appeared before the Committee on Standards of Official Conduct on no fewer than four occasions.[2] He answered all questions directed to him on those occasions. He testified fully about all dealings with Members of Congress. He responded to all inquiries about possible gifts to Congressmen, contacts with Congressmen, meetings with Congressmen, and discussions with Congressmen. His testimony covered the full range of the Committee's interest. Indeed, at the close of one of the latter sessions, attorneys for Mr. Kim were informed that the Committee's questioning was "ninety-nine percent" completed.

During the appearances before the Committee, Hancho C. Kim was not asked about his dealings with Sang Keun Kim or about the alleged receipt of $600,000 from Sang Keun Kim. Since the Special Staff knew that Mr. Kim was facing two trials involving these very issues, it is apparent that the avoidance of questioning in this area was both intentional and entirely proper.

On April 8, 1978, a jury in the United States District Court for the District of Columbia found Hancho C. Kim guilty of the charges of conspiracy and perjury. The jury found, *inter alia*, that Mr. Kim had lied when he denied receiving money from Sang Keun Kim. Sentencing was set for May 19, 1978.

After failing to hear from the House Committee for several months, and anticipating that his questioning by the Committee may have been completed, Mr. Kim was suddenly summoned to appear again before the Committee on May 15, 1978—four days before he was to be sentenced the District Court. When Mr. Kim appeared before the Committee, he was asked a single question. A member of the Committee's Special Staff[3] asked Mr. Kim, "Did there come a time when you received some money from Kim Sang Keun?" This was, of course, the *same* question which had led to Mr. Kim's perjury conviction.

Mr. Kim was placed in an impossible situation by the Special Staff. The Special Staff sought to force Mr. Kim either (1) to repeat the testimony which had already resulted in a perjury verdict or (2) to change his answer and confess his guilt to the perjury (for which he was soon to be sentenced) and the tax evasion charge (which was soon to come to trial). Since Mr. Kim has steadfastly maintained that he did not receive $600,000 from Sang Keun Kim, and the Special Staff knew that he would continue to deny receipt of the money from Sang Keun Kim,[4] the question served no useful, legislative purpose. However, the question placed Mr. Kim in an untenable position.

The Special Staff was frank to admit that it was asking the question for a purpose unconnected to the investigatory function of the Committee on Standards of Official Conduct. If Mr. Kim denied receipt of the funds from Sang Keun Kim (as he certainly would do), the Special Staff intended to appear before the sentencing judge in the United States District Court and inform the judge that Mr. Kim had repeated his allegedly perjurious testimony. In this way, the Special Staff hoped to influence the sentencing of Mr. Kim by the United States District Court. The Special Staff, apparently dissatisfied with Mr. Kim's cooperation, hoped to ensure that Mr. Kim received a stiff sentence.

Footnotes at end of article.

Mr. Kim did not answer the question directed to him by the Special Staff. He remained silent. His attorneys asserted Mr. Kim's Fifth Amendment privilege against compulsory self-incrimination and asked to appear before the full Committee.

On May 17, 1978, the Committee on Standards of Official Conduct met in executive session. Counsel for Hancho C. Kim appeared before the Committee and argued that Mr. Kim should not be required at this time to answer the question propounded to him by the Special Staff. Counsel told the Committee that the Special Staff was asking the question in an attempt to improperly influence the forthcoming sentencing of Mr. Kim. Nevertheless, the Committee adopted a Resolution directing the Chairman of the Committee to submit a contempt resolution to the House of Representatives.

The Resolution contained a curious clause. The Resolution gave Mr. Kim the opportunity to purge his alleged contempt by submitting to "a full and complete deposition prior to Friday, May 19, 1978"—the day of his sentencing. Once again, the Special Staff demonstrated that the questioning of Mr. Kim was directly tied to the forthcoming sentencing.

On May 18, 1978, Mr. Kim and his attorneys appeared before the Committee. The Special Staff asked Mr. Kim the same question. Mr. Kim again remained silent. Through his counsel, he asserted his Fifth Amendment privilege against compulsory self-incrimination and advanced the arguments discussed below.

On May 24, 1978, the Committee on Standards of Official Conduct filed a Report, H. Rept. 95–1214, recommending that Hancho C. Kim be cited for contempt of Congress and that the matter be referred to the Department of Justice for prosecution pursuant to Title 2, United States Code, Sections 192 and 194. That Report is before the House of Representatives at this time.

Argument

I. The actions of the special staff constituted an avowed breach of the district court's immunity and entitled Hancho C. Kim to reassert his fifth amendment privilege

On October 13, 1977, the United States District Court for the District of Columbia issued an "Order Conferring Immunity Upon and Compelling Testimony and Production of Information from Hancho C. Kim" (hereinafter "Immunity Order"). *See* H. Rept. 95–1214, Appendix VII, p. 44. This Order was issued at the request of the Committee on Standards of Official Conduct pursuant to Title 18, United States Code, Sections 6002 and 6005. The Immunity Order provided that Mr. Kim would not be excused from testifying before the House Committee by asserting his Fifth Amendment privilege against compulsory self-incrimination. However, the Immunity Order guaranteed Mr. Kim that any testimony or other information provided to the Committee could not "be used against [Mr. Kim] in any criminal case, except a prosecution for perjury,[5] giving a false statement, or failing to comply" with the Immunity Order.

Immunity provisions, like those found in Title 18, United States Code, Sections 6002 and 6005, displace the Fifth Amendment privilege. *See Hale* v. *Henkel*, 201 U.S. 43 (1906).[6] By requiring a witness to answer questions and provide information, immunity statutes "seek a rational accommodation between the imperatives of the privilege and the legitimate demands of government to compel citizens to testify." *Kastigar* v. *United States*, 406 U.S. 441, 446 (1972). As Mr. Justice Frankfurter once observed, such statutes have "become part of our constitutional fabric." *Ullman* v. *United States*, 350 U.S. 422, 438 (1956).

However, to satisfy constitutional requirements, the immunity granted to a witness must provide the witness with the *same* protection which the Fifth Amendment would provide. "[P]rotection coextensive with the privilege is the degree of protection which the Constitution requires. . . ." *Kastigar* v. *United States*, 406 U.S. 547 (1892); *see Brown* v. *United States*, 359 U.S. 41 (1959).

The United States Supreme Court has held that a witness is provided with sufficient protection, and may be compelled to testify over a claim of Fifth Amendment privilege, only if the immunity granted to the witness "prohibits the prosecutorial authorities from using the compelled testimony in *any* respect. . . ." *Id.* at 453. That is why the Immunity Order issued by the United States District Court in this case prohibited the Committee on Standards of Official Conduct from using Mr. Kim's testimony against him. Without that guarantee, Mr. Kim could not be required to testify before the Committee.

Despite the lawful Order of the United States District Court preventing the House Committee from using Mr. Kim's testimony against him in any way, the Special Staff apparently decided that they *could* use Mr. Kim's testimony against him. Specifically, they decided that his answer to the single question posed to him by the Special Staff could be conveyed to the District Court at the time of sentencing in the still unadjudicated criminal case.[7] They decided that the answer could be used to influence the District Court to impose a sterner sentence on Mr. Kim.

During a recess of an executive session of the Committee on Standards of Official Conduct on May 17, 1978, counsel for Hancho C. Kim was bluntly told by the Special Staff that Mr. Kim's answer to the Special Staff's question would be communicated to the District Court prior to the time of sentencing. This fact was communicated to the Committee during the executive session on May 17, 1978. Counsel for Mr. Kim argued:

"I think some people are trying to influence the judicial process in this way. It is not any of you, but I think it is your staff; it may be some members, but I think unfortunately there is a misguided attempt here to influence the ongoing judicial process.

"Let me tell you what I mean. The judge has not asked Hancho Kim, 'Did you receive the money from S. K. Kim?' The probation officer has not asked Hancho Kim, 'Did you receive the money from S. K. Kim?' But this committee has asked it and I believe, if you will question your staff, it is with the full expectation that they will then go to the judge and say, 'The man is now admitting his crime, so go hard on him' or 'The man is being uncooperative, so go hard on him.' . . .

"But I feel this is an improper way, that this is a very improper way for the congressional branch, the legislative branch, to impose itself on the ongoing judicial process." H. Rept. 95–1214, p. 57, Transcript of May 17, 1978 Session.

The Special Staff admitted that the scheduling of Mr. Kim's testimony was deliberate. The Special Staff said, "[W]e desired to bring this matter on before sentencing so the judge could be informed." *Id.* at 59. In addition, the Special Staff admitted that the Special Staff intended to communicate with the District Court. A member of he Special staff stated to the Committee:

"There has been an indication here that we are attempting to affect the judiciary in some way. We very frankly are." *Id.* at 57.[9]

At another session of the Committee on May 18, 1978, counsel for Hancho C. Kim told the Committee that the Special Staff contemplated communicating Mr. Kim's answers to the District Court in violation of the Immunity Order.

"I am told by my associates that the question was put to Mr. Kim, precisely the question which was the subject matter of the perjury in the indictment on which he now stands convicted. We are here now presumably because that question will be put to him again.

"I am further told, Mrs. Fenwick, that my associates were told that what Mr. Kim did here would be reported to the judge." *Id.* at 69.

A member of the Special Staff again confirmed that any contempt of Congress charge would be communicated to the District Court. The Special Staff also indicated that Mr. Kim's *answer* to the question could be communicated to the District Court.

"[I]f the witness were to answer a question in a manner which has already been determined by a jury to be perjurious beyond a reasonable doubt, I must say to you quite frankly that I don't know whether or not that could properly be communicated to a judge, *although my reaction is that it could.*" *Id.* at 71 (emphasis supplied).

So there could be no mistake, counsel for Mr. Kim restated on the record his understanding that the Special Staff intended to breach the Immunity Order.

"[I]f he answers the same way that he answered heretofore, it will be the contention of the counsel here that he has committed perjury. They have already said to you that they would take that to the judge." *Id.*

The Special Staff did not deny that this was intended.

Given the fact that the Special Staff had announced that it would use Mr. Kim's answer against him, in violation of the District Court's Immunity Order, Mr. Kim properly reasserted his Fifth Amendment privilege against compulsory self-incrimination. Because the Special Staff had informed Mr. Kim and his attorneys that Mr. Kim's testimony would be used against him, Mr. Kim no longer was protected by immunity which was "coextensive with the [constitutional] privilege," *Kastigar* v. *United States*, 406 U.S. 441, 459 (1972), and satisfied constitutional requirements. The Special Staff had unilaterally abrogated the Immunity Order. Under these circumstances, Mr. Kim properly reinvoked his Fifth Amendment privilege until he could be assured that the privilege was adequately protected by coextensive immunity.

II. Hancho C. Kim was entitled to rely upon his 5th amendment privilege because the district court's immunity order did not provide adequate protection

Despite its unilateral breach of the Immunity Order, the Special Staff argued that a reassertion of the Fifth Amendment privilege was nevertheless improper. The Special Staff argued that, rather than remain silent in the face of the Staff's question, Mr. Kim should answer the question. Then, if the Special Staff sought to use that answer against Mr. Kim before the District Court at the time of sentencing, counsel for Mr. Kim could object and seek to suppress this improper use of Mr. Kim's immunized testimony.

A member of the Special Staff argued as follows:

"If the witness gave that answer under oath then you could certainly argue to us that pursuant to the grant of immunity it should not be considered by the judge, you could argue to the Department of Justice or to the judge. That would come at a future time." H. Rept. 95–1214, p. 71, Transcript of May 18, 1978 Session.

Unfortunately, this remedy is insufficient. Prevention of improper use of an immunized answer through suppression of that answer does not adequately protect Mr. Kim's Fifth Amendment privilege in this case.

Hancho C. Kim testified before a Grand Jury in the District of Columbia that he did not receive money from Sang Keun Kim. Perjury charges were brought against Mr. Kim as a result of that answer. Eventually,

Footnotes at end of article.

Mr. Kim was convicted of perjury, pursuant to Title 18, United States Code, Section 1623, for that answer.

Mr. Kim has steadfastly maintained that he did not receive money from Sang Keun Kim. Despite the perjury conviction, Hancho C. Kim believes his answer to be truthful. Hancho C. Kim continues to assert that he did not receive money from Sang Keun Kim.

A Grand Jury has found that answer to be untruthful and issued a perjury indictment. The Department of Justice viewed the answer as untruthful and so argued when prosecuting Mr. Kim. Similarly, a petit jury has found that answer to be untruthful by finding Mr. Kim guilty of perjury. Additionally, the Special Staff of the House Committee on Standards of Official Conduct has clearly indicated that it believes the answer to be untruthful.[10]

While the Immunity Order of the United States District Court protects Hancho C. Kim from having his testimony used against him, the Immunity Order *does not* protect Mr. Kim from a prosecution for perjury for his answers before the House Committee. The Order explicitly excepts "a prosecution for perjury [of] giving a false statement" from its protections. This is not unusual. Grants of immunity do not normally protect a witness from a subsequent perjury prosecution. *Glickstein* v. *United States*, 222 U.S. 139 (1911); *United States* v. *Moss*, 522 F.2d 155 (2nd Cir. 1977); *United States* v. *Patrick*, 542 F.2d 381 (7th Cir. 1976); *In re Grand Jury Proceedings*, 509 F.2d 1349 (5th Cir. 1975).

Thus, even if counsel for Mr. Kim were successful in preventing the Special Staff from using Mr. Kim's testimony against him before the District Court at the time of sentencing, Mr. Kim's constitutional rights would not have been adequately protected. Mr. Kim would have been compelled to give self-incriminatory testimony without having been insured "that the testimony cannot lead to the infliction of criminal penalties on the witness." *Kastigar* v. *United States*, 406 U.S. 441, 453 (1972). He would have been compelled to repeat an answer which he believes to be truthful but others believe to be perjurious.

Since Mr. Kim had already answered the question posed by the Special Staff and had been prosecuted and found guilty of perjury for that answer, Mr. Kim would certainly have been susceptible to another perjury prosecution for the same answer. Mr. Kim was placed in an intolerable "Catch-22" situation. By giving an answer he believes to be truthful, albeit an answer that a Grand Jury, the Department of Justice, a petit jury, and the Special Staff believe to be untruthful, he would be subject to additional criminal penalties for his answer. Because the Immunity Order of the District Court did not protect Mr. Kim from a prosecution for perjury, he would be compelled to give self-incriminatory testimony in violation of his Fifth Amendment rights.

Of course, Mr. Kim could have changed his answer and testified that he *had* received money from Sang Keun Kim. However, Mr. Kim does not believe that answer to be truthful and was unwilling to lie under oath to satisfy the Special Staff. As the Supreme Court has noted, "Our legal system provides methods for challenging the Government's right to ask questions—lying is not one of them." *Bryson* v. *United States*, 396 U.S. 64, 72 (1969).

This is truly a unique situation. While a perjury prosecution arising out of the testimony before the Committee might be prevented by the doctrines of double jeopardy, *res judicata*, or collateral estoppel if Mr. Kim had been *acquitted* of the first perjury charge, such is not the case here. *See In re Boyle*, 527 F.2d 120 (7th Cir. 1975). Similarly, the Immunity Order would prevent the Government from using Mr. Kim's answer before the Committee to prosecute Mr. Kim for perjury for a *prior*, inconsistent statement. *See Kronick* v. *United States*, 343 F.2d 436 (9th Cir. 1965).

In this instance, however, Mr. Kim is being asked a question, and will be required to give an answer, which has already been the basis for a perjury indictment and a perjury conviction. He will be subjected to a possible criminal penalty for telling what he believes to be the truth.[11] The District Court's Immunity Order does not afford him adequate protection under these unique circumstances. Mr. Kim is entitled to rely upon his constitutional privilege against compulsory self-incrimination.

III. The question posed to Hancho C. Kim by the special staff exceeded the committee's legitimate investigatory power and violated separation of powers.

Congress has broad investigatory powers. Indeed, "[t]he power of the Congress to conduct investigations is inherent in the legislative process." *Watkins* v. *United States*, 354 U.S. 178, 187 (1957). However, the power is not without limits. The outermost boundaries of the investigatory power are marked by the outermost boundaries of congressional power under the Constitution. As the United States Supreme Court has noted,

"[T]he power actually possessed is limited to inquiries relating to matters of which the particular house 'has jurisdiction' and in respect of which it rightfully may take other action . . ." *McGrain* v. *Daugherty*, 273 135, 170 (1927).

Moreover, the investigatory powers invested in a particular Committee of the Congress is defined in the legislation or resolution establishing the Committee and assigning investigatory duties to it. A congressional committee possesses only those powers delegated to it by its parent body. The enabling resolution which gives the committee its life also contains the grant of, and limitations on, the committee's power. *United States* v. *Rumely*, 345 U.S. 41, 44 (1953).

There is no question that the Legislative Branch has broad investigatory power. Because almost anything within the mind of man can be the subject of legislation, almost anything can be the subject of a congressional investigation. However, the power to investigate does have limits. When a congressional investigation seeks to interfere with the duties properly assigned to a coordinate branch of government, or seeks to perform a function properly assigned to a coordinate branch of government, the investigation has gone beyond the limits of congressional power.

The Judicial Branch adjudicates criminal cases. The Judicial Branch assigns an appropriate sentence when a defendant is found guilty. The Executive Branch investigates and prosecutes criminal cases. The Executive Branch may recommend an appropriate sentence after a defendant is found guilty.

Here, the Legislative Branch, under the guise of a congressional investigation, is seeking to perform and influence the tasks of the other branches of government. Here, we have a congressional investigation boldly and unashamedly seeking to influence a judicial proceeding.

House Resolution 252, unanimously adopted by the House of Representatives on February 9, 1977, directs the Committee on Standards of Official Conduct to conduct a "full and complete inquiry and investigation to determine whether Members of the House of Representatives, their immediate families, or their associates accepted anything of value, directly or indirectly, from the Government of the Republic of Korea or representatives thereof." *See* H. Rept. 95-1214, Appendix II, p. 11. This investigation is clearly within the constitutional province of the House of Representatives. By conducting this investigation, the House may be deciding "to legislate or . . . not to legislate," *Barenblatt* v. *United States*, 360 U.S. 109, 111 (1959), or deciding whether to discipline a Member, *In re Chapman*, 166 U.S. 661 (1897).

However, when the Special Staff called Hancho C. Kim before the Committee four days before his sentencing to ask Mr. Kim whether he had received money from Sang Keun Kim, with the avowed purpose of using his answer, or his refusal to answer, to influence his sentencing in the United States District District Court, the Committee moved beyond the legitimate range of "the legislative function." *Kilbourn* v. *Thompson*, 103 U.S. 168, 189, (1881).[12] The Committee roamed outside the boundaries of permissible Legislative Branch investigatory power and beyond the authority granted to the Committee by House Resolution 252.[13] By seeking to influence a pending criminal case, the Special Staff violated separation of powers.

The United States Supreme Court has clearly noted that, if an inquiry "relates to 'a matter wherein relief or redress could be had only by judicial proceeding' it is not within the range of [congressional investigatory] power, but must be left to the courts, conformably to the constitutional seperation of government powers. . . ." *McGrain* v. *Daugherty*, 273 U.S. 135, 170 (1927). By seeking to intrude upon the legitimate sentencing prerogatives of a United States District Court, the Special Staff violated separation of powers principles. While the Committee may investigate with an eye toward legislation or the discipline of Members of the House, it may not investigate to influence a judicial proceeding.

"[T]he power to investigate must not be confused with any of the powers of law enforcement; those powers are assigned under our Constitution to the Executive and the Judiciary." *Quinn* v. *United States*, 349 U.S. 155, 161 (1955).

Moreover, there is a real question whether the information sought from Hancho C. Kim was necessary to the Committee.[14] The Committee had questioned Hancho C. Kim on four occasions. On all four occasions, the Committee has refrained from asking him about dealings with Sang Keun Kim. The Committee had full information on Mr. Kim's dealings with Sang Keun Kim from its questioning of Sang Keun Kim and had access to the full transcript of the conspiracy-perjury trial. More than five months had elapsed since the Committee last questioned Mr. Kim. Then, on the eve of his sentencing in the United States District Court, the Special Staff called Mr. Kim and asked him but one question—the very same question for which he had been found guilty of perjury.

If Mr. Kim adhered to his prior testimony, as the Special Staff knew he would,[15] the Committee would gain no new information. The Special Staff already had access to Mr. Kim's Grand Jury testimony. If Mr. Kim admitted receiving $600,000 from Sang Keun Kim, this would merely corroborate the information the Committee already had from Sang Keun Kim and already believed. Moreover, since Mr. Kim had testified fully that he had not sought to influence Members of Congress, and the Special Staff had no contradictory evidence, this testimony about money from Sang Keun Kim would not have aided the Committee. "Whichever course the witness should take, what aid to the legislative purpose could be hoped for by the Committee?" *United States* v. *Cross*, 170 F. Supp. 303, 309 (D.D.C. 1959).

These circumstances, standing alone, demonstrate that the Committee did not truly need the information sought from Mr. Kim and must have had an improper purpose in mind. However, the Special Staff went further. The Special Staff boldly *announced* that the information was sought for the

purpose of influencing Mr. Kim's sentence. The Special Staff admitted that it "desired to bring this matter on before sentencing so the judge could be informed." H. Rept. 95–1214, p. 59, Transcript of May 17, 1978 Session. The Special Staff said, "There has been an indication here that we are attempting to affect the judiciary in some way. We very frankly are." *Id.* at 58.

Under these circumstances, the Committee moved beyond its proper jurisdiction and violated separation of powers. Under these circumstances, Mr. Kim properly remained silent in the face of the Special Staff's question. A concept citation is therefore not appropriate. *See Bursey* v. *United States*, 466 F.2d 1059, 1080 (9th Cir. 1972); *Brown* v. *United States*, 245 F.2d 549 (8th Cir. 1957); *United States v. Cross*, 170 F. Supp. 303 (D.D.C. 1959); *United States* v. *Icardi*, 140 F. Supp. 383 (D.D.C. 1956).[16]

Conclusion

Hancho C. Kim was placed in an impossible situation by the Committee on Standards of Official Conduct. Mr. Kim's dilemna was described by his counsel in this way:

". . . [T]his proceeding is an intrusion into the function of the judiciary. I have concluded that it is a breach of Mr. Kim's immunity grant, a breach of the contract between Mr. Kim and the government of the United States. And I have further concluded this; that Mr. Kim stands in an absolutely incredible position before you here.

"He has three options. He can answer the question in accordance with his understanding of a truthful answer, which answer has already been adjudicated perjurious, so that he would be susceptible to another perjury conviction if he answers truthfully.

"He can refuse to answer, in which instance he has been threatened with an adjudication of contempt under section 192 of Title 2, and also potential contempt of the House via a proceeding conducted in the very Chambers of the House.

"Thirdly, his third option, and apparently this is the only other option, is to give an answer which he believes to be false, to commit perjury here, under oath—he has just been sworn to tell the truth—and if I may coin a phrase, that is a 'trilemma' on which no American was ever intended to be hoisted." H. Rept. 95–1214, p. 70, Transcript of May 18, 1978 Session.

Therefore, Hancho C. Kim, by undersigned counsel, respectfully requests that the House of Representatives disapprove the Resolution, proposed by the Committee on Standards of Official Conduct, citing Mr. Kim for contempt and referring the matter to the Department of Justice.

Respectfully submitted,

DAVID POVICH,

ROBERT B. BARNETT,

Williams & Connolly, 1000 Hill Building, Washington, D.C. Counsel for Hancho C. Kim.

FOOTNOTES

[1] The Committee was acting pursuant to H. Res. 252 which directed the Committee to conduct a "full and complete inquiry and investigation to determine whether Members of the House of Representatives, their immediate families, or their associates accepted anything of value, directly or indirectly, from the Government of the Republic of Korea or representatives thereof." *See* H. Rept. 95–1214, Appendix II, pp. 10–12.

[2] Prior to the first appearance, Mr. Kim, through his attorneys, raised various objections to the testimony. Mr. Kim also filed Briefs entitled "Memorandum Setting Forth the Constitutional and Practical Reasons Why Hancho C. Kim Should Not be Compelled to Testify" and "Memorandum in Response of Special Counsel with Respect to Claims of Hancho Kim." *See* H. Rept. 95–1214, pp. 13–21 and pp. 39–42. These objections are reasserted here, and the Brief is incorporated herein by reference.

[3] The Committee hired a Special Staff to conduct this inquiry. *See* Committee Resolution Defining Scope and Procedures for Korean Investigation, Feb. 8, 1977.

[4] *See* H. Rept. 95–1214, pp. 45–53, Transcript of May 15, 1978 Session.

[5] The "perjury" excepted from the immunity grant was, of course, not the perjury of which the jury had found Mr. Kim guilty, but only such perjury as he might commit in the testimony for which he was being immunized. *See Glickstein* v. *United States*, 222 U.S. 139 (1911).

[6] A witness before a congressional committee may rely upon the Fifth Amendment privilege. *Watkins* v. *United States*, 354 U.S. 178 (1957); *Quinn* v. *United States*, 349 U.S. 155 (1955).

[7] A criminal trial is concluded by the imposition of sentence, not by the verdict.

[8] *See* H. Rept. 95–1214, p. 69, Transcript of May 18, 1978 Session.

[9] By this time, however, the Committee was considering a contempt of Congress citation. Therefore, the Special Staff shifted gears and told the Committee it would communicate the *contempt charge* to the District Court.

"We think the judge should know on Friday if this man has been contemptuous to the Congress and has refused to answer a very simple question. . . ." H. Rept. 95–1214, p. 58, Transcript of May 17, 1978 Session.

[10] *See* H. Rept. 95–1214, p. 54, Transcript of May 17, 1978 Session: *Id.* pp. 72–73, Transcript of May 18, 1978 Session.

[11] The conduct of the Special Staff in this instance might constitute "governmental tactics or procedures so inherently unfair under all the circumstances as to constitute a prosecution for perjury a violation of the Due Process Clause of the Fifth Amendment." *United States* v. *Mandujano*, 425 U.S. 609 (Stewart, J. concurring).

[12] The Special Staff clearly acknowledged that it was seeking to influence the judicial process.

"There has been an indication here that we are attempting to affect the judiciary in some way. We very frankly are." H. Rept. 95–1214, p. 58, Transcript of May 17, 1978 Session.

Although the Special Staff sometimes indicated that Mr. Kim's *answers* would be reported to the District Court and sometimes indicated that only his *refusal* to answer would be reported to the District Court, the Special Staff was clearly seeking to influence the sentencing of Hancho C. Kim. *See also Id.* at 57, 58, 70, 71.

[13] Not only did the Committee intrude upon separation of powers by its actions, it also exceeded the specific jurisdiction assigned to it by the House of Representatives. Nowhere in House Resolution 252, which authorized the Committee's investigation, is there authority for the Committee to act to influence a judicial proceeding. *See Gojack* v. *United States*, 384 U.S. 702 (1966); *Watkins* v. *United States*, 354 U.S. 178 (1957); *United States* v. *Rumley*, 345 U.S. 41 (1953). Indeed, such a grant of authority would be of questionable constitutional validity.

[14] Assuming *arguendo* that the information sought from Hancho C. Kim, *i.e.*, whether Mr. Kim received $600,000 from Sang Keun Kim, could have served the Committee's legitimate and proper investigatory purposes, the Special Staff lost its right to seek this information by its improper purpose.

"It has been recognized that a legislative committee, although duly authorized to investigate adequately defined subjects in a field where it may legislate, has no power to compel the testimony of a witness for other than a bona fide legislative purpose, even though the testimony be relevant to the subject matter of the authorized investigation. *Watkins* v. *United States*, 354 U.S. 178 . . ." *United States* v. *Cross*, 170 F. Supp. 303 (D. D.C. 1959).

[15] *See* H. Rept. 95–1214, pp. 46–47, Transcript of May 15, 1978 Session.

[16] Mr. Kim should not be required to raise these arguments before the District Court at the time of sentencing or as a defense to a perjury charge. *See* Section II of this Memorandum. They are properly raised at this time before this tribunal.

HOUSE OF REPRESENTATIVES,
Washington, D.C., July 18, 1978.

Re Proceedings Against Hancho C. Kim, House Report 95–1214.

Hon. JOHN J. FLYNT, Jr.,
Chairman, Committee on Standards of Official Conduct, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: I am writing you this letter to respond briefly to the arguments made by lawyers for Hancho C. Kim ("Kim") as to why the House should refuse to follow your Committee's Recommendation to refer to the U.S. Attorney for criminal prosecution the contempt committed by Kim. These arguments were made to and rejected by the Committee and were fully set forth in House Report 95–1214. Nonetheless, they are now reiterated in a voluminous "Brief" that Kim's attorneys request that you insert in the Congressional Record.

As you know, a jury has found beyond a reasonable doubt that Hancho Kim received $600,000 in 1974 and 1975 from Kim Sang Keun, an operative of the Korean Central Intelligence Agency, as part of a scheme in which the KCIA sought to influence Members of Congress by paying them off. Kim told Kim Sang Keun the names of five members of the current Congress whom he said he paid off. The Committee must have and is entitled to have Kim's truthful testimony as to whether he in fact used the $600,000 he received to bribe these Members of Congress, as he claimed, or whether he kept it and defrauded the Korean government. Without Kim's testimony the true facts concerning the Korean government's scheme to influence the Congress can never be learned and, just as importantly, the cloud over the Members of the House whom Kim has claimed he bribed can never be removed.

As you know, to this end the Committee obtained an immunity order from the United States District Court and conferred immunity upon Kim. Notwithstanding the grant of immunity Kim still has refused to answer the Committee's questions.[1]

Kim argues that the staff violated the order which granted him immunity from the use of his testimony against him in a criminal proceeding because the staff told Kim's lawyers that if Kim committed either contempt or perjury before the Committee they might inform the judge who presided over a trial of Kim on conspiracy and perjury charges in the United States District Court and who was to sentence Kim.[2] Though there appears to be little question that Kim's contempt or perjury, had he committed it, could properly have been considered by the court at the time of Kim's sentence,[3] the simple answer to Kim's claim is that it is not a matter the Committee or the House need consider. Whether the court in the course of a criminal proceeding could properly consider Kim's refusal to testify or his false testimony if he did testify was, and is, a matter for the court to decide. The Committee was, in any event, entitled to Kim's testimony.

What the Committee did, quite simply, was to create a situation which would maximize the likelihood that Kim would tell the truth. This was the reason for trying to complete Kim's testimony before the date he was sentenced on the criminal charge. If Kim's apprehension that the court might

have taken his refusal to testify or his perjurious testimony into account increased the likelihood that Kim would testify and tell the truth, so much the better. The dilemma that Kim's lawyers have repeatedly said he faces simply does not exist and has never existed: if Kim tells the truth, his truthful testimony can never be used against him. Kim faces a dilemma only if he desires to continue to conceal the KCIA's scheme to influence Congress. To do that, he must either lie to the Committee or refuse to answer its questions. Kim's argument with the Committee and its staff arises only because the Committee has quite properly refused to accept either of the alternatives offered it by Kim.[4] As one court has put it:[5]

"The immunity granted by the Constitution does not confer upon the witness the right to perjure himself or to withhold testimony. The very purpose of the granting of immunity is to reach the truth, and when the testimony is incriminatory, it cannot be used against him. If the witness thwarts the inquiry by evasion or falsehood . . . such conduct is not entitled to immunity. In fact, another crime not existing when the immunity was offered is thereby committed."

Mr. Chairman. I thank you for this opportunity to briefly express my views on this important matter, and I would request that if Kim's papers are reprinted in any fashion, this letter be reprinted along with them.

Sincerely,

LEON JAWORSKI.

FOOTNOTES

[1] Kim's attorneys correctly point out that Kim did answer *some* questions: for example, denying that he gave any money to Members of Congress. Unfortunately these denials are not particularly helpful or credible, as Congressman Flowers pointed out when this issue was raised before the Committee (H. Rep. 95–1214 at page 62), because Kim so far also denies having received the money in the first place.

[2] Kim's attorneys try to insinuate that the staff was acting improperly because during the first four sessions Kim was not asked any questions concerning whether he received money from Kim Sang Keun. As Kim's attorneys are aware, these questions were not asked at their request in an attempt to reach an accommodation with Kim. They are also aware that the staff reserved the right to ask these questions *at any time*.

[3] Kim's contempt would have been relevant to Kim's sentencing for two reasons. First, it is evidence of a separate crime which the judge could take into account. *Williams* v. *Oklahoma*, 358 U.S. 576 (1959); *Williams* v. *New York*, 337 U.S. 241 (1949); *United States* v. *Needles*, 472 F. 2d 652, 655 (2d Cir. 1973); *United States* v. *Cifarelli*, 401 F. 2d 512, 514 (2d Cir.) (*per curiam*), *cert. denied*, 393 U.S. 987 (1968); *United States* v. *Doyle*, 348 F. 2d 715, 721 (2d Cir.), *cert. denied*, 362 U.S. 843 (1965). More importantly, it was evidence of Kim's refusal to cooperate with our investigation. Cooperation or non-cooperation in an investigation such as ours has frequently been considered as a relevant factor in sentencing. Thus, in a leading case, *United States* v. *Sweig*, 454 F. 2d 181 (2d Cir. 1972), the sentencing judge told Martin Sweig, former administrative assistant to Speaker McCormack, that he would reduce his sentence if Sweig cooperated with the government investigators. Sweig refused and challenged the propriety of the sentence. The Court of Appeals found Sweig's argument "without merit" and affirmed the sentence. To the same effect are: *United States* v. *Stein*, 554 F. 2d 96, 102 (2d Cir. 1976); *United States* v. *Vermeulen*, 436 F. 2d 72 (2d Cir. 1970); *United States* v. *Malcolm* 432 F. 2d 808, 815 (2d Cir. 1970); Am Bar Ass. Project on Standards for Criminal Justice, *Standards Relating to Pleas of Guilt* § 1.8(a)(v) Approved Draft 1968). The Committee has in other cases, for example, that of former Congressman Richard Hanna, informed the Court where defendants about to be sentenced have cooperated with the Committee's inquiry.

Similarly, it appears that if Kim gave *false* testimony his *false* testimony could be used against him at sentencing. Thus, in *United States* v. *Tramunti*, 500 F. 2d 1334, 1342 (2d Cir.), *cert. denied*, 419 U. S. 1047 (1974) the Court of Appeals for the Second Circuit held that *false* testimony given pursuant to a grant of immunity could be used against a defendant even at trial, stating:

"The theory of immunity statutes is that in return for his surrender of his fifth amendment right to remain silent lest he incriminate himself, the witness is promised that he will not be prosecuted based on the inculpatory evidence he gives in exchange. However, the bargain struck is conditional upon the witness who is under oath telling the truth. If he gives false testimony, it is not compelled at all. In that case, the testimony given not only violates his oath, but is not the incriminatory truth which the Constitution was intended to protect. Thus, the agreement is breached and the testimony falls outside the constitutional privilege. Moreover, by perjuring himself the witness commits a new crime beyond the scope of the immunity which was intended to protect him against his past indiscretions. This is not only a rational explanation of the accommodation between the competing interests and rights of the parties, but it is supported by authority." (Citations omitted.)

Though Kim plainly wishes it weren't so, the immunity order only protects him from the use of *truthful* testimony against him.

It should be pointed out in passing that the facts constituting Kim's contempt were, in fact, *not* communicated to the judge who sentenced Kim.

[4] Kim's argument that the Committee has, in attempting to get the truth from Kim about whether he bribed members of the current Congress, exceeded its legislative function and impinged upon the power of the courts and the executive is so frivolous so as not to require a response.

[5] *United States* v. *Tramunti*, 500 F. 2d 1334, 1343–44 (2d Cir.), *cert. denied*, 419 U.S. 1047 (1974) (footnote omitted.)

CONFERENCE REPORT ON H.R. 12935

Mr. SHIPLEY submitted the following conference report and statement on the bill (H.R. 12935) making appropriations for the legislative branch for the fiscal year ending September 30, 1979, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 95–1457)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12935) making appropriations for the legislative branch for the fiscal year ending September 30, 1979, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 54.

That the House recede from its disagreement to the amendments of the Senate numbered 40, 41, 42, 43, 44, 48, 51, 53, and 55, and agree to the same.

Amendment numbered 49: That the House recede from its disagreement to the amendment of the Senate numbered 49, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$126,500"; and the Senate agree to the same.

Amendment numbered 50: That the House recede from its disagreement to the amendment of the Senate numbered 50, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$47,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 45, 46, 47, and 52.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12935) making appropriations for the Legislative Branch for the fiscal year ending September 30, 1979 and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

TITLE I—CONGRESSIONAL OPERATIONS

SENATE

Amendments Nos. 1 through 39: Reported in technical disagreement. Inasmuch as these amendments relate solely to the Senate and in accord with long practice, under which each body determines its own housekeeping requirements and the other concurs therein without intervention, the managers on the part of the House will offer motions to recede and concur in the Senate amendments Nos. 1 through 39.

HOUSE OF REPRESENTATIVES

ADMINISTRATIVE PROVISIONS

Amendments Nos. 40 through 42: Change section numbers and clarify page number references as proposed by the Senate.

CONGESSIONAL BUDGET OFFICE

Amendment No. 43: Appropriates $11,368,000 for salaries and expenses as proposed by the Senate instead of $11,172,000 as proposed by the House.

Amendment No. 44: Increases the limitation of employees to 218 as proposed by the Senate instead of 208 as proposed by the House.

ARCHITECT OF THE CAPITOL

Office of the Architect of the Capitol

Salaries

The conferees are agreed that, within the funds provided, the Architect may add one additional central-office staff assistant over the House recommendation instead of the two additional staff assistants recommended in the Senate report.

Senate Office Buildings

Amendment No. 45: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and

concur in the amendment of the Senate appropriating $10,328,600 for Senate Office Buildings for fiscal year 1979, of which $210,000 shall remain available until expended.

Senate Garage

Amendment No. 46: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating $164,000 for the Senate Garage.

LIBRARY OF CONGRESS

Congressional Research Service

The conferees are agreed that, within the funds provided, nine additional positions over the House allowance may be added to improve and strengthen the Congressional Research Service, as recommended in the Senate report.

GOVERNMENT PRINTING OFFICE

Congressional Printing and Binding

Amendment No. 47: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate that provides that the distribution of bi-weekly and annual hardcover bound sets of the Congressional Record shall be limited to Members who make a request in writing.

TITLE II—RELATED AGENCIES

LIBRARY OF CONGRESS

Salaries and Expenses

The conferees are agreed that, within the funds provided, the following additions over the recommendations contained in the House report are allowed:

1. Thirteen positions for automated systems support;

2. Four positions and $143,000 for the exhibit program;

3. One additional position and $49,000 for the American Television and Radio Archives;

4. One additional position and $49,000 for the American Folklife Center.

In order to finance the above additions, the Library is directed not to divert funds from approved programs but may use unobligated balances from activities that require less funding than originally expected.
